A Summary of Marine Fishing Laws & Regulations for the Gulf States

December 2016

This publication is an unofficial compilation of marine fishing laws and regulations developed for the use and convenience of enforcement personnel. For definitive regulations, contact your local agency.
The following is an unofficial compilation of marine laws and regulations for the Gulf states. Enforcement personnel of the Gulf states compiled it specifically for their use and convenience. The information is current as of December 7, 2016; however, changes may occur in each state at any time. For definitive enforcement regulations in your area, contact state or federal agencies directly.

ALABAMA

The following is an unofficial compilation of marine laws and regulations for Alabama. The information is current as of September, 2016, but changes may occur at any time. For definitive enforcement regulations, please contact the Alabama Marine Resources Division (AMRD), P.O. Box 189, Dauphin Island, Alabama 36528 (251) 861-2882, or visit our web page at www.outdooralabama.com.

Residency Requirements

Annual Resident Freshwater or Saltwater Fishing License
Any person who has been a bona fide resident of this state for a period of not less than 90 days prior to making application and who is between the ages of 16 and 65.

Use of Commercial Fishing Gear
A resident of the state of Alabama, as applicable to this article, shall be a person who has resided continuously in this state for 12 months prior to making application for a license. Wholesale and retail licenses shall be issued in the same manner and under the same provisions as provided under other licenses.

Proof of Residency
A current valid Alabama’s driver’s license or two of the following:

- Certificate of employment if containing proof of permanent residency.
- Copy of home property tax.
- Copy of previous year’s tax return (mailing address only).
- Health insurance forms with address.
- The last three months of a utility bill with mailing address.
- Student identification plus copy of residence agreement or any other proof of residence listed.
- Military personnel with an out-of-state driver’s license must have a copy of order of assignment to Alabama for a minimum of 30 days, or have Alabama as home of record.
- Health insurance card with address.
- Telephone calling card with address.
- Copy of school registration for non-driving students.
- Voter registration.
- Other legal documents that may establish residency after approval by the conservation department.

A non-driver identification card issued by the department of public safety is not acceptable proof of residency.

Saltwater Jurisdiction
For the purpose of saltwater commercial and recreational fishing and seafood management activities the following areas would be under the authority of the Marine Resources Division as defined in 220-2-.42. Those areas, which occur south of the following line, beginning at the Mississippi state line – a meandering line following U.S. Highway 90 eastwardly to its junction with State Highway 188; State Highway 188 eastwardly to its junction with State Highway 193; State Highway 193 northwardly to its junction with State Highway 163; State Highway 163 northwardly to its intersection with Interstate Highway 10 (except the Theodore Industrial Canal); Interstate Highway 10 eastbound lane [except that portion of Interstate Highway 10 which lies north of state Highway 90 (Battleship Parkway) in which case the line follows the Parkway] to the Interstate Highway 10 intersection with U.S. Highway 98; U.S. Highway 98 southwardly and eastwardly to its intersection with State Highway 59; State Highway 59
southwardly to its intersection with Baldwin County Highway 20; Baldwin County Highway 20
eastwardly to its intersection with Baldwin County Highway 95; Baldwin Highway 95 northwardly to its
intersection with U.S. Highway 98; U.S. Highway 98 eastwardly to its intersection with the western shore
of Perdido Bay northwardly to the intersection of the Florida state line and the mouth of the Perdido
River.
All commercial licenses have a $1.00 issuance fee and all recreational licenses have $1.10 issuance fee in
addition to the cost of the license.

**SHRIMP**
License expires September 30 of each year.

**Commercial License**
Commercial Shrimp Boats
- Under 30’ $60.00
- 30’- 45’ $90.00
- Over 45’ $120.00
(Nonresidents pay the same fee as that charged
Alabama residents in the applicant’s state of
residence, except for the reciprocal state of
Mississippi)
Commercial Shrimp Boat Licenses are only
available at a MRD office or by mail.
If caught by cast net, a commercial fishing
license is required in addition to the shrimp boat
license.

**Recreational License**
- Boat License $18.00
- If using a cast net from a boat to catch
shrimp a boat license and recreational
fishing license are required.
- If a cast net is thrown from the shoreline for
shrimp, only a recreational fishing license is
required.
(Nonresidents pay the same fee as that charged
Alabama residents in the applicant’s state of
residence, except for the reciprocal state of
Mississippi.)

**Commercial Season**
All inside waters are closed to the taking of
shrimp from 6:00 a.m. May 1 through 6:00 a.m.
June 1 of each year.
The area within ½ mile of the shoreline
beginning at Mayday pier and running south to
the northern edge of the Point Clear channel
shall be closed from 6:00 a.m. August 15 until
6:00 a.m. October 1 each year.

**Recreational Season**
Prohibited in areas closed to commercial
shrimping and permanently closed areas.
Shrimping is allowed throughout the year in
designated exclusive bait areas from 4:00 a.m.
until 10:00 p.m.

**Commercial Gear Limitation**
There are no restrictions on mesh size. In inside
waters (bay, sounds, etc.), a trawl or trawls used
together cannot exceed 50’ as measured along
the main top line. No more than two trawls may
be used at the same time (not including a try
trawl, which cannot exceed ten feet (10’) on the
main top line). No restrictions on trawl size
offshore (Gulf of Mexico) – other commercial
specifications apply. Trawl wings shall be cut
and tied to the wing line only on points, and it
shall be illegal to use a trawl or trawls on which
the length of the top leg line exceeds the length
of the bottom leg line (the length of the leg line
being defined as the distance from the rear of the
trawl door to the beginning of the wing). Webbing or netting shall not be hung, tied, or
otherwise connected between the rear of the
trawl board or door and the adjacent wing line or
between the top leg line and bottom leg line of
any trawl so as to extend the width of any trawl
or trawls over the legal width (50’).

Cast nets may not exceed 30 feet in diameter and
be hand thrown.

**Recreational Gear Limitations**
One trawl, size not to exceed sixteen feet (16’)
as measured along the main top line. There are
no restrictions on mesh size.

Cast nets may not exceed 30 feet in diameter and
be hand thrown.
Commercial Legal Size
Shrimp smaller in size than 68 count (68 shrimp or less per pound) are not to be taken in Alabama waters.

Recreational Legal Size
No restrictions in areas open to commercial shrimping and designated exclusive bait areas.

Commercial Pounds Allowed
No limit.

Recreational Pounds Allowed
In areas open to commercial shrimping, five (5) gallons per person per day. In designated exclusive bait areas, one (1) gallon per boat per day.

LIVE BAIT
License expires September 30 of each year.

License
- Sell live shrimp for bait and operate one boat and one truck - $105.00
- Sell live shrimp for bait and operate two boats and two trucks - $210.00
  (Limit – two boats and two trucks per dealer)

Non-resident
Non-residents transporting and/or selling live or dead saltwater bait shall pay a license fee equal to that charged to an Alabama resident to conduct the same activity in the state of residence of the applicant and in no event less than double that of a citizen of the state of Alabama.

Live bait boats must have Alabama registration (no out of state catcher/facility boats)

Place of Business
Shore Facility
A permanently erected building from which fishing bait and fishing supplies and tackle are routinely sold to the public; or

Vessel Place of Business Excluding Shrimp
A vessel that sells live or dead saltwater bait (excluding shrimp) to the public. Such vessel shall meet the requirements for a boat facility, shall provide a physical address where vessel will be docked or stored, shall not possess or attempt to possess or attempt to use a trawl, and shall make vessel immediately available for inspection. Such vessel shall have the words “Live Bait – No Shrimp” in letters at least six (6) inches high on both sides of the vessel; or

Vessel Place of Business Including Shrimp
A vessel that sells live or dead saltwater bait (including shrimp) from a designated location to the public. Marine Resources Division shall be notified of the GPS position of the designated location ten (10) working days prior to utilizing or moving such location. The vessel shall meet all the requirements of a shore facility and a boat facility, shall provide a physical address where vessel will be docked or stored, shall not possess or attempt to possess or attempt to use a trawl, shall make a vessel immediately available for inspection. Such vessel shall have the words “Live Bait – For Sale” in letters at least six (6) inches high on both sides of the vessel.

Season
No closed season, but areas may be closed by regulation. Prohibited in permanently closed areas. Designated exclusive bait areas are open to live bait dealers year around from 4:00 a.m. until 10:00 p.m.

Gear
One trawl per boat. Trawl shall not exceed fifty feet (50’) as measured across main top line except when in an area temporarily closed to commercial shrimping or in a designated live bait area the trawl shall not exceed sixteen feet (16’). No mesh restrictions. Boats shall display the words “LIVE BAIT” in letters no smaller than six inches (6”) high on each side of the boat and shall have a tank with a spray system operated by a pump or commercial fish aerator or a live well with forced water exchange. Trucks must have a wooden or fabricated transport tank with water recirculation or commercial fish aerator and shall display the words “LIVE BAIT” no smaller than six inches (6”) high on each side of the truck. Boats and Trucks licensed under a Vessel Place of Business Excluding Shrimp shall not possess or transport live or dead shrimp. These boats and
trucks shall meet the same requirements as listed above except the words in six (6) inch high letters on each side of the boat or truck shall be “Live Bait – No Shrimp”

Bull minnow traps in possession onboard a boat on the waters of the state of Alabama or in use by a licensed live bait dealer shall be marked with the Alabama boat registration number.

Legal Size
No restrictions.

Pounds Allowed
Possession of no more than two standard shrimp baskets of shrimp (live or dead) per boat or truck. Possession of no more than four standard shrimp baskets of shrimp (live or dead) per place of business.

Restrictions
Drags shall not exceed 20 consecutive minutes before retrieving trawl and sorting boat shrimp into the live tank. Shrimp can be sold alive or dead. Dead shrimp must have heads attached and be packaged and sold in lots no greater than five pounds.

SHELLFISH – OYSTERS
License Requirements
License expires September 30 of each year.

Persons are allowed to take up to 100 oysters for personal consumption without a Catcher’s License.

- Commercial Oyster Catcher $30.00
  (Required by all persons, must be in possession, taking oysters for commercial purposes.)
- Harvester education required prior to purchase, renews every 5 years.
- Oyster Dredge $30.00
  (Required in addition to a Commercial Oyster Catcher’s License before an oyster dredge can be used.)

Nonresidents pay the same fee as that charged Alabama residents to conduct the same activity in the applicant’s state of residence, or not less than twice the amount of resident location.

Seasons
The Alabama Department of Conservation and Natural Resources (ADCNR) and the Alabama Department of Public Health (ADPH) are authorized to open and close public areas for commercial and recreational harvest from October 1 through April 30 of each year. Private leases may be closed at any time by the ADPH for public health reasons. Taking oysters from a closed area for any reason is a misdemeanor. Taking oysters from open areas before or after time as set by regulation is prohibited. Transporting oysters at night through closed areas is prohibited.

Gear
Oysters may be taken from public and private reefs and water bottoms by hand, oyster tongs or oyster dredge. Dredges may only be used on private leases or in designated public reef areas and must be inspected and permitted by MRD. Oyster dredges must:
- not exceed 125 pounds,
- have self-dumping baskets
- have no more than 16 teeth
- no more than 3 inches between teeth
- have a rope no shorter than 15 feet with a minimum 6 inch buoy attached with the permit holders number affixed

No more than one dredge may be possessed onboard at one time.

Size Limits
Oysters taken for either commercial or personal consumption must be at least three inches (3”) in length (5% undersize tolerance). Oysters must be culled on the reef where they are taken.

Possession Limits
Unlawful to take or have in possession more than the number of sacks of oysters per boat per day as set by regulation.

Leases
Persons, firms, or corporations desiring to lease oyster bottoms shall make application in writing to the Commissioner of Conservation and Natural Resources accompanied by such fee as may be prescribed. It is the duty of each lessee to have established an accurate survey by a registered surveyor of the bottoms, beds, or reefs
under his control; each corner shall be clearly marked and defined with the lessee’s name clearly attached. Intermediate markers shall be placed no more than 600 feet apart and plat (including GPS coordinates of the corners) of the area filed with the MRD together with a list of any persons using said lease area (list must be updated every 30 days). The Director of MRD may require the leases to be resurveyed every 5 years.

Oyster Aquaculture
Allowed by permit in areas approved by ADPH.

Restrictions
It is unlawful to drag any seines over the public reefs or private oyster grounds. Oysters taken commercially must be sacked (not more than ¼ Alabama barrel per sack) and each sack tagged before landing. Tags may be purchased for $0.35/each at MRD Oyster Management Stations. Oystermen must check out at an Oyster Management Station before oystering on Public Bottoms and check back in to the same Oyster Management Station. Commercially harvested oyster must be taken to a designated and certified dealer. No oysters shall be culled or sacked on board a boat in waters closed to the harvesting of oysters. No oysters taken from a public reef shall be culled upon a private reef. It shall be unlawful to possess oysters taken from a private lease and oysters taken from a public reef on board a boat at the same time. Recreational and commercially harvested oysters may not be possessed onboard a vessel in the same trip. It is illegal to possess empty oyster sacks with tags attached.

SHELLFISH – CRABS
License expires September 30 of each year.

Licenses
- Commercial - $60.00
- Recreational – Saltwater Fishing License Required (five traps maximum)

Nonresidents pay the same fee as that charged Alabama residents to conduct the same activity in the applicant’s state of residence, or not less than twice the amount of resident location.

Restrictions
No person, firm, or corporation shall take, catch, sell, transport, or possess blue crabs that measure less than five inches (5”) carapace width as measured from the tip of one lateral spine to the tip of the opposite lateral spine. Provided, however, this limitation does not apply to soft-shelled crabs or to pre-molt crabs if the pre-molt crabs are taken solely for the purposes of shedding and held in compliance with applicable laws and regulations. Exempted pre-molt crabs shall exhibit, at a minimum, a pink or red line on the back paddle fin, which is recognized by the crab industry as a preliminary pre-molt stage.

Soft-shell or pre-molt crabs must be held in a separate container, marked “peelers” or “busters,” from those crabs of legal size while in the possession of fishermen.

Pre-molt crabs in the possession of, or held by, a dealer for sale or processing as soft-shell crabs are exempted from the minimum prescribed size limit, if identified as premolt crabs and held in separate containers marked “peelers” or “busters.”

Crabs in a workbox shall not be subject to the minimum prescribed size limit while aboard the vessel. Commercial crab fishermen shall be allowed to have in possession aboard the vessel two workboxes. Crab boxes which are sealed or covered, other than by a grader, shall not be considered a workbox.

Commercial crab fishermen shall tag or mark any containers of Alabama crabs in possession, or that are sold, in a manner which will ensure that such commercial crab fisherman can be identified as the person who harvested the crabs. Such identification required shall be the full name of the crab fisherman and the number issued to the commercial crab fisherman by the MRD and the date on which the crabs were harvested. All containers of Alabama crabs in the possession of a dealer shall be tagged, marked, or otherwise identified in this manner. The identification number shall be assigned by the MRD when the fisherman purchases his or her commercial crab “catcher’s” license. For subsequent years, the same identification
number shall be assigned to the same commercial crab fisherman.

Crabs taken by a licensed live bait dealer for sale as bait shall not be subject to the minimum prescribed size limit.

Crabs taken for bait by licensed recreational shrimp boats shall not be subject to the minimum prescribed size limit, but such boats are limited to no more than the number of crabs held by a one (1) gallon container per boat per day.

Crabs taken by licensed commercial or recreational shrimp boats in waters open to commercial shrimping area limited to no more than one five-gallon container of legal size crabs in possession per boat unless the operator possesses a valid commercial “crab catcher’s” license.

Persons, firms, or corporations may import crabs for commercial purposes from a licensed dealer or fisherman residing outside the state of Alabama, provided such crabs were taken and shipped pursuant to the state’s laws and regulations. Containers of crabs shall be marked, tagged, or otherwise identified as required by the laws and regulations in that state.

A bill of sale or other proof of purchase showing the nonresident dealer’s or fisherman’s name and address, pounds or numbers of containers purchased, and date of purchase shall be maintained at the place of business for a period of one year and shall be available for inspection and presented without delay upon request by a conservation enforcement officer or other authorized agent.

Persons who have caught crabs from the waters of another state may import those crabs into the state of Alabama for commercial purposes, provided said crabs were legally taken, licensed, and transported pursuant to that state’s laws and regulations. Containers of crabs shall be marked or tagged with the fisherman’s name, commercial crab fisherman’s license number issued by the state, and the date of harvest.

Traps used to take crabs or other seafood shall not exceed twenty-seven (27) cubic feet in volume.

Each commercial crab trap shall be marked with at least one (1) buoy no smaller than six inches (6”) in diameter. At least one-half (½) of the buoy shall be white; each buoy shall be marked with the fisherman’s identification number (assigned by the Marine Resources Division and remains the same for subsequent years) that is visible above the water line. Buoys shall be attached to the traps by the use of weighted line to prevent the line from floating. Plastic bottles are prohibited for use as a commercial crab trap buoy. Owners trap identification number must be painted or affixed to each side of the vessel used to harvest crabs in block type a minimum of 3 inches in height and contrasting with the background.

Plastic bottles are prohibited for use as a commercial crab trap buoy.

It shall be unlawful to set or place in the waters of this state any commercial crab trap, which does not have attached a float marked with the identification number of the owner of the trap. Such number shall be at least one inch (1”) in height, colored to be a definite contrast with the color of the float, of block character, and readable from left to right.

It shall be unlawful to remove crab traps from the water or remove crabs from crab traps during the hours from sunset to one (1) hour before sunrise the following day.

It shall be unlawful to set or place any commercial or recreational trap used for the taking of crabs or other seafood in the access canals of Heron Bay (west of and adjacent to State Highway 193) or within three hundred feet (300’) of any navigational channel marked by a lawfully established system of waterway markers or any public boat launching ramp, Heron Bay Cutoff, or the mouth of the West Fowl River, Weeks Bay, Fish River, Magnolia River, any man-made canal, or in any manner so as to prevent ingress or egress to or from any
pier, wharf, dock, marina, or boat launching ramp.

It shall be unlawful to set or place any commercial trap used for the taking of crabs or other seafood in Mobile River, Dog River, Theodore Industrial Canal, Fowl River, the northwest arm of Heron Bay, Heron Bayou (off northwest arm of Heron Bay), Bill’s Bayou (in Heron Bay), Bayou Coden, Bayou La Batre, or their tributaries, in Mobile County, or Blakely River North of the charted position of Blakely River Marker 18 then northwesterly to the southern tip of Big Island (30-38.305°N, 087-55.503’W), Magnolia River, Bon Secour River north of Channel Markers 7 and 8, Wolf Creek, Sandy Creek, Mifflin Creek, Hammock Creek, Roberts Bayou, Soldier Creek, Palmetto Creek, Old River (between Ono Island and Perdido Key), or their tributaries, in Baldwin County, or in any man-made canal [including but not limited to the following on Dauphin Island: Quivera Bay, Polaris Lagoon, Port Royal Lagoon, Lafitte Bay, Indian Bay, Indian Canal, Buchanan Bay, Columbia Bay, Colony Cove, Spanish Bay, Barcelona Bay, Confederate Bay, Salt Creek (Heron Bayou), Government Cut, and Billy Goat Hole].

It shall be unlawful to set or place any recreational trap used for the taking of crabs or other seafood in any area named in the above paragraph of this regulation, unless such trap shall be physically attached by a line to a pier, dock, piling, bulkhead, boathouse, or other structure, on or attached to the shore. Such line shall allow the crab trap to be placed no farther than a distance of ten feet (10’) from the pier, dock, boathouse, or shoreline. No more than five (5) traps shall be allowed per property.

Recreational crab traps shall be marked with an orange floating, visible buoy not less than six inches (6”) in diameter or width. The buoy shall have a legible letter “R” at least two inches (2”) high, permanently affixed to it.

Crab traps which are no longer serviceable or in use shall be removed from the water by the owner thereof. No person shall intentionally damage or destroy crab traps or the floats or lines attached thereto.

Any unidentified, improperly marked, or illegally placed crab trap shall be considered a nuisance and may be confiscated by a conservation enforcement officer or other authorized agent of the ADCNR.

Any person, firm, or corporation taking, catching, selling, transporting, or possessing crabs shall have in their possession a valid license, if applicable, for such activity.

Such license shall be immediately available for inspection, upon request, by a conservation enforcement officer or other authorized agent.

**FINFISH**

**Saltwater Rod and Reel License**

Annual license expires August 31 each year.

Required by any person who is 16 years of age or older, but has not yet reached the age of 65, who takes, catches, kills, possess or attempts to take catch, kill, or posses by the use of rod & reel, artificial bait, lure, fly, gig, cast net, bow, crab trap or spear.

**Disability License**

Residents only $3.00

Must renew each year and provide proof of disability within the previous 12 months.

**Spear Fishing License**

License expires September 30 each year.

Required when completely submerged and using a spear or similar instrument that is held in the hand of the person using same and the use of a weapon, other than a firearm, which propels or forces a projectile, arrow or similar device
therefrom to which a wire, rope, line, cord or other means of recovering the propelled projectile, arrow or similar device is attached and is secured to the weapon or to the person using the weapon. The possession of a spear, spear gun or spearing device in a boat, on the bank of a body of public water or on or in the public waters of this state shall be prima facie evidence to the court having jurisdiction that the person in possession of the same is engaged in spearfishing, unless said person is frog gigging only.

- Resident $6.00
- Nonresident $8.50

Pier License
Piers located in inside waters of the state $1,001.00
(Residents may fish without an additional license but must have Saltwater Angler Registry.)

Saltwater Pier License (license for individual)
- Resident $6.15
- Non-resident $11.25
(Valid only on public piers)

Saltwater Angler Registration
Any Alabama resident 16 years of age or older fishing in, attempting to fish in or possessing fish taken from those waters under the Marine Resources Jurisdiction shall be required to register.
It is included in an annual saltwater, 7 day trip and pier fishing license.
Required for residents over the age of 64, lifetime saltwater license holders and persons that utilize a pier that purchases the $1001.00 pier license.

The registration is at NO COST.

Commercial Party Boat
License expires September 30 of each year.
Any person, firm or corporation that engages in the business of carrying one or more persons fishing in the salt and brackish waters of Alabama shall purchase a commercial party boat license. Also, required for federally permitted charter passengers to possess fish in Alabama State waters.
Persons onboard may fish without an additional license.

- Resident
  - Up to 6 people $240.00
  - 7-25 people $360.00
  - Over 25 people $600.00

Nonresidents pay the same fee as that charged Alabama residents to conduct the same activity in the applicant’s state of residence, or not less than twice the amount of resident location.

Commercial Fishing License
License expires September 30 of each year.
Required to sell or attempt to sell finfish or take or attempt to take by hook and line, rod and reel, cast net, gig, trot line, spear gun, or bow and arrow, or other gear as defined by regulation or to possess or transport for commercial purposes finfish from those waters under the jurisdiction of the Marine Resources Division.

Cast nets may not exceed 30 feet in diameter and be hand thrown.

Required to offload finfish to a resident or non-resident seafood dealer, regardless of where the fish were taken.

All finfish taken under this license are required to be reported to AMRD.

Does not apply to a legally licensed commercial gill net fisherman or for finfish taken by a licensed commercial shrimp boat.

- Resident $120.00
- Nonresident $240.00

It is unlawful to possess in Alabama any species of saltwater fish or seafood product taken in Federal waters or the waters of another state...
unlawfully in violation of any applicable Federal or other state creel, possession, or size limit.

It is unlawful to sell speckled trout, red drum, striped bass (caught under the MRD jurisdiction) and tarpon caught in state waters. No allowance for undersize fish.

All commercial fishing operations, as well as recreational netting operations, and all gear used in any of such operations, in state jurisdictional waters south of Interstate 10 eastbound lane [except that portion of Interstate 10 which lies north of State Highway 90 (Battleship Parkway) in which case the line follows the Parkway] shall be subject to those laws, rules, and regulations of the ADCNR/MRD.

No hook and line device may contain more than five (5) hooks when used in Alabama waters under the jurisdiction of the MRD except from January 1 through April 30, when trotlines may be used to take legal species other than saltwater game fish east of Mobile Ship Channel and north of the line from MS#78 to Blakely R. Ch. #2 and due east to the shoreline. These trotlines cannot exceed 300’ and 50 hooks.

Commercial fishermen landing Gulf Reef Fish shall have, in their possession, an Alabama Commercial Fishing License and must adhere to all provisions for landing, offloading, transporting and reporting of Gulf Reef Fish under 50 CFR Part 622

Any vessel or individual that is required to have a federal permit to harvest or retain a marine aquatic species must possess such permit to land that species in Alabama.

All species shall be maintained with heads and fins intact through landing. Sharks, swordfish and tunas may be landed in the form permitted by federal fisheries regulations.

**Closed Season and Creel/Possession Limit on King Mackerel and Reef Fish for Commercial Purposes**

During such period of time that the Federal waters (adjoining Alabama waters) are closed to the commercial harvest of king mackerel or reef fish, it shall be unlawful to take, harvest, or possess, for commercial purposes, king mackerel or reef fish from the waters of the state of Alabama.

**Season on Sharks for Commercial Purposes**

During such period of time that the Federal waters adjacent to Alabama waters are open to commercial harvest of a shark species as defined by Federal law or regulation, the Alabama waters of Mobile Bay, Bon Secour Bay, Mississippi Sound, and the Gulf of Mexico south of the Gulf Intracoastal Waterway and west of Little Lagoon Pass (87°44’24”W longitude) shall be open to the harvest of such sharks for commercial purposes from 12:01 a.m. each Monday through 11:59 p.m. each Friday (no weekends), except for commercial harvesting of sharks shall be prohibited from 12:01 a.m. through 11:59 p.m. on each of the following holidays: Memorial Day, Independence Day, and Labor Day. When Federal waters adjacent to Alabama are closed to the commercial harvest of a shark species, it shall be unlawful to take, harvest, or possess, or attempt to take, harvest, or possess, for commercial purposes, sharks of such closed management unit from the waters of the state of Alabama.

**Closed Season and Zero Possession Limit on Certain Species for Commercial Purposes**

No person shall take, possess, or attempt to take or possess from the waters of the state of Alabama, for commercial purposes, any of the following species: Atlantic Angel Shark, Bigeye Thresher Shark, Dusky Shark, Longfin Mako Shark, Sand Tiger Shark, Basking Shark, Whale Shark, White Shark, Smalltail Shark, Bigeye Sand Tiger Shark, Bigeye Six Gill Shark, Bignose Shark, Caribbean Reef Shark, Caribbean Sharpsnout Shark, Galapagos Shark, Narrow Tooth Shark, Night Shark, Seven Gill Shark, Six Gill Shark, Smalltooth Sawfish, Largetooth Sawfish, Silky Shark Sandbar (unless fisherman possess a NOAA Fisheries sandbar research permit), Atlantic Manta Ray, Spotted Eagle Ray, Goliath Grouper (Jewfish), Nassau Grouper
By-catch Provisions on Sharks for Commercial Purposes
Regardless of the open or closed status of Federal and Alabama waters regarding the directed harvest of sharks, gill net fishermen targeting other fish shall be allowed to keep, for commercial purposes, an incidental bycatch of dressed weight of sharks (carcasses and fins) – except those species listed above – totaling no more than ten percent (10%) by weight of other fish taken.

SALTWATER NETS
License expires September 30 of each year.

Purse Seine Licenses
- Resident $1,800.00
- Nonresident $3,600.00

Permits
Permits expire September 30 of each year. Recreational nets shall not exceed 300’ in length; commercial nets shall not exceed 2,400’ in length (main top line).
- Resident
  - Recreational - $60.00 + must have purchased a license prior to June 1, 2008 and must purchase the license each successive year.
  - Commercial - $360.00 + additional $600.00 for roe mullet and Spanish mackerel permit. Fisherman must have purchased a license prior to June 1, 2008 and must purchase the license each successive year.
- If a commercial or recreational gill net license holder fails to purchase a license in a license year they are ineligible to continue to purchase that license.

Nonresident
- Recreational – pays the same fee as that charged an Alabama resident to conduct the same activity in applicant’s state of residence provided nonresidents pay no less than twice the cost for license that Alabama residents pay. Must have license from previous year to purchase current year license.
- Commercial. Not available after June 1, 2008.

Permits for commercial net and seine permits shall only be issued to persons who purchased such licenses in two of five years from 1989 through 1993 and who have proof of 50% of their gross income from fishing or persons who purchased such a license in all five years and have filed annual income tax returns in all years. All nets and seines must be licensed except seines used for taking bait. Bait seines shall not exceed twenty-five feet (25’) in length or four feet (4’) in depth. A license made out to an individual is not transferable; licensee must be present when net is in use. A seafood dealer’s license is also required if fish are sold to other than an Alabama seafood dealer. A saltwater fishing license is required for cast nets when used recreationally by Alabama residents.

Restrictions
It shall be unlawful to use purse seines for the taking or attempting to take fishes of other than those of the families Clupeidae (menhaden and herrings) and Engraulidae (anchovies). The starting date for the commercial menhaden season in the territorial waters of Alabama shall be the third Monday in April, and the closing date shall be November 1 of each year (both dates inclusive). The taking of menhaden by purse seine shall be permitted only in those waters of Mississippi Sound and the Gulf of Mexico as described: “Mississippi Sound and the Gulf of Mexico west of a line extending from the southernmost tip of Point aux Pines to Bayou La Batre Channel Marker 17, then to the southernmost point of the Isle aux Herbes (Coffee Island), thence eastward to the easternmost point of Marsh Island, then southward to Gulf Intracoastal Waterway Range Beacon “C,” thence southward into the Gulf of Mexico for a distance of three (3) miles, except those waters lying within a radius of one (1) mile from the western point of Dauphin Island.”

Gill nets must be marked every 100’ with a color-contrasting float and every 300’ with the fisherman’s permit number. Recreational nets must be marked with the licensee’s name and license number. The allowable depth commercial gill nets, trammel nets, and other entangling nets may vary by area. The
minimum mesh size in the inside waters is 1½” (knot to knot).

Except as otherwise noted, gill nets, trammel nets, and other entangling nets used to catch any fish in Gulf waters in Alabama’s territorial jurisdiction must have a minimum mesh size of 1 1/32” bar (knot to knot). A minimum mesh size of 2” bar is required for such nets used to take mullet in the Gulf & during the period from October 24 thru December 31 of each year for all Alabama coastal waters under the jurisdiction of the MRD, and only strike nets may be used in certain waters of Bon Secour Bay during this period. Any person using a 2” or larger bar mesh during the period October 24 through December 31 of each year must have a roe mullet permit. The minimum mesh for nets used in these excepted areas shall be generally the same as previously described by season for other coastal waters.

The use of purse seines to catch mullet is prohibited. Commercial and recreational gill net fishermen may use only one net at any time; however, commercial fishermen may possess more than one such net. Gill nets, trammel nets, seines, purse seines, and other entangling nets are prohibited in any marked navigational channel, Theodore Industrial Canal, Little Lagoon Pass, or any man-made canal; within 300’ of any man-made canal or the mouth of any river, stream, bayou, or creek; and within 300’ of any pier, marina, dock, boat launching ramp, or certain “relic” piers. Recreational gill nets may not be used beyond 300’ of the shoreline. It is unlawful to use any seine or net in any manner so as to block ingress or egress from any of the aforementioned structures. It is illegal to use recreational gill nets in Gulf waters and Pelican Bay.

It shall be unlawful to use or possess a gill net, trammel net or other entangling net or seine in the Gulf of Mexico, including Pelican Bay, from March 15 through the day after Labor Day each year from 12:00 noon each Friday through 7:00 p.m. each Sunday.

Year round, gill nets, trammel nets, seines, haul seines, and other entangling nets are prohibited in Gulf waters within ¼ mile of shore, except (and subject to other provisions) waters east of longitude 87°47.826’ (Old Little Lagoon Pass) which will be open from 6:00 p.m. to 6:00 a.m. Monday through Thursday, 12:00 midnight to 12:00 noon on Friday and from 7:00 pm. to March 15 through May 12:00 midnight on Sunday 15. From October 2 through December 31, the waters east of Old Little Lagoon Pass to the Florida line are open 24 hours a day. From the day after Labor Day through March 14, Gulf waters within ¼ mile of shore will be open to netting west of Old Little Lagoon Pass in Mobile and Baldwin Counties, except from March 15 through Labor Day in waters west of Old Little Lagoon Pass. in Mobile and Baldwin Counties, waters shall be open from 6:00 p.m. to 6:00 a.m. Monday through Thursday, 12:00 midnight to 12:00 noon on Friday and from 7:00 pm. to 12:00 midnight on Sunday. West of Old Little Lagoon Pass to the last house on Dauphin Island (located at Longitude 88°11.500’W). From March 15 through Labor Day, waters west of longitude 88°11.500’ are open from 7:00 pm. Sunday to 12:00 noon Friday. From May 15 to October 2, all waters in the Gulf of Mexico east of Old Little Lagoon Pass to the Florida line are closed to gill nets, trammel nets, seines, haul seines, and other entangling nets. From January 1 through the day after Labor Day of each year, entangling nets are prohibited in certain waters in and around Dauphin Island.

It is illegal to remove the roe or otherwise process roe mullet aboard any boat or vessel in Alabama. All nets must be constantly attended by the licensee, and no dead fish or other dead seafood may be discarded within three (3) miles of Gulf beaches, 500’ of any shoreline, or into any river, stream, bayou, or creek.

It is illegal to use or possess a gill net, trammel, or other entangling net that do not have a two inch (2”) cork every five feet (5’) or a six inch (6”) buoy every fifty feet (50’) on the top line.

SEAFOOD DEALER LICENSE
License expires September 30 of each year.

Required of any person, firm, or corporation selling, brokering, trading, bartering, or processing any fresh or frozen seafood. To
obtain a seafood dealer license, tax identification, proof of business license, and appropriate health permit are required (if applicable). License required for each place of business ("place of business" means a permanent structure on land or a vehicle from which seafood is sold or purchased if owner/operator does not have a licensed permanent structure.)

- Resident seafood dealer - $240.00
- Nonresident seafood dealer - $480.00 or the same fee that is charged an Alabama resident in their state if Alabama residents are charged more than $480.00

**SEAFOOD DEALER VEHICLE LICENSE**
Only holders of a valid Alabama seafood dealer license may purchase a seafood dealer vehicle license.

- Resident and nonresident - $101.00 per vehicle

**SEAFOOD REPORTING AND LANDING REGULATION**
Alabama Code requires that each and every person, firm, or corporation holding a seafood dealer’s license issued by the Commissioner of Conservation and Natural Resources or his or her authorized agent shall under oath make a monthly report to the MRD Director, on blanks provided for that purpose.

All saltwater finfish commercially harvested in the state of Alabama, except those lawfully taken by purse seine, shall be landed in this state and reported through a properly licensed Alabama seafood dealer. Persons who are transporting commercially harvested saltwater finfish out of the state of Alabama must have in their possession proof that said finfish were first landed and reported to a licensed Alabama seafood dealer.

Commercially harvested living marine products other than saltwater finfish taken from Alabama waters including, but not limited to oysters, crabs, shrimp, other marine invertebrates and live rock may be landed outside the state of Alabama provided the dealer to which products are sold provides to the MRD Director at monthly intervals the fisherman’s name; license or permit number; species purchased; volume and price paid for the product; date and area of harvest; trip and fishing time; proper vessel identification; type, quality, and size of gear used; applicable mesh size of gear used; and date of purchase – provided that if the dealer outside the state of Alabama to which produce was sold fails to report as required, it will be the responsibility of the fisherman who sold the product to provide to the MRD Director at monthly intervals the above required information.

All motor vehicles, trailers, or semi-trailers transporting aquatic products for commercial purposes are required to exhibit the inscription “FISH” on the rear of the vehicle. The inscription shall read from left to right, be attached or painted on the vehicle in block Arabic letters of good proportion in contrasting color, and be at least six inches (6”) in height.

1. Commercial vessels which hold a valid Federal red snapper license and/or a Federal reef fish commercial vessel permit may land in Alabama up to their (IFQ) Individual Fishing Quota issued to them by NOAA. They are required to follow all pertinent Federal regulations.

2. Recreational and commercial harvest of the following species are prohibited:

3. Illegal to use chumming or bloodbaiting within 300 feet of the shoreline or any pier in the waters under the jurisdiction of Marine Resources Division.

4. When adjoining federal waters are closed then state waters are closed to the taking of Gulf reef fish, king mackerel & sharks.

</table>

1 Redfish – no undersized fish allowed, one (1) may exceed the maximum size.
2 There is a 20-fish aggregate bag limit for reef fish species for which there is no other bag limit (including banded rudderfish and lesser amberjack).
3 When caught in areas designated as salt water.
October 24 through December 31 – Recreational possession limit on mullet caught by cast net or
snagging is 25 fish per boat per day or 25 fish per person per day from shore.

Unlawful to possess onboard a boat more than 25 mullet while cast netting or snagging in waters close to
the use of gill nets.

October 24 through December 31 – Unlawful to take mullet by cast netting or snagging in Theodore
Industrial Canal, Dog River, or the tributaries thereof.

Illegal to chum or bloodbait within 300 feet of the shoreline or any pier in the waters under the
jurisdiction of Marine Resources Division.

Recreational and commercial harvest of the following species are prohibited:
- Sharks - Atlantic Angel, Longfin Mako, Small Tail, Bigeye Thresher, Bignose, Sevengill, White,
  Dusky, Sixgill, Nurse, Sand Tiger, Basking, Bigeye Sixgill, Caribbean reef, Caribbean Sharpnose,
  Galapogos, Narrowtooth, Night and Whale, Sandbar, Silky, Sawfish - largetooth & smalltooth
  Rays - Atlantic Manta & Spotted Eagle, Grouper - Goliath & Nassau

When adjoining federal waters are closed then state waters are closed to the taking of Gulf reef fish.

Planning a Move?

Disclaimer: This unofficial summary has no legal effect and is provided for informational purposes only. For the official regulatory language, please refer to Chapter 379, Florida Statutes, and Chapters 688 and 68E, Florida Administrative Code. **NOTE:** This summary is for informational purposes only and has no legal force or effect. Fishery regulations are subject to change. This summary does not include regulatory changes that may have occurred after publication. Visit MyFWC.com to view official rule language.
The Division of Law Enforcement (DLE)

The Division of Law Enforcement patrols Florida’s coastal waters to provide assistance to boaters and fishermen as well as to enforce Florida’s saltwater fishing and boating laws. FWC officers assist boaters who are in distress, provide advice and direction to those who are traveling Florida’s coastline and waterways, and may issue citations for violations of state and federal fishing, wildlife, and boating laws.

In emergencies or if state fisheries, wildlife, or boating laws are being violated, call 888-404-FWCC (3922) or for cell phone users throughout the state dial *FWC(*392) depending on your location, hail on VHF channel 16 or report violations via text message. Most cell phones allow users to send that text message directly to an email address. You can text Tip@MyFWC.com: standard usage fees may apply.

### Noncommercial Licenses

- **Stone/Blue Crab Depredation Permit (Issued to Aquaculture Producers only):** Free

### Special Activity Endorsement

- **Chemical Collecting Permit (Quinaldine):** $25 (Must hold Marine Life Endorsement)  
- **Scientific Research, Educational, Exhibitional, Pompano, Snook, Shellfish Dredge (clams & mussels), Public Purpose, Quinaldine, Indigenous Marine Prohibited Species, Brood stock, Experimental or Innovative Gear. (Issued by Div. of Marine Fisheries Management):** $25 (certain licenses; others free)

### Marine Trap Certificate Programs

To receive a quantity of trap tags, you must have an equal quantity of spiny lobster or stone crab trap certificates on account with the FWC or hold an active blue endorsement.

### Spiny Lobster Certificate Transactions

- **Spiny Lobster Trap Certificates/Tags:** $1
- **Spiny Lobster Trap Replacement Tags:** $1
- **Spiny Lobster Trap Tag Replacement Handling Fee:** $3 per trans
- **Spiny Lobster Trap Emergency Replacement Tags:** Cost
- **Spiny Lobster Trap Certificate Transfer:** $2/Cert.
- **Spiny Lobster Trap Certificate Surcharge (applies only to 1st-time transfer outside family):** Fee: $5 per Certificate or 25% of the actual market value, whichever is greater.

