

Stenopus scutellatus Rankin, 1898
Yellowbanded Coral Shrimp

Order Decapoda
Suborder Pleocyemata
Family Stenopodidae

References used: Chace (1972), Williams (1984)

Diagnostic characters: Rostrum armed ventrally with 6 to 8 spines; third abdominal segment with lobate boss; carapace covered with slender spinules, body lemon yellow.

Habitat: Shallow water to 113 m.

Range: Bermuda; South Carolina through the Gulf of Mexico to Brazil.

Remarks: Can be distinguished from *S. hispidus* by presence of ventral spines on rostrum.