### Stone Crab Certificate Transactions

- **Stone Crab Trap Certificates/Tags:** $0.50
- **Stone Crab Trap Replacement Tags:** $0.50
- **Stone Crab Trap Tag Replacement Handling:** $8 per trans
- **Stone Crab Trap Emergency Replacement Tags:** Cost
- **Stone Crab Trap Certificate Transfer:** $1/Cert
- **Stone Crab Trap Cert. Transfer (to crew per tag):** $0.50/Cert.
- **Stone Crab Trap Certificate Surcharge (applies only to 1st-time transfer outside family):** Fee: $1 per Certificate or 25% of the actual market value, whichever is greater.

### Blue Crab Effort Management Program Transactions

- **Blue Crab Trap Tags:** $0.50
- **Blue Crab Trap Replacement Tags:** $0.50
- **Blue Crab Trap Replacement Handling Fee:** $8 per trans
- **Blue Crab Trap Emergency Replacement Tags:** Cost
- **Blue Crab Endorsement Transfer Fee:** No Charge

### Planning a Move?

Don't forget to let the office of licensing and permitting know your new mailing address! 850-487-3122

http://myfwc.com/license/saltwater/commercial-fishing/
Commercial Saltwater Fishing Regulations

These rules apply in state waters extending nine nautical miles off the Gulf coast and three nautical miles off the Atlantic coast. Fish and Wildlife Conservation Commission rules may also include federal waters. The FWC is charged with establishing marine fisheries rules in Chapters 68B and 68E, Florida Administrative Code. License fees and penalties for fisheries violations rules and regulations in Chapter 379, Florida Statutes, are enacted by the Legislature. The official FWC marine fisheries regulations can be found at: myfwc.com. The FWC Division of Law Enforcement enforces fisheries laws in both state and federal waters.

Additional Regulations

A state may regulate vessels that are registered in that state and fishing in federal waters for species for which there are no federal fishery management plans or applicable federal regulations, or for which the appropriate fishery management plan has delegated management of the state and the state rules are consistent with federal regulations. NOTE: Federally permitted for-hire reef fish vessels must comply with the more restrictive of federal or state reef fish regulations when fishing for reef fish in state waters. A Saltwater Products License (SPL) is required to commercially harvest or sell all saltwater products. An SPL may be issued in the name of an individual or a valid boat registration number issued in the name of the license applicant. Any vessel used to harvest commercial quantities of saltwater products must have a commercial vessel registration. Such license is not transferable if the vessel is sold.

A saltwater product is any marine fish, marine invertebrate or marine plant, except non-living shells and salted, cured, canned, or smoked seafood. Harvest over the recreational bag limit, use of certain gear as required by law, or possession of more than 100 lbs. per person per day of species with no established bag limit is considered commercial harvest. Possession of two or fewer fish with no established bag limit is not considered commercial harvest.

A Restricted Species Endorsement (RS) is required to commercially harvest and sell the following species: Spanish Mackerel, King Mackerel, Black Drum, Spotted Sea Trout, Grouper, Snapper, Red Porgy, Gray Triggerfish, Amberjack, Sea Bass, Tropical/Ornamental “Marine Life”, Black Mullet, Silver Mullet, Bluefish, Hogfish, Blue Crab, Stone Crab, Crawfish/Spiny Lobster, African Pompano, Florida Pompano, Permit, Sheepshead, Tripletail, Clams (Brevard County only), Shrimp, Flounder, Cobia, Wahoo and Dolphin. Additional species may be designated as restricted by the Commission at any time. Licensed commercial fishermen must show proof of income in the form of trip tickets or out-of-state landings reported under their license (along with a copy of the out of state license) to qualify for the RS. Sales reported under a retailer’s license cannot be used to qualify for the RS. Additional qualification criteria or exemptions to the income requirements may apply for first-time applicants.

Sale and Reporting Requirements for Saltwater Products

A wholesale dealer’s license is required to purchase saltwater products from a producer and sell products to retail dealers or other wholesale dealers. A retail dealer’s license is required to purchase saltwater products from a wholesale dealer and sell to the consumer unless licensed by the Division of Hotels and Restaurants. A wholesale dealer’s license is not required for products entering the state through interstate or international commerce as long as the products are continuously bonded during transit through the state. Wholesale dealers are responsible for reporting all purchases from a producer to the commission.

It is unlawful for any unlicensed person to purchase or sell saltwater products. Penalties for unlicensed sale include criminal and civil fines of up to $5,000, permanent revocation of license privileges, and imprisonment in addition to penalties levied by the court. Additional penalties for unlicensed sale by a person whose fishing privileges have been revoked or suspended include forfeiture of property involved in the offense.

Dealers are required to confirm that potential sellers hold all of the required licenses prior to purchasing any saltwater product. All dealers must report products when landed for the first time to the FWC Fish and Wildlife Research Institute (FWRI) Trip Ticket Reporting Office. Wholesale and retail dealers who harvest their own products under an SPL must also submit trip tickets.

Commercial fishermen can only sell their catch to a licensed wholesale dealer. Fishermen are strongly advised to always obtain and retain copies of their trip tickets and to compare them with their landings summaries produced by the FWRI on an annual basis. For reporting or landings information contact the FWC FWRI Trip Ticket Office at (727) 896-8626.

DID YOU KNOW...

- A federal dealer permit is required for a dealer to receive Gulf reef fish harvested from federal waters of the Gulf of Mexico. A Gulf IFQ dealer endorsement is also required. Call 1-866-425-7627 for more information.
- Food fish may not be taken for the purpose of making oil, fertilizer or compost.
- Hook and line gear must be tended at all times. Possession of longline gear (a line or a series of connected lines with more than 10 hooks) is prohibited in state waters except for persons in continuous transit across state waters to or from federal waters.
- Use of firearms or explosives for harvest is prohibited. Harvest with or possession of fish harvested with a powerhead or bangstick is prohibited in state waters. Powerheads may be used for personal protection only. Use of a rebreather to harvest any marine species is prohibited. Use of a rebreather is allowed for nonconsumptive purposes only. Simultaneous possession of a rebreather and fish is prohibited, except for persons in continuous transit from federal waters.
- Vessel monitoring systems are required onboard all vessels with federal commercial permits for Gulf reef fish, including charter vessels/ headboats that also have a commercial reef fish permit.
Net Limitations

Food fish caught in any net and not kept due to bag, size, or other reason must be immediately returned to the water alive.

The use of gill and entangling nets is prohibited in all state waters (nine nautical miles from the Gulf coast and three nautical miles from the Atlantic coast). Any net (other than a hand thrown cast net) with a stretched mesh size larger than two inches is considered an entangling net. Any net (other than a hand thrown cast net or handheld landing or dip net) constructed wholly or partially of monofilament or multisstrand monofilament material is also considered an entangling net.

The use of a cast net with a stretched length (the distance from the horn to the lead line with the net pulled tight) of more than 14 feet and fishing with more than two cast nets per vessel are also prohibited in state waters.

Use of more than four seines is prohibited in state waters. This limitation applies to primary vessels and secondary vessels aboard or connected to the primary vessel. No more than two lawful nets may be fished per vessel in nearshore and inshore waters (all waters landward of a line three nautical miles from the Gulf coast and one nautical mile from the Atlantic coast). A person not on a vessel may fish no more than one such net.

The use of any net with a mesh area exceeding 500 square feet is prohibited in nearshore and inshore waters. Check rule number 68B-38(2), F.A.C.

No net may have more meshes attached per foot of cordline or leadline than 14 divided by the bar measurement of the mesh in the net. The use of trawls with a net or bag containing more than 500 square feet of mesh area is prohibited in nearshore and inshore waters.

Any vessel in state waters with gill or entangling nets aboard or more than four seines aboard and vessels in nearshore or inshore waters with any net with a mesh area larger than 500 square feet aboard (the trawl door or frame may not be deployed) must proceed as directly, continuously, and expeditiously as possible from the place where the vessel is regularly moored to waters where use of such nets is lawful and to the licensed wholesale dealer where the catch is to be sold. This requirement does not apply to vessels containing or otherwise transporting dry nets that are rolled, folded, or otherwise properly stowed in “lock boxes” so as to make their immediate use impracticable.

In all waters of the state, the possession of gill or entangling nets or seines with a mesh area larger than 500 square feet is prohibited on any airboat, on any vessel with a forward-mounted primary power source that is less than 25 feet in length, and on any vessel less than 22 feet in length.

Violations of these net gear regulations are considered major violations. Civil penalties and license suspensions may be assessed in addition to court assessed criminal penalties.

Gill nets used in the federal gill net fishery must be marked at each end with the SPL number of the vessel operator or vessel from which it is deployed. Seines must be tended and marked with the SPL number at each end.

Beach or haul seines, with the exception of nets used in the specified area of the the Southwest region, may not be soaked for more than one hour from the time the mesh first enters the water until the mesh is first retrieved. In the Southwest region (Manatee, Sarasota, Charlotte, Lee, and Collier counties, except inside waters) nets may be fished from one hour after sunset to one hour before sunrise. Such nets may not be soaked for more than 12 hours from the time the first mesh is set until the first mesh is retrieved. In this area a seine net with one unattached wing is allowed; however, one end of the main net must be anchored on the shore, and a vessel with a white light visible from 360° and at least one mile must be anchored at the seaward end of the nets.

Purse seines or similar devices may not be used to take food fish other than tuna and menhaden. Lawfully used seines may have a pocket bunt on the middle of the seine with a mesh size less than two inches.

Trap Limitations/Marking Requirements

The use of any trap is prohibited in designated areas off of Citrus, Hernando, and Pasco counties during the following closed seasons.

Zone II - closed season Oct. 5 - May 20
Zone IV - closed season Oct. 5 - Dec. 1 & April 2 - May 20
Zone V - closed season Oct. 5 - Nov. 30 & Mar. 16 - May 20

The boundaries for these zones are defined by longitude and latitude in rule 68B-38(2), F.A.C.

Unless otherwise prohibited, finfish may be harvested in a lawful black sea bass or pinfish trap, or as bycatch in a lawful crab or crawfish trap (licensing requirements apply to bycatch). A lawful black sea bass trap may not exceed two feet in any dimension and must have a biodegradable panel and a throat not more than five inches high by two inches wide. Black sea bass traps are prohibited south of Latitude 27° N (a line extending east and west through the Sarasota area on the west coast and Martin County on the east coast). A lawful pinfish trap may not exceed two feet in any dimension and must have a throat or entrance not more than 3 inches high and ¾ inches wide. Possession of fish traps not otherwise allowed by rule is prohibited in state.

Each black sea bass trap must have the trap owner’s saltwater products license number permanently attached to the trap. Each buoy attached to such trap shall have the letter “B” and the owner’s saltwater products license number affixed to it in legible figures at least 1.5 inches high.

Each trap and buoy used to harvest spiny lobster, blue crab and stone crab shall have the commercial harvester’s current endorsement number permanently affixed in legible figures. Each trap shall also have firmly affixed a current trap tag issued annually by the Commission. Traps with tags that are not firmly affixed by nails, staples, or otherwise securely fastened as may be provided by the Commission, shall be considered untagged for enforcement purposes. On each buoy, the affixed endorsement number shall be at least 2 inches high. The buoy color and license or trap number shall also be permanently and conspicuously displayed on any vessel used by a commercial harvester for setting traps and buoys, so as to be readily identifiable from the air and water, in the following manner:

A buoy or time release buoy shall be attached to each trap or at each end of a weighted trap trotline. The buoy shall be constructed of styrofoam, cork, molded polyvinyl chloride, or molded polystyrene, be of sufficient strength and buoyancy to float, and be of such color, hue, and brilliancy as to be easily distinguished, seen, and located. Buoys shall be either spherical in shape with a diameter no smaller than 6 inches or some other shape so long as it is no shorter than 10 inches in the longest dimension and the width at some point exceeds 5 inches. No more than 5 feet of any buoy line attached to a buoy used to mark a stone crab trap or attached to a trotline shall float on the surface of the water.

From the Air – The buoy design approved by the Commission shall be displayed and be permanently affixed to the uppermost structural portion of the vessel and displayed horizontally with the painted design up. The display shall exhibit the harvester’s approved buoy design, unobstructed, on a circle 20 inches in diameter, outlined in a contrasting color, together with the endorsement number permanently affixed beneath the circle in numerals no smaller than 10 inches in height.

From the Water – The buoy design approved by the Commission shall be displayed and be permanently affixed vertically to both the starboard and port sides of the vessel near amidship. The display shall exhibit the harvester’s approved buoy design, unobstructed, on a circle 8 inches in diameter, outlined in a contrasting color, together with the endorsement number permanently affixed beneath the circle in numerals no smaller than 4 inches in height.
Species designated as “Reef Fish” are also designated as Restricted Species. An SPL with a Restricted Species (RS) endorsement is required to sell any species designated as “Reef Fish”. A Federal Permit is also required to harvest in commercial quantities and sell “Reef Fish” species other than bank, black, or rock sea bass and red porgy harvested in the Gulf. No “Reef Fish” may be sold by or purchased from persons who do not hold the required state and federal permits.

Allowable gear for the harvest of “Reef Fish” is limited to hook and line gear, black sea bass traps, and spearing. Possession of “Reef Fish” harvested as incidental bycatch while targeting other species or with gear not allowed for the harvest of “Reef Fish” is limited to the recreational bag limit. Incidental bycatch of red porgy harvested in the Atlantic during the closed season is limited to one fish and may not be sold. Possession of a recreational and a commercial bag limit of all reef fish species on the same trip is prohibited.

If at any time adjacent federal waters are closed to commercial harvest of a “Reef Fish” species, corresponding state waters are also closed to the harvest of that species. During any such closure, the purchase and sale of that species harvested from the closed area is prohibited.

Federally permitted for-hire reef fish vessels must comply with the more restrictive of federal or state reef fish regulations when fishing for reef fish in state waters.

Basic Commercial Fishing Regulations

State and Federal Waters Daily Commercial Harvest Limits

Commercial Florida Pompano Fishing

Without Pompano endorsement:
Persons harvesting Florida pompano in state and federal waters who have a saltwater products license with a restricted species endorsement, but do not possess a pompano endorsement, shall be subject to a daily harvest and landing limit of 250 individual Florida pompano.

Simultaneous possession of Florida pompano and gill or entangling nets is prohibited in state waters unless pompano were harvested in federal waters as incidental bycatch. Vessels carrying pompano harvested in federal waters as incidental bycatch with gill and entangling nets must travel directly through state waters to land without stopping.

Incidental bycatch harvested with gill or entangling nets in federal waters may not exceed 100 Florida pompano.

With Pompano endorsement:
Persons harvesting Florida pompano in state and federal waters who have a saltwater products license with a restricted species endorsement and a pompano endorsement can harvest an unlimited number of pompano with gill and entangling nets in addition to allowable gear within the Pompano Endorsement Zone, south of Hurricane Pass and north of Cape Sable.

Florida pompano harvested in federal waters with gill or entangling nets must be landed in Florida within the boundaries of the Pompano Endorsement Zone. Vessels with gill nets and Florida pompano on board at the same time must travel through state waters without stopping.

Gill nets used to directly harvest Florida pompano in federal waters must be at least 400 yards long, at least 70 meshes deep at its shallowest point and have a stretched mesh size of at least 4 1/2 inches throughout.

---

Gill nets used to directly harvest Florida pompano in federal waters must be at least 400 yards long, at least 70 meshes deep at its shallowest point and have a stretched mesh size of at least 4 1/2 inches throughout.

*NOTE: Sale and possession of seatrout inventory is allowed for 30 days after the season closes. All spotted seatrout inventory must be reported to the FWC on the Closed Season Spotted Seatrout Declaration and be submitted to the FWC by the seventh day after a regional closure. A copy must be kept at the place of business through the 30 days following a closure. After 30 days following a regional closure, no spotted seatrout may be possessed in a closed region.
King mackerel are divided into two separate fisheries: the Atlantic fishery and the Gulf-Atlantic fishery. Bag limits vary by fishery, region, and season.

The boundaries between the Atlantic and Gulf-Atlantic fisheries shift between the summer and winter seasons. During the summer season (April 1 – Oct. 31), the Atlantic Fishery includes all Atlantic and Monroe County waters and the Gulf-Atlantic Fishery includes all Gulf waters north of the Collier/Monroe County line.

During the winter season (Nov. 1 – March 31), the Atlantic fishery includes only Atlantic waters north of the Volusia/Flagler County line and the Gulf-Atlantic Fishery includes all Atlantic waters south of the Volusia/Flagler County line and all Gulf waters east of the Alabama/Florida border.

In both the Atlantic and Gulf-Atlantic fisheries, the trip limit for the commercial harvest of king mackerel in state waters is reduced or closed in response to federal trip limit reductions and closures.

King mackerel must be at least 24 inches in fork length to be harvested and a saltwater products license, a restricted species endorsement, and a federal king mackerel permit must be held to harvest king mackerel commercially.

Colored areas in the vessel/trip limits chart correspond to colored area in the maps.
Basic Commercial Fishing Regulations

Striped (black) and silver (white, fantail, or redeye) mullet are designated as “Restricted Species”.

The minimum size limit for striped mullet is 11 inches (fork length), with an allowance for a quantity of undersized mullet not to exceed 10 percent of the total weight of all striped mullet possessed. Fork length is measured from the tip of the snout to the fork of the tail.

The use of any gear other than cast nets (no more than 14 feet long, and no more than two per vessel), beach or haul seines (no larger than 500 square feet, and no more than two may be fished per vessel), hook and line gear; and by spearing is prohibited. Spearfishing is prohibited in fresh water. Simultaneous possession of any mullet species in excess of the recreational bag limit and any gill or entangling net is prohibited. This prohibition applies to mullet and gill nets in separate vessels or vehicles that are operated in coordination with one another, including towed vessels. Sale of mullet harvested with illegal gear is prohibited.

Striped Mullet Only

Area*  Regional Bag Limits and Closures
Pinellas County (Tampa Bay) - Riveria Bay and Bayou Grande (Pappy’s Bayou), Placido Bayou (Smack’s Bayou), Snell Isle Harbour, and Coffee Pot Bayou, and certain connecting areas of Tampa Bay, and areas of Tampa Bay between the municipal pier head to just north of the southern tip of Weedon Island.
Manatee County - Manatee River upstream of a line from the eastern side of the mouth of Warner’s Bayou northeasterly to the eastern side of the mouth of Tierra Ciea Cutoff.
Charlotte County - Peace River upstream of a line from Mangrove Point running northwesterly through the northeastern most point of Locust Point to the shoreline in the body of water known as Myakka Cutoff. Coral Creek upstream of its mouth on Gasparilla Sound.
Charlotte County - Punta Gorda area.

* Refer to official area descriptions in the Mullet Rule.

Silver Mullet Only

Area*  Regional Bag Limits and Closures
All Atlantic waters north of the Miami/Dade/Monroe County line.
Statewide

* Refer to official area descriptions in the Mullet Rule 68B-39, F.A.C.
The blue crab effort management plan for the commercial blue crab fishery limits both the number of fishermen and traps in the blue crab fishery. A hard crab endorsement (VH, VN), soft crab (VS) and a blue crab incidental take (VI) endorsement can be associated with either an individual or vessel SPL. The cost of a blue crab endorsement fee is $125 for a hard shell endorsement, $125 for a soft shell endorsement and $25 for the incidental take endorsement. Endorsements must be renewed by September 30. From these endorsement fees, $25 is dedicated to the trap retrieval program with the retrieval fee waived for up to 5 traps retrieved during trap retrieval. Traps retrieved during closed season by FWC will be assessed a retrieval fee of $10 per trap. Commission issued blue crab trap tags will be required on blue crab traps an annual fee of 50 cents per trap tag and can be ordered in increments of 50. Leasing or renting of endorsements, tags or traps is prohibited. Blue crab endorsements will be transferable from May 1, through the end of February, but the buyer must purchase the endorsement and trap tags. The buyer must also work no fewer than 14 days fishing blue crab on the buyer’s/endorsement holder’s vessel and document this activity at the time of transfer. Requalification: Beginning with license year 2010/2011, the holder of a blue crab effort management endorsement must requalify for the endorsement number by documenting landings in at least one of the three previous license years. Each endorsement number will then be valid for three years from the date of requalification, but must still be renewed annually.

A hard crab (VH) endorsement is required to harvest commercial quantities of hard shell blue. A VH endorsement entitles the owner to fish up to 600 inshore blue crab traps, and an additional 400 traps offshore in the Gulf of Mexico, per endorsed SPL. A total of 150 soft crabs per endorsed SPL may be landed daily as bycatch. Fishermen can maintain as many as three shedding tanks without possessing a soft shell crab endorsement.

A soft crab (VS) endorsement is required to harvest commercial quantities of soft shell crabs. A VS endorsement allows up to 400 peeler traps to be fished and allows the holder to operate a blue crab shedding facility with greater than 3 shedding tanks. Entities with more than one qualifying SPL are entitled to receive up to 250 additional traps per additional endorsed SPL.

A hard crab (VN) endorsement is a nontransferable blue crab endorsement that allows the endorsement holder to deploy 100 hard shell blue crab traps in any state waters where blue crab traps are allowed. A total of 150 soft crabs per endorsed SPL may be landed daily as bycatch. Fishermen can maintain as many as three shedding tanks without possessing a soft crab endorsement. The non-transferable blue crab endorsement cannot be sold or otherwise transferred. If the holder of a VN endorsement purchases a VH endorsement the non-transferable endorsement shall be forfeited.

A blue crab (VI) incidental take endorsement allows persons possessing a valid stone crab endorsement or persons who can demonstrate landings of blue crabs as bycatch using legal shrimping gear, to harvest and sell up to 200 pounds of blue crabs as bycatch, provided the amount does not exceed 200 pounds of blue crabs per vessel per trip.

There are six regional closed seasons to the harvest of blue crabs with traps to help clean up Florida’s waters. Traps that remain in the water will be removed and disposed of by FWC.

The dates and locations of the closures are:
- All waters of the St. Johns River system from Jan. 16–25*
- All other coastal waters from the Georgia/Florida state line south through Volusia County from Aug. 20–29**
- All waters of Brevard through Palm Beach counties from Aug. 10–19**

* All waters of the St. Johns River, its associated lakes and tributaries from west of the St. Johns River’s intersection with the Intracoastal Canal through and including Lake Hellen Blazes

** Except all waters of the St. Johns River system

Blue crab closures that occur in odd years:
- All waters of Broward through Pasco Counties from July 10–19
- All waters of Hernando through Wakulla Counties including all waters Ochlockonee River and Bay from July 20-29
- All waters of Franklin County to the Florida/Alabama state line from Jan. 5–14

Trap theft or molestation is a felony crime; penalties include permanent loss of license and trap certificates in addition to court assessed penalties.
STONE CRAB

Size and bag limits, closed seasons and license requirements are found in the chart on pages 16-22. An SPL with a Restricted Species (RS) and Stone crab (X#) endorsement is required to commercially harvest and sell any stone crab. Only legal sized claws may be possessed, transported, or sold. Crabs must be kept alive and damp in containers that do not compress them until the claws can be removed. Transport of intact stone crabs or bodies is prohibited. Spears, grains, grabs, or hooks that can puncture or crush crabs are prohibited. Removal of claws from egg-bearing females is prohibited.

Trap certificates and tags are required for all stone crab traps. A valid tag must be securely attached to each trap. Stone crab trap specifications and trap, buoy, and vessel marking requirements apply. Traps, buoys, and vessels must display the X#. Traps must be constructed of wood, plastic, or wire and be no larger than two feet by two feet or a volume of 8 cubic feet with the entrance (throat) located on a horizontal side of wire traps and on the top of wood and plastic traps. Each plastic trap must have a degradable panel. Each wire trap must have at least three unobstructed escape rings (2 3/8” inside diameter) located on a vertical side of the trap as specified in rule. Refer to the official rules before building or buying traps. Traps may be worked during daylight hours only. Traps may be baited and placed in the water 10 days before the season begins.

Stone crab traps are prohibited in all navigation channels of Inland Coastal Waterways or channels marked by the U.S. Army Corp of Engineers, USCG, state, county or local governments. Pulling another person’s trap without express consent of the owner and FWC Law Enforcement is prohibited. Traps must be removed from the water within 5 days after the end of the season.

SPINY LOBSTER (CRAWFISH)

Size limits and closed seasons are found in the “Basic Commercial Saltwater Fishing Regulations” chart on pages 16-22.

An SPL with a Restricted Species (RS) and Crawfish (C#) or (CD#) endorsement is required to commercially harvest and sell any spiny lobster.

Additional requirements apply to harvest by diving and with traps.

Spiny lobster retained as an incidental bycatch in a net or trawl other than a hand-held net may not exceed five percent of the total whole weight of all species possessed (all license requirements apply). Spiny lobster may only be sold by or purchased from persons who hold the required licenses and endorsements. A federal permit is required to possess “wrung” tails in or on state waters. Tails must be at least 5 1/2 inches in length (not including muscle tissue). Possession of undersized lobster is prohibited, except as provided for in the Spiny Lobster Trap Fishery section below. Undersized lobster may not be sold. Possession of any egg-bearing lobster is prohibited. Use of any device that could puncture or crush the lobster is prohibited.

The vessel limit for harvest with a bullynnet is 250 lobster per vessel per day statewide.

**Spiny Lobster Trap Fishery**

Trap certificates and tags are required for all traps. A valid tag must be securely attached to each trap. Spiny lobster trap specifications and trap, buoy, and vessel marking requirements apply. Traps, buoys, and vessels must display the C#. Traps must be constructed of wood or plastic and be no larger than three feet by two feet by two feet or the volumetric equivalent (12 cubic feet) with the entrance (throat) located on top of the trap. Each plastic trap must have a degradable panel. Refer to the official rules before building or buying traps. Traps may be baited and placed in the water beginning Aug. 1. Traps may be worked during daylight hours only. Traps may not be placed within 100 feet of the intercoastal waterway or any bridge or seawall. Pulling another person’s trap without the express written consent of the owner and FWC Law Enforcement is prohibited. Traps must be removed from the water by April 5 each year. Spiny lobster trap specifications and trap, buoy, and vessel marking requirements apply. The allowance for shorts applies to the trap fishery only and sale is prohibited.

**Spiny Lobster Dive Fishery**

All vessels used by persons commercially harvesting lobster by diving, scuba or snorkel must display the Commercial Dive Permit (CD#) on the vessel. A dive permit was issued to divers with trip ticket landings between July 1, 2000 and June 30, 2003. Trap certificates cannot be held by a person with a CD#. No dive permits will be issued, renewed or replaced except those that were active in 2004-05. Dive permits not renewed by September 30, of each year are forfeited to the FWC.

A 250 lobster per day vessel limit applies in Broward, Dade, Monroe, Collier and Lee counties and adjoining federal waters. Divers must permanently and conspicuously display a “divers down flag” placard on the vessel and affix the CD# to the diagonal stripe with 10” numbers visible from the air and 4” numbers visible from the water. Harvest from artificial habitat is prohibited. Divers must possess a carapace measuring device and measure lobster in the water. The use of bleach or chemical solutions or simultaneous possession of spiny lobster and any plastic container capable of ejecting liquid is prohibited. The recreational bag limit applies when diving at night.
Shellfish may only be harvested from waters certified by the Department of Agriculture and Consumer Services (DACS) as open for harvest. The DACS is authorized to describe, open and temporarily close any shellfish harvesting area. Vessels used to harvest shellfish must have a portable or U.S. Coast Guard approved marine sanitation device with a holding tank and any through valve shut and fixed in a closed position. All vessels must have false bottoms and bulkheads fore and aft to prevent contact with bilge water. The presence of dogs or other animals on vessels is prohibited. Additional shellfish handling and area water quality requirements apply. Refer to Chapter 5-L, F.A.C.

Unauthorized harvest is prohibited within a distance of 25 feet from the lawfully marked lease boundaries or within the setback and access corridors within specifically designated high-density aquaculture lease areas and aquaculture lease areas and aquaculture use zones.

*Apalachicola Bay includes St. George Sound, East Bay, Apalachicola Bay, and St. Vincent Sound and their canals, channels, rivers, and creeks; and Indian Lagoon and its canals, channels, rivers, and creeks.

### Hard Clam Regulations

Unless otherwise stated below, the basic statewide clam size and bag limits, closed season and gear restrictions are listed in the chart on page 16. Clams may only be harvested from waters certified by DACS as open for harvest.

There is a three percent (by count) per bag allowance for undersized clams. The possession of unsorted clams aboard vessels underway is prohibited. Harvest is prohibited between one-half hour after sunset and one-half hour before sunrise (this restriction does not apply to properly permitted dredge operations).

Vessel engines must be turned off during manual use of gear. Use of rakes, dredges, or mechanical devices is prohibited in grass beds and pulling such gear under power is prohibited except under a Special Activity License. Vessels must be equipped with shades to shield clams from the sun and cull boards or racks with unobstructed clear space to allow undersized clams to fall through. Undersized clams must be immediately returned alive to the place where taken.

In Apalachicola Bay, clams may only be harvested by hand, diving, swimming, or leaning from vessels, wading, and by tongs. The use of a dredge is prohibited. In Brevard County, divers must be certified. Harvest is prohibited within 75 feet of the Indian River, any canal bank, or any privately owned submerged lands, or dock without written permission of the owner. In Volusia County, oysters harvested from an approved public bar may not be stockpiled onto a lease.

**Chart Key**

- ▲ Must remain in whole condition until landed ashore (head & tail intact)
- † Harvest prohibited by or with the use of any multiple hook in conjunction with live or dead natural bait or any snatch hook.
- **TL** = total length measure; Tip of snout to tip of tail.
- **FL** = fork length measure; Tip of snout to fork of tail.
- * A Saltwater Products License (SPL) is required for commercial harvest and sale of all saltwater products. Additional Licenses, Permits, and Endorsements may also be required. See: Commercial Saltwater Fishing License Requirements
- **AP** = Dept. of Agriculture and Consumer Services Apalachicola Bay Oyster harvesting license.
- **C#** = crawfish endorsement required.
- **CD#** = commercial dive permit required to harvest spiny lobster for commercial purposes by diving.
- **DS#/LS#** = in St. Johns River, food shrimp or live shrimp production license required (moratorium in place for DS).
- **FP** = federal permit.
- **I#** = incidental catch endorsement required to sell up to 5 gallons of stone crab claws harvested in lawful commercial blue crab and spiny lobster traps by persons who hold a C# and/or V# and no X#.
- **L#** = lampara net endorsement required to harvest more than 10 gallons of Ballyhoo per vessel per day.
- **MLD#, MLB#, MLN#** = marine life endorsement required to species designated as “Marine Life” including “Live Shellfish” species such as urchins, starfish, star snails, sand dollars.
- **P#** = pompano endorsement applies to Cape Sable-Hurricane Pass area federal gill net fishery only.
- **Q#** = sponge endorsement.
- **RS** = restricted species endorsement.
- **TB#** = in Tampa Bay, food shrimp production license required (moratorium in place).
- **VH#, VS#, VN#, VI#** = blue crab endorsements required to sell or harvest blue crab, harvest in commercial quantities, or harvest with more than 5 traps.
- **X#** = stone crab endorsement.

</tr>
</tbody>
</table>

‡ Boxes must have rectangular or square sides, a base and lid with a dimension no larger than 4.25 feet by 2 feet by 2 feet (the volume equivalent of 17 feet³).

Baitfish Regulations

Basic size and bag limits, closed seasons, license requirements, and gear allowances are listed on pages 5 and 6. All license requirements and general commercial fishing limitations apply to species harvested as baitfish. Local limitations also apply to the use of nets to harvest baitfish, such as herring, menhaden, or sardines, in waters off the coasts of Citrus, Hernando, Pasco, Pinellas, Hillsborough, Manatee, Charlotte, Collier, Lee and Sarasota counties. Contact the regional FWC Law Enforcement Office before using nets to commercially harvest baitfish. See: FWC Law Enforcement Regional Offices on page 3.

A National Marine Sanctuary Permit is required to harvest ballyhoo or herring in the Newfound Harbor Key, Cheeca Rocks, Eastern Dry Rocks, Hens and Chickens, Rock Key and Sand Key sanctuary preservation areas (SPAs). All bycatch other than ballyhoo, balao, halfbeaks, or herring must be returned to the water alive. Lampara nets are prohibited in the Florida Keys National Marine Sanctuary (FKNMS) Newfound Harbor Key SPA, and cast nets used in Newfound Harbor Key SPA can be no greater than 500 square feet in area (12’7” radius). Cast nets and/or modified lampara nets that are no greater than 500 square feet in area may be used in the Sand Key, Rock Key, Eastern Dry Rocks, Hens and Chickens, and Cheeca Rocks SPAs. Contact with or disturbance of the seabed is prohibited in the SPAs. Harvest of baitfish by hook and line in the Newfound Harbor Key, Cheeca Rocks, Eastern Dry Rocks, Hens and Chickens, Rock Key and Sand Key SPAs is prohibited.

“Marine Life” Regulations (Tropical/Ornamentals)

Marine Life Chart on Page 15

Florida’s commercial marine life fishery involves harvest of live saltwater finfish, invertebrates and plants, primarily for the aquarium trade. These organisms are landed and sold alive to wholesalers, retailers and aquarium owners. An SPL with a Restricted Species (RS) and Marine Life tiered endorsement is required for harvest of marine life species listed in rule 68B-42, F.A.C.

Marine Life Transferable Dive (MLD)

Required to harvest commercial quantities of listed marine life species using allowable gears, including harvest by diving. Initially issued to applicants with a reported income of at least $5000 from landings of marine life species or live rock during one of the license years between July 1, 1999 and June 30, 2003. The MLD is transferable to another person with an SPL & RS. Requalification for this endorsement begins in 2010/2011, based on prior years landings.

Marine Life Bycatch Endorsement (MLB)

Required to harvest commercial quantities of marine life as bycatch which does not include harvest by diving. For persons who collected marine life primarily as bycatch in other fisheries, with gear other than diving gear, and with reported sales of less than $5000 during one of the qualifying years. The bycatch endorsement is also transferable.

Marine Life Non-Transferable Dive (MLN)

Required to harvest commercial quantities of marine life by diving using dive gear for persons who had less than $5000 in marine life landings or held a state live rock lease or federal live rock permit during one of the qualifying years and wish to harvest by diving. This endorsement is only transferable to immediate family members in the event of death or disability.
The following species may not be commercially harvested and/or sold in Florida.

Commerically Prohibited Species

The prohibition on the sale of warsaw grouper and speckled hind does not apply to legally imported fish or fish harvested from federal waters.

Possession, harvest, destruction, and sale of fresh, uncleaned, or uncured sea fan, hard or stony coral or fire coral is prohibited (does not apply to such species harvested outside state waters or adjacent federal waters and lawfully entering the state through interstate or international commerce and with acceptable proof of origin documenting the initial place of harvest and original sales transaction).

The prohibitions on the harvest and possession of live queen conch apply to Florida registered vessels in adjacent federal waters, but not to queen conch shells that are empty when collected. Licensed wholesale or retail dealers may possess conch meat when documentation is present to show that such meat was legally imported from a foreign country. Possession of shells with an off-center hole larger than 1/16 inch in diameter through the spire is prohibited in or on the waters of Florida.

Simultaneous possession of bay scallops and any trawl, drag, dredge or net other than a landing dip net is prohibited. Documentation on scallops harvested out-of-state and entering the state in interstate commerce must be maintained and presented upon request.

Industry Input is Key to Fishery Management

Feedback offered by one fisherman or dealer can make a difference. Fishermen who cannot attend Commission meetings are encouraged to send comments to the Commission and to respond to questionnaires. The Division of Marine Fisheries Management Commercial Outreach Program can be reached by phone at 850-617-9629 or by e-mail at daniel.ellinor@myfwc.com or look for updates on the web at MyFWC.com.

Buy your license online!
When you buy your license online, it’s fast, convenient and saves time and travel.

You can obtain a license 24 hours a day at GoOutdoorsFlorida.com and begin fishing immediately!

Licenses are also available toll-free at 1-888-FISHFLORIDA (1-888-347-4358). Processing fees apply to telephone and Internet sales.
Introduction
This publication is provided as a guide to Florida fishing laws and regulations. The Florida Administrative Code is the final authority on fishing laws. The Florida Fish and Wildlife Conservation Commission (FWC) strives to ensure information in this booklet is accurate, but assumes no liability for any errors that occur in this publication. Contact the FWC if you have any questions on issues not covered in this booklet. A continuously updated electronic version of this publication is available at MyFWC.com/Fishing by clicking on “Saltwater” and “Recreational Regulations.”

How your license fee helps
The money collected from saltwater fishing licenses is used to improve and restore fish habitat and for marine fisheries research, law enforcement and public education on marine resources. An additional $.50 fee will be charged for any license or permit not purchased directly from the county tax collector. Obtain immediate license privileges, 24 hours a day, at GoOutdoorsFlorida.com or by calling toll-free 888-FISH-FLORIDA (347-4356). Processing fees will apply to telephone and Internet sales.

2016 Commission meeting dates and locations
Subject to change due to availability of appropriate facilities to hold the meeting.

- Sept. 8–9, 2016 — Amelia Island / St. Augustine
- Nov. 16–17, 2016 — St. Petersburg

For more information about Commission meeting dates, times, locations and agendas, visit MyFWC.com and click on “About” and “Commission Meetings” on the top of the page.

2016 Shows and Events
Visit the FWC booth at these upcoming events to pick up your copy of the Recreational Saltwater Fishing Regulations and Fishing Lines: Angler’s Guide to Florida’s Marine Resources. For more information call 850-487-0554 or visit MyFWC.com/Fishing and click on “Saltwater” and “Outreach and Education Programs.”

Shows and Expositions
- July 13, ICAST, Orlando
- October 8–9, Florida Sportsman Expo, Tampa
- October 22, FWRI’s Marine Quest, St. Petersburg

Kids' Fishing Clinics
- July 16, Palm Coast
- September 17, Sarasota
- November 5, Steinhatchee

Women's Fishing Clinics
Women’s Fishing Clinics will be held in March, April, May, and June. Dates and locations have not been determined at this time. Please see: MyFWC.com for more information or contact the FWC - Division of Marine Fisheries Management at: 850-487-0554.
THERE ARE PLENTY OF FISH IN THE SEA.

AND A GREAT CATCH IS ONLY MADE WITH THE RIGHT GEAR.

FROM THE BEST BRANDS IN RODS AND REELS TO LOW PRICES ON THE LATEST FISHFINDERS — ACADEMY HAS EVERYTHING YOU NEED FOR YOUR NEXT FISHING ADVENTURE.
MESSAGE FROM THE DIRECTOR

Snook like hook or snook like newk, no matter how you pronounce it, it’s iconic. It’s beloved. It is one of Florida’s favorite recreational fish.

Earlier this year, the Florida Fish and Wildlife Conservation Commission (FWC) began a conversation about snook when they hosted Snook Symposium VI in Orlando. The day-long discussion was open to the public and focused on snook management and research, including opportunities for improving snook management and the results of the 2015 stock assessment (the first assessment to fully evaluate the impacts of the 2010 cold kill).

The symposium was a success not only in terms of attendance and interest (more than 150 people attended the meeting, and 350 registered) but in the productive conversations that took place.

While ideas about how to manage snook in the future varied, it was clear that some concepts rose to the top for attendees. Many would like to see more attention paid to habitat conservation, maintaining the current higher than average management goal for snook populations, and managing snook for abundance.

Innovative ideas for future management were also explored such as managing snook by estuary.

So what is next? After the meeting, all those who registered were asked to fill out a follow up survey. From this, we plan to continue the conversation by pulling together a series of small groups based on user group (for example, fishing guides from South Florida, tourist industry leaders or recreational anglers). These groups will help fisheries managers better understand what is important to various stakeholder groups when it comes to the snook fishery.

These small group meetings will be followed by larger open to the public workshop to gather feedback on the recommendations developed.

The stock assessment was also recently finalized. And though several hundred thousand snook died statewide as a result of the cold kill, the assessment shows that catch rates for the snook populations have returned to pre-cold event levels and the populations on both coasts, while still recovering, are meeting management goals. The quick recovery demonstrates that FWC’s management efforts to date have been successful in building population resilience.

Let’s keep the conversation going so we can decide together how to manage this iconic fishery. Send your thoughts or questions to Marine@MyFWC.com. Keep up with the latest on snook management at MyFWC.com/Fishing by clicking on “Saltwater,” “Recreational Regulations” and “Snook.” For more information about snook research, go to MyFWC.com/Research, select “Saltwater” then “Saltwater Fish” and then click on “Snook.”

Know Your Management Zones

For most species, Florida’s recreational bag limits apply to all state waters off Florida, which extend out to 3 nautical miles on the Atlantic and out to 9 nautical miles on the Gulf. The maps below provide information regarding three species that have specific management zones where bag limits or rules vary by region. Great barracuda (map not included) also has a new bag limit of two fish per person and six per vessel that applies within all state and federal waters off Collier, Monroe, Miami-Dade, Broward, Palm Beach and Martin counties. Barracuda is not specifically regulated in other areas.

Red Drum Management Zones

For red drum, there are three management zones. The daily bag limit is one fish in the northwest and south zones and two fish in the northeast zone.

Spotted Seatrout Management Zones

Spotted seatrout has four management zones and the recreational bag limit is six fish in the northeast region, five fish in the northwest region, and four fish in the southeast and southwest zones.

Blue Crab Trap Closures

The blue crab trap closure map identifies the regions and time-frames where recreational traps must be removed from the water or tied to private property. Crabbing can continue during a trap closure period with other legal gear or with traps that are attached to private property. For more information on trap closures please visit: MyFWC.com/Fishing/Saltwater/Recreational/Blue-Crab.
Hooked a Bird? Don’t Cut the Line!

If you are a fisherman, you may hook a seabird or wading bird by accident. Then what to do? First, don’t panic and cut the line! This is important. Because when a bird flies away with a hook and line attached, it often becomes entangled in trees. That can injure or kill the bird. And once the line is snared where birds roost, it can catch and kill even more birds.

If you hook a bird — or find one that is hooked or entangled — take these steps for safe rescue and release:

1. Reel the bird in slowly. Do not attempt to shake it loose, which can increase chances of injury. If you are on a pier or bridge, lift the bird from the water using a hoop net.
2. If the bird has swallowed the hook or is severely injured, contact a local wildlife rehabilitator. For wildlife rehabilitators in your area, call any of FWC’s five regional offices listed on page 5. Otherwise follow the steps below to unhook a seabird.
3. Wear safety glasses for protection and enlist a partner to help.
4. Grasp the bird by the head just behind the eyes and fold the wings against the body. For pelicans, hold the beak but keep the mouth slightly open so it can breath.
5. Cover the birds head with a cloth to keep it calm.
6. If the bird is hooked and the barb is exposed, either mash down the barb with pliers and back it out or cut off either end of the hook so it can be easily removed. If the tip and barb are not exposed, push the hook through so that it can be cut above the barb and removed.
7. If the bird is entangled, gently remove all line from the bird.
8. If the bird seems healthy, place it on the ground near the water and allow the bird to take off on its own.

How else can you help a seabird or wading bird?

1. Don’t feed the birds. Feeding birds teaches them to approach fishermen, where they are more likely to be hooked.
2. Birds also generally eat small fish whole and can easily digest small bones, but the bigger bones of a filleted fish can tear throats, stomachs and intestines. Dispose of filleted bones where birds can’t get them — in a trash can with lid or at home.
3. Cover bait buckets.
4. Dispose of fishing line in a monofilament recycling bin or else cut into small pieces (3 inches or smaller) and place in the trash.
5. Don’t leave your line unattended.
6. Cast carefully to avoid being snared on trees, bridge piles, power lines or obstacles.
7. Help other fishermen learn what to do when they accidentally catch a bird. It’s pretty easy, once you know how.
Two new reward programs were approved by the FWC Commission in April 2016 and the competition officially started on May 14. These programs are designed to increase public awareness about the lionfish invasion, increase diver participation in removal efforts, and help reduce the number of lionfish in our waters.

“Innovative programs like these are a great way to generate public involvement and interest in controlling the lionfish population,” said FWC Chairman Brian Yablonski.

Statewide Program
The statewide “Lionfish Challenge” program started on May 14 and runs through Sept. 30, 2016. To qualify, participants must remove 50 or more lionfish. Under the program, participants can document their catch by submitting photographs electronically to FWC or by dropping off labeled bags of lionfish tails at one of the identified drop off locations. A list of drop off locations can be found at MyFWC.com/Lionfish.

Persons who reach 50 lionfish will receive a commemorative lionfish coin to mark their membership and a Lionfish Challenge t-shirt; be featured in the lionfish hall of fame on the MyFWC.com website; and be entered in drawings to win prizes including fishing licenses, diving equipment, fuel cards and tank fill cards. Those who qualify prior to the 2016 lobster mini-season (July 27–28, 2016) will also be eligible to take one additional lobster per day during the two-day season. For each additional 50 lionfish that are harvested, participants will receive one additional entry into the raffle.

The person who “checks in” the most lionfish between May 14 and Sept. 30 will be crowned Florida’s Lionfish King or Queen and will receive a lifetime saltwater fishing license and have his or her photograph on the cover of the January 2017 Florida Saltwater Regulations magazine. The King or Queen will also be recognized at the November 2016 Commission Meeting.

Pilot Program
A second program referred to as the “Panhandle Pilot Program” will focus on removal efforts in the Florida panhandle region from Escambia County to Franklin County. For every 100 lionfish harvested from waters off these seven counties between May 14, 2016, and May 20, 2017, the harvester will receive a tag that allows the harvest of an additional red grouper or cobia from state waters. All other recreational fishing regulations apply. FWC will issue a maximum of 100 red grouper tags and maximum of 30 cobia tags to successful participants in the pilot program on a first come first served basis. In addition, the first 10 participants or groups to harvest 500 or more lionfish during the program will be given the opportunity to name one of Florida’s artificial reefs.

Unlike the statewide program, photo documentation will not be allowed for fish entered under the Pilot program. Tails of fish to be entered under the pilot program must be brought to one of the identified locations in a panhandle county.

Whether you are a casual recreational diver or hard core tournament competitor, these programs are a great opportunity to get involved in Florida’s lionfish removal efforts. Please visit MyFWC.com/Lionfish for program instructions and additional information.
### Snapper

**General Snapper Regulations:**
- Within state waters of the Atlantic and Gulf, the snapper aggregate bag limit is 10 fish per harvester unless the species rule specifies that it is not included in the aggregate. This means that a harvester can retain a total of 10 snappers in any combination of species. Exceptions are noted below.
- If no season information is included, the species is open year-round.

#### Snapper, Cubera ▲ ●
- **Minimum Size Limits:** Atlantic and Gulf - 12" (see remarks)
- **Daily Recreational Bag Limit:** Atlantic and Gulf - 10 per harvester
- **Remarks:** May possess no more than 2 over 30" per harvester or vessel per day, whichever is less. 30" or larger not included within the snapper aggregate bag limit.

#### Snapper, Red ▲ ●
- **Minimum Size Limits:**
  - Atlantic: 12"
  - Gulf: 16"
- **Season:** Open year-round
- **Daily Recreational Bag Limit:**
  - Atlantic: 5 per harvester
  - Gulf: 10 per harvester
- **Remarks:** Not included within the snapper aggregate bag limit.

#### Snapper, Vermilion ▲ ●
- **Minimum Size Limits:**
  - Atlantic: 12"
  - Gulf: 10"
- **Season:** Open year-round
- **Daily Recreational Bag Limit:**
  - Atlantic: 5 per harvester
  - Gulf: 10 per harvester
- **Remarks:** Not included within the snapper aggregate bag limit.

#### Snapper, Gray (Mangrove) ▲ ●
- **Minimum Size Limits:** Atlantic and Gulf - 10"
- **Daily Recreational Bag Limit:** Atlantic and Gulf - 5 per harvester

### All Other Snapper ▲ ●

#### Minimum Size Limits:
- Atlantic and Gulf - 12"

#### Daily Recreational Bag Limit:
- Atlantic and Gulf - 10 per harvester

#### Remarks:
- Includes: Blackfin, Dog, Mahogany, Queen, Silk and Yellowtail

### Grouper

**Atlantic Grouper General Regulations:**
- Atlantic grouper regulations apply to all state waters of the Atlantic and all state waters off Monroe County (Gulf and Atlantic sides).
- Atlantic grouper aggregate bag limit is 3 fish, which means that no harvester shall retain more than 3 Atlantic groupers in any combination of species.

#### Grouper, Black ▲ ●
- **Minimum Size Limits:**
  - Atlantic: 24"
  - Gulf: 24"
- **Season:**
  - Atlantic: Closed Jan. 1-April 30
  - Gulf: Open year-round
- **Daily Recreational Bag Limit:**
  - Atlantic: 1 per harvester
  - Gulf: 4 per harvester

#### Grouper, Scamp ▲ ●
- **Minimum Size Limits:**
  - Atlantic: 20"
  - Gulf: 16"
- **Season:**
  - Atlantic: Closed Jan. 1-April 30
  - Gulf: Open year-round
- **Daily Recreational Bag Limit:**
  - Atlantic: 3 per harvester
  - Gulf: 4 per harvester

### Gulf Grouper General Regulations:
- Gulf grouper regulations apply to all state waters of the Gulf except off Monroe County (where Atlantic rules apply).
- Gulf grouper aggregate bag limit is 4 fish which means that no harvester can retain more than 4 Gulf grouper in any combination of species.
- Zero bag limit for captain and crew of for-hire vessels applies to gag, black, and red grouper only.

#### Grouper, Snowy ▲ ●
- **Minimum Size Limit:** Atlantic and Gulf - None
- **Daily Recreational Bag Limit:**
  - Atlantic: 4 per harvester
  - Gulf: 1 per person

#### Grouper, Red ▲ ●
- **Minimum Size Limit:**
  - Atlantic and Gulf: 20"
- **Season:**
  - Atlantic: Closed Jan. 1-April 30
  - Gulf: Open year-round
- **Daily Recreational Bag Limit:**
  - Atlantic: 3 per harvester
  - Gulf: 2 per person

#### Gag Grouper ▲ ●
- **Minimum Size Limits:**
  - Atlantic: 24"
  - Gulf: 24"
- **Seasons:**
  - Atlantic: Closed Jan. 1-April 30
  - Gulf: State waters off Franklin, Wakulla, Jefferson and Taylor counties: Open April 1-June 30
  - Gulf: State waters off all other counties: Open June 1-Dec. 31
- **Daily Recreational Bag Limit:**
  - Atlantic: 1 per harvester
  - Gulf: Only 1 fish can be gag, black, or red

### Other Grouper ▲

#### Other Grouper includes:
- Tiger, Rock Hind, Red Hind, Coney and Graysby
- **Minimum Size Limit:**
  - Atlantic and Gulf: 20"
- **Season:**
  - Atlantic: Closed Jan. 1-April 30
  - Gulf: Open year-round
- **Daily Recreational Bag Limit:**
  - Atlantic: 3 per harvester
  - Gulf: 4 per harvester
Reef Fish

Other Reef Fish (If no season information is provided, the species is open year-round)

Amberjack, Greater ▲ ●
Minimum Size Limits:
• Atlantic - 28” fork length
• Gulf - 34” fork length
Season:
• Atlantic - Open year-round
• Gulf - Closed June 1–July 31
Also closed Sept. 10–Dec. 31, 2016
Daily Recreational Bag Limit:
• Atlantic and Gulf - 1 per harvester
Remarks
• 1 per harvester per day aggregate bag limit

Amberjack, Lesser & Banded Rudderfish ▲ ●
Minimum Size Limits:
• Atlantic and Gulf - Cannot be less than 14” or greater than 22” fork length
Daily Recreational Bag Limit:
• Atlantic and Gulf - 5 per person aggregate of the two species

Black Sea Bass ▲ ●
Minimum Size Limits:
• Atlantic - 13”
• Gulf - 10”
Daily Recreational Bag Limit:
• Atlantic - 5 per harvester
• Gulf - 100 pounds per harvester

Triggerfish (Gray) ▲ ●
Minimum Size Limits:
• Atlantic - 12” fork length
• Gulf - 14” fork length
Season:
• Atlantic - Open year-round
• Gulf - Closed June and July and may remain closed until Jan. 1, 2017. Check MyFWC.com for current information
Daily Recreational Bag Limit:
• Atlantic - 10 per harvester
• Gulf - 2 per harvester

Red Porgy ➠
Minimum Size Limits:
• Atlantic - 14”
• Gulf - None
Daily Recreational Bag Limit:
• Atlantic - 3 per harvester
• Gulf - 100 pounds

Tilefish, Golden ➠
Daily Recreational Bag Limit:
• Atlantic - 1 per harvester
• Gulf - 4 per harvester
Remarks
• Golden tilefish included within Atlantic and Gulf Grouper aggregate bag limits

Great Barracuda ➠
Minimum Size Limits:
• None
Daily Recreational Bag Limit:
• Atlantic and Gulf - None

Pelagics

Billfish ▲
Minimum Size Limits:
• Sailfish 63”
• Blue Marlin 99”
• White Marlin 66”
• Roundscale Spearfish 66”
Daily Recreational Bag Limit:
• 1 per harvester per day aggregate bag limit
Remarks
• Measured tip of lower jaw to fork. All landed fish must be reported to NOAA within 24 hours of recovery. 800-894-5528 or hmspermits.noaa.gov.
• HMS permit required in federal waters.

Swordfish ▲
Minimum Size Limits:
• 47” lower jaw fork length with head attached or 29” cleithrum to keel length if head removed
Daily Recreational Bag Limit:
• 1 per harvester per day, not to exceed a maximum of 4 per recreational (not for-hire) vessel or 15 per for-hire vessel per day
Remarks
• All landed fish must be reported to NOAA within 24 hours 800-894-5528 or hmspermits.noaa.gov. HMS permit required in federal waters. Zero daily bag and possession limit for captain and crew of for-hire vessels.

Cobia (Ling) ▲
Minimum Size Limits:
• 33” fork length
Daily Recreational Bag Limit:
• 1 per harvester per day, not to exceed 6 per vessel per day

Mackerel, King ▲
Minimum Size Limits:
• 24” fork length
Daily Recreational Bag Limit:
• 2 per harvester per day
Remarks
• Bag limit reduced to 1 in some state waters if federal waters are closed to recreational harvest.

Mackerel, Spanish ▲
Minimum Size Limits:
• 12” fork length
Daily Recreational Bag Limit:
• 15 per harvester per day

Wahoo ▲
Minimum Size Limits:
• None
Daily Recreational Bag Limit:
• 2 per harvester per day

Tripletail ▲ ●
Minimum Size Limits:
• 15”
Daily Recreational Bag Limit:
• 2 per harvester per day
Remarks
• Hook and line only. No snatch hooks.

Dolphinfish ▲
Minimum Size Limits:
• Atlantic - 20” fork length
• Gulf - None
Daily Recreational Bag Limit:
• 10 per harvester per day, not to exceed 60 per vessel per day. Vessel limit does not apply to for-hire vessels.

Scan this code with your mobile device to view the regulations online. Buy your license online at GoOutdoorsFlorida.com or toll free at: 1-888-347-4356. Report fish and wildlife law violations toll free at: 1-888-404-3922.
Coastal Species

Bluefish

Minimum Size Limits:
- 12" fork length

Daily Recreational Bag Limit:
- 10 per harvester per day

Blue Runner

Minimum Size Limits:
- No minimum

Daily Recreational Bag Limit:
- 100 fish per harvester per day

Bonefish

Daily Recreational Bag Limit:
- 0 per harvester per day

Remarks
- Catch and release only
- Hook and line only

Pompano, African

Minimum Size Limits:
- 24" fork length

Daily Recreational Bag Limit:
- 2 per harvester per day, not to exceed 2 per vessel per day

Sheephead

Minimum Size Limits:
- 15" per harvester per day

Daily Recreational Bag Limit:
- Snatching prohibited

Weakfish

Minimum Size Limits:
- Weakfish Management Area (WMA) in Nassau County - 12"
- All other areas - no minimum

Daily Recreational Bag Limit:
- WMA - 1 per harvester
- All other areas - 100 pounds per day

Remarks
- Regulations apply in parts of Nassau County only.
- See map at: MyFWC.com/Fishing/Saltwater/Recreational/Weakfish

Snoek

Minimum Size Limits:
- Not less than 28" or more than 32" Atlantic excluding Monroe
- Not less than 28" or more than 33" Gulf and Monroe County

Closed Season:

Daily Recreational Bag Limit:
- 1 per harvester per day

Remarks
- Snook permit required for harvest when saltwater license required. See MyFWC.com for snook permit details. Snatch hooks and spearing prohibited.

Spotted Seatrout

Size Limits:
- Not less than 15" or more than 20" (See remarks)

Daily Recreational Bag Limit:
- 5 per harvester per day N.W. Zone
- 4 per harvester per day S.W. Zone
- 4 per harvester per day E. Zone
- 4 per harvester per day N.E. Zone

Remarks
- May possess no more than 1 over 20"; included in the regional bag limit. See management zone map at MyFWC.com.

Permit

Minimum Size Limits:
- 22" fork Special Permit Zone (SPZ); Not less than 11" or more than 22" fork length all other areas

Closed Season:
- May 1-July 31 SPZ Only

Daily Recreational Bag Limit:
- 1 per harvester per day, not to exceed 2 per vessel per SPZ;
- 2 per harvester per day all other state waters

Remarks
- May possess over 22" fork length outside the SPZ, not to exceed 2 over 22" fork per vessel per day. For map of SPZ, please see: MyFWC.com.

Can’t find your fish in the regulations?

Florida’s coastal waters are home to thousands of marine species, and the majority of these species have no specific regulations with regard to bag limits, size limits, gear restrictions or closed seasons. These species are often referred to as “unregulated species,” although the name can be a bit misleading. State law provides that for any marine species that does not have specific regulations, harvesting more than 100 pounds or two fish (whichever is the greater amount) constitutes a commercial quantity and requires a commercial license. This means the recreational harvest limit for any unregulated species is 100 pounds or two organisms if the combined weight of the two organisms exceeds 100 pounds.

- Must remain in whole condition (removal of gills and guts allowed).
- Measured as total length. Total length is the straight line distance from the most forward part of the head with the mouth closed to the farthest tip of the tail with the tail compressed or squeezed together while the fish is lying on its side.
- State regulations apply in federal waters.
- Additional gear rules apply, please see: MyFWC.com
- Harvest prohibited by or with the use of any multiple hook (any hook with two or more points and a common shaft) in conjunction with live or dead natural bait.

Examples of "unregulated species" include:
- Ladyfish, bonito, menhaden, white grunt, southern stingray, gulf kingfish (whiting), pinfish, Atlantic croaker, jack crevalle, cero mackerel, hardhead catfish, gafftopsail catfish and blackfin tuna.
This publication is provided as a guide to Florida fishing laws and regulations. The Florida Administrative Code is the final authority on fishing laws. The Florida Fish and Wildlife Conservation Commission (FWC) strives to ensure information in this booklet is accurate, but assumes no liability for any errors that occur in this publication.

### Crustaceans and Mollusks

#### Bay Scallops
- **Season:** Open June 25–Sept. 24, 2016
- **Daily Recreational Bag Limit:** 2 gallons whole or 1 pint meat per harvester per day; no more than 10 gallons whole, or ½ gallon meat per vessel anytime
- **Remarks:** Harvest allowed only in state waters of the Gulf of Mexico from a line drawn from the Pasco-Hernando county line, to the west bank of the Mexico Beach Canal in Bay County. It is illegal to harvest, possess and land bay scallops on waters outside open harvest area.
  - Changes possible – Check MyFWC.com

#### Spiny Lobster
- **Minimum Size Limit:** Carapace must be greater than 3” measured in the water
- **Seasons:** Sport Season Open July 27–28, 2016
  - Regular Season Opens March 1, 2017
- **Daily Recreational Bag Limit:** 1 per harvester or 2 per vessel per day, whichever is less
- **Remarks:** Recreational trapping prohibited. Spiny lobster permit required when license required. Harvest of egg-bearing females prohibited.
  - Go to www.FloridaAquaculture.com for allowable harvesting areas.

#### Crab, Stone
- **Minimum Size Limits:** 2 ¼” claw
- **Closed Season:** May 16–Oct. 14
- **Daily Recreational Bag Limit:** 5 gal. claws per harvester or 2 gal. per vessel, whichever is less
- **Remarks:** 5 traps maximum. Visit MyFWC.com for statewide trap construction requirements and specific requirements that apply in Miami-Dade, Monroe and Collier. Illegal to possess whole crab. Harvest of egg-bearing crabs prohibited.

#### Clams (Hard)
- **Minimum Size Limits:** 1” thick across hinge
- **Daily Recreational Bag Limit:** One 5 gal. bucket per harvester or 2 per vessel (whole in shell)
- **Remarks:** Illegal to harvest from closed areas.
  - Go to www.FloridaAquaculture.com for allowable harvesting areas.
  - Harvest prohibited in any harvest area that is in the Closed status as determined by the Florida Department of Agriculture and Consumer Services.

#### Crab, Blue
- **Closed Season:** Regional trap closures apply. See MyFWC.com for 2016 trap closure dates and locations.
- **Daily Recreational Bag Limit:** 10 gallons whole per harvester per day
- **Remarks:** 5 traps maximum. Trap requirements apply. Harvest of egg-bearing crabs prohibited.

#### Oysters
- **Minimum Size Limit:** 3”
- **Closed Season:** June, July, Aug. in Dixie, Wakulla, Levy counties.
  - July, Aug., Sept. in all other areas except Apalachicola Bay which has open areas year-round.
- **Daily Recreational Bag Limit:** 2 bags per harvester or vessel except Apalachicola Bay
- **Remarks:** Apalachicola Bay: special bag limits and other harvest restrictions apply. See MyFWC.com for detailed information.

### Sharks

#### Daily Recreational Bag Limit:
- 1 per harvester or 2 per vessel per day, whichever is less.
- The retainable sharks are managed as a group for bag limit purposes. In other words, you can only harvest one shark per day and the shark that you harvest must be one of the retainable species.
- **Remarks:**
  - Hook-and-line gear only.
  - See list of prohibited species below.

#### Retainable Sharks with a 54” fork length minimum
- **Blue, oceanic whitetip, porbeagle, shortfin mako.**

#### Retainable Sharks with no minimum size limit
- **Atlantic Sharpnose**
- **Blacknose**
- **Bonnethhead**
- **Finetooth**
- **Blacktip**
- **Smooth Dogfish**

### Prohibited Species

It is unlawful to harvest, possess, land, purchase, sell or exchange the following species:

FWC – Division of Marine Fisheries Management, 2590 Executive Center Circle East, Tallahassee, FL 32301 Phone: 850-487-0554

This publication is provided as a guide to Florida fishing laws and regulations. The Florida Administrative Code is the final authority on fishing laws. The Florida Fish and Wildlife Conservation Commission (FWC) strives to ensure information in this booklet is accurate, but assumes no liability for any errors that occur in this publication.
Researchers are surgically implanting cobia with acoustic transmitters that give off signals, allowing each fish to be detected by an array of acoustic receivers found along the coast. Data collected will allow researchers to track cobia movements and help managers make informed decisions on the cobia fishery.

**What if I catch a tagged cobia?**
These cobia are marked with two external dart tags on their back. If you catch a tagged cobia please do NOT harvest it! Record the tag number, fork length, date and general location of catch; release the fish in good condition with tags still intact; and call 888-824-7472 to report the cobia and get a t-shirt. Releasing tagged cobia will allow them to continue gathering valuable data.

For the purpose of this study, we discourage the harvest of tagged cobia. If you accidentally harvest a tagged cobia, please report all information listed above AND return both the internal acoustic transmitter and plastic dart tags to FWC (Attn: Jim Whittington, Florida Fish and Wildlife Conservation Commission, Tequesta Field Laboratory, 19100 SE Federal Hwy. Tequesta, FL 33469). The internal acoustic transmitter can be found implanted just inside the body cavity on the underside of the fish.

**Other ways to get involved?**
You can further assist in this project by collecting fin clips from cobia caught on the east coast of Florida. Email Jim.Whittington@MyFWC.com or call 561-882-5975 to request a fin clip kit.

---

**Tagged Cobia Project Gathers Important Data on Fishery**

The Florida Fish and Wildlife Conservation Commission (FWC), along with other states and organizations, is using acoustic telemetry technology to gather data that will help shed light on wide-ranging cobia migrations and the geographical boundary of Atlantic and Gulf stocks.
Recreational gear

Additional regional gear restrictions may apply in your county. For further clarification, contact the local regional offices listed on page 5.

Reef fish gear rules

(applies to species marked with ● on pages 9–10)

- **Gulf of Mexico**: These regulations require the use of a dehooking device when recreationally fishing for reef fish in the Gulf of Mexico. All persons aboard a vessel harvesting reef fish must possess and use non-stainless steel non-offset circle hooks when using natural baits.

- **Atlantic Ocean**: Recreational and commercial fishers are required to use dehooking devices as needed while fishing for reef fish.

These rules apply to all members of the reef fish complex including groupers, snappers, amberjacks, red porgy, gray triggerfish, black sea bass, golden tilefish, banded rudderfish, speckled hind and others. For a complete species list, please visit MyFWC.com.

Hook-and-line gear

Hook-and-line anglers must tend their gear at all times to prevent people, marine life and shore life from becoming entangled in the line or injured by the hook. Also, it is against the law to intentionally discard any monofilament netting or line into or onto state waters. Monofilament line can entangle birds, marine mammals, marine turtles and fish, often injuring or killing them. Trot lines with 10 or fewer hooks are considered hook-and-line gear and must be tended at all times while deployed. Species identified with "T" on pages 9 through 12 cannot be harvested with multi-hooks (single hook with two or more points) in conjunction with natural baits.

Nets

The following types of nets may be used for recreational purposes in Florida waters:

- Bully nets (for lobster only) no greater than 3 feet in diameter and not made of monofilament.
- Frame nets and push nets (for shrimp only) no greater than 16 feet in perimeter and not made of monofilament. Frame nets cannot be used in state waters off Dade County.
- Hand-held landing or dip nets no greater than 96 inches in perimeter.
- Cast nets measuring 14 feet or less stretched length (stretched length is defined as the distance from the horn at the center of the net with the net gathered and pulled taut, to the lead line).
- Beach or haul seines measuring no larger than 500 square feet of mesh area, no larger than 2 inches stretched mesh size, not constructed of monofilament, and legibly marked at both ends with the harvester’s name and address if a Florida resident. Non-residents using beach or haul seines for recreational purposes are required to have a commercial saltwater products license and legibly mark the seine at both ends with the harvester’s saltwater products license number.
- Cast nets and seines may be used as harvesting gear for the following species only: black drum, bluefish, cobia, flounder, mullet, Florida pompano, red drum, sheepshead, shrimp, Spanish mackerel, spotted seatrout, weakfish and unregulated species (see p. 11).
- No more than two nets can be fished from any vessel and no more than one net can be fished by any person not on a vessel.

Explosives, etc.

The use of powerheads, explosives, chemicals or the discharge of firearms to kill or harvest marine life is prohibited in state waters.

Need to Know

On the Go?

The Florida Saltwater Fishing Regulations are now available online through your mobile devices!

www.eRegulations.com
**Spearing**

Spearing is a general term that includes bow fishing, gigging, spearfishing (underwater), or the use of any other device to capture a fish by piercing its body. Spearing does not include snagging or snatch hooking by hook and line. Marine species harvested by spearing are subject to the same recreational regulations (e.g., bag limits, size limits, and closed seasons) as those marine species that are harvested by any other type of recreationally-allowed gear. The following is a list of species or groups of species that are prohibited from harvest by all forms of spearing in state waters:

- All prohibited species (listed on p. 12)
- Billfish and swordfish (all species)
- Bonefish
- Crab (blue, stone)
- Caribbean spiny lobster (*Panulirus argus*)
- Permit
- Pompano (Florida and African)
- Red drum
- Sharks (all species including dogfish)
- Snook
- Spotted seatrout
- Tarpon
- Tripletail
- Weakfish
- Marine life species (listed on p. 18)

* Volusia County — You may not harvest by spearing in Volusia County inland waters with the exception of flounder and sheepshead, and only by the use of a barbed spear with three or fewer prongs.

* Special Local Laws also prohibit harvest by spearing in specific areas (Visit MyFWC.com/Fishing and select “Saltwater,” “Recreational Regulations,” “Full Text Rule by Species” and “Local Laws.”)

**Spearfishing**

Spearfishing is a specific form of “spearing” defined as “the catching or taking of a fish through the instrumentality of a hand or mechanically-propelled, single or multi-pronged spear or lance, barbed or barbless, operated by a person swimming at or below the surface of the water.” In addition to the harvest species limitations above, you may not spearfish:

- For any species that cannot be harvested by spearing (see Spearing above).
- For any species (freshwater or marine) in freshwater. Possession of spearfishing equipment in or on freshwater is also prohibited.
- Within the upper Keys no-spearfishing zone, which includes all state waters from the Miami-Dade County line down to and including Long Key.
- Within 100 yards of any designated public bathing beaches, commercial or public fishing piers, or portions of bridges where fishing is allowed.
- Within 100 feet of the unsubmerged portion of any jetty, except that spearfishing is allowed along the last 500 yards of any jetty that extends more than 1,500 yards from the shoreline.
- In or on any body of water under the jurisdiction of the Division of Recreation and Parks of the Department of Environmental Protection. Within these areas, the possession of spearfishing equipment is also prohibited except when such equipment is unloaded and is properly stored upon watercraft passing nonstop through the area.
- Within the no-take areas of the Florida Keys National Marine Sanctuary (Visit: www.floridakeys.noaa.gov.)
- Within any area where spearfishing is prohibited by a Special Local Law (Visit MyFWC.com/Fishing and select “Saltwater,” “Recreational Regulations,” “Full Text Rule by Species” and “Local Laws.”)

**Powerheads, Bangsticks, Rebreathers**

Harvest with the use of powerheads, bangsticks or rebreathers is prohibited in state waters, except that rebreathers are allowed for the harvest of lionfish. Within state waters, powerheads and bangsticks can be used for personal protection only, and cannot be used to harvest any species.
Catch a Florida Memory with FWC’s Saltwater Grand Slam Program

FWC’s Saltwater Grand Slams are a challenge to catch three specified fish species in a 24-hour period. This program entices anglers to learn more about Florida’s vast recreational fishing opportunities by encouraging them to target multiple species during fishing trips.

All catches, past and present, are eligible if they can be documented and photos of the angler properly holding each fish or in the picture with each fish are submitted.

Successful anglers will receive a certificate signed by the Director of FWC Marine Fisheries Management and the President of the International Game Fish Association, as well as a colorful shirt in recognition of their achievement. Recipients will also be listed in the Saltwater Recreational Fishing Regulations Booklet.

As always, FWC encourages responsible angling. Remember proper catch-and-release techniques when fishing. Anglers do not have to harvest fish to be eligible, and are encouraged to release catches alive.

The nine Grand Slams include:

- **Inshore Grand Slam:**
  - Red drum, spotted seatrout, flounder

- **Family Grand Slam:**
  - Any three fish in the same scientific family

- **Blue Water Grand Slam:**
  - Dolphinfish, sailfish, wahoo

- **Florida Grand Slam:**
  - Permit, tarpon, bonefish

- **Shoreline Grand Slam:**
  - Sheepshead, kingfish (whiting), Florida pompano

- **Reefs and Rubble Grand Slam:**
  - Black sea bass, gag, triggerfish

- **Nearshore Grand Slam:**
  - Cobia, tripletail, king mackerel

- **Bay and Estuary Grand Slam:**
  - Mangrove snapper, snook, Spanish mackerel

- **Small Fry Grand Slam:**
  - (15 and under): Pinfish, grunt, catfish

Be on the lookout for additional FWC Saltwater Angler Recognition Programs in the future, including the Saltwater Fish Life List (a challenge to catch over 70 different species of saltwater fish) and Reel Big Fish (recognition for extraordinarily-sized catches). These programs will recognize anglers for their fishing skills and help strengthen conservation ethics.

For more information or to apply for a Grand Slam, visit MyFWC.com/AnglerRecognition or email AnglerRecognition@MyFWC.com. Share your Grand Slam photographs and stories with us on social media by using #FWCSlam. We hope that you will participate and “Catch a Florida Memory!”

**Congratulations to these Grand Slam Certificate Recipients!**

**Inshore Grand Slam:**
- Robert Forbes
- Sherr D. Williams
- Ken Van Doren
- Patrick Kroboth
- Bryan Gold
- Tim Blue
- John Tait
- Samuel Lambert
- Ken Van Doren

**Family Grand Slam:**
- Steve Datkuliak
- Steve Meerman

**Bay and Estuary Grand Slam:**
- Christopher Rowell

Marine life regulations

**Requirements for marine life (aquarium species) harvest:**
- Recreational saltwater fishing license
- Organisms must be landed and kept alive
- A continuously circulating live well, aeration or oxygenation system of adequate size to maintain these organisms in a healthy condition

**Allowable Gear:** hand-held net, drop net, rod, barrier net, slurp gun (use of quinaldine is prohibited)*

**Bag Limit:** 20 organisms per person per day; only 5 of any one species allowed within the 20-organism bag limit

**Possession Limit:** 2-day possession limit, 40 total organisms, no more than 10 of any one species allowed

**Allowable substrate:** see species specifications in table

**Closed areas:** Some closed areas exist**

**Sale of recreationally caught marine life organisms is prohibited**

**Regulations apply in federal waters**

* Some organisms have additional gear limitations, see chart.

** Various closed areas exist. See regulations for Florida Keys National Marine Sanctuary, Everglades National Park, Biscayne National Park and Florida’s State Parks before collecting in these areas.

Additional rules apply to the collection of shells containing live organisms in Lee or Manatee counties.

---

1–Unless otherwise noted, combined bag limit of 20 marine life fish and invertebrates per person per day, only 5 of any one species allowed. A 2-day possession limit also applies (40 total organisms, only 10 of any one species).

2–Such as groupers, snappers, seabass and amberjacks. Must abide by regulations for these species on pages 9–10.

3–Bag limit of 2 live shells of any single species per harvester per day in Manatee County. Harvest prohibited in Lee County.
2016 Women's Saltwater Fishing Clinics

Florida has been coined The Fishing Capital of the World for good reason. With 8,426 miles of tidal shoreline, 7,700 lakes, and roughly 10,550 miles of rivers, residents and tourists are never far from water. So where does a first time or novice woman learn about saltwater fishing?

Women's Fishing Clinics (WFCs) are free, one-day educational events that introduce women to saltwater fishing and educate participants on conserving Florida’s marine resources. These catch and release only events are conducted by the FWC staff with funding in part by the Wildlife and Sport Fish Restoration Program. This national program is funded by your purchases of fishing equipment, boats and motorboat and small-engine fuel sales.

The clinic class sizes are kept low in an effort to implement a structured hands-on approach to basic saltwater fishing skills and conservation of fish resources. These events are held in coastal cities statewide.

Participants learn about types of fishing rods and reels, how to use and setup a spinning rod and reel, knot tying, cast netting, catch-and-release techniques, marine habitats, conservation efforts and fishing tackle. The program partners with local professionals to provide information and instruction at the events.

Participants are encouraged to bring their own equipment for the fishing component of the program but if they do not have any, FWC will provide some for the day.

These clinics are free to the public, participants must be 18 years or older, and they are required to possess a valid recreational saltwater fishing license to attend, unless exempt.

Advanced registration is required, to register, call the Division of Marine Fisheries Management Outreach and Education subsection at (850) 487-0554 or email Heather.Sneed@MyFWC.com.

For more information, visit MyFWC.com/education/outdoor-skills/women-fishing/.

Saltwater fishing in Florida...
What you must know before you go

Saltwater fishing licenses are sold online at GoOutdoorsFlorida.com, at county tax collectors’ offices and at many license agents. Licenses may also be obtained over the telephone by dialing toll-free, 1-888-FISH-FLORIDA (347-4356). An additional fee is charged for telephone and Internet services. For any recreational licensing information not contained in this publication, please go to MyFWC.com/License.

Florida residents

When applying for a saltwater recreational fishing license, you are considered to be a Florida resident if you are:

- Any person who has declared Florida as his or her only state of residence as evidenced by a valid Florida driver license or identification card with both a Florida address and a Florida residency verified by the Department of Highway Safety; or
- Any member of the United States Armed Forces who is stationed in Florida (includes spouse and dependent children residing in the household).

Gold sportsman’s licenses

- Includes:
  - Hunting, Saltwater Fishing and Freshwater Fishing licenses
  - Management Area, Archery, Crossbow, Muzzleloading Gun, Turkey, Florida Waterfowl, Deer, Snook and Spiny Lobster permits
- Florida residents may buy a lifetime saltwater fishing license or a lifetime sportsman license. Holders of lifetime saltwater fishing licenses may fish in saltwater for life and will pay no additional fees. The lifetime license fee includes the taking of snook or spiny lobster, which would otherwise require a separate fee. A lifetime sportsman license allows holders to fish in freshwater or saltwater and to hunt in Florida. Both of the licenses require holders to obey fishing or hunting laws in effect at any given time.

You do not need a license if you are:

- A resident who is saltwater fishing from land or a structure fixed to land who has been determined eligible for the food stamp, temporary cash assistance, or Medicaid Program by the Department of Children and Family Services. Proof of identification and a benefit issuance or program identification card issued by the Agency for Persons with Disabilities or the Agency for Health Care Administration must be on your person when fishing.
- A child under 16 years of age.
- Any resident fishing for recreational purposes only, within her or his county of residence with live or natural bait, using poles or lines not equipped with a fishing line retrieval mechanism.
- Fishing from a for-hire vessel—guide, charter, party boat—that has a valid charter boat license or charter captain license.
- A holder of a valid saltwater products license.
- Florida resident 65 years of age or older and you possess proof of age and residency, such as a Florida driver’s license or ID, or an optional no-cost Resident Senior Citizen Hunting and Fishing Certificate.
- Florida resident who is a member of the U.S. Armed Forces, who is not stationed in this state, while on leave for 30 days or less, upon submission of orders. This does not apply to journalists only.
- Any person who has been accepted as a client for developmental disabilities services by the Agency for Persons with Disabilities, provided the agency furnishes proof thereof.
- Fishing for recreational purposes from a pier that has a valid pier saltwater fishing license.
- Fishing from a boat that has a valid recreational vessel fishing license.
- A Florida resident who is fishing for mullet in freshwater with a valid Florida freshwater fishing license.
- A Florida resident who possesses a no-cost Florida Resident Disabled Person Hunting and Fishing Certificate. In order to qualify for this, applicants must provide a certification of total and permanent disability from the United States Armed Forces, Railroad Retirement Board, Florida Worker’s Compensation or the United States Veterans Administration. Alternatively, current documentation from the Social Security Administration for Supplemental Security Income (SSI) or Supplemental Security Disability Income (SSDI) benefits also will be accepted.

Other saltwater fishing fees

Licenses (Charter Boat or Charter Captain) are required for all vessels that charge a fee (for-hire vessels) to take passengers out to catch marine fish.

Eleven or more customers ................. $801.50
Five to ten customers ....................... $401.50
Four or fewer customers ................... $201.50

Optional fees include the annual Recreational Vessel fee ($2,001.50) for not-for-hire pleasure craft and the annual Pier license ($501.50). For charter licensing information, contact your local county tax collector’s office or visit MyFWC.com.
The FWC’s Division of Law Enforcement patrols Florida’s coastal waters to provide assistance to boaters and anglers as well as to enforce Florida’s saltwater fishing and boating laws. FWC officers assist boaters who are in distress, provide advice and direction to those who are traveling Florida’s coastline and waterways, and may issue citations for violations of state and federal fishing, wildlife and boating laws.

In emergencies or if state fisheries, wildlife or boating laws are being violated, call 888-404-FWCC (3922) or for cell phone users throughout the state, dial *FWC (*392) depending on your location, hail on VHF Channel 16 or report violations via text message. Most cell phones allow users to send text messages directly to an email address. You can text Tip@MyFWC.com; standard usage fees may apply.

Join the nation’s largest conservation law enforcement agency—become an FWC law enforcement officer. For more information contact the Florida Fish and Wildlife Conservation Commission at 1-866-FWC-HIRE (392-4473) or visit MyFWC.com/Law Enforcement.

Our Captains are licensed professionals that will get you and your boat underway and where you need to go in no time.

CALL OR GO ONLINE NOW TO JOIN FOR JUST $149 ALL YEAR.
Louisiana’s salt and freshwater areas are divided by a line that runs from the Intracoastal Waterway from the Texas-Louisiana boundary to its junction with Louisiana Highway 27 at Gibbstown, south to Louisiana Highway 82, east to its junction with the Intracoastal Waterway from Forked Island to Bayou Barataria to the Harvey Canal, the Harvey Canal to the Mississippi River, the Mississippi River to the Industrial Canal, the Industrial Canal to the Intracoastal Waterway, the Intracoastal Waterway to the Rigolets in Orleans Parish to the Louisville and Nashville Railroad Bridge, and the Louisville and Nashville Railroad right-of-way from the Orleans Parish line to the Mississippi state line. Areas north of this line are freshwater. Areas south of this line are saltwater, including Lakes Maurepas, Pontchartrain, and St. Catherine, Chef Menteur Pass (except a 7/10-mile section from Bayou Sauvage south to the Intracoastal Waterway), the Rigolets, Unknown Pass, Pass Manchac, the Intracoastal Waterway, and the portion of the Calcasieu Ship Channel from the Intracoastal Waterway south to the Gulf of Mexico.

The Louisiana Department of Wildlife and Fisheries (LDWF), the Commission, and the Louisiana Legislature manage fisheries in state waters; the Gulf of Mexico Fishery Management Council (Gulf Council) and the National Oceanic and Atmospheric Administration’s National Marine Fisheries Service (NOAA Fisheries) manage fisheries in federal waters. Generally, Louisiana state waters extend 3 nautical miles from the nearest land; federal waters extend from 3 nautical miles to 200 nautical miles. However, for reef fish fishery management, Louisiana waters extend to 9 nautical miles. Fishermen should stay informed of the state/federal jurisdictional boundary as future congressional actions may affect the current boundary demarcation as it applies to reef fish species. If a future congressional action modifies the state/federal jurisdictional boundary, it will not impact the type of fishing gear reef fish fishermen may use.

Commercial Harvesters

To take or possess shrimp, crab, oysters, or finfish in Louisiana waters or gather reptiles and/or amphibians for commercial purposes, you must have one or more of the following licenses issued by LDWF. You also must have additional licenses and permits to harvest some species, use certain gears, and/or operate in federal waters (see each species section for details).

If you: 
You must have a/an: 
Fees and notes:

</tr>
</tbody>
</table>

Applying for a License or Permit

To apply for LDWF-issued licenses, contact 225.765.2898 or visit LDWF’s headquarters at 2000 Quail Drive in Baton Rouge, Monday through Friday, 8:00 am to 4:00 pm. You must provide proof of residency for your domiciliary state. If you’re applying for a license in a business name, you must provide documentation of valid federal tax ID number assigned to your business name and authorized signature OR an occupational license.

Expired Licenses and Permits

All commercial licenses expire December 31 each year, unless otherwise noted. Renew your license online at la.wildlifelicense.com.

Resident License Requirements

To qualify for a resident license, you must be a Bona Fide Resident. You’re a Bona Fide Resident if you’ve resided in the state continuously during the 12 months immediately prior to the date you apply for any license and if you’ve established Louisiana as your legal domicile. You must demonstrate compliance with all of the following, as applicable:

- If you’re registered to vote, you’re registered to vote in Louisiana
- If you’re licensed to drive a motor vehicle, you have a valid Louisiana drivers license
- If you own a motor vehicle located within Louisiana, you have a valid Louisiana registration for that vehicle
- If you earn an income, you have filed a Louisiana state income tax return and have complied with state income tax law and regulations.

With respect to a corporation or other legal entity, a resident is incorporated or otherwise organized under and subject to the laws of Louisiana, is domiciled in Louisiana, and has a permanent physical location of business in Louisiana where records are held.

Any person, corporation, or other legal entity that possesses a resident license from any other state or country shall not qualify for a resident license in Louisiana.

### Dealers, Retailers, and Processors

To purchase, resell, or process seafood products, bait, reptiles or amphibians in Louisiana, you must have one of the following licenses issued by LDWF, unless otherwise noted. You also must have additional licenses and/or permits to buy, sell, or process some species (see each species section for details).

<table>
<thead>
<tr>
<th>If you:</th>
<th>You must have a/an:</th>
<th>Fees and notes:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buy, acquire, or handle seafood products or bait from licensed commercial fishermen or wholesale/retail seafood dealers from in or out of the state for sale or resale</td>
<td>Wholesale/Retail Seafood Dealer Business License OR Wholesale/Retail Seafood Dealer Vehicle License if selling from a vehicle</td>
<td>$250 resident, $1,105 nonresident. You may buy from licensed commercial fishermen and licensed wholesale/retail dealers in Louisiana and from out of state. When buying seafood products for which a permit is required (mullet, reef fish, spotted seatrout, shark, tuna, etc.), you may only buy from commercial fishermen who have the required permit. There are no restrictions on whom you may sell to. You are also licensed to transport fish.</td>
</tr>
<tr>
<td>Buy, acquire, or handle seafood products from a licensed Louisiana wholesale/retail seafood dealer for sale to consumers for personal or household use</td>
<td>Retail Seafood Dealer Business License OR Retail Seafood Dealer Vehicle License if selling from a vehicle</td>
<td>$105 resident, $405 nonresident. You may only buy from licensed wholesale/retail dealers in Louisiana and only sell directly to consumers for personal or household use. You may ship seafood products within and out of Louisiana to consumers for personal or household use. To buy from out of state, you must have a Wholesale/Retail Seafood Dealer License (see above). Restaurants and grocers are exempt from these license requirements if they only sell seafood products fully prepared for immediate consumption.</td>
</tr>
<tr>
<td>Buy, acquire, or handle for resale or sell any native reptiles or amphibians, including those reared in captivity</td>
<td>Reptile and Amphibian Wholesale/Retail Dealer License</td>
<td>$105 resident, $405 nonresident. Nonresidents may instead purchase a Three-Day Reptile and Amphibian Wholesale/Retail Dealer's License ($75; valid for three consecutive days). Licensed wholesale/retail seafood dealers are exempt from this license.</td>
</tr>
</tbody>
</table>
Shipping Requirements

Seafood transporters must mark all vehicles used to transport seafood with the name and address of your company, plainly mark all shipments containing seafood products or bait, and attach records, tags, or certificates showing names of the buyer and seller and an itemized statement of the number of pounds of seafood or bait and the names of each kind or species of seafood or bait in the shipment. Bills of lading issued by a common carrier for shipments of seafood products or bait must state the number of packages that contain seafood products or bait and the date and names of the buyer and seller and include an itemized statement of the number of pounds of seafood or bait and the names of each kind or species of seafood or bait in the shipment. Shipments are subject to inspection while in transit and upon leaving the state.

Reptile and amphibian transporters must plainly mark all shipments containing reptiles or amphibians and attach tags or certificates showing names of the buyer and seller and an itemized statement of each kind of reptile or amphibian in the shipment. Bills of lading issued by a common carrier for shipments of reptiles or amphibians must state the number of packages that contain reptiles, or amphibians. Out-of-state shipments of reptiles or amphibians ordinarily used for human consumption must be registered at some port of exit and inspected.
Trip Ticket Requirements

When a licensed commercial fisherman sells or transfers his catch to a wholesale/retail seafood dealer, he must present his license to the dealer for license verification and provide the dealer with information necessary to complete a commercial trip ticket. The dealer must record the sale or transfer on a three-part LDWF-issued trip ticket form and include the following information:

- The fisherman’s name and license number
- The dealer’s name and license number
- Transaction date
- Gear and vessel used
- Primary location of where the fish were caught
- Duration of the fishing trip
- Species identification
- Quantity and units of each species
- Size and condition of each species
- Unit price of each species

The commercial fisherman and dealer must sign each trip ticket attesting that the information is correct. The dealer retains one part of the trip ticket, provides the fisherman with one part, and submits one part to LDWF.

When a commercial fisherman sells his catch under a Fresh Products License, he must record all information required on the commercial trip ticket form, recording his fresh products license number in place of the wholesaler/retailer seafood dealer’s license number. The commercial fisherman must sign each trip ticket attesting that the information he provided is correct.

On or before the 10th of each month, dealers and fresh products licenseholders must submit to LDWF all trip tickets from the previous month. Dealers must also include a signed submission sheet certifying that the submitted trip tickets represent all of the dealer’s transactions with commercial fishermen for that month. For more details, go to wlf.louisiana.gov/fishing/trip-ticket or call 225.765.2399.

Dealers, fresh products licenseholders, retailers, restaurants, and grocers must keep records of the following and make them available for inspection by LDWF:

- Quantity and species of seafood products, bait, reptiles, or amphibians you purchase, date of purchase, and full name and license and/or permit number of the commercial fisherman/collector, wholesale/retail dealer, or out-of-state seller from whom you purchase the seafood products, bait, reptiles, or amphibians
- Quantity and species of seafood products, bait, reptiles, or amphibians you sell, date of sale, and name and license number of the buyer
- If selling to consumers, quantity and species of seafood products, bait, reptiles, or amphibians sold, the date you sell it to consumers, and a statement that you sold it to consumers

If a fisherman must have a special permit to harvest a species, records must indicate the commercial fisherman’s permit number. If creel limits apply to a species, records must indicate the number by head count of such species.

Dealers with federal permits must report landings electronically through approved reporting methods every week. Go to www.sefsc.noaa.gov/fisheries/dealers.htm for more information.

Electronic Trip Tickets

Free computerized trip ticket data entry software is also available for wholesale/retail seafood dealers. This electronic trip ticket program completely replaces the paper ticket system, electronically collects and sends all information required by the state, tracks all monies owed and paid to fishermen, tracks deductions, generates reports, prints checks, and exports data. Dealers must still mail LDWF a copy of their monthly submission sheet generated by the electronic program and a completed electronic signature log by the 10th of each month for the preceding month. If you’re interested in using the electronic trip ticket program to enter and submit trip ticket information, please contact Claude Petersen at claudie@bluefindata.com or 225.744.0807.

Nearly 50% of annual Gulf of Mexico shrimp landings is landed in Louisiana.
First, place the fish on its side on a flat board with its jaw closed.
For **total length**, measure in a straight line from the tip of the snout to the extreme tip of the tail fin. Rotate OR squeeze the tail so you can determine the maximum length of the fish.

For **fork length**, measure in a straight line from the tip of the snout to the fork of the tail.

For **curved fork length**, measure tracing the contour of the body from the tip of the upper jaw to the fork of the tail.

For **carcass length**, measure the curve from rear edge of gill opening to the front edge of the caudal keel (the ridge found just before the tail fin).

For **lower jaw fork length**, measure from the tip of the lower jaw to the midline of caudal fin. This measurement is used for billfish such as swordfish.

</tr>
</tbody>
</table>

Harvest Areas

Louisiana’s state waters are divided into inside and outside waters. The "inside/outside line" separates these waters. It generally follows the coastline from the Louisiana/Texas state line to the Louisiana/Mississippi state line. Waters landward of the inside/outside line are inside or inshore waters; waters seaward of the inside/outside line out to three nautical miles are outside waters or the territorial seas. Inside waters are further divided by major estuarine basin. The Commission may amend the shrimp line due to environmental changes. See the latest coordinates at [wlf.louisiana.gov/fishing/insideoutside-shrimp-line](http://wlf.louisiana.gov/fishing/insideoutside-shrimp-line).

The Louisiana Legislature, the Commission, and LDWF are responsible for managing the shrimp fishery in inshore waters and the territorial seas. The Gulf Council and NOAA Fisheries are responsible for federal waters.

Seasons

You may only harvest shrimp during open shrimp seasons (unless you’re permitted to harvest live bait under a Special Bait Dealer Permit). The Commission sets shrimp seasons for Louisiana’s state waters by area, according to scientific information about environmental and water conditions and the growth rates, distribution, and abundance of shrimp. They also consider input from the industry and other stakeholders. In general, shrimp seasons by area are:

- Inside: open when enough market-sized shrimp are available in these waters for harvest. The spring/brown shrimp season generally runs May to July.
- Outside: year-round, except from mid or late December to April or May in certain areas to protect small white shrimp and allow them to grow to market size. The Commission can close these waters at other times of the year if necessary.
- Federal waters off Louisiana: year-round

Go to [wlf.louisiana.gov/fishing/shrimp-seasons](http://wlf.louisiana.gov/fishing/shrimp-seasons) for the most up to date information on Louisiana’s shrimp seasons.

Size/Possession Limits

There is no size limit for any shrimp harvested during the spring open season nor for brown or seabob shrimp harvested during any open season. White shrimp is legal size when a pound of white shrimp equals 100 whole shrimp or less. You may not harvest sub-legal white shrimp, except from October 15 through the 3rd Monday in December. Also, when more than half of your catch is seabob or brown shrimp, no more than 10% (by weight) of your catch may be sub-legal size white shrimp.

5,600
Approximate number of licensed shrimpers in Louisiana.
Legal Gear

You may only use trawls, butterfly nets, skimmer nets, and cast nets to harvest shrimp during open seasons in Louisiana's waters.

Turtle Excluder Devices

State and federal law require all shrimpers fishing with powered or mechanically-retrieved otter trawls (except test nets with headrope lengths of 12 feet or less) to equip them with turtle excluder devices (TEDs), which allow incidentally captured turtles to escape the nets.

In lieu of TEDs, shrimpers fishing with test trawls and skimmer and butterfly nets must limit their tow times to 75 minutes from November 1 through March 31 and 55 minutes from April 1 through October 31 to reduce potential impacts on sea turtles.

Go to go.usa.gov/xKJ74 for the latest TED regulations and guidelines for complying with them. Email Michael.Barnette@noaa.gov or call 727.551.5794 with any TED-related questions.

Bycatch Reduction Requirements

When fishing in federal waters, shrimp trawlers must install bycatch reduction devices (BRDs) in each trawl to reduce catch of non-targeted species. Go to go.usa.gov/xKJ7k for more information. Email Steve.Branstetter@noaa.gov or call 727.824.5305 with any BRD-related questions.

Restricted and Closed Areas

Some areas, including wildlife refuges, wildlife management areas (WMAs), and habitat conservation areas, may be closed to certain gear types, methods, and/ or times of day and may have different possession limits. Some are closed to shrimping altogether. These restrictions and closures help protect developing shrimp populations and reduce conflicts among users. See wlf.louisiana.gov/fishing/commercial-shrimp for details.

Shrimper/ Crab Trap Interactions

If you catch an unserviceable crab trap, you must keep it on your vessel and properly dispose of it onshore. If you catch a serviceable crab trap without a float, return it to the water with a common float (a white, plastic, one-gallon or larger bleach bottle).

Shrimp Excise Tax

Louisiana collects an excise tax on all saltwater shrimp harvested from state waters as well as all shrimp imported into the state. Taxes apply as follows:

- 15 cents per barrel of 210 pounds of head-on, unpeeled shrimp
- 15 cents per barrel of 125 pounds of headless, unpeeled shrimp
- 15 cents per barrel of 75 pounds of headless, peeled shrimp

The first wholesale/retail seafood dealer who receives the shrimp must pay this tax. For imported shrimp brought to cold storage, the dealer storing, brokering, or distributing the shrimp must pay the tax.

Taxes are deposited in Louisiana's Conservation Fund and support LDWF's Law Enforcement Division and its operations.

Live Bait Shrimp

To commercially harvest shrimp for live bait, you must have a Special Bait Dealer Permit, which allows you to harvest shrimp for bait at any time. The requirements for this permit include:

- A permit application and fee
- $1,000 cash bond, which must be forfeited if anyone associated with the permit violates any of the permit requirements or any commercial fishing laws and regulations
- Background check for previous wildlife or fisheries violations
- Inspection of live bait holding facilities (onshore and on vessel)
- Proper signage on the vessel identifying that the vessel is working under the bait permit
- Public notice that live bait is available
- Use of an approved, fully operational vessel monitoring system onboard the vessel if harvesting bait shrimp at night
- Recordkeeping and reporting

You may only use the following gear under this permit:

- One trawl no more than 25 feet along the corks line and 33 feet along the lead line
- Two skimmer nets with individual nets no more than 16 feet measured horizontally, 12 feet measured vertically, or 20 feet measure diagonally

For more information, visit wlf.louisiana.gov/permit/special-bait-dealer-permit.
## Gear Requirements

<table>
<thead>
<tr>
<th>Trawls</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Mesh</strong></td>
</tr>
</tbody>
</table>
| **Size and number** | - *Inside waters:* regulations permit one trawl measuring 50 feet long or less along the cork line and 66 feet long or less along the lead line; two trawls not exceeding 25 feet each along the cork line and 33 feet along the lead line, with trawl doors no more than 8 feet long and 43 inches high; OR two trawls not exceeding 25 feet each along the cork line and 33 feet along the lead line, with no more than two outer trawl doors no larger than 8 feet long and 43 inches high and no more than two inner sled doors. Each vessel may also pull a test trawl.  
- *Outside waters:* A vessel's nets may not exceed a total of 130 feet of cork line and 165 feet of lead line, in addition to one test trawl.  
- *Breton and Chandeleur Sounds:* Regulations permit two trawls, each measuring no more than 65 feet long along the cork line and no more than 82 feet long along the lead line, plus one test trawl.  
- *Federal waters:* up to four trawls of any size plus one test trawl.  
| *A test trawl is no more than 16 feet long along the cork line or 20 feet long along the lead line or head rope.* |

### Butterfly and skimmer nets

| Mesh | Must be at least 5/8-inch bar or 1-1/4 inches stretched mesh. Must be at least 3/4 inch bar or 1-1/2 inches stretched mesh during the fall inshore shrimp season from the western shore of Vermilion Bay and Southwest Pass at Marsh Island to the Atchafalaya River. |
| **Size and number** | - A single stationary butterfly net may measure no more than 22 feet vertically or horizontally.  
- Individual nets of double butterfly nets may measure no more than 12 feet vertically or horizontally, unless used on a vessel, in which case they may measure no more than 12 feet vertically by 16 feet horizontally.  
- Double skimmer nets may have an opening circumference of no more than 72 feet for each net and a maximum lead line length of 33 feet. |
| **Other** | - Butterfly nets may be mounted no more than 24 inches from the side of the vessel.  
- Skimmer nets may be mounted to the horizontal net frame at any distance from the gunwale of the vessel as long as the mounting distance and horizontal length of the net frame does not exceed 20 feet from the gunwale.  
- You may not tie individual nets together.  
- No sweeper devices, leads, extensions, wings, or other attachments.  
- You must mark butterfly nets with a tag listing your name, address, and net license number when using them in East and West Passes of the Calcasieu River, Grand Bayou, and in Oyster Bayou (all within Cameron Parish only); if found unmarked, these nets will be seized by LDWF agents or other authorized employees. This tag must be attached to the net, frame, or any other part directly attached to the net or frame and must be visible above the water at all times. Letters must be at least 3 inches high and of appropriate width to make it visible and readable. |

*Examples of legal and illegal skimmer net frames.*
Legal Gear

You may only use the following gear to harvest crabs in Louisiana waters:

- Crab traps
- Crab drop nets
- Trawl, skimmer, and butterfly nets*
- Trotlines, handlines, and bushlines
- Dip and cast nets

*You may only use trawls and butterfly and skimmer nets to harvest crabs during open shrimp seasons and must abide by commercial shrimping regulations.

You may not use dredges to intentionally harvest crabs.

Commercial Gear Licenses

In addition to the applicable licenses and permits listed on pages 7-9, you must have the following Commercial Gear Licenses to use or possess commercial fishing gear:

- Any legal number of crab traps*: $50 resident, $200 nonresident
- Each butterfly, skimmer, or trawl net: $25 resident, $100 nonresident, plus an annual gear fee ($10 resident, $40 nonresident)
- Each cast, dip, or drop net: $25 resident, $100 nonresident
- Any legal number of bush, hand, or trotlines: $25 resident, $100 nonresident

*Any commercial fisherman applying for a Commercial Crab Trap Gear License must have either (1) possessed a valid Commercial Crab Trap Gear License in any two of the following years: 2011, 2012, 2013, and 2014; or (2) possessed a valid Wholesale/Retail Seafood Dealer License and can demonstrate crab landings through trip ticket submissions during any two years between 2011 and 2014. Otherwise, they must first enroll in and complete a crab industry professionalism program. See wlf.louisiana.gov/crabtraining for details.

Seasons

In 2017, 2018, and 2019, the commercial harvest of blue crabs and the use of all crab traps are prohibited for a 30-day period beginning on the 3rd Monday in February. All crab traps remaining in Louisiana’s territorial waters during this closure will be presumed to be actively fishing and thus considered illegal.

The Commission may also prohibit the use of crab traps in certain areas for short periods of time to remove lost or abandoned traps through the Derelict Crab Trap Removal Program.

Size Limits

Any commercial fisherman identified as having sold undersized crabs to a wholesale/retail dealer will be subject to penalties for taking and possessing undersized crabs.

Hard shell crabs: You may only harvest crabs 5 inches carapace width or wider. Since at least half of the crab population has sexually matured at this size, this minimum size limit helps ensure crabs are able to reproduce and replace those that are harvested. You must immediately return crabs smaller than 5 inches wide back to the water without injury.

Immature female crabs: You may not harvest immature female blue crabs during 2017, 2018, and 2019, except when an immature female is in the pre-molt stage and is being held for processing as soft shell crab or sold to a processor for making soft shell crab.

Pre-molt crabs*: You may harvest pre-molt crabs smaller than 5 inches carapace width under the following conditions:

- You’re holding them for processing as soft shell crabs, OR
- You’re selling them to a processor for making soft shell crabs, have properly identified them as pre-molt crabs, and are holding them in a separate container marked "peelers" or "busters".

*Pre-molt crabs are crabs showing signs of molting; the first sign is a white line on the back paddle fin.

Stone crabs: You may only harvest stone crab claws. The claws must measure at least 2-3/4 inches from the tip of the claw to the base of the joint. You may only transfer legal size stone crab claws from a vessel to the shore. You may keep whole stone crabs on a vessel until you have removed their claws; then you must immediately return the crabs to the waters where you harvested them.
### Crab Trap Requirements

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Night restrictions</strong></td>
<td>You may not bait, tend, check, or remove crab traps, their contents, lines, buoys, or markers in public waters from 1/2-hour after legal sunset until 1/2-hour before legal sunrise.</td>
</tr>
<tr>
<td><strong>Trap placement</strong></td>
<td>You must place your traps so vessels can safely navigate waters. Do not set them in navigable channels or entrances to streams.</td>
</tr>
<tr>
<td><strong>Unserviceable traps</strong></td>
<td>• You must properly dispose of unserviceable crab traps back at the dock to reduce the risk and potential impact of derelict traps.</td>
</tr>
<tr>
<td></td>
<td>• If you retrieve a trap with a Commission-approved common float, you must return that float to any shrimper for reuse.</td>
</tr>
<tr>
<td><strong>Damage to or destruction of traps</strong></td>
<td>Unless you are the crab trap licenseholder (or his agent), you may not intentionally damage or destroy a crab trap, attached floats or lines, or its contents.</td>
</tr>
<tr>
<td><strong>Trap identification</strong></td>
<td>You must mark your traps with a plastic bait box cover or a 2-inch stainless steel, self-locking tag attached to the center of the trap ceiling to identify the owner of the trap. Either one must be legibly engraved or embossed with your Commercial Fisherman’s License number.</td>
</tr>
<tr>
<td><strong>Floats and float lines</strong></td>
<td>• You must mark all crab traps with a solid float, 6 inches in diameter or larger, attached with a non-floating line, 1/4 inches in diameter or larger. You do not have to mark traps with a float and line in areas designated as freshwater north of the northern bank of the Intracoastal Waterway and west of LA Highway 70 and those areas located on the eastern side of the Mississippi River and inland from the saltwater line, unless you’re placing the trap in a lake.</td>
</tr>
<tr>
<td></td>
<td>• You may attach crab traps to a trotline attached to a non-floating line and a visible float measuring at least 6 inches in diameter or 1/2 gallon in volume. You must register each trap on a trotline with LDWF and tag it with your Commercial Fisherman’s License number.</td>
</tr>
<tr>
<td><strong>Escape rings</strong></td>
<td>• Each crab trap must have at least two escape rings, 2-5/16 inches in inside diameter or larger, to allow undersized crabs the opportunity to escape the trap. They must be placed on the vertical outside walls flush with the trap floor or baffle. There must be one ring located in each chamber of the trap. Escape rings are not required in Lake Pontchartrain until November 15, 2017 or on any crab trap constructed of square wire mesh 2-5/16 inches or larger. Beginning November 15, 2017, each trap must have three escape rings, each measuring 2-3/8 inches or larger, with at least two located in the upper chamber.</td>
</tr>
<tr>
<td></td>
<td>• No material should obstruct the escape rings and hamper or prevent crabs from exiting, except from April 1 through June 30 and September 1 through October 31.</td>
</tr>
<tr>
<td><strong>Metal tackle and traps</strong></td>
<td>You may not use metal tackle or metal crab traps in any of the public waters north of the Intracoastal Waterway in the Calcasieu River, in any body of water of the Calcasieu River System north of the Intracoastal Canal, or in Vermilion Bay from Cypremort Point one mile offshore to Blue Point.</td>
</tr>
<tr>
<td><strong>Closed area</strong></td>
<td>You may not use crab traps in the Chafuncte River.</td>
</tr>
</tbody>
</table>

### Possession Limits

**Egg-bearing crabs:** You may not harvest any females bearing eggs on their abdomen. You must immediately return egg-bearing crabs to the water without injury to protect this next generation of crabs. No more than 2% of the total number of crabs in your possession may be incidentally harvested, egg-bearing crabs.

**Immature female crabs:** No more than 2% of a random sample of 50 crabs from each crate (or group of crabs equivalent to one crate) in your possession may be incidentally harvested immature female crabs.

**Whole stone crabs:** You may only harvest stone crab claws; you may possess one incidentally harvested whole stone crab per crate of blue crabs (or group of blue crabs equivalent to one crate).

### Tagging Requirements

You must tag, mark, or otherwise identify any crabs you sell with your name, license number, and the date you harvested the crabs.

### Bycatch Limits

You may retain for personal consumption up to 25 finfish in aggregate caught as bycatch in crab traps per vessel per day. However, you may not keep any freshwater gamefish, red drum, or spotted seatrout. Any fish you keep are still subject to recreational size and possession limits.

If you have a gear license which allows you to take finfish for commercial purposes, you may keep any finfish you catch under this license, up to the commercial possession limit for that fish. You do not have to separate this catch from the bycatch described above.
**WMAs and Refuges**

Commercial fishing is **permitted** in:
- Atchafalaya Delta, except in the Limited Access Areas from September to January each year
- Pass-a-Loutre, except in the Limited Access Areas from September to January each year
- Pointe-aux-Chenes (in the Cut Off Canal and Wonder Lake); nighttime fishing is prohibited.

Commercial fishing is **prohibited** in:
- Elmer’s Island
- Isle Derniers Barrier Island
- Rockefeller, State, and Marsh Island
- Salvador.

**Derelict Crab Traps**

Derelict traps are traps that have been discarded, lost, or abandoned. Derelict traps can “ghost fish” and continue to capture blue crabs and other species. They can also create a navigational hazard for boats and become entangled in other fishing gear such as shrimp nets.

Funded in part by the sale of Louisiana crab fishing licenses, a volunteer-based Derelict Crab Trap Removal Program was initiated in 2004 to remove derelict crab traps and reduce their potential impacts. Every year, the Commission prohibits the use of crab traps in certain areas for short periods of time to remove lost or abandoned traps through this program. Any crab trap found in these areas of the state when the Commission has prohibited their use shall be considered abandoned and may be removed by persons authorized by the Commission. Since the program began, volunteers have helped remove more than 27,000 traps. The program also collects data on the number and types of animals found in recovered traps. Go to [wlf.louisiana.gov/fishing/derelict-crab-trap-removal](http://wlf.louisiana.gov/fishing/derelict-crab-trap-removal) for information on current crab trap removal closures.

**Additional Dealer Requirements**

</tbody>
</table>

### Oyster Harvester License Training Requirements

Beginning in license year 2017, **ALL** oyster harvesters must complete an online oyster harvester education course **BEFORE** applying for their 2017 license.

Go to [wlf.louisiana.gov/fishing/commercial-oyster](http://wlf.louisiana.gov/fishing/commercial-oyster) and click “Training Videos”. Enter your first name, last name, email (optional), last 4 digits of your social security number, and Commercial Fisherman’s License number. Watch the video and answer a minimum of 80% of the questions correctly to pass (takes about 1 hour). A certificate of completion will be sent to your email and logged with LDWF. It takes 24 to 48 hours for the system to update, so be sure to finish the video at least 3 days before you try to apply for a license. If you don’t have a computer with internet connection at home, try your local public library.

Harvesters are required to take this training every three years.
**Closed Areas**

LDHH may close oyster areas for public health reasons. Call 800.256.2775 for more information. If LDWF finds a vessel harvesting oysters within an unapproved or closed area, LDWF will deem all oysters on board the vessel to have been taken from that area, seize the oysters, and return them to the water. LDWF may also revoke the oyster harvester's license(s).

**Seasons and Times**

**Public areas:** Generally open from the first Wednesday after Labor Day in September for seed oysters and the second Monday in October for market oysters through April 30 of the following year. The Commission may open and close the season when biological data indicate a need. Go to wlf.louisiana.gov/fishing/commercial-oyster for the latest information.

**State-issued leases and privately-owned water bottoms:** A lessee or his agent may fish oysters on the lease at any time unless it is closed by LDHH.

**All areas:** No harvest from 1/2-hour after sunset to 1/2-hour before sunrise.

**Gear Restrictions**

**Public areas:** You may harvest oysters with scrapers and tongs. Scrapers may be no wider than 54 inches measured along the tooth bar and weigh no more than 175 pounds. Scraper teeth may be no longer than 5 inches and must be spaced at least 2-1/4 inches, measured from the center of a tooth to center of the adjacent tooth. A tooth may be no larger than 11/16 inches in diameter. The scraper bag must be single mesh with a minimum mesh size of 3 inches stretched. Vessels may not use more than two scrapers at one time. Vessels may not use any scraper attachment intended to increase downward pressure.

**State-issued leases and privately-owned water bottoms:** A lessee or his agent may use any gear as long as it does not impair or destroy the water bottom.

**Calcasieu and Sabine Lakes:** You may harvest oysters with tongs, a hand scraper, or a single scraper with mechanical assist and a flat bar no longer than 36 inches. Commercial vessels must be self-propelled (traveling under their own power).

**Size and Possession Limits**

**Public areas:** Oysters harvested for market must measure 3 inches or larger from hinge to mouth. Immediately return any undersized oysters and any shell and/or cultch back to the reefs from which they were taken. Sacks of market oysters from public oyster areas may contain no more than 15% undersized oysters and shell and/or cultch. Size limit does not apply if a fisherman is lawfully removing seed oysters from public grounds.

**State-issued leases and privately-owned water bottoms:** No size limit.

**Calcasieu Lake:** You may harvest no more than the sack limit set by the Commission.

**Unlawful Removal of Oysters or Signs**

You may not take, carry away, or attempt to take or carry away any oysters, shell, or cultch from a leased area without the lessee’s permission. You may not remove or alter any stake, monument, bounds, buoy, sign, or other designation of bedding or propagating grounds placed by LDWF or in accordance with regulations.

**Cleanliness of Shellfish Vessels**

You must wash decks, holds, or binds used for storing shellfish daily. Unless exempted in writing by LDHH, you must have a suspended awning (tarp) on your vessel to protect shellfish from direct exposure to sun, birds, and other conditions. It must be between 1 and 7 feet high and extend to the outer edges of the vessel.

</tbody>
</table>
Sewage Disposal on Shellfish Vessels

Vessels without an LDHH-approved sewerage system must have waste receptacles with tight fitting lids, labeled “FOR HUMAN WASTE ONLY” with letters at least 1-½ inches tall, and with a capacity of at least 2 gallons per person on the vessel. You must dispose of the contents of such receptacles through a municipal sewer system, incineration, or burial in the ground.

Oyster Harvest Tags

If you take oysters from Louisiana state waters for sale, you must identify sacks and other packing containers used to hold in-shell oysters with official oyster harvest tags purchased from LDWF. The color of the tag depends on the intended use of the oysters (white for raw consumption in and outside of Louisiana, pink for raw consumption only in Louisiana, or green for shucking or post-harvest processing). Tags are identified with and traceable to your license.

You must complete all information on the tag, including:
- Dealer’s name, address, certification number assigned by LDHH and the original oyster shipper’s number, if different
- Harvester’s identification number assigned by LDWF
- Date and area of harvest
- Type and quantity of oysters.

If you sack or package oysters on your vessel, you must tag them prior to removing them from the vessel. If you sack or package oysters at the dock, you must tag them immediately upon arriving at the dock prior to shipping them. If you harvest from more than one area on a given day, you must sack or package and tag the oysters from one area before moving on to the next.

Dealers must keep oyster harvest tags affixed to each container of in-shell oysters until the container is shipped or emptied for washing, grading, or packing. Dealers must retain all tags for at least 90 days.

It is illegal to possess untagged sacks or containers of oysters (other than on board the vessel or at the dock prior to shipment)—untagged or improperly tagged sacks or containers will be considered to have been taken from polluted waters, deemed a health hazard, and seized and destroyed. You may not sell for resale untagged sacks or containers of oysters.

General Refrigeration Requirements

You must place all harvested in-shell oysters under mechanical refrigeration at an air temperature of 45°F or less (measured 12 inches from the blower). Oysters must be refrigerated within two hours of being offloaded from the harvest vessel onto the dock. Total harvest to refrigeration time must not exceed the time/temperature requirements specified on page 21. If you offload oysters from the harvest vessel to an oyster cargo vessel, oysters must be refrigerated within the times specified on page 21.

In-shell oysters must be maintained at or below 45°F throughout all levels of commerce. You must meet additional refrigeration requirements (see page 21), depending on the oysters’ intended use (raw consumption, processing, etc.). Any oysters that do not meet refrigeration requirements may not be used for raw consumption; only certified dealers may use them for shucking or post-harvest processing.

Time/Temperature Log Sheet

Both the harvester and the first certified dealer must complete time/temperature log sheets to document compliance with refrigeration requirements. Harvesters and dealers must maintain the log sheets for one year (two years for frozen oysters) and make them available for inspection by LDHH, LDWF, and the U.S. Food and Drug Administration (FDA). Harvesters must keep log sheets for the current and previous 15 days aboard their vessel. (Exception: Time/temperature log sheets are not required for harvest in the West Cove Conditional Management Area or the Lower Calcasieu Lake Conditional Management Area, both located in Cameron Parish.)

Harvester instructions: Before harvesting oysters, legibly document the following:
- Your boat name/number
- Your name and harvester license number
- Harvest area/lease number
- Time harvesting begins
- Whether oysters will be bedded, shucked, relaid, or other (explain)
- Your signature and date.

After harvesting oysters and prior to leaving the harvest area, record the time harvesting ended and the total number of sacks harvested. If you declare sacks of oysters for shucking and half-shell, distinguish those oysters from each other by placing the appropriate tag on the sack prior to leaving the harvesting area.

Certified dealer instructions: Legibly document the following:
- Temperature of the cooler where oysters are being stored when they begin to be offloaded from the harvesting vessel
- Time and temperature of the cooler when the last sack or container of oysters is removed from the harvest vessel and placed in the cooler.
- Your signature and date.
### Additional Refrigeration Requirements

#### WHITE TAG OYSTERS
Intended for raw consumption in and outside of Louisiana

<td></td>
<td></td>
</tr>
<tr>
<td>From June through September</td>
<td>12 hours from the time harvest began</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Harvesting Oysters for Raw Consumption

If you harvest oysters for raw consumption, you must have a HACCP plan.

Your time/temperature log sheet must document the time harvest began for each lot of oysters and the time you refrigerated each lot. Log sheets for pink tag oysters must be separated from log sheets for oysters intended for shipment outside of Louisiana. Harvesters must note on log sheets for pink tag oysters that the oysters are “For Intrastate Shipments Only”. If your harvest vessel is equipped with refrigeration capabilities, you must provide documentation to the original dealer that you have met the time and temperature requirements.

You must attach an LDHH- and LDWF-approved tag on all containers holding in-shell oysters, with the corresponding lot identification number or character printed legibly on the tag, prior to refrigerating them. You must record the number of sacks contained within each lot immediately after refrigerating the oysters.

Harvesting Oysters for Shucking or Post-Harvest Processing

Your time/temperature log sheet must document the date and time harvest began for each lot of oysters. If your harvest vessel is equipped with refrigeration capabilities, you must provide documentation to the original dealer that you have met the time and temperature requirements.

If you harvest oysters for delivery to a steam factory for canning and thermal processing, you must land them at the factory within 72 hours from the time harvesting begins. You must document the time harvesting begins and the time of arrival at the factory on your invoice.

Landing Oysters

If you’re harvesting oysters from Louisiana’s public reefs for sale or consumption, you must land them in Louisiana and tag them appropriately.

If you land oysters harvested from a private lease in Louisiana’s waters outside the state (with applicable permit from LDWF), you must tag all sacks or containers prior to leaving the state. You must install a VMS on the vessel used to transport oysters to another state and allow LDWF to access the system.

If you harvest oysters outside of Louisiana waters but land them in Louisiana, you must tag sacks or containers according to the laws of the state where you harvested the oysters.

Oyster Severance Tax

Louisiana collects a severance tax on all oysters harvested from state waters.

Taxes apply as follows:

- 2-1/2 cents per barrel of oysters fished from leased water bottoms
- 3 cents per barrel of oysters fished from the natural reefs.

The oyster fisherman or lessee is responsible for paying these taxes, unless they are sold to a resident wholesale/retail dealer. In that case, the dealer is responsible. If a nonresident wholesale/retail dealer buys oysters from a Louisiana fisherman to ship out-of-state and no severance taxes have been paid on the oysters, the nonresident dealer is responsible for the tax.

Standard Measurements and Labeling

A barrel is equal to 6,451.26 cubic inches and is the equivalent of two sacks/baskets or three bushels of unshucked oysters.

A sack (or basket) is exactly 3,225.63 cubic inches and is the equivalent of 1/2 barrel or 1-1/2 bushels of unshucked oysters.

A mini-sack is 1,075.21 cubic inches and is the equivalent of 1/3 of a sack or 1/2 bushel of unshucked oysters.

LDAF certifies metal baskets to ensure accurate measurement. Contact LDAF’s Weights and Measures Division at 225.925.3780. LDAF and LDWF agents have the authority to inspect baskets to ensure volumetric measurements are accurate.

All licensed oyster captains, harvesters, or certified wholesale/retail dealers of in-shell and shucked oyster products shall verify that the oysters being sold adhere to these measurement standards. The quantity of oysters for sale must be accurately labeled by volume, weight, or count (e.g., 1 sack, 35 pounds, or 120 count) in the ‘Quantity’ field on the harvest tag. Sacks and barrels must contain correct measurements when they are delivered to the buyer.

You may sell in-shell oysters by volume, weight (including the weight of the shell), or count. All oysters must be market size and wholesome.

You may only sell half-shell oysters by weight (excluding shell weight) or count. You may only sell shucked oysters by fluid volume or net drained weight at wholesale or retail. They must be clearly labeled by volume or weight. A maximum of 15% free liquid by weight is permitted for oysters sold by volume.

Formula for measuring the volume of a basket.

\[ V = \frac{\pi H (R_2^2 + R_1R_2 + R_1^2)}{3} \]
You may only sell shucked oysters by count at final retail sale; if they are prepackaged, you must also label them by net drained weight.

**Packaging, Labeling, and Distributing Shucked Oysters**

You must follow the National Institute of Standards and Technology’s guidelines when packaging, labeling, or distributing shucked oysters.

You may only shuck and prepackage oysters in LDHH-certified facilities. You may only ship them in LDHH-approved containers.

When packing shucked oysters, you must mark the containers with

- Your packer certificate number preceeded by the letters LA
- The packing date in code or by actual date.

Shipping documents for shucked oysters must show:

- The name and address of the buyer
- Shipper’s name, address, and certificate number
- State of origin.

You must also keep accurate records of the source of the oysters so they can be traced back to the harvest tag and label containers of shucked oysters with this information.

You may not use containers with the certificate number of another packer. If you repack oysters, you must keep records which show the packing date, certificate number, and name and address of the original shucker and packer.

You may not sell or distribute shucked oyster containers to anyone that has not been certified by LDHH. The packer, distributor, or purchaser shall not resell shucked oyster containers. Nonresidents who purchase new and unused shucked oyster containers must have a valid certificate from an appropriate state agency that regulates the seafood industry.

Shucked oysters must maintain a temperature of 45°F or below throughout transit.

**Packaging, Labeling, and Shipping In-Shell Oysters**

You must pack in-shell oysters (except those for bulk shipments) in clean barrels or sacks.

When in-shell oysters are temporarily offloaded for any reason, you must store them on pallets or on a well-graded paved surface and limit direct exposure to the sun to no more than 30 minutes.

If you ship in-shell oysters in bulk, you may not ship them by truck or car, except when shipping from only one seller to only one buyer. An oyster harvest tag must accompany each shipment.

You may ship in-shell oysters in bulk by boat when harvesters obtain the oysters directly from growing areas and sell them without shucking them. When you ship in-shell oysters by boat, you must label the shipment according to requirements for shucked oysters. If these oysters are intended for processing in shucking houses, the boat operator must keep records in a book provided for such purposes only, showing the sources and quantity of oysters, date and local waters where the oysters were taken, and license or certificate number of persons buying and selling the oysters. The operator must keep these records for at least 12 months.

All land-based deliveries of in-shell oysters must be made aboard mechanically refrigerated trucks with an internal air temperature of 45°F or less. (Exceptions: deliveries to certified shellfish dealers located less than 30 minutes from the dock and deliveries to steam factories for thermal processing and canning from November through May within 72 hours from the time harvesting began.)

Railroad cars and trucks in which oysters are shipped in sacks must be kept clean; both are subject to inspection. Vessels used to transport in-shell oysters must be constructed to prevent contamination, deterioration, and decomposition of oysters during transport. They must be pre-chilled to 45°F or below prior to loading; the dealer must document compliance with this temperature requirement.

For shipments by air, in-shell oysters must have an internal meat temperature of 45°F or less at all times. You must pre-chill them to an internal temperature of 40°F or less prior to packing them into insulated containers with frozen gel packs.

If you receive in-shell oysters either sacked or in boxes from a certified dealer and do not process or repack them, you must label the package with your name and certification number if you reship them to another certified dealer, wholesaler, or retailer.

You may label in-shell oysters in sacks in bulk when the sale is between certified dealers.
Post-Harvest Processing

If you process oysters to reduce the level of a particular pathogen, you must:

- Have a HACCP plan approved by LDHH that ensures the processing method reduces pathogen(s) in the product to established safe levels for the at-risk population. This plan must include process controls and periodic sampling to ensure and verify that these criteria are met.
- Package and label all oysters in accordance with all National Shellfish Sanitation Program requirements.
- Keep records in accordance with the National Shellfish Sanitation Program.

If you meet the above requirements, you may label your processed product as:

- "Processed for added safety", if the process reduces the levels of all pathogens of public health concern to safe levels for the at-risk population
- "Processed to reduce [name of target pathogen(s)] to non-detectable levels", if the process reduces one or more, but not all, pathogens of public health concern to safe levels for the at-risk population, and if that level is non-detectable
- "Processed to reduce [name of target pathogen(s)] to non-detectable levels for added safety", if the process reduces one or more, but not all, pathogens of public health concern to safe levels for the at-risk population, and if that level is non-detectable
- A term that describes the type of process applied (e.g. "pasteurized," "individually quick frozen," "pressure treated") may be substituted for the word "processed" in the above options.

If your end product is dead, refrigerate it according to requirements for shucked oysters; if your end product is live, refrigerate it according to requirements for in-shell oysters.

You must tag all in-shell oysters that have gone through post-harvest processing with a blue tag, which must include the certification number of the post-harvest processing facility. A blue tag indicates that the oysters have been post-harvest processed by a certified dealer and may now be sold for raw (half-shell) consumption in both interstate and intrastate commerce.

Selling Raw Oysters

You may sell oysters harvested from Louisiana waters for raw consumption within the state throughout the year as long as they meet refrigeration requirements specified on page 21.

All establishments that sell or serve raw oysters must display one of the following messages at the point of sale; the message must also appear on the main display panel and on top of containers of prepackaged raw oysters.

- "There may be a risk associated with consuming raw shellfish as is the case with other raw protein products. If you suffer from chronic illness of the liver, stomach, or blood or have other immune disorders, you should eat these products fully cooked."
- "Consuming raw or undercooked meats, poultry, seafood, shellfish, or eggs may increase your risk of foodborne illness, especially if you have certain medical conditions."

Other Requirements

You must keep oysters in the container in which they were received until they are used, unless displaying them for retail sale. You may not mix oysters from different lots.

Recalls

Certified dealers must have written procedures for recalling adulterated or misbranded oyster products. These procedures must be based on and complementary to FDA policy.

Certified dealers must follow these procedures including timely notification to LDHH and the product buyer of a situation requiring recall and effective removal or correction of the affected product.

---

$85.3 million
The dockside value of Louisiana’s 2015 oyster harvest.

14.5 million
pounds of oysters were harvested by Louisiana’s commercial fishermen in 2015.
To use or possess commercial fishing gear, you must have a Commercial Gear License for your gear. You must also have additional special permits to harvest some species and/or use certain gear, and there are specific requirements and restrictions for the use of some commercial fishing gear.

</tbody>
</table>
| Mullet strike net | • License fee: $250 resident, $1,000 nonresident (per net)  
• You must have a Mullet Permit to use a strike net to harvest mullet (see page 31). You may only use strike nets to harvest striped mullet; you may not harvest any other fish while harvesting mullet with a strike net (or cast net). You may not have red drum or spotted seatrout on board any vessel that’s carrying a strike net.  
• Mesh must be at least 1-3/4 inches square or 3-1/2 inches stretched, and net must not exceed 1,200 feet in length.  
• You may only use one strike net from a vessel at any time. You must attach an LDWF-issued tag to the net.  
• You may not anchor or secure a strike net to the water bottom or shore. You must actively work the net and may not leave it unattended. |
| Pompano strike net | • License fee: $250 resident, $1,000 nonresident (per net)  
• You must have a Pompano Permit (captain only; no fee) to use a strike net to harvest pompano (see page 31).  
• You may only use pompano strike nets from August 1 to October 31 of each year in waters more than 7 feet deep and beyond 2,500 feet from land within Breton and Chandeleur Sounds. You may not use them between sunset and sunrise nor on weekends or Labor Day.  
• You may not harvest any other fish while harvesting pompano with a strike net, and you may not have any other gear on board. You may not have red drum or spotted seatrout on board any vessel that’s carrying a strike net.  
• Mesh must be at least 2-1/2 inches square or 5 inches stretched, and net may be no longer than 2,400 feet.  
• You must attach an LDWF-issued tag to the net, and your vessel must display your permit number in 8-inch high letters.  
• You may not anchor or secure a strike net to the bottom. You must actively work the net and may not leave it unattended.  
• You must notify LDWF before you leave port to fish under the conditions of your Pompano Permit and immediately when you return. |
| Purse seine | • License fee: $505 resident, $2,020 nonresident (per seine)  
• You may only use purse seines in state waters to harvest menhaden and/or herring-like species. |
| Rod and reel | • License fee: $250 resident, $1,000 nonresident (any legal number)  
• You must have a permit to use a rod and reel for commercial purposes. To qualify, you must have had a valid Saltwater Gill Net License during any two years from 1993 to 1995 and provide state and federal income tax returns (including Schedule C of the federal 1040 form) demonstrating more than 50% of your earned income came from the capture and sale of seafood in at least two years from 1993 to 1995. |
| Seine | • License fee: $25 resident, $100 nonresident (any legal number)  
• Prohibited in saltwater.  
• For use in freshwater, net may be no longer than 1,200 feet; mesh must be at least 2 inches square or 4 inches stretched after treating with tar or copper. |
| Set lines (trot, bush, yo-yos, triggers, etc.) | • License fee: $25 resident, $100 nonresident (any legal number)  
• Trotline hooks must be at least 24 inches apart. |
| Shad gill net | • License fee: $25 resident, $100 nonresident  
• You must hold a special Shad Gill Net License to use this gear (one shad gill net per licensee per vessel). This license allows you to harvest shad and skipjack herring in Lac Des Allemands, Lakes Palourde and Verret, any Iberville Parish waterway, and those portions of Iberia, St. Martin, and St. Mary Parishes located between the guide levees of the Atchafalaya Basin. You may not harvest shad or skipjack in streams, bayous, canals, and other water bodies connected with these lakes. You may only use gill nets to take shad or skipjack; however, you may keep up to 25 other commercial fish. Heads and caudal fins of all fish on board the vessel must be intact. You may not harvest shad or skipjack on Saturday or Sunday. The season is closed from July through October.  
• Net may be no longer than 1,200 feet; mesh must be at least 1 inch bar or 2 inches stretched but no more than 2 inch bar or 4 inches stretched.  
• A 1-gallon jug painted international orange and marked, in black letters, with the words "Shad Gill Net" must be attached to each end of the net.  
• You must attach waterproof tags with your full name and license number to your net.  
• You must place nets at least 50 feet from the tree line.  
• Never leave your net unattended.  
• Only strike fishing is allowed. Once you deploy the net, it must remain stationary until you remove the fish or retrieve the net from the water. |

<td>You may not use bandit gear in state saltwater areas.</td>
<td></td>
</tr>
<tr>
<td>Longlines</td>
<td>You may not use longlines in state saltwater areas.</td>
<td></td>
</tr>
<tr>
<td>Saltwater gill net, seines, strike nets, and trammel nets</td>
<td>You must have an LDWF-issued Traversing Permit (no fee) to transport gill nets, seines, strike nets, and trammel nets across state waters to use in federal waters. You may not use these gears in state saltwater areas (unless you have a special permit to use strike nets). You may not possess red drum or spotted seatrout on vessels carrying these gears. You must notify LDWF at <strong>800.442.2511</strong> or <strong>225.765.2441</strong> four hours before you leave port to traverse or fish under the conditions of the Traversing Permit and immediately when you return from the permitted trip.</td>
<td></td>
</tr>
</tbody>
</table>
Prohibited Gear

You may not use any of the following types of gear in state saltwater areas:

- Spears (except for flounder and garfish)
- Stupefying substances or devices
- Guns
- Poisons
- Explosives
- Tree-topping devices
- Electric shocking instruments or devices
- Seines (unless you are harvesting menhaden and/or herring-like species)
- Snagging devices (not including bows and arrows; exceptions: garfish taken by spears)
- Longlines (not the same as trotlines—longlines are longer than 440 yards; allowed in federal waters)
- Gill nets (unless you have a special permit to use strike nets to harvest mullet or pompano)
- Bandit gear (allowed in federal waters)
- Elevated trotlines (except in exempt areas)
- Trammel nets.

You may not use any aircraft including fixed-wing aircraft, dirigibles, balloons, helicopters, or any other form of aerial surveillance to assist in harvesting finfish, except menhaden and herring-like fish.

Area Restrictions

Free fish passage: Do not set gear within 500 feet of the mouth of any inlet or pass or within 500 feet of any water control structures. This ensures fish can pass freely through these areas.

WMAs and refuges: Commercial fishing is permitted in:

- Atchafalaya Delta, except in the Limited Access Areas from September to January each year.
- Pointe-aux-Chenes (in the Cut Off Canal and Wonder Lake); nighttime fishing is prohibited.

Commercial fishing is prohibited in:

- Elmer's Island

Additional Dealer Licenses and Permits

In addition to the applicable licenses and permits listed on pages 8-9, you must have the following permits to participate in the following activities.

<table>
<thead>
<tr>
<th>If you are a:</th>
<th>You must have a/an:</th>
<th>Notes:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dealer receiving reef fish, mackerel, or cobia harvested from federal waters</td>
<td>NOAA Fisheries Gulf and South Atlantic Dealer Permit</td>
<td>You must also have a Gulf IFQ Dealer Endorsement if you're receiving red snapper, groupers, or tilefish (unless the commercial fisherman has one). For details, contact NOAA Fisheries Southeast Regional Office at 877.376.4877.</td>
</tr>
<tr>
<td>Dealer receiving, buying, trading, or bartering Atlantic swordfish</td>
<td>NOAA Fisheries Atlantic Swordfish Dealer Permit</td>
<td></td>
</tr>
<tr>

### Prohibited Saltwater Species

You may not harvest the following **federally-listed threatened, endangered, or prohibited species**:

<table>
<thead>
<tr>
<th>Species</th>
</tr>
</thead>
<tbody>
<tr>
<td>All whales</td>
</tr>
<tr>
<td>Dolphin (mammal)</td>
</tr>
<tr>
<td>West Indian manatees</td>
</tr>
<tr>
<td>Sea turtles</td>
</tr>
</tbody>
</table>

You may not harvest the following **gamefish**:

<table>
<thead>
<tr>
<th>Gamefish</th>
</tr>
</thead>
<tbody>
<tr>
<td>Red drum</td>
</tr>
<tr>
<td>Black marlin</td>
</tr>
<tr>
<td>Blue marlin</td>
</tr>
<tr>
<td>Hatchet marlin</td>
</tr>
<tr>
<td>Striped marlin</td>
</tr>
<tr>
<td>White marlin</td>
</tr>
<tr>
<td>Sailfish</td>
</tr>
</tbody>
</table>

You may only purchase or sell the gamefish listed above if you import them. You must notify LDWF at **800.442.2511** or **225.765.2441** before you import any of these fish. When you import any of these fish, you must attach an official metal self-locking tag to one gill cover of each fish. These tags must be issued by the official conservation agency of the state from which the fish was taken and must show the originating water body and identity of the issuing agency. However, imported wild-caught red drum must only be accompanied by a bill of lading. Farm-raised red drum is exempt from these requirements if certified by LDWF as having been raised and harvested in accordance with a certified aquaculture program or a valid mariculture program.

You may not harvest **goliath grouper (jewfish)** or **Nassau grouper**.

You may not harvest, possess, purchase, sell, barter, exchange or attempt any of these activities for the following **shark species**:

</tr>
</tbody>
</table>

78% of Louisiana’s 2015 finfish harvest (by value)* came from saltwater.  
*Not including menhaden.

11.7 million pounds of saltwater finfish* were landed by commercial fishermen in Louisiana in 2015.  
*Not including menhaden.
Species Regulations

You must return undersized fish back to the water unharmed; 5% (by number) of each species of commercial fish you harvest may be smaller than the legal limit. You may harvest commercial species with no specified size limit in any size and quantity. No one may sell, purchase, barter, trade, or exchange undersized fish (or attempt to do any of these activities).

Make sure that all saltwater finfish, except garfish, tuna, swordfish, and sharks, have their head and caudal fins intact until you put them on shore or sell them. Garfish must retain a strip of skin sufficient to clearly identify the fish until you put them on shore or sell them. All sharks aboard your vessel must have their fins naturally attached by at least some portion of uncut skin.

For the most current information, go to wlf.louisiana.gov/fishing/commercial-finfish.

**REEF FISH:** You must have a NOAA Fisheries-issued Commercial Reef Fish Vessel Permit to harvest or sell triggerfish, amberjack, wrasse, snapper, grouper, and tilefish, regardless of whether you’re fishing in state or federal waters. Federally-permitted reef fish vessels must carry VMS onboard. Additional federal regulations apply to the harvest of reef fish species. For reef fish fishery management, Louisiana waters extend to 9 nautical miles. Fishermen should stay informed of the state/federal jurisdictional boundary as future congressional actions may affect current boundary demarcation as it applies to reef fish species. If a future congressional action modifies the state/federal jurisdictional boundary, it will not impact the type of fishing gear reef fish fishermen may use.

</table>

**Prohibited Gear**

You may not use any of the following types of gear in state freshwater areas:

<table>
<thead>
<tr>
<th>Gear Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>Spears (except garfish)</td>
</tr>
<tr>
<td>Stupefying substances or devices</td>
</tr>
<tr>
<td>Guns</td>
</tr>
<tr>
<td>Lead nets (exception: leads on hoop nets set at least 500 feet from a stream bed in overflow regions)</td>
</tr>
<tr>

</tr>
<tr>
<td>Poisons</td>
</tr>
<tr>
<td>Explosives</td>
</tr>
<tr>
<td>Tree-topping devices</td>
</tr>
<tr>
<td>Electric shocking instruments or devices</td>
</tr>
<tr>
<td>Elevated trotlines (except in exempt areas)</td>
</tr>
</tbody>
</table>

You may not use any aircraft including fixed-wing aircraft, dirigibles, balloons, helicopters, or any other form of aerial surveillance to assist in harvesting finfish, except herring-like fish.

**Bait**

You may use the following gear to harvest minnows, shrimp, and other baits permitted by law:
- Seines no longer than 30 feet and with mesh no larger than 1/4 inch
- Cast nets with a radius of less than 8-1/2 feet
- Dip nets no larger than 3 feet in diameter
- Minnow traps
### Area Restrictions

**Free fish passage:** Do not set gear, such as trawls, nets, or seines, within 500 feet of the mouth of any inlet or pass or within 500 feet of any water control structures, dams, or weirs. This ensures fish can pass freely through these areas.

**Louisiana/Mississippi Border:** When fishing in border waters, you must attach waterproof tags with your full name and license number to trotlines, snag lines, hoop nets, gill nets, and trammel nets, in lieu of tags required by Mississippi regulations. You must place the tag within 5 feet of one end on trot and snag lines, on the first hoop on hoop nets, and on the float line within 5 feet of one end on gill and trammel nets. Louisiana fishermen using slat traps or baskets in border waters must obtain tags from the Mississippi Department of Wildlife, Fisheries, and Parks.

**Impoundments:** You may not use nets to harvest fish in freshwater impoundments during water drawdown periods, unless LDWF specifies otherwise. Closures begin on the date the drawdown control structure opens and continues until the lake is full again.

**WMAs and refuges:** Commercial fishing is **permitted** in:

- Fort Polk (specific regulations pertaining to fishing are posted at specific lakes)
- Grassy Lake*, except in Smith Bay, Red River Bay, and Grassy Lake on Saturday and Sunday and during waterfowl season
- Pomme de Terre*, except on the weekends and during duck season
- Richard K. Yancey, except during regular waterfowl seasons in Grand Bay, Silver Lake, and Lower Sunk Lake
- Spring Bayou* (Monday through Friday and after 2 pm during waterfowl season). However, you may use slat traps and hoop nets any day, you may never use gill or trammel nets, and you may not harvest grass carp.

*You must have a permit to fish Grassy Lake, Pomme de Terre, and Spring Bayou WMAs. Permits are available from **Spring Bayou Headquarters** or the **Opelousas Field Office** at 337.948.0255.

Commercial fishing is **prohibited** in Ouachita WMA.

### Prohibited Freshwater Species

You may not commercially harvest the following freshwater species:

<table>
<thead>
<tr>
<th>Freshwater Species</th>
</tr>
</thead>
<tbody>
<tr>
<td>Largemouth bass</td>
</tr>
<tr>
<td>Hybrid striped bass</td>
</tr>
<tr>
<td>Shadow bass</td>

</tr>
<tr>
<td>Claridae (walking catfishes)</td>
</tr>
</tbody>
</table>

12.6 million pounds of freshwater finfish were landed by commercial fishermen in Louisiana in 2015.

71% of active freshwater commercial fishermen in Louisiana harvest catfish.
Species Regulations

You must return undersized fish back to the water unharmed; 5% (by number) of each species of commercial fish you harvest may be smaller than the legal limit, except channel catfish of which 10% (by number) may be smaller. No one (commercial fishermen, dealers, retailers, and restaurants) may sell, purchase, barter, trade, or exchange undersized fish (or attempt to do any of these activities).

You may harvest commercial species with no specified size limit in any size and quantity.

For the most current information, go to wlf.louisiana.gov/fishing/commercial-finfish.

Gear License Fees, Requirements, and Restrictions

You may use approved crawfish traps to harvest wild crawfish in Louisiana’s waters. Trap mesh must be a hexagon of 3/4-inch by 11/16-inch or larger, measured from wire to wire, not including any coating on the wire. The openings of trap flues and throats must not exceed 2 inches. These requirements allow small crawfish to escape the trap—small crawfish have little market value and are important to the population for breeding.

To use or possess crawfish traps, you must have a Commercial Gear License for any legal number of traps. A Commercial Gear License for crawfish traps costs $25 for residents and $100 for nonresidents.

Seasons and Size/Possession Limits

There are no limits on season, size, or possession for commercial crawfish harvests. Harvest controls are not necessary as crawfish populations are productive, resilient, and influenced by environmental conditions, rather than fishing.

WMAs and Refuges

Commercial fishing is permitted in:

- Fort Polk (see fishing regulations posted at specific lakes)
- Grassy Lake*, except in Smith Bay, Red River Bay, and Grassy Lake on Saturday and Sunday and during waterfowl season
- Pomme de Terre*, except on weekends and during duck season
- Richard K. Yancey, except during regular waterfowl season in Grand Bay, Silver Lake, and Lower Sunk Lake
- Spring Bayou* (Monday through Friday and after 2 pm during waterfowl season).

*You must have a permit to fish Grassy Lake, Pomme de Terre, and Spring Bayou WMAs. Permits are available from Spring Bayou Headquarters or the Opelousas Field Office at 337.948.0255.

Commercial fishing is prohibited in Ouachita WMA.

Labeling

No product labeled “crawfish” may be sold in Louisiana unless it consists of, or is derived from, the red swamp crawfish (Procambarus clarkii), the white river crawfish (Procambarus zonangulus), or Louisiana pond-raised crawfish.

No owner or manager of a restaurant that sells imported crawfish shall misrepresent to the public, either verbally, on a menu, or on signs displayed on the premises, that the crawfish is domestic.

Did you know?

With more than 1,000 crawfish fishermen and 1,300 crawfish farmers, Louisiana leads the nation in crawfish production, supplying 100 to 120 million pounds per year. Louisiana’s crawfish industry contributes more than $300 million to the state’s economy annually.

LDWF is responsible for monitoring and managing wild crawfish; the information in this brochure applies to the harvest and sale of wild crawfish. About 10% of Louisiana’s total crawfish production comes from the wild. Most wild Louisiana crawfish comes from the rivers, bayous, swamps, and lakes of the Atchafalaya and Vermilion-Tecche basins.

The Louisiana Department of Agriculture, U.S. Department of Agriculture, and other agencies are responsible for farm-raised crawfish. However, farmers who plan to resell their crawfish must have the appropriate licenses from LDWF and other agencies.
**Reptiles and Amphibians**

Contact: Jeff Boundy, 225.765.2815, jboundy@wlf.la.gov

**Prohibited Species**

You may not harvest alligator snapping, box, or razor-backed musk turtles for commercial purposes. You may not harvest any of the following for any purpose in Louisiana:

<table>
<thead>
<tr>
<th>Species</th>
<th>Minimum Length</th>
</tr>
</thead>
<tbody>
<tr>
<td>Salamanders (Tiger, Southern red backed, Webster's, Mud, and Red)</td>
<td>Louisiana pine snake</td>
</tr>
<tr>
<td>Gopher tortoise</td>
<td></td>
</tr>
<tr>
<td>Sea turtles (Green, Hawksbill, Kemp's ridley, Leatherback, and Loggerhead)</td>
<td>Ringed sawback turtle</td>
</tr>
<tr>
<td>Dusky gopher frog</td>
<td></td>
</tr>
<tr>
<td>Black pine snake</td>
<td>Eastern diamondback rattlesnake</td>
</tr>
</tbody>
</table>

**Legal Collection Methods**

You may not remove nests or animals tending their nests. You may not use gasoline to flush animals from hiding places. You may not destroy natural habitat while searching for animals.

You must mark traps or other capture devices with your name, address, and license number if you leave them unattended. You must check them daily.

You must place turtle traps in a way that leaves enough area above the waterline for turtles to breathe. You must mark them with the words “turtle trap”. They must have one or more horizontal throat. You may not possess finfish while turtle trapping. You may not use any trap or net to harvest diamondback terrapins; you may only take diamondback terrapins by hand.

You may take frogs using any visible light and mechanical devices known as frog catchers or with devices that puncture the skin such as gigs and spears. You may not carry a firearm while hunting/taking frogs at night.

**Closed Seasons and Areas**

You may not harvest bullfrogs or pig frogs/grunters during April and May. You may not take diamondback terrapins from April 15 to June 15.

You may not collect reptiles and amphibians for commercial purposes from any WMA or state wildlife refuge.

**Size/Possession Limits**

- **Bullfrogs**: must be at least 5 inches long
- **Pig frogs/grunters**: must be at least 3 inches long, measured from the tip of the muzzle to the posterior end of the body between the hind legs. A permitted owner (or authorized representative) of a privately-owned waterbody may take undersized frogs from their privately-owned waterbody and sell them for stocking other waterbodies.
- **Diamondback terrapins**: must be at least 6 inches long on the plastron (bottom shell plate)
- **Green anoles**: must be at least 1-3/4 inches snout-vent length or 5 inches overall length
- **Turtle eggs**: no harvest of turtle eggs, except for red-eared slider eggs

**Regulations for commercially collecting reptiles and amphibians**

Regulations for commercially collecting reptiles and amphibians apply to native lizards, snakes, turtles, frogs, salamanders, and related species. They do not apply to alligators.
Get Involved!

To manage Louisiana’s fisheries, LDWF and the Commission rely on scientific data and landings records as well as public input. Our decisions directly impact you, so it’s important that we have your input as we define management goals and strategies. We encourage you to participate in the management process to ensure that we consider your interests and that you understand the regulatory process and resulting management actions.

LDWF has organized industry task forces for Louisiana’s shrimp, blue crab, and oyster industries. These task forces are made up of representatives from the respective industries as well as relevant state agencies. The task forces are responsible for studying and monitoring their industries and making recommendations to LDWF, the Commission, and other state agencies on managing and developing their industries. The task forces meet regularly, and meetings are open to the public. Read more online at:

- Shrimp Task Force: wlf.louisiana.gov/fishing/shrimp-task-force
- Blue Crab Task Force: wlf.louisiana.gov/fishing/louisiana-blue-crab-task-force
- Oyster Task Force: wlf.louisiana.gov/fishing/oyster-task-force

LDWF is also in the process of organizing a Finfish Task Force. Email awest@wlf.la.gov for more information.

The Commission’s monthly meetings and our open regulatory process provide additional opportunities for public input.

Louisiana Fisheries Forward

Louisiana Fisheries Forward (LFF) is a voluntary education and training program for members of Louisiana’s seafood community. Created by LDWF and Louisiana Sea Grant, LFF delivers training videos and fact sheets on a number of topics such as how to be a commercial fisherman and seafood business finance and management, as well as hands-on workshops, trainings, and demonstrations to showcase new technology and best practices. LFF’s goal is to help improve the economic success of Louisiana’s commercial fishing industry. Learn more at lafisheriesforward.org.

Louisiana Wild Seafood Certification Program

Through the Louisiana Wild Seafood Certification Program (LWSCP), LDWF aims to build a brand that guarantees the origin of Louisiana wild-caught seafood. Through strict chain of custody requirements, the program guarantees that all seafood products bearing the Certified Louisiana Seafood label were caught in Louisiana or Gulf waters by a licensed Louisiana fisherman, landed at a Louisiana dock, and processed and packaged by a Louisiana-based company. The program provides education for participants on best seafood handling and sanitation practices to ensure the utmost safety and quality. When a buyer sees this label, they can be confident they’re buying authentic Louisiana wild-caught seafood, a premium product known for freshness, consistent quality, and sustainability, and that they’re supporting our local fishing communities.

By branding and showcasing Louisiana seafood, LWSCP helps suppliers increase the value of their seafood and remain competitive in the marketplace. LWSCP participants benefit from free marketing support, such as:

- Market portal linking Certified Louisiana Seafood suppliers with buyers
- Promotions through the program website, social media, and events including seafood festivals and industry conventions
- Point-of-sale materials such as decals, brochures, and apparel
- Access to program partners including the Louisiana Seafood Promotion and Marketing Board, Audubon GULF, NOAA Fisheries, Louisiana Sea Grant, and other partners who purchase and promote Certified Louisiana Seafood.

Licensed Louisiana commercial fishermen are automatically eligible for the program; licensed Louisiana Fresh Products dealers and Wholesale/Retail Seafood dealers must obtain a permit to participate. They must also comply with all state and federal permitting and reporting requirements. Find out more or sign up to participate at LouisianaCertifiedSeafood.com.
### Licenses and Permits

To operate a vessel for hire and derive income from taking recreational fishermen to saltwater areas within the state to take fish, you must have one or more of the following licenses issued by LDWF. To apply for LDWF-issued licenses, contact 225.765.2898 or visit LDWF’s headquarters at 2000 Quail Drive in Baton Rouge. New applicants must apply in person at LDWF’s headquarters. Renew your license online at la.wildlifelicense.com. You must have additional permits issued by NOAA Fisheries to operate a vessel for hire in federal waters and take passengers to recreationally fish for and retain federally managed species. Fishermen should stay informed of the state/federal jurisdictional boundary as future congressional actions may affect current boundary demarcation as it applies to reef fish species.

| Operate a charter fishing vessel in saltwater areas of the state      | Charter Boat Fishing Guide License          | Up to six passengers: $250 resident, $1,500 nonresident; more than six passengers: $500 resident, $2,500 nonresident. To qualify for this license, the captain of a charter vessel must present the following:  
  • A valid U.S. Coast Guard Captain’s License  
  • A valid driver’s license  
  • A Louisiana Recreational Fishing License.  
  • Proof of liability insurance (see page 43)  
  A licensed Charter Boat Fishing Guide shall not have a Spotted Seatrout Permit. |
| Are a charter fishing operation which does not have a charter boat fishing guide present and consists of a large vessel carrying small skiffs that will be used by no more than two people for fishing purposes | Mothership License (for the main motorized vessel)  
  • Charter Skiff License (for each skiff) | Mothership with up to six skiffs: $1,000 resident and nonresident; mothership with more than six skiffs: $2,000 resident and nonresident; mothership captain must have a valid U.S. Coast Guard Captain’s License on his person. A Charter Skiff License  
  • Charter Skiff License (2 persons per skiff limit): $50 resident and nonresident; identifies the mothership to which it is attached; a licensed skiff may only be used for fishing purposes while the mothership to which it is attached is located in Louisiana waters |
| Are a charter boat captain whose passengers are fishing for tunas, billfish, swordfish, amberjacks, groupers, snappers, hinds, cobia, wahoo, or dolphin | Recreational Offshore Landing Permit        | No fee; go to wlf.louisiana.gov/rolp for more details and to obtain a permit. |
| Own or operate a charter vessel or headboat and take people out fishing in federal waters to catch and keep mackerels, cobia, little tunny, cero, dolphin, or bluefish | Gulf of Mexico Charter Vessel/Headboat Coastal Migratory Pelagics Permit | No permits are currently being issued (as of 6/16/2003); you may not sell fish under this permit. Go to sero.nmfs.noaa.gov/permits for more information. |
### Insurance Requirements
Licensed charter boat fishing guides and mothership vessels must have proof of liability insurance in their possession while on the water and make it available for inspection by duly authorized agents LDWF. Insurance must be:

- In their name (charter boat fishing guides only)
- Currently in force
- Written by a company with at least an A- rating in the latest printing of A.M. Best's Key Rating Guide
- Of a commercial nature
- Not associated with a primary residence
- At least $300,000 in coverage per occurrence.

### Regulations
Individuals fishing under the direction of a charter boat fishing guide or mothership operation south of the saltwater line for saltwater species must have a Louisiana saltwater angler's license in addition to a basic Louisiana fishing license, except those persons otherwise exempted.

Existing state and federal recreational regulations apply. See LDWF and the Gulf Council's recreational fishing regulations brochures for additional details.

- For-hire vessels operated by a legally licensed Louisiana guide with a valid recreational offshore landing permit in possession may harvest and possess a recreational limit of reef fish when fishing the waters of the state during an open season.
- Federally permitted for-hire vessels fishing in state waters must comply with federal regulations, unless state regulations are more restrictive.
- Passengers on charter vessels or headboats with two captains for trips longer than 24 hours may keep a 2-day bag limit of reef fish, king mackerel, and Spanish mackerel. One-day bag limits apply to all other species and trips, regardless of trip length.
  - The captain and crew of a vessel under charter may not harvest any grouper, greater amberjack, or red snapper (their possession limit is zero).
  - Operators of vessels with Gulf of Mexico reef fish charter vessel/headboat permits must comply with guidelines for proper care and release of incidentally caught smalltooth sawfish and sea turtles and must have specific gear onboard to ensure proper release of such species.
  - When fishing for swordfish, a charter vessel may keep no more than 6 swordfish; a headboat may keep no more than 15.

This public document was published at a total cost of $11,988. A total of 13,000 copies of this public document were published in the first printing at a total cost of $11,988. This document was published by LDWF, 2000 Quail Drive, Baton Rouge, LA to inform Louisiana residents and nonresidents of the rules and regulations pertaining to commercial and charter fishing in Louisiana. This material was printed in accordance with standards for printing by state agencies established pursuant to R.S. 43:31. Printing of this material was purchased in accordance with provisions of R.S. 43.
LA Creel is an angler survey tailored to fit Louisiana’s unique recreational fisheries. Through LA Creel we will not only improve the precision of recreational landings data statewide, but will also be able to obtain critical, basin-level information to customize management of the species that are abundant in the unique habitats of our state’s basins. You can help us by updating your contact information and participating in our brief surveys at www.FishLA.org/la-creel-survey

### LDWF MISSION STATEMENT

To manage, conserve, and promote wise utilization of Louisiana’s renewable fish and wildlife resources and their supporting habitats through replenishment, protection, enhancement, research, development, and education for the social and economic benefit of current and future generations; to provide opportunities for knowledge of and use and enjoyment of these resources; and to promote a safe and healthy environment for the users of the resources.
MAJOR CHANGES FOR 2016

1. The way recreational licenses are issued when purchased via mobile device and internet has changed (see page 6).

FRESHWATER FINFISH

1. Changes in black bass creel limits in the Atchafalaya Basin, on Lake Fausse Point, and on lakes Verret, Grassy and Palourde: statewide regulations now apply.
2. Changes in crappie (black crappie and white crappie) size limit and creel limit on Eagle Lake, on the Louisiana/Mississippi border: size limit is now 11 inches total length with a 30 fish daily limit.

MARINE FINFISH

Please refer to these LDWF websites for current information:
http://www.fishla.org/fishing/recreational-fishing-regulations/saltwater-regulations/saltwater-creel-size-limits/ and
http://www.fishla.org/articles/2015-recreational-fishing-regulations-major-changes/

1. Gray snapper, dolphinfish, wahoo and cobia have been added to the list of species requiring a Recreational Offshore Landing Permit. Permit must be obtained at www.wlf.la.gov/rolp (see pages 6 and 25).
2. The requirement for anglers on a for hire trip to have the Recreational Offshore Landing Permit has been removed, instead only requiring the charter captain to have the permit in possession (see page 6).
3. The requirement for anglers under the age of 16 (15 and under) to have the Recreational Offshore Landing Permit has been removed.
4. The size, bag and season limits for rock hind, red hind, misty grouper, black sea bass, dog snapper, mahogany snapper, schoolmaster, blackline tilefish and anchor tilefish have been removed.
5. Fishermen who stay overnight at Port Eads Marina, located in Plaquemines Parish, are allowed to clean their catch on site and transport filleted fish to land-based ports in Louisiana. Catch inspections and certifications, which can only be issued when LDWF is on site at Port Eads, would allow for fishermen to possess and transport up to a 3-day daily creel limit (see http://www.fishla.org/port-eads-marina-regulations for details).
6. Crab Traps (These regulations shall become effective Nov. 15, 2017, and shall be applicable to license year 2017 and thereafter.)
   • A minimum of 3 escape rings shall be placed on the vertical outside walls flush with the trap floor or baffle, with at least 2 rings located in the upper chamber of the trap
   • Minimum ring size shall be 2 and 3/8 inches in inside diameter, not including the ring material
   • Traps placed in Lake Pontchartrain would no longer be exempt from escape ring requirements

</table>
1 Valid to fish from a charter vessel in saltwater areas of the state, with a licensed guide on board at all times.
2 Valid to fish under the direction of a charter operation in a licensed charter skiff in saltwater areas of the state.
3 **Sportsman’s Paradise License:** Includes Basic and Saltwater Fishing, Basic and Big Game Hunting, Bow, Primitive Firearms, Turkey, LA Duck and WMA Hunting Permit, and all recreational gear licenses (EXCEPT recreational trawls greater than 16 feet in length).
4 **Senior Fish/Hunt License:** Any resident who reached age 60 on June 1, 2000 or later must obtain a Senior Hunt/Fish License to hunt or fish. This license is in lieu of basic and saltwater fishing, basic hunting, big game, bow, primitive firearms, LA duck license, turkey stamp and WMA hunting permit. It does not include special gear such as trawls, crab traps, crawfish traps, hoop nets, etc.
5 **NR Student:** Applies to a nonresident who is enrolled as a full-time student at an accredited college, university or high school that has a physical campus in Louisiana. Verification of full-time status on the Department form available at http://wlf.la.gov/licenses. Any person fishing under a “student license” must carry valid student I.D. card indicating current full time status while hunting or fishing.
6 **LA Disabled Fishing and Saltwater:** See page 8.
7 **Recreational Offshore Landing Permit (ROLP):** See page 6.
8 Recreational wire and hoop nets shall be used only in the geographical areas of the state designated as freshwater (see page 16).

</table>

Lifetime fishing licenses include both freshwater and saltwater fishing.

**Lifetime licenses are available from Baton Rouge office only.** Allow three weeks processing time. Applicants are required to have lived in Louisiana for the immediate 6 months prior to making application to qualify for resident rates. Mandatory documents required for applicants over the age of 18 are a valid LA driver’s license issued a minimum of 6 months and one of the following:
1. Louisiana voter’s registration card
2. Louisiana vehicle registration or
3. Two previous year’s state tax filing, stamped by Department of Revenue and Taxation.

(Applications available at www.wlf.louisiana.gov/licenses/lifetime/ or by calling 225-765-2887)

Mandatory paperwork for applicants under the age of 18 is the following:

- Original or certified copy of the birth certificate
- Copy of both parents driver’s license
Recreational fishing and hunting licenses may be purchased by phone toll-free at 1-888-765-2602, an authorization number for immediate use will be provided and Licenses will be mailed to each licensee or purchase and E-License online at www.la.wildlifelicense.com and print using your home printer for immediate use. Methods of payment are Visa, MasterCard, Discover, American Express or E-check. An authorization number for immediate use will be provided. A convenience fee is assessed. Customers wanting a license on durable, waterproof paper can still visit any license vendors.

RECREATIONAL LICENSES

ABOUT THE LICENSE

- Recreational licenses are valid from the date of purchase, are available for purchase each June 1, and expire June 30 of the following year.
- To obtain licenses at resident rates, proof of residency is required. Valid forms of I.D. include:
  - Louisiana driver’s license
  - Louisiana ID card (issued by the Department of Public Safety)
- Recreational Licenses that are purchased via mobile device (smart phone, laptop, tablet, etc.) will not receive a license in the mail. You will receive a text with a temporary authorization number, and an e-mail with the temporary authorization number and a PDF of your licenses which can be saved and printed.
- Recreational Licenses that are purchased online, at www.wlf.louisiana.gov will have the option to purchase an E-License. The E-License can be printed using your own printer for immediate use or save the PDF of licenses purchased to the electronic device you take with you. Those customers wanting a license on durable, waterproof paper can still visit any license vendors or call toll free (1-888-765-2602).

WHO NEEDS A LICENSE

Anglers 16 years of age or older who take or possess fish in Louisiana waters must possess a fishing license.

WHO DOES NOT NEED A LICENSE

- Children under the age of 16 do not need a fishing license (15 and under).
- Residents born before June 1, 1940 who have lived in Louisiana for one year prior to fishing are exempt from basic and saltwater licenses but MUST have appropriate gear licenses when using trawls, crab traps, silt traps, oyster tongs, crawfish traps, wire nets, hoop nets or any other legal fishing gear.

FISHING IN SALTWATER

Title 56, Section 302.1.C.(1) requires that all recreational anglers fishing south of the “saltwater line” (see page 16) for saltwater species have in their possession a Louisiana saltwater angler’s license IN ADDITION TO a basic Louisiana fishing license EXCEPT those persons otherwise exempted. All regulations apply regardless of where the fish is taken.
RECREATIONAL OFFSHORE LANDING PERMIT
Recreational anglers who are 16 years of age or older and charter captains are required to obtain this permit (free of charge) to possess tunas, billfish, swordfish, amberjacks, groupers, hinds, snappers, dolphinfish, wahoo and cobia. Anglers wishing to obtain or renew a permit must register or login at https://rolp.wlf.la.gov. More details on this program are also available on this site. The requirement for anglers on a for-hire trip to have the permit has been removed, instead only requiring the charter captain to have the permit in possession. The requirement for anglers that are 15 years of age and under to have the permit has also been removed.

ACTIVITIES THAT REQUIRE A LICENSE
A valid Basic Fishing License is required to possess fish in Louisiana waters OR to use the following gears in pursuit of fish:

- Bow and arrow
- A barbed or barbless spear
- Frog gig/catcher
- Scuba gear
- Hook and Line
- Cast net with a radius not to exceed 8 feet, 6 inches
- Crabbing on a refuge or wildlife management area (WMA)

MILITARY RECREATIONAL LICENSES

- Active-duty members of the United States armed forces, including National Guard, are eligible to purchase annual licenses for the same fee that Louisiana residents pay for annual licenses.
- An active-duty military member’s spouse and/or any dependents may also obtain a fishing license at the Louisiana resident rate.
- In order to obtain Louisiana resident rate licenses the active-duty member of the military, spouse or dependents must present a valid active duty military ID card at the time of the license purchase.
- A Louisiana resident who is a member of the Louisiana National Guard or any reserve component of the United States armed forces may purchase a combination license to hunt and fish for $50. Information and applications are available at http://www.wlf.louisiana.gov/licenses or by calling 225-765-2887.
- A Louisiana resident or native born Retired member of the United States armed forces, including Louisiana National Guard, is eligible to purchase a combination license to hunt and fish for $5.

(Application for this license can be mailed to the Baton Rouge office or presented to the Baton Rouge office in person).
- A Louisiana resident who is a surviving spouse of a member of the United States armed forces, including Louisiana National Guard, who was killed in action while in a combat zone, is eligible to purchase a recreational fishing license for $2.50. (Application for this license can be mailed to the Baton Rouge office or presented to the Baton Rouge office in person).
TEXAS/LOUISIANA RECIPROCAL

- Louisiana and Texas residents who hold resident licenses from their resident state or who are exempted from holding resident licenses in their state may fish the border waters between Texas and Louisiana without additional licenses. Boundary waters include:
  - Caddo Lake
  - Toledo Bend Reservoir
  - Sabine River
  - Sabine Lake
  - Sabine Pass
- Louisiana residents who are 65 years old or older may fish in Texas public waters (both freshwater and saltwater) as long as they possess valid Louisiana resident licenses and comply with Texas law.
- Louisiana residents born before June 1, 1940 are not required to have a license to fish border waters, only.
- Louisiana residents who are 17 to 64 years of age must purchase Texas non-resident fishing license(s) when fishing in Texas, except when fishing in border waters.
- Texas residents who are 65 years old or older may fish in Louisiana public waters (both freshwater and saltwater) as long as they possess valid Texas resident license(s) and comply with Louisiana law.
- Texas residents born before Sept. 1, 1930 must possess Texas resident fishing license(s) when fishing in Louisiana, except in the border waters.

DISABILITY LICENSES

- Resident veterans who have a permanent service-connected disability classification of 50 percent or more, and residents who are blind, paraplegic or multiple amputee can be issued recreational basic and saltwater fishing license(s) for free.
- Residents who are totally and permanently disabled and receiving federal social security disability benefits or disability retirement income from a retirement system whose members are exempt from social security pursuant to the Railroad Retirement Insurance Act or employees of the state or a political subdivision of the state that has not voluntarily agreed to participate in federal social security may qualify for reduced rate basic and saltwater fishing licenses. (This exemption does not apply to Supplemental Security Income benefits).
- Residents required to use one or more artificial limbs or permanent braces for mobility or a single amputee can be issued recreational basic and saltwater fishing licenses for free.
- As defined in R.S. 47:463.4(E), Mobility impaired persons that are bona fide residents of Louisiana, in possession of valid identification, and over 60 years of age may use one legal slat trap and/or one hoop net not greater than 18 feet by 8 feet, without a license in any waters of the state, only for the purpose of catching catfish and only for home consumption.
- Applications for these licenses can be mailed to the Baton Rouge office or presented to the Baton Rouge office in person.
- Application forms for the Resident Disabled Sportsman License or Resident Disabled with Social Security Benefit License are available at [www.wlf.louisiana.gov/licenses](http://www.wlf.louisiana.gov/licenses). For more information contact Sports License at 225-765-2887.
DEFINITIONS

1. **Angling:** to fish with rod, fishing pole or hook and line, with or without a reel.
2. **Bag Limit/Creel Limit:** the maximum number of a species permitted to be taken by one person in any one day.
3. **Bait Seine:** a net measuring no more than 30 feet in length with a mesh size not exceeding 1/4-inch mesh bar, 1/2-inch mesh stretched, and operated solely on foot and solely by hand, without any mechanical device, pulley or mechanical assistance whatsoever.
4. **Bait Species:** all species of fish and other aquatic life utilized for bait.
5. **Bandit Gear:** vertical hook-and-line gear with rods attached to a vessel and with line retrieved with rods and with line retrieved by manual, electric or hydraulic reels. (Use prohibited in state waters)
6. **Bona Fide Resident:**
   A. any person who has resided in this state continuously during the six months immediately prior to the date on which he applies for any license and who has manifested his intent to remain in this state by establishing Louisiana as his legal domicile, as demonstrated by compliance with all of the following, as applicable.
      - If registered to vote, he is registered to vote in Louisiana.
      - If licensed to drive a motor vehicle, he is in possession of a valid Louisiana driver’s license.
      - If owning a motor vehicle located within Louisiana, he is in possession of a valid Louisiana registration for that vehicle.
      - If earning an income, he has filed a Louisiana state income tax return and has complied with state income tax laws and regulations.
   B. any person who possesses a resident license from any other state shall not qualify for a resident license in Louisiana.
7. **Can:** a metal container of not more than 55-gallon capacity which is set for the purpose of taking fish.
8. **Cast Net:** a light circular net of vegetable or synthetic materials that is weighted around its perimeter and is thrown by hand over the water.
9. **Crab Dropnet:** any device constructed with vegetable, synthetic, or metal fibers and without flues or throat, attached to a wire frame that forms a net basket and is used for the purpose of taking crabs. This device shall be operated solely by hand and fished in a stationary, passive manner.
10. **Crab Trap:** a cube-shaped, device constructed of wire, no larger than 30 inches on any side, and with either a bait box or materials providing cover or shelter for peeler crabs. The entrance funnels must extend no further than 7 inches into the inside of the trap, with the openings to the entrance funnels on the vertical wall of the trap such that the horizontal diameter of each opening is at least one and one-half times the vertical diameter of the opening.
11. **Crawfish Net:** any device constructed with vegetable or synthetic material without flues or throats attached to a wire frame that forms a net basket and is used for the purpose of taking crawfish.
12. **Crawfish Trap:** any device constructed of coated wire with the opening of the throats or flues not exceeding 2 inches and which is used for the express purpose of taking crawfish.
13. **Dip Net:** a net, usually a deep mesh bag of vegetable or synthetic materials, on a fixed frame not to exceed 3 feet in diameter attached to a handle that is held and worked solely by hand by no more than one individual, and without any mechanical assistance.
14. **Finfish:** (noun) any of numerous cold-blooded aquatic vertebrates that characteristically swim with fins, breathe with gills and are covered with skin or scales.
15. **Fish:** (noun) all finfish, shellfish and crustaceans and all other species of aquatic life.
16. **Fork Length:** distance from tip of snout to midline of caudal fin. Used to measure some fish with deeply forked tails, such as amberjack.
17. **Freshwater Game Fish:** see “Game Fish” definition.
18. **Freshwater Recreational Fish:** any species of freshwater fish taken for recreational purposes.
19. **Fyke Net:** any cone-shaped net of vegetable or synthetic fibers having throats or flues which are stretched over a series of rings or hoops to support the webbing, with vertical panels of net wings set obliquely on one or both sides of the mouth of the cone-shaped net.
20. **Game Fish**: all of the following species of freshwater and saltwater fish.

A. **Freshwater Game Fish**: largemouth bass (*Micropterus salmoides*), spotted bass (*Micropterus punctulatus*), shadow bass (*Ambloplites arionnus*), black and white crappie (*Pomoxis nigromaculatus*, *P. annularis*), white bass (*Morone chrysops*), yellow bass (*Morone mississippiensis*), striped bass (*Morone saxatilis*), hybrid striped bass (striped bass-white bass cross or stripped bass-yellow bass cross), and any species of bream (*Lepomis* sp.).

B. **Saltwater Game Fish**: any sailfish (* Istiophorus platypterus*), blue marlin (*Makaira nigricans*), black marlin (*Makaira indica*), striped marlin (*Tetrapturus audax*), hatchet marlin (*Tetrapturus spp.*), white marlin (*Tetrapturus albidus*), and red drum (*Sciaenops ocellatus*).

21. **Hook**: any curved or bent device attached to a line for the purpose of taking fish or alligator and consisting of not more than one eye and one shank with no more than three barbs.

22. **Hoop Net**: a cone-shaped net of vegetable or synthetic materials having throats or flues and which are stretched over a series of rings or hoops to support the webbing.

23. **Landing Net**: means a net, usually a mesh bag of vegetable or synthetic material on a fixed frame attached to a handle held and operated by hand for the sole purpose of assisting in the landing of fish legally caught by other legal gear.

24. **Lead or Wing Net**: a panel of netting of any mesh size or length, with or without weights and floats, attached to one or both sides of the mouth of a cone-shaped net having flues or throats, and set so as to deflect or guide fish toward the mouth of the net.

25. **Licensee**: any resident or nonresident lawful holder of an effective license duly issued under the authority of the Louisiana Department of Wildlife and Fisheries (LDWF).

26. **Lower Jaw Fork Length (LJFL)**: longest distance from tip of lower jaw to midline of caudal fin. Used to measure billfish such as marlin, swordfish and paddlefish.

27. **Mesh Size**: the full measure of the mesh as found in use when measured as follows:

   A. **Bar measure** is the length of the full bar stretched from the near side of one knot to the far side of the other after being tarred, treated or otherwise processed.

   B. **Stretched measure** is the full stretched distance from the near side of one knot to the far side of the opposite knot diagonally across the mesh. This measurement shall not be applicable to weaved or woven nets commonly used for menhaden fishing. In woven nets, stretched measure is the full stretched distance of the opening of the mesh; bar measure is one-half of stretched measure.

28. **Monofilament**: a single untwisted synthetic filament.

29. **Nonresident**: any person who is not a bona fide resident as that term is defined by R.S. 56:8(69) (See Bona Fide Resident on page 9).

30. **Possess**: in its different tenses, the act of having in possession or control, keeping, detaining, restraining or holding as owner, or as agent, bailee or custodian for another. When possession of fish or other wildlife is prohibited, reference is made equally to such fish or other wildlife coming from without the state as to those taken within the state.

31. **Recreational Purposes**: a purpose other than deriving or attempting to derive an income of any kind from the harvest of fish. “Income” as used herein shall not include a prize or award offered as a prize in a fishing tournament.

32. **Reptiles and Amphibians**: native frogs, toads, turtles, snakes, lizards and salamanders.

33. **Saltwater Fish**: all species of finfish which normally inhabit the saline waters of the marine and estuarine environment for most of their life cycle.

34. **Saltwater Game Fish**: see “Game Fish” definition.

35. **Saltwater Recreational Fish**: any species of saltwater fish taken for recreational purposes.

36. **Shellfish**: an aquatic invertebrate species having a shell. These species include, but are not limited to oysters, clams, crabfish, shrimp, crabs and other mollusks and crustaceans.

37. **Slat Trap**: any device, used solely for the capture of catfish, which is cylindrical, rectangular, or square in cross section configuration, constructed of slats forming the length of the trap, with at least one pair of slats spaced at least 1 inch apart from each other on at least three sides of the trap and which is no more than 6 feet in length, 2 feet in diameter or width and which has one or more cone-shaped throats, flues or entrances.

38. **Slot Limit**: protective size limits denoting that fish within the range, inclusive of stated measurements, must be returned to the water immediately.

39. **Snagging**: a method of hooking fish without the fish taking the bait with their mouth. The angler jerks the fishing line out of the water as soon as any movement is felt on the line.

40. **Stupefying Substances or Devices**: explosives or chemicals or comparable destructive fishing practices as a capture technique.
41. **Take:** in its different tenses, the attempt or act of hooking, pursuing, netting, capturing, snaring, trapping, shooting, hunting, wounding or killing by any means or device.

42. **Test Trawl:** a trawl which is not more than 16 feet along the corkline or 20 feet along the headline or headrope.

43. **Total Length:** the longest measurable distance from the outermost portion of the snout lengthwise to the outermost portion of the caudal fin.

44. **Transport:** in its different tenses, the act of shipping, attempting to ship, receiving or delivering for shipment, transporting, conveying, carrying or exporting by air, land or water, or by any means whatsoever.

45. **Trawl:** any net, generally funnel-shaped, pulled through the water or along the bottom with otter boards to spread the mouth open while being fished. The term “trawl” also means and includes plumb staff beam trawls that do not exceed 16 feet, and that do not use otter boards but are held open laterally by a horizontal beam, and vertically by two vertical beams (plumb staffs), and that are used while the vessel is under way. Trawls are only allowed to be used in state waters when and where the shrimp season is open.

46. **Trigger:** any tension-loaded device that contains several feet of line and a hook or hooks, which is baited and set, and which automatically hooks and plays a fish.

47. **Turtle Trap:** any device designed to attract and/or capture turtles in aquatic habitats. It must be open above water to allow respiration of air-breathing animals and clearly marked “turtle trap.”

48. **Venting Tool:** a device intended to deflate the abdominal cavity of a fish to release the gases so the fish may be released with minimum damage.

49. **Wing Net:** see Lead Net on page 10.

50. **Wire Net:** a cone-shaped net of vegetable (cotton, flax, burlap) or synthetic materials (nylon, polypropylene, plastic), with a mesh no less than 1-inch square or 2 inches stretched, having throats or flues and which is stretched over wire of 5-inch mesh or greater to support the webbing.
SALE OF RECREATIONAL FISH PROHIBITED
All aquatic species caught must be for personal use only and are not to be sold or used for commercial purposes. It is illegal to buy, sell or trade any game fish.

GENERAL INFORMATION FOR FRESHWATER & SALTWATER ANGLERS

Louisiana is known around the world as a premier sport fishing destination. The Office of Fisheries uses scientific management methods to protect and enhance fish environments, habitats and other populations of aquatic species. As an angler, the decisions you make and your catch help us sustain the fisheries for present and future generations.

KNOW BEFORE YOU GO!

Want to check the weather and river stages before you leave on your next fishing trip? Call the National Weather Service’s Dial A Forecast for regularly updated marine forecasts.

- Shreveport 318-635-7575
- Lake Charles 337-439-0000
- New Orleans 504-522-7330

Also stay tuned to the NOAA Weather Radio (NWR) for up to the minute broadcasts.

BEST PRACTICES FOR CATCH AND RELEASE FISHING

Proper fish handling techniques are critical for the survival of your catch.

- Never play the fish to complete exhaustion.
- Handle the fish as little as possible and use wet hands, wet towel or wet glove.
- Avoid any contact with the gills.
- Keep the fish in the water as much as possible. Do not let the fish flop on a deck or beach.
- If you must remove the fish from the water, keep air exposure to a minimum.
- Use a landing net only when necessary. A soft knotless mesh or rubber net is less damaging to the fish’s eyes, fins and mucus coating (slime).
- Circle hooks, barbless hooks or hooks with crimped barb make removal easier.
- If the hook is deeply buried, cut the line as close to the hook as possible.
- Return the fish to water as quickly as possible. If it is sluggish, gently hold it and move it forward and back to get water moving across the gills.

A fish that appears to be in poor condition probably has a low chance of survival. If legal, consider keeping that fish for consumption.
CARING FOR YOUR CATCH

You can never be too careful when preserving your catch for later consumption. The fish must be iced down to remain fresh. A fish that feels mushy and has cloudy eyes may have spoiled and can make you sick.

- Be sure you have plenty of ice on hand. Place the fish on ice as soon as you remove the hook.
- Pour the ice out of the bag into your ice chest and place a layer of ice above and below the fish.
- Another technique in keeping fish fresh on hot days or for extended periods is to gut the fish and pack the body cavities with ice. This practice chills the fish faster.
- Anglers using baskets and live wells should be aware that overcrowded fish die quickly. If using a stringer, put the stringer through the jaw tissue and not the gills. Anglers using live wells on their vessel should also be aware of this danger.
- Cleaning your fish at the end of the fishing day is recommended. If you stored your fish on ice, use fresh ice for the newly cleaned fish.
- Keep the fish as cold as possible and refrigerate them as quickly as possible.
GENERAL INFORMATION

HOW TO MEASURE YOUR FISH

Use these guidelines to measure a fish correctly (refer to Illustrations):

1. Place the fish on its side on a flat board with the jaw closed.
2. **Total Length** - Measure in a straight line from the tip of the snout to the extreme tip of the tail fin. Adjust the tail by rotating (Example 1) or by squeezing (Example 2) to obtain the maximum length of the fish (Illustration 1).
3. **Fork Length** - Measure in a straight line from the tip of the snout to the fork of the tail (Illustration 2).
4. **Lower Jaw Fork Length** - Measure in a straight line the length from the tip of the lower jaw to the fork of the tail (Illustration 3).
5. **Curved Fork Length** - Measure from the tip of the upper jaw to fork of tail measured along the contour of the middle of the body (Illustration 4).
6. **Carcass Length** – Measure the curve from posterior edge of gill opening to anterior portion of caudal keel (Illustration 4).

**Illustration 1**

Example 1. Rotating

Example 2. Squeezing
The saltwater-freshwater line in Louisiana extends easterly from the Texas state line all the way to the Mississippi state line. The areas north of this saltwater-freshwater line are deemed freshwater. The areas south of the described line, including a number of saltwater lakes and waterways, are legally considered saltwater. Although the actual levels of salt in the water may differ from day to day due to tides and shifts in wind and currents, in most cases, the flora and fauna found on either side of the line differ dramatically. A detailed description of the saltwater-freshwater line can be found below. As with any regulation issue, please contact your local LDWF Enforcement Office with any questions you may have (see page 3).

**NOTE:** Persons fishing and/or possessing saltwater fish in these areas are required to have a saltwater fishing license in addition to the basic fishing license. Persons fishing for and/or possessing freshwater fish in saltwater areas are not required to hold a saltwater license.

**LOUISIANA SALTWATER LINE DEFINITION**

The Intracoastal waterway from the Texas-Louisiana boundary to its junction with Louisiana Highway 27 at Gibbstown, south along Louisiana Highway 82, east to its junction with the Intracoastal Waterway at Forked Island, the Intracoastal Waterway from Forked Island to Bayou Barataria to the Harvey Canal, the Harvey Canal to the Mississippi River, the Mississippi River to the Industrial Canal, the Industrial Canal to the Intracoastal Waterway, the Intracoastal Waterway to the Rigolets in Orleans Parish to the Louisville & Nashville Railroad bridge, the Louisville & Nashville Railroad right-of-way from the Orleans Parish line to the Mississippi state line.

Also, the areas south of the above described line, plus the saltwater lakes known as Lake Maurepas, Lake Pontchartrain, Lake St. Catherine, Chef Menteur Pass (except that 7/10 of a mile section from Bayou Sauvage south to the Intracoastal Waterway), the Rigolets, Unknown Pass, Pass Manchac, Intracoastal, and that portion of the Calcasieu Ship Channel from the Intracoastal Waterway south to the Gulf of Mexico, shall be designated as saltwater areas.
**FRESHWATER FISHING IN LOUISIANA**

**LICENSE REQUIREMENTS**

All anglers fishing in freshwater must possess a valid Basic Fishing License.

A **Basic Fishing License** is also required to use the following gear:

- Bow and arrow
- Barbed or barbless spear
- Frog gig/catcher
- Scuba gear
- Hook and Line
- Cast net (radius not to exceed 8 feet, 6 inches)

All applicable licenses must be in possession of the fisherman.

**FRESHWATER SPECIES YOU CANNOT HARVEST**

The federally listed threatened and endangered, or prohibited species listed below are off limits for recreational take. Civil and criminal penalties may apply for taking the following aquatic species.

- Louisiana pearlshell mussel (*Margaritifera hembeli*)
- Inflated heelsplitter mussel (*Potamilus inflatus*)
- Fat pocketbook mussel (*Potamilus capax*)
- Pink mucket mussel (*Lampsilis orbiculata*)
- Gulf sturgeon (*Acipenser oxyrinchus desotoi*)
- Pallid sturgeon (*Scaphirhynchus albus*)
- Shovelnose sturgeon (*Scaphirhynchus platorynchus*)

**PROHIBITED FRESHWATER FISH**

It is unlawful for any person, firm, or corporation to possess, sell, or transport any of the following species of fish into Louisiana without first obtaining the written permission of the secretary of the Department of Wildlife and Fisheries.

- All species of tilapia
- Carp (except koi, common carp and goldfish)
- Freshwater electric eel
- Rudd
- All members of the families of Asian swamp eels, snakeheads, walking catfishes, and pencil catfishes

Exotic species of Asian carp (silver, bighead, black and grass) taken from state waters must not be returned to the water and may not be possessed alive.

No person shall have in possession or sell in this state a piranha or Rio Grande cichlid. If an angler catches a Rio Grande cichlid using legal methods, the fish shall not be returned to the water or kept alive while in the possession of the angler.
**DAILY BAG LIMIT**
Recreational anglers must not exceed the daily bag limit for any species while on the water.

**POSSSESSION LIMIT**
No recreational anglers can have in their possession more than twice the daily bag limit of any species of freshwater recreational fish, **EXCEPT** that anglers may have up to three times the daily bag limit of black bass (*Micropterus spp.*) below U.S. Highway 90 in coastal Louisiana. Anglers may have up to 100 crappie in their possession at Toledo Bend Reservoir.

All freshwater game fish caught in any type of recreational or commercial net or trap must be returned immediately to the water from which it was taken without injury. See tips for safely releasing fish on page 12.

No person shall possess filleted fish while aboard a vessel in freshwater. However, for the purpose of consumption, a person shall have no more than 2 pounds of filleted finfish per person on board a vessel in freshwater.

**METHODS FOR FISHING OR TAKING FRESHWATER FISH**
There are many ways to catch fish and other aquatic species in Louisiana’s beautiful rivers, lakes, bayous, ponds and streams. The headings below define the legal methods and illegal methods of take, and certain exceptions that are allowable by species, methods and locations.

Always check with an LDWF Enforcement Office if you have questions. See page 3 for contact information.

**LEGAL METHODS OF TAKE**
- Hook and Line
- Bow and Arrow
- Yo-yos or Trigger Devices
- Recreational Slat Traps
- Recreational Crawfish Traps (must be marked with a waterproof tag, provided by the fisherman, with the name and recreational gear license number of the fisherman legibly printed on the tag, and must have a minimum mesh size of a hexagon of 3/4 by 11/16 of 1 inch from wire to wire not including any coating on the wire)
- Standard Spearing Equipment (used by recreational skin divers submerged in water when sport fishing)
- Barbed Gig (allowed in saltwater for taking flounder ONLY)
- Recreational Hoop Nets*
- Recreational Wire Nets*
* Allowed only in the geographical areas of the state designated as Freshwater (see map and definition on page 16).

**ILLEGAL METHODS FOR FISHING OR TAKING ALL FISH**
It is unlawful to possess any of the prohibited instruments, weapons, substances or devices described below with the intent to take fish.
- Crossbows
- Poisons
- Spears (see garfish, silver carp and bighead carp exception listed in “Gear Restrictions by Species” section)
- Stupefying Substances or Devices
- Explosives
- Guns
- Any instrument or device capable of producing electric current to shock fish
- Snagging Devices (see catfish, silver carp, and big head carp exceptions listed below)

### GEAR RESTRICTIONS BY SPECIES

Some alternative methods are allowed for catching/taking specific aquatic species.

#### FRESHWATER GAME FISH

Game fish are defined as largemouth bass, spotted bass, shadow bass, yellow bass, white bass, striped bass, hybrid striped bass, black crappie, white crappie, and bream

**LEGAL**
- Bream (Lepomis spp.) may not be taken as bait for sportfishing purposes in any form of trap **EXCEPT** at Toledo Bend Reservoir, where a minnow trap not exceeding 24 inches in length and having a throat no larger than 1 inch by 3 inches may be used to take bream for non-commercial bait purposes

**NOT LEGAL**
- Standard Spearing Equipment used by recreational skin divers is prohibited.
- Bow and Arrow
- Possession of game fish with nets or traps including recreational hoop nets, slat traps, pipes, buckets, drums, tires or cans including those licensed for recreational purposes.

#### CATFISH

**LEGAL** – snagging devices

#### PADDLEFISH (commonly called “spoonbill catfish,” but are not catfish)

**NOT LEGAL** – snagging devices

#### GARFISH

**LEGAL**
- Spears
- Bows and arrows

**LEGAL BAIT SPECIES**

Including minnows, crawfish and shrimp (does not include game fish)

**LEGAL**
- Cast nets
- Minnow traps
- Recreational Trawls
- Dip Nets (net must be on a fixed frame no larger than 3 feet in diameter worked exclusively by hand, by no more than one person, without any mechanical assistance)
- Bait Seines (with a maximum mesh size not exceeding 1/4 inch bar, 1/2 inch stretched and 30 feet in length; must be operated solely on foot and by hand, without any pulley, mechanical device or assistance whatsoever)

#### SILVER CARP & BIGHEAD CARP

**LEGAL**
- Boats
- Dip nets
- Spears
- Snagging

### RESTRICTIONS AND EXCEPTIONS BY METHOD

#### DIVERS

**LEGAL**
- Standard spearing equipment is the only legal method of take for non-game species that can be used by a skin diver submerged in water

**NOT LEGAL**
- The taking of gamefish with standard spearing equipment is prohibited.
MOBILITY IMPAIRED INDIVIDUALS
As defined in R.S. 47:463.4(E), mobility impaired persons who are bona fide residents of Louisiana, in possession of valid identification, and over 60 years of age may use one legal slat trap and/or one hoop net not greater than 18 feet by 8 feet, without a license in any waters of the state, only for the purpose of catching catfish and only for home consumption.

RESTRICTIONS BY LOCATION
Some Louisiana waterbodies have specific gear restrictions and are listed below.

BLACK LAKE, CLEAR LAKE, PRAIRIE LAKE (Natchitoches Parish)
CADDO LAKE (Caddo Parish)
CHICOT LAKE (Evangeline Parish)
LAKE D’ARBONNE (Union Parish)
LAKE LAFOURCHE (Caldwell Parish) and
LAKE SAINT JOSEPH (Tensas Parish)

Yo-Yo Restrictions
• The placement of any artificial object to anchor a yo-yo or trigger device is prohibited.
• No more than 50 yo-yos or trigger devices allowed per person.
• Each yo-yo or trigger device must be clearly tagged with the name, address and telephone number of the owner/user.
• All fish or any other animals caught or hooked must be immediately removed from the device.
• Each yo-yo or trigger device must be re-baited at least once every 24 hours.
• No yo-yo or trigger device is allowed to be attached to any metallic object.
• Except for an object used strictly in the construction of a pier, boathouse, seawall, or dock, no object which is driven into the lake bottom, a stump, tree, or the shoreline shall be used to anchor a yo-yo or trigger device. “Object” means rebar or other metal material, cane, PVC tubing, construction material, or any other type of material.

Trotline Restrictions
• All trotlines must be marked, tagged, and dated with the owner/user’s name, address, phone number and date of placement. The trotline must be marked on each end with a floating object that is readily visible.
• No person is allowed to set more than three trotlines with a maximum of 50 hooks per trotline.

• All trotlines must have an 8-foot cotton leader on each end of the trotline to insure that if the trotline is left unattended, the cotton leader will deteriorate and the line will sink.
• All trotlines must be attended daily while in service.

BOGUE CHITTO RIVER
Seines, Nets and Webbing Restrictions
• The use of seines, nets or webbing for the taking of fish in Bogue Chitto River from where it enters the state in the northern part of Washington Parish to where it enters into the Pearl River in St. Tammany Parish is prohibited.

Taking by Hand
• The taking of fish from logs, buckets, barrels, drums or natural or artificial nesting areas by hand grabbing is also prohibited in this area.

CYPRESS LAKE AND BLACK BAYOU RESERVOIR (Bossier Parish)
Hoop Nets, Wire Nets and Slat Traps
• These devices are prohibited from March 1 - Oct. 31 of each year.
• These devices must be removed from the lakes prior to March 1 of each year.

POVERTY POINT
No person is allowed to possess, set or use any recreational hoop nets, recreational wire nets, yo-yos, trotlines or slat traps at this location.

TCHEFUNCTE RIVER
Seines, nets, webbing or traps of any kind and all types, including slat traps, for the taking of fish in the Tchefuncte River, and its tributaries, from its origin in Washington Parish to where it empties into Lake Pontchartrain in St. Tammany Parish, are prohibited.
Attention!
LIFETIME FISHING LICENSE HOLDERS

Make sure your contact information is current! This is critical to our success at monitoring and managing your fisheries!

Do your part to help manage YOUR fisheries.

HOW TO UPDATE YOUR INFO

1. Go to la.wildlifelicense.com
2. Click “Update Contact Info”
3. Access your account with your fishing license number
4. Complete contact info, especially email address

Updating your contact info enters you into the 2015-2016 License To Win! sweepstakes. See back cover for more details!
# 2016 Louisiana Fishing Regulations

## FRESHWATER STATE CREEL AND SIZE LIMITS

### KEY

**MLL** - Minimum Length Limit  
**SL** - Slot Limit

Possession Limit is TWICE the daily creel limit unless otherwise stated.

## FRESHWATER GAME FISH

### BLACK BASS (Largemouth & Spotted)

<table>
<thead>
<tr>
<th>Location</th>
<th>Size Limit</th>
<th>Daily Creel Limit</th>
</tr>
</thead>
<tbody>
<tr>
<td>All state waters EXCEPT as follows:</td>
<td>None</td>
<td>10 daily</td>
</tr>
<tr>
<td>Eagle Lake</td>
<td>16” MLL</td>
<td>10 daily</td>
</tr>
</tbody>
</table>
| Poverty Point Reservoir | 15-19” protected SL | 8 daily  
No more than one over 19” total length |
| Caney Creek Lake (Jackson Parish) | 15-19” protected SL | 8 daily  
No more than two over 19” total length |
| False River (Pointe Coupee Parish) | 14” MLL | 5 daily |
| John K. Kelly-Grand Bayou Reservoir (Red River Parish) | 14-17” protected SL | 8 daily  
No more than four over 17” total length |
| Caddo Lake | 14-18” protected SL  
for Largemouth Bass  
No length restriction for Spotted Bass | 8 daily  
No more than four  
Largemouth Bass over 18” total length |
| Sabine River$^3$ and Toledo Bend Reservoir | 14” MLL for Largemouth Bass  
No MLL for Spotted Bass | 8 daily |

---

1. **NOTE:** For enforcement purposes, a spotted bass is defined as a black bass with a tooth patch on the tongue.
2. Fish falling within a protected slot limit must be immediately released.
3. Sabine River from the Toledo Bend Dam to the I-10 bridge. Sabine River upstream from Toledo Bend Reservoir to the point at which the entire river enters TX (state line is marked with a sign).
4. Anglers may have up to three times the daily bag limit of black bass (Micropterus spp.) below U.S. Highway 90 in coastal Louisiana providing the fish are kept whole or whole gutted in separate bags for each daily take limit. The bags must be marked with the date fish were taken, the species and number of fish contained in the bag, and the name and recreational fishing license number of the person taking the fish.

SALTWATER FISHING IN LOUISIANA

STATE AND FEDERAL LICENSES AND PERMIT REQUIREMENTS

STATE LICENSE REQUIREMENTS
1. Basic Fishing License
2. Saltwater Fishing License
3. A Recreational Offshore Landing Permit (ROLP) is required of all anglers, EXCEPT those anglers on a paid for-hire trip where the captain possesses a Recreational Offshore Landing Permit, or those anglers that are under the age of 16, (free of charge) including those not normally required to have a fishing license to possess tunas, billfish, swordfish, amberjacks, groupers, hinds, snappers, dolphinfish, wahoo and cobia.
   • The Recreational Offshore Landing Permit can be found on the LDWF website at https://rolp.wlf.la.gov or through Smartphone applications. The iPhone app can be downloaded free of charge from the App Store by searching for the Louisiana Recreational Offshore Landing Permits App. The Android app can also be downloaded free of charge from the Google Play Store by searching for LDWF Recreational Offshore Landing Permits App.

All applicable licenses must be in possession of the fisherman.

FEDERAL LICENSE REQUIREMENTS
The National Marine Fisheries Service (NMFS) manages the Atlantic Highly Migratory Species (HMS) Division in the Atlantic Ocean, Gulf of Mexico and Caribbean Sea.
1. An Atlantic HMS Angling Permit is required for vessels fishing for tunas, billfshes, swordfish and sharks. You may apply for an initial or renewal permit in one of several ways. The permit fee is $20.

2. An Atlantic HMS Charter/Headboat Permit is required for all charter or headboat fishing for and/or retaining regulated Atlantic HMS in federal waters of the Gulf of Mexico The permit fee is $20. HMS Charter/Headboat Permit will be valid from the date of issuance through Dec. 31, 2014

3. A Federal Shrimp Vessel Permit is required for all vessels fishing shrimp in the Gulf of Mexico EEZ.

Information about obtaining HMS permits and regulations are available at www.nmfs.noaa.gov/sfa/hms/information or by calling 888-872-8862.
SALTWATER FISHING

KNOW BEFORE YOU GO

The National Marine Fisheries Service has a Memorandum of Agreement with the National Weather Service to broadcast unanticipated and time-critical fishery regulatory actions where there is minimal opportunity for advance public notice. These broadcasts are issued for four or five days, 24 hours a day, by selected NWR coastal stations. (VHF frequencies in MHz)

- 162.400
- 162.525
- 162.550
- 162.425
- 162.450
- 162.475

SALTWATER SPECIES YOU CANNOT HARVEST

THREATENED OR ENDANGERED AND PROHIBITED SPECIES
The federally listed threatened and endangered, or prohibited species listed below are off limits for fishing or recreational take. Civil and criminal penalties may apply for taking the following aquatic species. If any of these protected species are incidentally caught, they must be released immediately unharmed. See page 12 for tips on safely releasing fish.

- All Whales
- Dolphin (mammal)
- Goliath Grouper
- Gulf Sturgeon
  (*Acipenser oxyrinchus desotoi*)
- Large tooth Sawfish
- Nassau Grouper
- Sea Turtles
- Smalltooth Sawfish
- West Indian Manatee

SHARKS

- Atlantic Angel Shark
- Basking Shark
- Bigeye Sand Tiger Shark
- Bigeye Sixgill Shark
- Bigeye Thresher Shark
- Bignose Shark
- Caribbean Reef Shark
- Caribbean Sharpnose Shark
- Dusky Shark
- Galapagos Shark
- Longfin Mako Shark
- Narrowtooth Shark
- Night Shark
- Sand Tiger Shark
- Sevengill Shark
- Sixgill Shark
- Smalltail Shark
- Whale Shark
- White Shark

RECREATIONAL SALTWATER TOURNAMENT OPERATORS

Federal regulations require any person conducting a fishing tournament in the federal waters of the Gulf of Mexico involving the catch and/or landing of any HMS regulated species to register with the HMS Management Division of the National Marine Fisheries Service at least four weeks prior to start of the tournament. A Tournament Registration Form [PDF] is available on the NMFS website at [www.nmfs.noaa.gov/sfa/hms/tournaments/index.html](http://www.nmfs.noaa.gov/sfa/hms/tournaments/index.html).

To register a tournament, an Atlantic HMS Tournament Registration Form must be completed, signed, and sent to the Atlantic HMS Management Division by mail or fax. Fax: 728-824-5398

Mailing Address:
HMS Tournament Registration
National Marine Fisheries Service
263 13th Avenue S.
St. Petersburg, FL 33701

Once the registration form has been processed an Atlantic HMS Tournament Confirmation Number will be produced and provided to the tournament operator.

NOTE: Registration is not complete unless the tournament operator has received a confirmation number from the HMS Management Division of NMFS. For more information call 728-824-5399; [www.hmspermits.noaa.gov](http://www.hmspermits.noaa.gov).
IMPORTANT INFORMATION ABOUT FISHING IN GULF OF MEXICO FEDERAL WATERS

The Gulf of Mexico Fishery Management Council manages federal waters from where the Louisiana gulfward boundary ends and extends 200 miles seaward into the Gulf of Mexico. Louisiana recreational and commercial anglers fishing beyond the 9 nautical-mile (10.357 statute miles or 3 marine leagues) Louisiana gulfward boundary are in federal waters.

*NOTE: In June 2012, the Louisiana Wildlife and Fisheries Commission took action to extend Louisiana state waters from 3 miles offshore to 3 marine leagues or approximately 9 nautical miles, but the U.S. Congress has yet to confirm this action. LDWF officials encourage fishermen to use caution and their own personal judgment when fishing beyond the 3 mile boundary as it is fully expected that federal agents will continue to enforce federal law.

These waters are also known as the Exclusive Economic Zone (EEZ). Federal fishing regulations are not always the same as state fishing regulations. To make sure that you are in complete compliance with federal regulations call the Gulf Council at 888-833-1844, or e-mail gulfcouncil@gulfcouncil.org. Visit gulfcouncil.org for information about federal fishing regulations, measurement guidelines, sanctuaries & closures and fish identification charts.

The Louisiana Department of Wildlife and Fisheries App for iPhone and Android available free of charge.

METHODS FOR FISHING OR TAKING SALTWATER FISH

There are many ways to catch fish and other aquatic species in Louisiana’s beautiful coastal waters. The headings below define the legal methods and illegal methods of take, plus certain exceptions that are allowed by species, methods and locations.

Always check with an LDWF Enforcement Office if you have questions.

LEGAL METHODS

Some species of gamefish may not be taken with the gear listed below.

- Hook and Line
- Trolling Line
- Handline
- Bait Casting
- Fly Casting Apparatus
- Recreational Crawfish Traps (must be marked with a waterproof tag, provided by the fisherman, with the name and recreational gear license number of the fisherman legibly printed on the tag, and must have a minimum mesh size of a hexagon of 3/4 by 11/16 of 1 inch from wire to wire not including any coating on the wire)
- Yo-yos or Trigger Devices
- Bow and Arrow
- Standard Spearing Equipment (used by a skin diver sport fishing in saltwater or freshwater when submerged in the water)
- Barbless Spear or Multi-pronged Barbed Gig (may be used in saltwater for taking flounder ONLY)
- Dip Nets
EXCEPTIONS TO METHODS OF TAKE BY SPECIES

An alternative method is allowed for taking the aquatic species listed below. Harvest of any other saltwater species by this method is prohibited.

RED DRUM

LEGAL
• Bow and Arrows
• Standard Spearing Equipment used by a skin divers submerged in water when sport fishing

SALTWATER RESTRICTIONS AND EXCEPTIONS BY METHOD

SKIN DIVERS
With the exception of game fish, the only legal method for a skin diver to take fish is when submerged in water using standard spearing equipment. See page 30 for a complete listing of game fish.

MOBILITY IMPAIRED INDIVIDUALS
As defined in R.S. 47:463.4(E), mobility impaired persons who are bona fide residents of Louisiana, in possession of valid identification, and over 60 years of age may use one legal slat trap and/or one hoop net not greater than 18 feet by 8 feet, without a license in any waters of the state, only for the purpose of catching catfish and only for home consumption.

ILLEGAL METHODS FOR FISHING OR TAKING ALL FISH

It is unlawful to possess any of the prohibited instruments, weapons, substances or devices described below with the intent to take fish.
• Crossbows
• Gill Nets (freshwater and saltwater)
• Spears
• Poisons
• Stupefying Substances or Devices
• Explosives
• Guns
• Tree-topping Devices
• Any instrument or device capable of producing electric current to shock fish
• Snagging Devices

LEGAL BAIT SPECIES

INCLUDING MINNOWS, CRAWFISH AND SHRIMP (not including game fish)

LEGAL
• Cast nets
• Minnow traps
• Dip Nets (net must be on a fixed frame no larger than 3 feet in diameter worked exclusively by hand, by no more than one person, without any mechanical assistance)
• Bait Seines (a maximum mesh size not exceeding 1/4-inch bar, 1/2 inch stretched and 30 feet in length; must be operated solely on foot and by hand, without any pulley, mechanical device or assistance whatsoever)
• Recreational Trawls, only allowed in state waters when and where shrimp season is open.
IMPORTANT INFORMATION ABOUT BRINGING YOUR SALTWATER CATCH TO SHORE

All saltwater finfish caught in possession of a recreational angler must have the head and caudal fin intact until set on shore. Garfish may have the head and caudal fin removed prior to the fish being on shore as long as a sufficient patch of skin that clearly identifies the fish remains on the fish.

**EXCEPTION:** Tuna, swordfish and shark possessed by a recreational angler must not be skinned or scaled until set or put on shore. Tuna that meet minimum size requirements may have the head removed if the carcass length is in excess of the minimum total length. See Lengths on page 14.

Fillets may not be possessed on the water, except for the purpose of consumption at sea aboard the harvesting vessel. An individual must not have more than 2 pounds of finfish parts per person in state waters, or more than 1.5 pounds of finfish parts per person in federal waters, on board the vessel, provided that the vessel is equipped to cook finfish and that the finfish does not exceed applicable bag limits. These provisions do not apply to bait species.

Saltwater finfish caught or transported by a recreational fisherman are presumed to have been caught in Louisiana waters, for license requirements.

All regulations regarding these species apply whether caught in freshwater or saltwater areas.

REQUIRED ONBOARD GEAR FOR FISHING IN GULF OF MEXICO FEDERAL WATERS

Louisiana state waters extend 9 nautical miles (10.357 statute miles or 3 marine leagues) seaward from the nearest land, but in some cases extend further. The EEZ is described as waters that extend seaward from that point out to 200 miles from the coast.

Recreational anglers onboard a vessel to fish for or possess Gulf reef fish in the Gulf of Mexico EEZ must possess onboard and use the required gear as specified below. These devices are required because they reduce mortality on released fish. See page 12 for tips on safely releasing fish.

**DEHOOKING DEVICE**

At least one dehooking device is required on board and must be used to remove hooks embedded in Gulf reef fish with minimum damage. The device must be constructed to allow the hook to be secured and the barb shielded without reengaging during the removal process. The dehooking end must be blunt and all edges rounded. The device must be of a size appropriate to secure the range of hook sizes and styles used in the Gulf reef fishery.

**NON-STAINLESS STEEL CIRCLE HOOKS**

Non-stainless steel circle hooks are required when fishing with natural baits for reef fish.

Become an LDWF VIP and help us increase awareness and participation in recreational fishing throughout Louisiana.

### EXPLANATION OF SALTWATER CREEL & SIZE LIMITS

1. **RED DRUM (REDFISH) AND SPOTTED SEATROUT (SPEC KLED TROUT)**

Recreational saltwater anglers may possess a two days’ bag limit on land; however, no person shall be in possession of fish over the daily bag limit in any one day or while fishing or while on the water, unless that recreational saltwater angler is aboard a trawler engaged in commercial fishing for a consecutive period of longer than 25 hours. Take or possession of red drum in federal waters is prohibited.

2. **OFF-WATER BAG LIMIT**

Two days’ bag limit allowed in possession off of the water, not while fishing or in a boat.

3. **CHARTER VESSELS & HEADBOATS**

Two-day limit allowed in possession only on charter vessels and headboats on multi day trips, if the vessels have two licensed operators as required by the U.S. Coast Guard for trips more than 12 hours, and if each angler has in possession a receipt issued on behalf of the vessel verifying the length of the trip.
**HIGHLY MIGRATORY SPECIES**

A **HMS Permit** is required for all owners/operator of vessels in the Gulf of Mexico fishing for and/or retaining the HMS regulated species of tunas, billfishes, swordfish and sharks. The Atlantic HMS Permits will be valid from the date of issuance through Dec. 31, 2014. The permit fee is $20.

For information about contact the National Marine Fisheries Service (NMFS) Permitting Office at 1-888-872-8862 or 727-824-5399 or visit the NMFS Permit Shop at [www.hmspermits.noaa.gov](http://www.hmspermits.noaa.gov). For complete HMS regulations, contact the HMS Management Division at 301-713-2347 or visit the website at [www.nmfs.noaa.gov/sfa/hms/information](http://www.nmfs.noaa.gov/sfa/hms/information). See page 25 for a complete listing of Highly Migratory Species contact information.

**MARLIN AND SAILFISH**

All recreational anglers, including those not normally required to have a fishing license (except anglers 15 years of age or under), and charter captains must obtain a Recreational Offshore Landing Permit to possess billfish (see pages 7 & 25 for more details).

**SHARKS**

**CLOSED SEASON**

All Louisiana state waters seaward to the gulfward boundary of the Louisiana Territorial Sea shall be closed to the recreational and commercial harvest and possession of all sharks between April 1 and June 30 of each year.

**LARGE COASTAL SHARKS**
Blacktip shark; nurse shark; smooth hammerhead; bull shark; sandbar shark*; spinner shark; great hammerhead; scalloped hammerhead; tiger shark; lemon shark; silky shark*

*NOTE: Recreational harvest of sandbar and silky sharks (ridgeback sharks) is not allowed.

**SMALL COASTAL SHARKS**
Atlantic sharpnose shark; bonnethead shark; blacknose shark; finetooth shark

**PELAGIC SHARKS**
Blue shark; porbeagle shark; thresher shark; oceanic whitetip shark; shortfin mako

**SPOTTED SEATROUT (SPECKLED TROUT)**

12” minimum total length, 25 fish per person daily bag limit. EXCEPT: 15 fish daily bag and possession limit, with no more than two spotted seatrout exceeding 25” total length, regardless of where taken in a defined area of Cameron and Calcasieu parishes located in southwestern Louisiana. The defined area, including coastal territorial waters, is as follows: south of Interstate 10 from its junction at the Texas-Louisiana boundary eastward to its junction with Louisiana Highway 171, south to Highway 14, south to Holmwood, and then south on Highway 27 through Gibbstown, south to Louisiana Highway 82 at Creole and south on Highway 82 to Oak Grove, then due south to the western shore of the Mermentau River, following this shoreline south to the junction with the Gulf of Mexico, and then due south to the limit of the state territorial sea. Under the authority of the provisions of R. S. 56:325.1(A), the daily bag and possession limit shall be 15 fish, regardless of where taken, with no more than two spotted seatrout exceeding 25 inches total length. Those spotted seatrout exceeding 25” in length shall be considered as part of the daily recreational bag and possession limit.
NOTE: A person subject to a bag limit shall not possess at any time, regardless of the number of trips or the duration of a trip, any shark in excess of the bag limits listed under Highly Migratory Species on Illustrated chart (page 32). The practice of “finning,” that is, removing only the fins and returning the remainder of the shark to the sea, is prohibited within and without Louisiana waters. Notwithstanding other provisions of this part, a person may fish for, but not retain, white shark (Carcharodon carcharias) with rod and reel only under a catch-and-release program, provided the person releases and returns such fish to the sea immediately with a minimum of injury (see tips on safely releasing fish on page 12).

8SWORDFISH

All recreational anglers, including those not normally required to have a fishing license, and charter captains must obtain a Recreational Offshore Landing Permit to possess swordfish (see pages 7 & 25 for details). Anglers on a paid for-hire trip and anglers 15 years of age or younger are not required to have the permit.

Recreational fishing vessels shall not possess more than five swordfish per vessel per trip. Swordfish taken under a recreational bag limit shall not be sold, purchased, exchanged, bartered, or attempted to be sold, purchased, exchanged or bartered. No person aboard any vessel shall transfer or cause the transfer of swordfish between vessels on state or federal waters.

9TUNA

All recreational anglers, including those not normally required to have a fishing license, and charter captains must obtain a Recreational Offshore Landing Permit to possess tuna (see pages 7 & 25 for details). Anglers on a paid for-hire trip and anglers 15 years of age or younger are not required to have the permit.

Anglers fishing for tunas within or outside Louisiana state waters are subject to both state and federal laws, rules and regulations. Federal regulations regarding the recreational harvest of tunas change often, especially for bluefin tuna. Prior to angling for or harvest of tuna, be aware of the most current federal regulations for fishing or harvest, including sizes, bag limits and closed seasons. For updates on tuna quota monitoring and tuna retention limit adjustments, anglers may call the Atlantic Tunas Information Line at 888-872-8862. The “Atlantic Tunas Regulations Brochure” is available at http://hmspermits.noaa.gov/library.asp and announcements of changes may be accessed via the web at http://hmspermits.noaa.gov/news.asp.

Permanent Louisiana regulations on tuna harvest may be superseded by seasonal changes within the federal regulatory system. See websites referenced above for current federal regulations. State requirements regarding tuna regulations may also be subject to change, please refer to the LDWF website for current information: www.wlf.louisiana.gov/fishing/recreational/saltwater/seasons and www.wlf.louisiana.gov/fishing/recreational/saltwater/regulations.

BLUEFIN TUNA

All bluefin tuna must be reported within 24 hours of landing to NMFS by calling 888-872-8862 or visiting www.hmspermits.noaa.gov. For further information about angling category permits call the NMFS HMS Division at 888-872-8862 or 301-713-2347.
**10 GROUPER**

All recreational anglers, including those not normally required to have a fishing license, and charter captains must obtain a Recreational Offshore Landing Permit to possess grouper (see pages 7 & 25 for details). Anglers on a paid for-hire trip and anglers 15 years of age or younger are not required to have the permit.

There is a closed season for the recreational harvest of gag from Jan. 1 through May 31 of each year. A closed season for the recreational harvest of black, red, yellowfin and yellowmouth groupers as well as scamp has also been established from Feb. 1 - March 31 of each year seaward of the 20 fathom (120 feet) curve.

Other seasons and rules are currently in place in Federal waters off of Louisiana. Please check those rules at www.gulfcouncil.org under “Fishing Regulations.”

**11 CHARTER CAPTAIN & CREW**

No harvest of red snapper, greater amberjack or grouper of any species is allowed for the captain and crew of vessel under charter (their creel limit/bag limit is zero).

Charter captains must have a Recreational Offshore Landing Permit when conducting a for-hire trip that is in possession of any of the following species or species groups: snappers, groupers, amberjacks, hinds, tunas, swordfish, billfish, cobia, wahoo, or dolphinfish (see pages 7 & 25 for details).

**12 SNAPPER**

All recreational anglers, including those not normally required to have a fishing license, and charter captains must obtain a Recreational Offshore Landing Permit to possess snapper. Anglers on a paid for-hire trip and anglers 15 years of age or younger are not required to have the permit. (see pages 7 & 25 for more details).

**13 RED SNAPPER**

As of publication of this regulations pamphlet, modified regulations were being considered for the recreational harvest of red snapper in Louisiana state waters. For current red snapper season, bag limit and possession-information check the LDWF website at: http://www.fishla.org/fishing/recreational-fishing-regulations/saltwater-regulations/saltwater-creel-size-limits/

- As our department continues to fight the battle for regional management of our fisheries, regulations may have the potential to change throughout the season. We urge anglers to visit our webpage or our online fishing regulations pamphlet prior to your trip to ensure you are compliant.
- State-waters-only season is open 7 days a week until closed by LDWF.

**14 GRAY TRIGGERFISH**

There is a closed season for the harvest of gray triggerfish from June 1 through June 30.
**AMBERJACK**

All recreational anglers, including those not normally required to have a fishing license, and charter captains must obtain a Recreational Offshore Landing Permit to possess grouper. Anglers on a paid for-hire trip and anglers 15 years of age or younger are not required to have the permit (see pages 7 & 25 for details).

A closed season for the recreational harvest of greater amberjack has been established from June 1 - July 31 of each year. For amberjack season information, check the LDWF website at www.wlf.louisiana.gov/fishing/recreational/saltwater/seasons and www.wlf.louisiana.gov/fishing/recreational/saltwater/regulations.

---

**LOUISIANA SPORT FISH RESTORATION PROGRAM**

The Sport Fish Restoration Program is a “user pays, user benefits” system of resource management. The federal and state governments, the sport fishing industry, anglers, and boaters formed the cooperative effort to increase boating and sport fishing opportunities.

The cycle of funding (illustrated above) shows how Louisiana anglers and outdoor enthusiasts support the Sport Fish Restoration Program, and the benefits they receive in return.

**Invest in the Future... Geaux Fish Louisiana!**
RECENATIONAL SHRIMPING

LICENSE REQUIREMENTS

CAST NET LICENSE REQUIREMENTS
1. Basic Fishing License

TRAWL LICENSE REQUIREMENTS
1. Basic Fishing License
2. Trawl License
3. Federal Shrimp Vessel Permit required for vessels fishing shrimp in federal waters of the Gulf of Mexico (EEZ)

* No license required for use of bait seines and dip nets.

HARVEST AREAS

For management purposes, Louisiana’s state waters are divided into inside and outside waters. The “shrimp line” separates these waters. It generally follows the coastline from the Louisiana/Texas state line to the Louisiana/Mississippi state line. Inside waters (landward of the shrimp line) are inshore waters; outside waters (seaward out to three nautical miles) are the territorial seas. Inside waters are further divided by major estuarine basin. The Louisiana Wildlife and Fisheries Commission (Commission) may amend the shrimp line due to environmental changes. See the latest coordinates at www.wlf.louisiana.gov/fishing/insideoutside-shrimp-line.

The Louisiana Department of Wildlife and Fisheries (LDWF), the Commission, and the Louisiana Legislature are responsible for managing the shrimp fishery in inshore waters and the territorial seas. The Gulf of Mexico Fishery Management Council and NOAA Fisheries are responsible for federal waters.

SEASONS

Trawls cannot be used for any purpose in state waters during the closed shrimp season. Shrimp seasons are flexible and are determined by the LWFC based upon biological and technical data relative to shrimp populations as well as public input. The spring inshore season usually begins in early to mid May, and may extend into July. The fall inshore season usually begins near mid-August and typically extends into December. The shrimp season in Louisiana’s outside territorial waters is generally open year round EXCEPT for a closed season in portions of state outside waters, which may be set during the late winter to early spring months, usually beginning in December or January and extending into March or April. The shrimp season in the EEZ is usually open year-round.

NOTE: Restricted areas exist within WMAs, refuges and other areas and may be closed to certain gear types or methods of fishing. Check with your local LDWF Office or refer to the WMA and Refuge section of this pamphlet.
SIZE AND POSSESSION LIMITS

No size limit on any saltwater shrimp taken during the spring open season in Louisiana. No size limit on brown shrimp or seabobs taken during any open season.

There is a minimum possession of 100 count (whole shrimp per pound) on white shrimp taken in either inside or outside (offshore) waters of Louisiana. This size restriction applies to the taking or possession of such shrimp aboard a vessel.

EXCEPTION: There is no possession count on white shrimp taken or possessed from Oct. 15 through the third Monday in December. When more than 50 percent by weight of the shrimp taken or possessed is seabobs or brown shrimp, the maximum allowable amount of undersized white shrimp taken or possessed shall not exceed 10 percent by weight of the total shrimp taken or possessed.

CAST NETS, DIP NETS AND BAIT SEINES

A recreational fisherman is allowed to use dip nets, bait seines, and cast nets not to exceed 8 and 1/2 feet in radius. Recreational fishermen shall not take at anytime more than 50 pounds of shrimp per day during closed shrimp season and 100 pounds of shrimp per day during the open season, in the aggregate, per boat or vehicle, regardless of the number of persons thereon. Shrimp taken are to be used for bait or for the fisherman’s own consumption and are not sold, traded or otherwise permitted to enter into commerce. Certain WMAs and state or federal refuges may have different rules. Always check with an LDWF Enforcement Office if you have questions.

RESTRICTIONS ON NIGHT SHRIMPING

Night shrimpig is prohibited between the hours of one-half hour after sunset to one-half hour before sunrise in the following areas: Vermilion Bay, East and West Cote Blanche bays, and in Atchafalaya Bay, from the western shore of Vermilion Bay to the western shore of the Atchafalaya River and the Atchafalaya River Ship Channel out to Eugene Island as described by the inside-outside line.

TRAWLS

Trawls cannot have a mesh size less than 5/8-inch bar or 1 and 1/4 inches stretched. In that portion of state inside waters from the western shore of the Atchafalaya River to the western shore of Vermilion Bay and Southwest Pass at Marsh Island, mesh size must not be less than 3/4-inch bar or 1 and 1/2 inches stretched during the fall inshore shrimp season.

TRAWLING DURING OPEN SEASON AND POSSESSION LIMITS

During the open shrimping seasons trawls 25 feet and less are allowed for recreational purposes.

Recreational shrimpers using trawls 16 feet in length or less are limited to 100 pounds (heads on) of shrimp per boat per day.

Recreational shrimpers using trawls between 16 and 25 feet in length are limited to no more than 250 pounds of (heads-on) shrimp per day per boat, if the shrimp taken are used for bait or the fisherman’s own consumption and are not sold, traded or otherwise permitted to enter commerce.

Federal Turtle Excluder Device (TED) regulations require any shrimp trawler in the Gulf Area to have an approved TED installed in each net that is rigged for fishing. However,
certain exemptions to these requirements may apply (e.g. vessels without mechanical advantage or power net retrieval, test trawls). A net is rigged for fishing if it is in the water, or if it is shackled, tied, or otherwise connected to any trawl door or board, or to any tow rope, cable, pole or extension, either on board or attached in any manner to the shrimp trawler.

More information concerning federal shrimp vessel permits, Turtle Excluder Device (TED) and Bycatch Reduction Devices (BRD) requirements and exemptions can be obtained by contacting the NOAA Fisheries Service at 727-824-5312 for TEDs or 727-824-5305 for BRDs or at www.nmfs.noaa.gov. Detailed information on TEDs may be found at the following link to the NOAA Fisheries website http://www.sefsc.noaa.gov/labs/mississippi/ted/regulations.htm.

**TRAWLING RESTRICTIONS**

- No net or beam trawl used for taking fish or shrimp from the saltwater areas of the state is allowed to be left unattended.

- Taking shrimp with saltwater trawls from May 1 - Sept. 15 each year is prohibited in state waters on the south side of Grand Isle from Caminada Pass to Barataria Pass in Jefferson Parish; from the southeast side of the Caminada bridge to the northwest side of Barataria Pass at Fort Livingston, extending from the beach side of Grand Isle to a distance of 500 feet beyond the shoreline into the Gulf of Mexico.

- Trawls cannot be used for any purpose in state waters during the closed shrimp season.

- No person is allowed to trawl over any privately leased bedding grounds or oyster propagating place that is staked off, marked or posted as required by law or regulation.

- Trawling is prohibited in Lake Maurepas and that portion of Lake Pontchartrain from the shoreline to 1.25 miles out from the Jefferson/Orleans Parish line east to the eastern shore of South Point, from South Point to North Shore along the railroad bridge west from North Shore to Goose Point.

- Trawling is prohibited between the railroad bridge and Interstate 10 in Lake Pontchartrain.

- Trawling at night is prohibited in Cameron Parish sections of Calcasieu Lake, the Black Lake Bayou System, Grand Bayou, Little Burton’s Ditch, Grand Lake, and White Lake.

- Trawls are prohibited in the waters of Bayou Judge Perez (Bayou Hermitage) from its entrance into Lake Judge Perez (Bayou Hermitage) to Devils Bayou, a distance of approximately 1 mile, located in Plaquemines Parish.

- Trawling is prohibited north of the LA Highway 631 Bridge at Des Allemands, Louisiana, and in Lac Des Allemands, its streams and tributaries.

- Trawling is also prohibited in the cove immediately adjacent to Cypremort Point State Park landward of a line from Blue Point to Cypremort Point to the shoreline.

---

**CLEAN WATER - DO YOUR PART**

*Be part of the solution*

- Use shore-side toilet facilities before going out on the water.

- Dispose of waste from portable toilets or on-board sewage holding tanks properly.

- Don’t throw anything overboard.

- Bring cut fishing line ashore.

- Avoid discharging bilge waste into the water.

- Be careful when fueling; try to prevent spills.

- For more information on boat sewage disposal facilities or the Clean Vessel Act (CVA) Grant Program, please contact the Louisiana Department of Wildlife and Fisheries at (225) 765-2864, or visit the Louisiana CVA web page at www.wlf.louisiana.gov (click on “Boating,” click on “Programs” then click on “Clean Vessel Program”).
RECREATIONAL OYSTERING

LICENSE REQUIREMENTS

1. Basic Fishing License
2. Saltwater Fishing License
3. A Recreational Tonging License is required for each tong in use.
4. A Senior Fishing License is required of residents who turned 60 years of age on or after June 1, 2000, to take oysters.

METHODS OF TAKE

Recreational oyster harvest for home consumption is limited to tonging or gathering by hand.

RESTRICTIONS ON METHODS OF TAKE

- Culling oysters, the act of discarding undersized oysters or dead shell, is allowed only on the open designated public areas or on private leases on which the fisherman is authorized to take oysters. At no time will the act of culling oysters be permitted in areas closed to oyster harvest.
- The harvest or take of oysters during the period of one-half hour after sunset until one-half hour before sunrise is prohibited.
- Oysters taken from the reefs of Louisiana either for sale or consumption must be landed in Louisiana, except with a valid out-of-state oyster-landing permit and with the fisherman being in compliance with all other rules and regulations.

SEASONS

The LWFC determines the public oyster areas to be opened for oyster fishing by opening and closing the seasons as biological and technical data indicates. The owner of an oyster lease or his designee, with written permission, may fish oysters at any time of year on their lease.

EXCEPTION: Areas opened by the LWFC may, however, be closed by the LDHH for public health reasons. Information on LDHH closed areas is available at www.dhh.la.gov.

SIZE AND POSSESSION LIMITS

- All oysters taken from public oyster areas must be 3 inches or greater in length from hinge to mouth. A lessee of private oyster areas may be permitted to take undersized oysters from public areas for bedding purposes only.
- Size restrictions do not apply to oysters taken from a private lease.
- Recreational oyster fishermen may harvest oysters from a lease only with the written permission of the leaseholder or in public oyster areas open for the harvesting of oysters. Recreational oyster harvesters are limited to two sacks per person per day for personal consumption, except in the Calcasieu Lake Public Oyster area where the limit is set at one sack per person, per day.
OTHER REC REATIONAL ACTIVITIES

LEASES

For information on Oyster Leases visit oysterlease.wlf.la/oyster or call (504) 284-5279.
Louisiana Department of Wildlife and Fisheries
2021 Lakeshore Drive, Suite 220
New Orleans, LA 70122

RECREATIONAL CRABBING

REQUIRED LICENSES

1. No license is required for any person using crab nets or crab lines for the purpose of
taking crabs.
2. Persons harvesting crabs on LDWF WMAs or refuges must possess a basic recre-
tional fishing license or a Wild Louisiana Stamp.
3. A Recreational Crab Trap Gear License is required to use crab traps. There is a limit of
10 traps per licensed fisherman. Crab traps may be prohibited on certain LDWF
WMAs and refuges. Consult fishing regulations on WMA’s and Refuges for more
details.

METHODS OF TAKE

• Blue crabs or stone crabs can be taken with any legal crab trap, crab drop
net, trawl, hoop net, trotline, hand-line, bushline, dip net or cast net.
• The taking of crabs by means of
trawls in inside waters is permitted
only during the open season for
shrimp and with legal mesh sizes. For
legal mesh sizes refer to the section
about trawls listed under
Recreational Shrimping.
• Gear restrictions may exist within
certain wildlife management areas
(WMAs), refuges or other areas.

RESTRICTIONS ON METHODS OF TAKE

• Dredges are not allowed for the
intentional taking of crabs.
• No person may possess adult female
crabs in the berry stage (i.e., carrying
the eggs or young attached to the abdo-
men). All crabs taken in the berry stage
by any means must be returned imme-
diately to the waters.
• No crab traps shall be set in navigable
channels or entrances to streams. Traps
must be placed so vessels can safely
navigate.
• Metal tackle or metal crab traps shall
not be used in any of the public waters
north of the Intracoastal Waterway in
the Calcasieu River or in any body of
water comprising the Calcasieu River
System north of the Intracoastal Canal
or in the waters of Vermilion Bay from
Cypremort Point 1 mile offshore to Blue
Point.
• Crab traps are prohibited in the
Tchefuncte River.

ABOUT CRAB TRAPS

• A crab trap is a cube-shaped device,
constructed of wire, no larger than
30 inches on any side, and with
either a bait box or materials provid-
ing cover or shelter for peeler crabs.
The entrance funnels must extend
no further than 7 inches into the inside
of the trap, with the openings to the
entrance funnels on the vertical wall of
the trap such that the horizontal diam-
eter of each opening is at least one and
one-half times the vertical diameter of
the opening.
• Certain traps advertised by retail outlets as crab/fish/crawfish traps may not be legal. If unsure that the trap you purchased or plan to use is legal, please consult your local Enforcement Agent.
• The baiting, tending, checking or removing of serviceable crab traps in use, the contents of such crab traps or their lines, buoys or markers is prohibited in public waters from one-half hour after legal sunset until one-half hour before legal sunrise.
• Crab traps that are no longer serviceable or no longer in use must be removed by the owner and properly disposed of or stored.
• No person other than the licensee or his agent shall intentionally damage or destroy serviceable crab traps or the floats or lines to which they are attached, nor shall they remove the contents thereof.
• Each crab trap shall be marked with a 2-inch stainless steel self-locking tag attached to the center of the trap ceiling. Tags shall be supplied by the fishermen and shall have the recreational crab trap gear license number printed thereon. Crabbers are allowed to use a durable plastic bait box marker as an alternate means of tagging crab traps. Crab traps may be attached to a trotline to which at least one end is attached to a non-floating line and a visible float of at least 6 inches in diameter or 2-gallon volume size. Crab traps located in areas designated as freshwater north of the northern bank of the Intracoastal Waterway and west of Louisiana Highway 70 and those areas located on the eastern side of the Mississippi River and inland from the saltwater line are not required to be marked with a float and float line, unless the trap is placed in a lake. Each crab trap on a trotline shall be registered with LDWF and shall have attached to it a tag bearing the crab fisherman’s license number. This is the LDWF number located at the top of your license.
• All crab traps are required to be marked with a solid float at least 6 inches in diameter. The float must be attached to the trap with a non-floating line at least 1/4 inch in diameter. West of Louisiana Highway 70, there is no mark required.
• Each crab trap shall have a minimum of two escape rings. All escape rings shall be placed on the vertical outside walls flush with the trap floor or baffle with at least one ring located in each chamber of the trap. The minimum sizes of the rings shall be 2 and 5/16 inches in inside diameter, not including the ring material. Rings shall be rigid and attached to the trap with material of a smaller diameter than the wire strands of the trap. Escape ring openings may be obstructed with material that prevents or hampers exit of crabs from April 1 - June 30 and from Sept. 1 - Oct. 31. Effective Nov. 15, 2017 and thereafter, a minimum of three escape rings shall be placed on the vertical, outside walls flush with the trap floor or baffle with at least two rings located in the upper chamber of each trap. The minimum sizes of rings shall be 2 and 3/8 inches. Any crab trap constructed of wire mesh 2 and 5/16 square or greater is exempt from escape ring requirements.

**SIZE AND POSSESSION LIMITS**

- There is no minimum recreational size limit for blue crabs. The limit is 12 dozen per person, daily and in possession.
- Certain WMAs and state and federal refuges may have different possession limits. Consult a local LDWF or Enforcement Office for specifics (see WMA and Refuge Regulations on page 46).
- There is no minimum recreational size limit for stone crabs or stone crab claws.
OTHER RECREATIONAL ACTIVITIES

RECREATIONAL CRAWFISHING

LICENSE REQUIREMENTS

1. Basic Fishing License
2. A Recreational Crawfish Trap Gear License is required to use crawfish traps in public waters.

EXCEPTIONS

- A Basic Recreational Fishing License or a Wild Louisiana Stamp is required to use crawfish nets, dip nets, hand lines, or bait seines on LDWF WMAs or refuges.
- A Basic Recreational Fishing License or a gear license is not required to use crawfish nets, dip nets, hand lines, or bait seines for taking crawfish recreationally.

METHODS OF TAKE

Crawfish may be taken with any legal crawfish trap, crawfish net, hoop net, wire net, handline, bushline, bait seine or dip net. A cast net must not exceed 8.5 feet in radius. Crawfish traps may be prohibited on certain LDWF WMAs and refuges. Consult fishing regulations on WMA’s and Refuges for more details.

CRAWFISH TRAP

A crawfish trap is defined as any device constructed of coated wire with the opening of the throats or flues not exceeding 2 inches, and which is used for the express use of taking crawfish. Crawfish traps are typically of the pillow style or cone style with minimum mesh size no smaller than 3/4 inches by 11/16 inches. Traps must have a minimum mesh size of a hexagon of 3/4 by 11/16 of 1 inch from wire to wire not including any coating on the wire.

Crawfish traps must be marked with a waterproof tag, provided by the fisherman, with the name and recreational gear license number of the fisherman legibly printed on the tag.

CRAWFISH NET

A crawfish net is defined as any device constructed with vegetable or synthetic material without flues or throats attached to a wire frame that forms a net basket and is used for the purpose of taking crawfish.

SEASONS

There is no closed season for wild crawfish harvest EXCEPT for some wildlife management areas and state and federal refuges (see WMAs and Refuges on page 46).

SIZE AND POSSESSION LIMITS

- There is no minimum size for crawfish.
- The bag and possession limit for crawfish is 150 pounds daily per person in state waters.
- No more than 35 traps may be used per person while fishing recreationally for crawfish.
REPTILES & AMPHIBIANS

LICENSE REQUIREMENTS

1. Basic Resident or Non-Resident Fishing License.

METHODS FOR COLLECTING OR CATCHING THESE SPECIES

The regulations listed below apply to all frogs, salamanders, lizards, snakes, turtles and related species. All reptiles and amphibians caught are for personal (non-commercial) use only. These regulations do not include alligators. For alligator regulations visit www.wlf.louisiana.gov. Always check with an LDWF Enforcement Office if you have questions.

SPECIES YOU CANNOT HARVEST

- Tiger salamander
- Southern red backed salamander
- Webster’s salamander (*Plethodon websteri*)
- Mud salamander (*Pseudotriton montanus*)
- Red salamander

THREATENED OR ENDANGERED SPECIES

The following federally listed threatened and endangered, or prohibited species are off limits for recreational take. Civil and criminal penalties may apply for taking the following aquatic species. If any of these protected species are incidentally caught, they must be released unharmed immediately:

- Green sea turtle (*Chelonia mydas*)
- Hawksbill sea turtle (*Eretmochelys imbricata*)
- Kemp’s ridley sea turtle (*Lepidochelys kempii*)
- Leatherback sea turtle (*Dermochelys coriacea*)
- Loggerhead sea turtle (*Caretta caretta*)
- Gopher tortoise (*Gopherus polyphemus*)
- Ringed map turtle (*Graptemys oculifera*)
- Dusky gopher frog (*Rana sevosa*)

WILDLIFE MANAGEMENT AREAS AND STATE AND FEDERAL REFUGES

WMAs, state refuges and federal refuges may have specific regulations regarding open seasons, harvest and gear restrictions. For state-regulated areas refer to the WMA and Refuge Regulation section on page 46.
**TURTLES**

**ALLIGATOR SNAPPING TURTLES**
- No size limit.
- Take is limited to no more than one snapping turtle per day, per person, per vehicle/vessel.

**DIAMONDBACK TERRAPINS**
- Must measure 6 inches or more carapace length.
- Legal during all months except between the dates of April 15 - June 15.
- *It is illegal to take this species by a trap of any kind.*

**BOX TURTLES**
- Take is limited to two box turtles per day.
- Possession is limited to four box turtles of the genus *Terrapene* at any time.

**TURTLE EGGS**
No turtle eggs may be taken except for those of the red eared slider.

**TURTLE TRAPS**
- Traps must be checked daily.
- Must be marked as “turtle trap.”
- Must be open above water to allow breathing.
- Must be constructed as a horizontal, single-throated device.
- *It is illegal to possess finfish while turtle trapping.*

---

**FROGS**

**LEGAL METHOD OF TAKE**
Frogs may be taken using any visible light and mechanical devices known as frog catchers or with devices that puncture the skin, such as gigs or spears.

**ILLEGAL METHOD OF TAKE**
Possession of firearms while taking or hunting frogs at night is prohibited.

**BULLFROGS AND PIG FROGS**
- Length requirements (measured from tip of the muzzle to the posterior end of the body between the hind legs)
- Bullfrogs harvested must be 5 inches or larger.
- Pig frogs harvested must be 3 inches or larger.
- Frogs harvested on private lands, ponds or waters where the individual is an authorized representative are not limited by length requirements.
- Harvest is legal during all months of the year except April and May.
FISHING REGULATIONS ON WILDLIFE MANAGEMENT AREAS, REFUGES & FEDERAL LANDS

Wildlife management areas (WMAs), refuges and certain federal lands may have special fishing seasons and bag and possession limits, size limits or closures that differ from general regulations.

REQUIRED LICENSES

A Wild Louisiana Stamp, hunting license or fishing license, depending on activities in which an individual is engaged, is required for use of department-administered lands, including wildlife refuges, WMAs and habitat conservation areas. Persons under 16 years of age and over 60 years of age or older are exempt from this requirement. Persons attending official functions of private, non-profit and charitable organizations recognized as tax-exempt under the provisions of the U.S. Internal Revenue Code shall also be exempted from this requirement.

GENERAL INFORMATION

The operation of boats with internal combustion engines within designated limited access areas (LAAs), on some coastal WMAs is restricted during waterfowl hunting season from Sept. 1 - Jan. 31. Limited access areas exist within the Atchafalaya Delta, Joyce (year-round), Manchac, Pass-a-Loutre, Pointe-aux-Chenes and Salvador WMAs.

LAAs are posted with signage at access points around the perimeter. Any vessel with a movable outdrive system may enter an LAA as long as the boat’s internal combustion engine is trimmed up out of the water in an inoperable position. Vessels with fixed props must adhere to the “no operation” rule. Trolling motors may be used to access and navigate within an LAA while hunting or fishing.

Additional restrictions may apply at some WMAs. Below are specific restrictions by WMA. For additional information, contact your local LDWF Office.

For National Wildlife Refuges, please contact the area offices as follows:
- North Louisiana Complex - 318-726-4222
- Central Louisiana Complex - 318-253-4238
- Southeast Louisiana Complex - 985-882-2000
- Southwest Louisiana Complex - 337-598-2216

For fishing information on the Indian Bayou Recreational Area within the Atchafalaya Basin or the Bonne Carre Spillway contact the U.S. Army Corps of Engineers at 337-585-0853.

For fishing information within the Catahoula and Red Dirt National Wildlife Management Preserves, contact Kisatchie National forest 318-473-7160.
ATCHAFALAYA DELTA

- Camping and houseboat mooring is allowed only in designated areas. Houseboat mooring is allowed via permit only (through annual lottery or by a bid lease program during hunting season and by 16 day permit during the remainder of the year). Contact New Iberia Field Office for details.
- **Vessels/Vehicles:** Mudboats or air-cooled propulsion vessels powered by more than 36 total horsepower are prohibited on the WMA.
- **Limited Access Area:** Operation of internal combustion engines prohibited from September through January. See WMA map for specific locations.

BILOXI

**Vessels/Vehicles:** Mud boats or air-cooled propulsion vessels can only be powered by straight shaft “long tail” air-cooled mud motors that are 25 total horsepower or less on the WMA. All other types of mud boats or air cooled propulsion vessels (including “surface drive” boats) are prohibited.

CAMP BEAUREGARD

Special regulations to be posted at Twin Lakes.

DEWEY W. WILLS

Crawfishing is limited to 100 pounds per person per day.

ELMER’S ISLAND WILDLIFE REFUGE

- Commercial fishing, including guide service, is CLOSED.
- Access and use of Elmer’s Island is only permitted 30 minutes before official sunrise to 30 minutes after official sunset seven days a week. However, the secretary of LDWF may restrict any portion of Elmer’s Island whenever circumstances exist such that restrictions are necessary to protect the Refuge or to protect the public from harm.
- Camping or overnight activities are prohibited.
- No glass containers are allowed.
- The discharge of firearms, including muzzleloaders, bows and arrows, or crossbows is prohibited.
- Maximum speed limit on the island is 5 MPH.
- Check for emergency closures and other information on Elmer’s Island at [http://www.wlf.louisiana.gov/refuge/elmers-island](http://www.wlf.louisiana.gov/refuge/elmers-island)

FORT POLK-VERNON

Special regulations pertaining to fishing are posted at specific lakes.

GRASSY LAKE

- Recreational fishing is permitted only after 2 p.m., during the waterfowl season in Smith and Red River bays, and in Grassy Lake proper.
- Recreational crawfishing is permitted from March 15 - July 31 and is limited to 100 pounds per person per day. No traps or nets are to be left overnight.
ISLE DERNIERES BARRIER ISLANDS REFUGE

WINE ISLAND, EAST ISLAND, WHISKEY ISLAND AND RACCOON ISLAND
- Public access by any means to the exposed land areas, wetlands, and interior waterways of these islands is prohibited without a permit.
- Disturbing, injuring, or collecting flora, fauna, or other property is prohibited without a permit.
- Boat traffic is allowed adjacent to the islands in open water (Gulf and bays).
- Boat traffic is prohibited in waterways extending into the interior of the islands or within any land-locked open waters or wetlands of the islands.
- Fishing from boats along the shore and wade fishing in the surf areas of the islands is allowed.
- Littering is prohibited.

TRINITY ISLAND
- Public access is allowed in a designated public use area.
- The area is approximately 3,000 linear feet by 500 linear feet and it borders the western end of the man-made canal commonly known as California Canal. It is accessible via California Canal or the Gulf of Mexico. The boundaries are marked and maintained by LDWF.
- Public recreation such as bird-watching, picnicking, fishing, and overnight camping is allowed in this area.
- Travel on or across this area shall be limited to foot or bicycle traffic only. No use of ATVs or other vehicles powered by internal combustion engines or electric motors shall be allowed.
- Carrying, possessing, or discharging firearms, fireworks, or explosives in the designated public use area is prohibited.
- Littering is prohibited.
- Disturbing, injuring, or collecting flora, fauna, or other property is prohibited without a permit.
- Any member of the public utilizing the public use area must have a portable waste disposal container to collect all human waste and to remove it upon leaving the island.
- Public access outside of the public use area is prohibited without a permit.
- Boat traffic is allowed adjacent to the island in open water (Gulf and bays) and within the man-made canal commonly known as California Canal.
- Fishing from boats along the shore and wade fishing in the surf areas of the island is allowed.
- No boat traffic is allowed in other man-made or natural waterways extending into the interior of the island or in any land-locked open waters or wetlands of the island.

JOYCE
- **Limited Access Area:** Internal combustion engines prohibited year-round. See WMA map for specific location.
- Crawfishing is limited to 100 pounds per person per day.

LAKE BOEUF
- Self-clearing Permit required for all activities. Self-clearing Permits available at Theriot Canal Boat Landing on LA 308.
- All nighttime activities prohibited, including frogging.

MANCHAC
- **Limited Access Area:** No internal combustion engines allowed from September through January. See WMA map for specific location.
- Crab traps are prohibited. Attended lift nets are allowed.
MAUREPAS SWAMP

Crawfishing is limited to 100 pounds per person per day.

OUACHITA

- Recreational crawfishing is limited to 100 pounds per person per day. No traps or nets may be left overnight.
- The waterfowl refuge north of LA Hwy. 15 is closed to all fishing during duck season, including early teal season, **EXCEPT** allowed during the “Falconry for Ducks” portion of the waterfowl season.

PASS-A-LOUTRE

- Oyster harvesting is prohibited.
- Camping is allowed only in designated areas. Self-Clearing Permit required for camping on the WMA. Self-Clearing Permits available at all designated camping areas, and at the WMA Headquarters.
- **Vessels/Vehicles:** Mudboats or air-cooled propulsion vessels powered by more than 36 total horsepower are prohibited on the WMA.
- **Limited Access Area:** Operation of internal combustion engines prohibited from September through January. See WMA map for specific locations.

PEARL RIVER

Crawfishing is limited to 100 pounds per person per day.

POINTE-AUX-CHÉNES

- All nighttime activities prohibited **EXCEPT** fishing adjacent to the road side of Island Road. Possession of more than one daily limit of fish/crab/shrimp while on the WMA is prohibited. Nighttime use of vessels to access any other areas of the WMA, other than the immediate roadside of Island Road is prohibited.
- The harvest of all fish, shrimp, crabs and crawfish is for recreational purposes only and any commercial use is prohibited.

SHRIMPING

- Shrimp may be taken by the use of cast nets only.
- During the inside open shrimp season, 25 pounds per boat per day (heads on) maximum allowed. Size count must conform to open season requirements.

- During the inside closed season, 10 pounds per boat per day (heads on) may be taken for bait.
- All castnet contents shall be contained and bycatch returned to the water immediately.

OYSTERS

- Oyster harvesting is prohibited.

FINFISH

- Fish may be taken only by rod and reel or by hand lines for recreational purposes only.

CRABBING

- Crabs may be taken only through the use of hand lines or nets; however, none are to remain set overnight.
- Twelve dozen crabs maximum are allowed per boat or vehicle per day.

CRAWFISHING

- Crawfish may be harvested in unrestricted portions of the WMA and shall
be limited to 100 pounds per person per day.
- Fishing gear used to catch crawfish must not remain set overnight.

**VESSELS & VEHICLES**
- All boats powered by internal combustion engines having horsepower ratings above 25 hp., are not allowed in the Grand Bayou, Montegut and Pointe-aux-Chenes water management units. The public is permitted to travel anytime through the WMA for access purposes only, in the waterways known as Bayou Pointe-aux-Chenes, Grand Bayou, Humble Canal, Little Bayou Blue, St. Louis Canal, and Grand Bayou Blue. All other motorized vehicles, as well as horses and mules, are prohibited unless authorized by LDWF.
- Type A personal watercraft, model year 2003 and beyond, which are 8 or more feet in length may be operated on Pointe-aux-Chenes WMA from April 1 until the Monday after Labor Day Weekend, from sunrise to sunset only. No person shall operate such watercraft at a speed greater than “slow/no wake” within 100 feet of any anchored or moored vessel, shoreline, dock, pier, persons engaged in angling or any other manually powered vessel.

**LIMITED ACCESS AREA**
- Operation of internal combustion engines prohibited from September through January. See WMA map for specific locations.

**POMME DE TERRE**
- Recreational fishing regulations are the same as outside. **NOTE:** Allowed only after 2 p.m., during waterfowl season.
- Recreational crawfishing is allowed from March 15 - July 31 and is limited to 100 pounds per person per day. No traps or nets are to be left overnight.

**RICHARD K. YANCEY**

**YAKEY FARMS ONLY**
- Recreational crawfishing is permitted from March 15 - July 31 and is limited to 100 pounds per person per day. A maximum of five wire traps per person is permitted. No traps or nets are to be left overnight.
- No motorized watercraft are allowed on farms.

**RUSSELL SAGE**
Crawfishing is limited to 100 pounds per person per day limit.

**SALVADOR/TIMKEN**
- All nighttime activities prohibited, **EXCEPT** during the Experimental Nighttime Activity Season.
- Self-Clearing Permit required for all activities permitted during the Experimental Nighttime Activity Season.
- The harvest of all fish, shrimp, crabs and crawfish are for recreational purposes only and any commercial use is prohibited.

**SHRIMPING**
- Shrimp may be taken by the use of cast nets only.
- During the inside open shrimp season, 25 pounds per boat per day (heads on) maximum shall be permitted.
- Size count shall conform with any open season requirements.
- During the inside closed season, 10 pounds per boat per day (heads on) maximum may be taken for bait.
• All castnet contents shall be contained and bycatch returned to the water immediately.

FINFISH
• Fish may be taken only by rod and reel, or by hand lines for recreational purposes.

CRABBING
• Crabs may be taken only through the use of hand lines or nets; however, none are to remain set overnight.
• Twelve dozen crabs maximum are allowed per boat or vehicle per day.

CRAWFISHING
• Crawfish may be harvested in unrestricted portions of the WMA and shall be limited to 100 pounds per person per day. Fishing gear used to catch crawfish shall not remain set overnight.

VESSELS & VEHICLES
• Use of mudboats powered by internal combustion engines with more than four cylinders is prohibited.
• Pulling boats over levees, dams or water control structures or any other activities that may cause detriment to the integrity of levees, dams and water control structures is prohibited.

LIMITED ACCESS AREA
• Operation of internal combustion engines prohibited from September through January. See WMA map for specific location.

EXPERIMENTAL NIGHTTIME ACTIVITY SEASON
• Self-clearing Permit required
• 12 a.m., June 1 through official sunrise Aug. 15. Nighttime activities LIMITED to the take of frogs and fishing with a rod and reel. All other nighttime activities prohibited. Daily limit of 50 frogs per vessel in aggregate (bull frogs/pig frogs). If engaged in frogging on or while traversing the WMA, all frogs in possession will be deemed to have been taken from the WMA. At no time may anyone possess more than on daily limit of frogs while on the water.
• Size Limit: (Measured from the tip of the muzzle to the posterior end of the body between the hind legs). Bull frogs harvested must be 5 inches or larger. Pig frogs harvested must be 3 inches or larger.
• Check out portion of self-clearing permit must include boat registration number under the comments section. Possession of firearms while participation in any experimental nighttime activity is prohibited.

SHERBURNESHERBURNE
• Recreational crawfishing is permitted from March 15 - July 31 with a limit of 100 pounds per person per day. No traps or nets are to be left overnight.
• No motorized watercrafts are allowed on the farm complex.

SODA LAKE
Recreational fishing is permitted from April 1 - Aug. 31.

SPRING BAYOU
• Recreational fishing is permitted, EXCEPT only after 2 p.m. during waterfowl season.
• Recreational crawfishing is permitted from March 15 - July 31 and is limited to 100 pounds per person per day. No traps or nets are to be left overnight.
ROCKEFELLER WILDLIFE REFUGE, STATE WILDLIFE REFUGE
(Vermilion) & MARSH ISLAND WILDLIFE REFUGE

- Trawling is prohibited.
- Trotlines, jug lines, trammel and gill nets, and traps are prohibited.
- Use of the refuges is permitted from official sunrise to official sunset. This includes access routes through the refuge. Overnight camping is prohibited.
- Firearms are prohibited. Littering is prohibited. Damage to or removal of trees, shrubs, and wild plants without prior approval is prohibited.

SHRIMPING
- 25 pounds of shrimp (heads on) per boat or vehicle per day is allowed during the inside open shrimp season as established by the Louisiana Wildlife and Fisheries Commission.
- 10 pounds of shrimp (heads on) for bait purposes may be caught during the closed season.
- Shrimp may be harvested only by cast net on the refuge and only for sport fishing or home consumption use. When harvesting shrimp with a cast net, contents shall be dumped in a container and not on the ground.

CRAWFISHING
- Recreational crawfishing is permitted in the open portion of the refuge with a limit of 100 pounds per boat or vehicle per day.
- Set nets may be used but must be attended and removed from the refuge daily. No commercial harvest is allowed.

CRABBING
- Crabs may be harvested from the open portion of the refuge with a limit of 12 dozen crabs per boat or vehicle per day.
- **NOTE:** No commercial harvest is allowed on Marsh Island, State Wildlife and Rockefeller refuges.

OYSTERS
- Oysters may be harvested by tonging (properly licensed) or by hand collection from the natural reefs, but only in waters approved (open) for harvest by the Department of Health and Hospitals.
- One gallon per boat or vehicle per day is allowed and oysters must be opened at the reef and the shells returned to the reef.
- Taking of oysters from the natural reefs may be closed at any time by the Louisiana Department of Wildlife and Fisheries.

VESSELS & VEHICLES
- Speedboat racing and water skiing are prohibited.
- All boat traffic shall honor no wake zones and shall keep wave wash to a minimum.
- Pulling boats over or around levees, dams or water control structures or any other activities that may cause detriment to the integrity of levees, dams and water control structures is prohibited.
- Jet skis and airboats are prohibited.

KISATCHIE NATIONAL FOREST- NATIONAL CATAHOULA AND
NATIONAL RED DIRT WILDLIFE MANAGEMENT PRESERVES

Preserves will be closed to fishing during deer gun hunts. Consult hunting regulations for dates.

U.S. ARMY CORPS OF ENGINEERS - INDIAN BAYOU AREA

Commercial or recreational crawfishing is permitted from Feb. 1 - Aug. 31 with an additional permit required. The permit is available Jan. 1. Call USACE Port Barre Office for more details (337) 585-0853.
All boaters are encouraged to ensure their vessels are in good working condition and all required safety equipment is on board.

1. Those on personal watercraft (PWC) must wear a USCG approved Type I, II, III or V personal flotation device (PFD) at all times.
2. Children 16 years of age and younger must wear a USCG approved Type I, II or III PFD while underway on a vessel less than 26 feet long. A wearable USCG approved Type I, II or III PFD must be readily available for each of the other passengers onboard.
3. All persons onboard a motorboat less than 16 feet which is being propelled by a hand tiller outboard motor are required to wear a USCG approved Type I, II, III or V PFD while the motorboat is underway.
4. Persons engaged in water sports, which includes but is not limited to water skiing, being towed on a tube, wake boarding, wake surfing, etc. must wear a USCG approved Type I, II, III or V PFD. An inflatable PFD does not meet the requirements.
5. A motorboat less than 26 feet with a hand tiller outboard motor in excess of 10 horsepower designed to have or having an engine cut-off switch must have the engine cut-off switch link attached to the operator, the operator’s clothing, or the operator’s PFD, if worn, while the motor is running and the vessel is underway.
6. Certain items are not applicable to PWCs because PWCs are not allowed to operate between sunset and sunrise.
7. Required on federally controlled waters (offshore, tidal coastal areas).
8. Required for inboards and stern drivers only.
LIFE JACKETS SAVE LIVES
Personal Flotation Devices (PFDs) save lives. Get one and wear it when you’re on the water.
Remember that children 16 years old or younger must wear a properly sized and fitted, personal flotation device approved by the U.S. Coast Guard at all times when a vessel is underway. Get your child fitted for a proper life vest and lead by example by wearing one too. For more information on how to find the right life vest or for more boating safety tips, visit http://www.uscgboating.org or www.wlf.louisiana.gov.

CONSUMER ALERT: Choosing the correct Personal Flotation Device (PFD) can be the difference between life and death when on the water. Make sure the PFD is U.S. Coast Guard (USCG) approved. A USCG approved PFD will have an approval number on the label usually on the inside part of the PFD. A PFD that is not USCG approved is illegal and unsafe. More and more non-approved PFDs are showing up in the marketplace and are being sold at larger retailers where most customers assume it is an approved version.

BOATER EDUCATION
All persons born after Jan. 1, 1984 are required to complete a NASBLA approved boating education course to operate a motorboat over 10 horsepower and must carry proof of such when operating the motorboat. A motorboat may be operated if any person on board or participating in any boating activity from the motorboat is over the age of 18, and if required to have completed a boating course, has completed the required boating safety course.

LDWF offers Boating Classes in every region of the state, free of charge to the public.

For those who cannot attend a classroom setting an online boating class is available, however, it is not administered by LDWF and a fee is assessed. Visit www.wlf.louisiana.gov for more information about Boater Education.

TO REPORT MISSING/OVERDUE BOATERS, REPORT A BOAT CRASH INCIDENT OR REPORT VIOLATIONS, PLEASE CALL 1-800-442-2511.

LADWF TIPS APP now available from the Apple Store and Google Play

LOUISIANA DEPARTMENT OF WILDLIFE & FISHERIES LAW ENFORCEMENT DIVISION

www.wlf.louisiana.gov  55
Fish are a lean and nutritious source of protein. However, some fish may contain chemicals that could pose health risks. Louisiana fish consumption advisories are based on the estimate that the average Louisiana resident eats four fish meals per month (a meal is considered to be 6 ounces of fish for adults and children). If you or your family members eat more than four meals of fish a month from local water bodies, you might increase your health risks. For current advisories call the Department of Environmental Health at 888-293-7020, 504-568-8156 or visit www.dhh.state.la.us for more information about eating fish that may contain chemicals.

**CONSUMPTION ADVICE FOR WOMEN WHO ARE PREGNANT, NURSING OR MIGHT BECOME PREGNANT & FOR YOUNG CHILDREN**

By following these three recommendations for selecting and eating fish or shellfish, women and young children will receive the benefits of eating fish and shellfish and be confident that they have reduced their exposure to the harmful effects of mercury. Follow these same recommendations when feeding fish or shellfish to a young child, but serve smaller portions.

- Do not eat shark, swordfish, king mackerel or tilefish, as these contain high levels of mercury.
- Eat up to 12 ounces a week of a variety of fish and shellfish that are lower in mercury. The five most commonly eaten species that are low in mercury are shrimp, canned light tuna, salmon, pollock and catfish.
- Up to 6 ounces a week of albacore (“white”) tuna may be consumed since this variety may contain more mercury than light tuna.

**Free Fishing Weekend**

**June 11 - 12**

Enjoy a weekend of fishing in Louisiana without having to purchase a license. See wlf.louisiana.gov and fishla.org for special events and more information.

For more information, contact the Mississippi Department of Marine Resources, 1141 Bayview Ave., Biloxi, MS 39530, 228-374-5000, Monday-Friday 8 a.m. to 5 p.m.
Visit our website: dmr.ms.gov.

The information provided in this guide is an overview of regulations in effect as of July 1, 2016, concerning saltwater fishing in Mississippi’s marine waters prepared in accordance with Mississippi Code Annotated §49-15-18. However, this guide is not, nor is it intended to be, a definitive publication of all regulations pertaining to saltwater fishing in Mississippi. Complete texts of all regulations and statutes are available at the Mississippi Department of Marine Resources’ office and website. While every effort has been made to ensure the accuracy of the information contained in this guide, readers are reminded that in the event of a conflict between state statute and CMR regulations, state statute will take precedence. If you are fishing in another state or in federal waters, please consult fishing regulations that would be applicable. Readers are further reminded that all regulations are subject to change.

Federal regulations may differ from state regulations. For federal regulations, contact the Gulf of Mexico Fishery Management Council at 888-833-1844 or gulfcouncil.org.

The Gulf of Mexico Fishery Management Council offers a free fishing regulations App for the Android and the iPhone. The Apps provide immediate access to the most up-to-date commercial and recreational federal fishing regulations for species managed by the Gulf of Mexico Fishery Management Council. Visit the App Store or Android Market to download the App or simply scan the appropriate QR code below with your iPhone or Droid.

Fishing and Boat Licenses

FISHING LICENSES
A Mississippi saltwater fishing license is required for anyone to harvest fish in coastal and marine waters (Miss Code Ann. Section 49-15-313) of this state except:
• Any person under the age of 16.
• Residents who have been declared by the Veterans Administration as having a total service-connected disability or have been declared totally disabled by the Social Security Administration. **Proof is required.**

Residents 65 years of age or older are required to purchase a lifetime recreational saltwater fishing license for a one-time fee.

A saltwater fishing license is required to fish south of Highway 90. Above Highway 90 and below Interstate 10, either a saltwater or freshwater license will suffice, and above I-10, a freshwater license is required.

OTHER RECREATIONAL LICENSES
The above exemptions apply for recreational crab, shrimp and oyster licenses, but only to vessels registered in the exempt resident’s name.

Anyone exempt from these license requirements must have a valid driver’s license and proof of service-connected or Social Security disability, if applicable, in his possession while fishing.

Temporary residents stationed at a Mississippi military base can use a military I.D. to purchase a resident fishing license.

**Free fishing days** – Anyone may fish without a recreational saltwater fishing license in state marine waters, which are waters south of I-10, on the **first weekend of National Fishing and Boating Week in June and on July 4.**

**Saltwater sportfishing, recreational shrimping and recreational crabbing licenses expire one (1) year after date of sale.**

All commercial boats, whether resident or nonresident, fishing for shrimp, oysters, crabs or finfish (with gill net, trammel net or similar approved nets) within the territorial waters of the State of Mississippi are required to be licensed as described herein.

**All commercial seafood licenses expire April 30 of each year.**

BOAT LICENSES
Proof of residence must be shown, along with valid boat registration/documentation before any license can be purchased. Proof can be a valid driver’s license, homestead exemption, voter’s registration card or a Mississippi state tax return.

**License fee of $10 plus $2.29 processing and agent fees.

***Residents 65 years of age or older are required to purchase a lifetime recreational saltwater fishing license for a small one-time fee of $5 plus $2.29 processing and agent fees.

****In order to catch or transport saltwater minnows for sale, fishermen must obtain a saltwater minnow license (see p. 13).

*****A valid MS Shellfish Harvester Education certificate must be presented by the boat owner at time of license purchase.

******A valid MS Shellfish Dealers Education certificate must be presented by the business representative at time of license purchase.

Each seafood dealer/processor is required to complete Mississippi trip tickets provided by the MDMR. Commercial fishermen who land and sell their catch to anyone except a licensed Mississippi dealer/processor are required to complete trip tickets and be in possession of a fresh product permit.

License fees for nonresidents may vary. Call the MDMR at 228-374-5000 for current license fees if you are a nonresident.

*It is illegal to sell any seafood taken with a recreational license.

**Range represents minimum and maximum lengths.

***Recreational fishermen may possess one (1) per vessel within four-fish aggregate.

****Recreational fishermen may possess two (2) within four-fish aggregate.

*Recreational fishermen may retain only one red drum over 30 inches.

***For information on federally regulated fish, and updated size limits, visit gulfcouncil.org.

TL = TOTAL LENGTH - Straight line distance from tip of snout to tip of tail.

FL = FORK LENGTH - Straight line distance from tip of snout to fork of tail.

CFL = CURVED FORK LENGTH - Tip of the upper jaw to the fork of tail measured along the contour of the middle of the body.

**Note:** Fishing seasons for some species may be closed by order of the Commission on Marine Resources. Advance notice of such closures shall be given. Species caught out of their natural habitat may have size, creel and seasonal limits.

*It is illegal to sell cobia caught in Mississippi territorial waters or cobia landed in Mississippi.

**Commercial fishermen may retain only one red drum over 30 inches.

*Range represents minimum and maximum lengths.

**It is illegal to sell, barter or trade any species of reef fish without possessing the proper federal permits and/or licenses required by the NOAA Gulf of Mexico Reef Fish Fishery Management Plan and complying with any other conditions set forth by federal or state regulations for the management of the identified reef fish. IFQ = Individual Fishing Quota.

***The season for flounder and red drum will run from Jan. 1 through Dec. 31 each year. The season for spotted sea-trout will run from Feb. 1 through Sept. 30 each year. Total allowable catch (TAC) limits are 74,000 pounds for flounder, 50,000 pounds for red drum and 50,000 pounds for spotted seatrout. The commercial TAC for spotted seatrout is 50,000 pounds, which is divided into two fishing periods. For more information on the commercial spotted seatrout season, see page 15. When landing reports, as required by law, show the TAC has been reached for a given species, MDMR will, with adequate notice, issue a news release and public notice closing state waters to commercial fishing for that species for the remainder of that fishing year.

Federal regulations may differ from state regulations. For federal regulations, contact the Gulf of Mexico Fishery Management Council at 888-833-1844 or gulfcouncil.org.

****As measured from tip of one lateral spine across the back of the shell to tip of opposite lateral spine.
Catch and Release

WHY RELEASE FISH?
1. A fish is too valuable a resource to be caught only once.
2. A personal commitment to conservation adds fun to fishing.
3. Size, season and bag regulations make release of some fish mandatory.

HOW TO BEGIN
1. Use barbless or circle hooks that are made from metals that rust quickly.
2. Set your hook immediately. Try to prevent a fish from swallowing the bait.
3. Work a fish out of deep water slowly, so it can adjust to the pressure change.
4. Otherwise, land your quarry quickly; don’t play it to exhaustion.

HANDLING YOUR CATCH
1. Leave the fish in the water (if possible) and don’t handle it.
2. Net your catch only if you cannot control it any other way.
3. When you must handle a fish: Use a wet glove or rag to hold it; turn a fish on its back or cover its eyes with a wet towel to calm it; don’t put your fingers in the eyes or gills of your catch. Larger fish may be kept in the water by holding the leader with a glove or by slipping a release gaff through the lower jaw. Avoid removing mucus or scales.

REMOVING THE HOOK
1. If possible, back the hook out the opposite way it went in.
2. Cut the leader close to the mouth if a fish has been hooked deeply or if the hook can’t be removed quickly.
3. Use needle-nose pliers, a hemostat or a hookout to remove the hook and protect your hands.
4. For a larger fish in the water, slip a gaff around the leader and slide it down to the hook. Lift the gaff upward while pulling downward on the leader.
5. Do not jerk or pop a leader to break it. This could kill the fish.

THE RELEASE
1. Gently place the fish in the water, supporting its midsection and tail.
2. Resuscitate an exhausted fish by moving it back and forth or tow it alongside the boat to force water through its gills.
3. For fish pulled up from deep water, air bladder deflation is achieved by inserting an approved venting tool through the side of the fish immediately behind the upper part of the pectoral fin base (see diagram p. 14). The deflation position varies among species. However, penetration at a point below the 4th or 5th dorsal fin spine is generally appropriate.
4. Watch the fish to make sure it swims away.
5. If it doesn’t, recover the fish and try again.
6. Venting of fish species is not mandatory

Note: Fishing seasons for some species may be closed by order of the Commission on Marine Resources. Advance notice of such closures shall be given.
Sharks

The numerous shark species are divided into three management groups:

I. LARGE COASTAL SHARKS
sandbar**  
blacktip  
dusky*  
spinner  
silky*  
bull  
bignose*  
narrowtooth*  
Galapagos*

Carcharhinus limbatus  
Carcharhinus obscurus  
Carcharhinus brevipinna  
Carcharhinus falciformis  
Carcharhinus leucas  
Carcharhinus altimus  
Carcharhinus brachyurus  
Carcharhinus galapagensis  
Carcharhinus signatus  
Carcharhinus perezi  
Negaprion brevirostris  
Odontaspis taurus  
Odontaspis noronhai  
Ginglymostoma cirratum  
Sphyrna lewini  
Sphyrna mokarran  
Sphyrna zygaena  
Rhincodon typus  
Cetorhinus maximus  
Carcharodon carcharias

II. SMALL COASTAL SHARKS
Atlantic sharpnose  
Caribbean sharpnose*  
finetooth  
blacknose  
smalltail*  
bonnethead  
Atlantic angel*  
Rhizoprionodon terraenovae  
Rhizoprionodon porosus  
Carcharhinus isodon  
Carcharhinus acronotus  
Carcharhinus porosus  
Sphyrna tiburo  
Squatina dumeril

*Possession of these species is prohibited by state regulation and federal law.

**Sandbar sharks may only be possessed by fishermen possessing a research fishery permit issued by the National Marine Fisheries Service.
### III. PELAGIC SHARKS

### RECREATIONAL SHARK LIMITS

Recreational fishermen may possess no more than one of the large coastal and pelagic shark species per person and no more than three of the large coastal and pelagic shark species per vessel in state waters.

The minimum size limit for large coastal sharks is 37 inches total length in state waters.

Of the small coastal shark species group, recreational fishermen may possess four sharks per person per day in state waters.

The minimum size limit for small coastal sharks is 25 inches total length in state waters.

### COMMERCIAL SHARK LIMITS

All shark species are under federal quotas.

The practice of finning, which is removing only the fins and returning the remainder of the shark to the sea, is illegal.
Common Sharks in Mississippi Waters

Bull Shark
*Carcharhinus leucas*

One of the largest sharks commonly found in inshore waters, it can reach lengths of greater than 10 feet. One of the few sharks that regularly move into fresh water. The most distinguishing characteristic of this shark is its large robust body. This shark is also characterized by a short snout that is blunt and rounded.

Blacktip Shark
*Carcharhinus limbatus*

As the name indicates, this shark’s fins are tipped in black *except* for the anal fin. It is a medium-size shark, but can reach lengths of 9 feet. This shark is very active when hooked and will jump out of the water.
Common Sharks in Mississippi Waters

Spinner Shark
*Carcharhinus brevipinna*

The spinner shark gets its name from a behavior where it leaps out of the water and spins in midair. It is very similar to the blacktip shark, but all its fins are black-tipped, including the anal fin. It can reach lengths up to 9 feet and is extremely active when hooked.

Atlantic Sharpnose Shark
*Rhizoprionodon terraenovae*

The most common shark in Mississippi coastal waters, this shark rarely exceeds 4 feet in length. It is characterized by a slender build and white blotches on the body. The origin of the second dorsal fin is about mid-base of the anal fin. These sharks are also called “wormies” by coastal fishermen.
Saltwater Finfish

METHODS OF TAKING
A Recreational Fishing license is required for all methods of finfish harvest.

Saltwater finfish may be taken from Mississippi waters by any of the following methods:

• Hook and line: Cane pole, handline or rod and reel.
• Trotline: Anyone trotline fishing south of Interstate 10 must be registered with MDMR and be issued a unique number that is to be attached, along with fisherman’s name, to both ends of trotline on metal tags, written in indelible ink so that it is readable by MDMR personnel.
• Bow, spear or gig. No restriction on number of prongs.
• Cast nets and brail (brail) nets: Not to exceed 12 feet in radius, may be used in marine waters only. No freshwater species may be in a fisherman’s possession while he is using a cast net or brail net.
• Small-mesh beach seines under 100 feet in length and with a maximum 1/4-inch-square mesh size.
• Trammel or gill nets, seines or any similar contrivance must be under 1,200 feet in total length. Gill and trammel nets must have a minimum 1-1/2-inch-square mesh size. From Oct. 15 through Dec. 15 of each year, gill and trammel nets must have a minimum square-inch mesh size of 1-3/4 inches. Gill and trammel nets must be made of MDMR-approved degradable materials.
• Permitted eel traps must have a minimum of 1/2- by 1-inch-square mesh size.

SPECIAL PROVISIONS
Commercial fishing is prohibited north of the CSX Railroad bridge in the three coastal counties of Mississippi.

In addition, the National Park Service prohibits commercial fishing within the Gulf Islands National Seashore boundary, which is a one-mile perimeter around Ship, Horn and Petit Bois islands.

Any person or company selling or transporting for sale any species of fish that does not meet Mississippi state size limits or for which the season is closed must possess valid documentation from the state or country of origin evidencing that the fish were legally harvested.

Commercial eel permit: A special permit and regulations for commercial eel fishing must be obtained from the MDMR.

All fish traps or pots and eel traps or pots must be clearly marked with the owner’s full name, permit or license number. All fish traps or pots and eel traps or pots must be checked and emptied at least once every 48 hours.

It shall be unlawful for commercial or recreational fishermen to possess fish with heads, tails or flesh removed until delivered to final destination; however, fish may be scaled or have gills removed. (see pg. 19 for charter boats)
**Saltwater minnow license:** In order to catch or transport saltwater minnows for sale, fishermen must obtain a saltwater minnow license (see license fees pg. 3).

All minnow traps placed in or on the marine waters of Mississippi must have a corrosion-resistant metal or plastic tag permanently attached to the trap and stamped with the licensed owner’s full name. The minimum height of the letters shall be at least 3/16 of an inch.

**The possession of a gill net, trammel net or like contrivance,** or any other equipment prohibited for use in the taking or harvesting of seafood on a vessel on the marine waters of this state where the use of the net, contrivance or equipment is prohibited, shall constitute *prima facie* evidence that an offense has been committed to take or harvest seafood with nets, contrivances or equipment prohibited by this chapter, unless the vessel is:

(a) Anchored or moored at a permanent facility intended for the mooring of vessels;

(b) Traveling directly between a marina, harbor or public boat launching facility and a U.S. Coast Guard marked and maintained navigation channel; OR

(c) Traveling within a U.S. Coast Guard marked and maintained navigation channel.

The use of gill or trammel nets is prohibited within 1/2 mile of the shoreline. All nets, regardless of type, must be clearly marked with the owner’s name or license number. Floats or buoys must be placed at intervals of 100 feet or less.

**Nets, seines or any like contrivance are not permitted in the following areas:** Within any river, bayou, creek, canal, stream, tributary, lake, bay, inlet or other water source entering into salt waters, except:

- Point Aux Chenes Bay.
- Middle Bay - Jose Bay.
- L’Isle Chaude Bay.
- Heron Bay.
- South Rigolets.
- Biloxi Bay, south of a line between Marsh Point, Ocean Springs and Grand Bayou, Deer Island.
- Pascagoula Bay, south of a line beginning at a point on the shoreline at the southern terminus of range lines R7W and R6W near Camp Lamotte; thence southeasterly along the most direct line to the southernmost point of Twin Islands; thence easterly along the most direct line to the southern point of Rabbit Island; thence easterly along the most direct line to beacon “Occ R 4 sec 100 feet” on the eastern side of Northrop Grumman Ship Systems; thence southeasterly following the shoreline of the southeasternmost point
of Northrop Grumman Ship Systems; thence easterly along the most direct line to the southernmost point of land adjoining the entrance of Yazoo Lake and South Rigolets and Biloxi Bay south of a line drawn between Marsh Point and Grand Bayou.

Nets, seines or fish traps used for catching fish are not permitted within 1,200 feet of any pier or harbor. Nets, seines or fish traps are not permitted within 100 feet of the mouth of any bay, bayou, creek, canal, stream, lake, inlet, channel or tributary or within any area that would block the mouth of any such body of water. (**Please note: gill and trammel nets are prohibited within 1/2 mile of the shoreline.**)

Purse seines may not exceed 1,500 feet in length, except those used expressly to catch menhaden. Menhaden purse seines must have a mesh size no smaller than 1/2-inch square (1-inch stretch).

**REEF FISH REGULATIONS**

All fishermen fishing for reef-associated species (snappers, groupers, triggerfish and amberjack) must possess and use NON-stainless steel circle hooks when using natural baits while fishing for all reef species, including red snapper.

**MANDATORY RECREATIONAL RED SNAPPER REPORTING**

Prior to landing red snapper, recreational anglers are required to create a trip using MDMR’s reporting program, “Tails N’ Scales” through the smartphone app, the website or the call center. The “Tails N’ Scales” app is available on iTunes and Google Play. Anglers can also go to tailsnscales.org, or call 1-844-MSSNAPP (677-6277) to speak to a representative. Once fishermen create a trip, they must close it out before creating a new one.

![QR Code for iPhone](image1.png)

![QR Code for Droid](image2.png)
CATCH RESTRICTIONS

King mackerel fishing is defined as a fishing activity in which the sole purpose is to catch king mackerel. Catching in excess of 10 percent by weight of species other than king mackerel while net fishing for king mackerel is prohibited.

Mullet fishing is defined as any net-fishing activity in which 90 percent or more of the total catch by weight consists of mullet. Mullet fishing using traps, seines or nets other than cast or brill nets is not permitted within 1,200 feet of any public or hotel pier nor within 300 feet of any private pier, provided that such piers are in usable condition and extend 75 feet or more from the shoreline. Nets must not exceed 1,200 feet in length.

The commercial season will run from Jan. 1 to Dec. 31 each year. Total allowable catch (TAC) limits for the 2015 season and each following will be 74,000 pounds for flounder, 50,000 pounds for red drum and 50,000 for spotted seatrout. When landing reports, as required by law, show the TAC has been reached for a given species, MDMR will, with adequate notice, issue a news release and public notice closing state waters to commercial fishing for that species for the remainder of that fishing year.

If the first half of the commercial TAC is not met in the first time period (Feb. 1 - May 31) the extra poundage shall be added to the second time period (June 1 - Sept. 30). If however the 25,000-pound TAC is exceeded, the overage shall be subtracted from the second time period (June 1 - Sept. 30).

Purse seines may not be used to catch in excess of 5 percent by weight in any single set of the net, any of the following fishes:

- Bluefish
- Cobia (ling or lemonfish)
- Dolphin
- Jack crevalle
- King mackerel
- Pompano
- Spanish mackerel
- Spotted seatrout (speckled trout)

It also is illegal for any vessel carrying a purse seine to have on board in excess of 10 percent by weight of the total catch any of the aforementioned species.

It is further illegal for any vessel carrying a purse seine to have on board any quantity of red drum (redfish).

Commercial fishermen may retain two cobia per person for personal consumption.

It is illegal to sell cobia caught in Mississippi territorial waters or landed in Mississippi.
Common Finfish in Mississippi Waters

Red Snapper  
*Lutjanus campechanus*

Abounding around the offshore artificial reefs and other bottom obstructions, the red snapper is a coveted foodfish along the Gulf Coast. These brilliantly colored fish are distinguished by their red coloration and reef-dwelling habits. Snapper are typically caught on heavy tackle, using cut fish for bait. Please be aware, juveniles will have a dark spot below the dorsal fin.

Mullet  
*Mugil cephalus*

Both striped and white mullet are called “Biloxi Bacon” along the Mississippi Gulf Coast as this species is a staple for subsistence fishermen and a principal prey species for larger fish. Mullet are most commonly taken using cast nets. Hook-and-line fishermen can catch these fish with very small hooks and doughball baits.

Lane Snapper  
*Lutjanus synagris*

The color pattern of this snapper makes it easy to distinguish from the other snappers that occur along the Mississippi Gulf Coast. They are a red color with 8 to 10 yellow/gold horizontal stripes along the sides and a black spot beneath the dorsal fin. This species is less abundant than either the red or vermilion snappers.

Red Drum  
*Sciaenops ocellatus*

Redfish are another favorite species of local anglers. These bruisers can get upwards of 30 pounds. Feeding habits are intermediate between their cousins, the bottom-feeding black drum and the more surface-feeding spotted seatrout. Blue crabs and gold spoons are among the best bait to use for catching redfish.

Gray Snapper (Mangrove)  
*Lutjanus griseus*

This small snapper is commonly found inshore congregating around seagrass beds, rocky areas and piers. This species is often found in mixed schools with pinfish and pigfish. As they grow larger they move offshore over hard bottoms and can be caught around artificial reefs.

Vermillion Snapper (Beeliner)  
*Rhomboplites aurorubens*

This snapper is bright red in color and its body shape is narrower than that of the red snapper. Vermillion snapper are small snapper which are found in the same habitat as red snapper and caught on the same type of baits.
Common Finfish in Mississippi Waters

King Mackerel
*Scomberomorus cavalla*

Kings are constantly on the move and migrate along the entire northern Gulf of Mexico, where they may congregate around oil rigs, offshore wrecks and shoalwater. King mackerel in excess of 60 pounds are taken each year by fishermen who troll and cast for them as far south as the mouth of the Mississippi River.

Gag
*Mycteroperca microlepis*

During the summer months when the water temperatures increase along the coast, juvenile gag are often caught by fishermen around rock piles and pilings. The larger adults occur offshore in deeper water, usually over hard bottoms and around some kind of structure.

Spanish Mackerel
*Scomberomorus maculatus*

Spanish mackerel are abundant in the Mississippi Sound from early summer through midfall. Caught best on fast-moving, silvery lures, they form the summer staple of the charter fishery. Care should be taken when removing these toothsome critters from the hook.

Spotted Seatrout
*Cynoscion nebulosus*

Locally called speckled trout or simply “speck,” this fish is widely sought in coastal waters Gulfwide. Specks upwards of 5 pounds are not uncommon, but the average school trout will be around a pound or so. Trout can be caught year-round, but spring and fall are peak fishing times.

Cobia
*Rachycentron canadum*

Called lemonfish locally, the cobia is truly a big-game species. Lemonfish up to 100 pounds are caught annually during the spring run. Lemonfish have a decided preference for congregating around buoys, anchored vessels, etc. Live catfish or white trout are preferred bait, though a jig or feather might also entice a big lemon into striking.

Greater Amberjack
*Seriola dumerili*

This fish is generally found around deep water oil rigs or artificial reefs. Greater amberjack can reach weights in excess of 100 pounds and can put up an excellent fight when hooked. The greater amberjack is the largest of the four amberjack species that occur in the Gulf of Mexico.
Recreational Fishing

SPECIAL PROVISIONS
Please see the “Fishing Licenses” section (pp. 2-3) in the front of this booklet for more information on Mississippi recreational saltwater sportfishing licenses and Mississippi’s free saltwater sportfishing days. A recreational saltwater fishing license is required for all methods of recreational finfish harvest.

It shall be unlawful for recreational fishermen to sell or offer for sale any seafood caught in or landed in the State of Mississippi, and only licensed commercial fishermen may catch and sell seafood. Furthermore, it shall be unlawful for any person, firm or corporation to purchase, buy, barter for or trade for any seafood caught in or landed in the State of Mississippi that was caught or landed by a recreational fisherman or that was transported into the State of Mississippi by a recreational fisherman.

It is lawful for any restaurant to possess, prepare and serve lawfully recreationally caught marine finfish to the persons who caught the finfish (Senate Bill 2068).

Recreational fishermen not fishing in Mississippi waters may transport and land fish that meet the minimum size and creel limits of the waters in which they were legally caught. Said recreational fishermen must possess a valid salt-water sportfishing license as may be required in the waters where the fish were caught. In the absence of minimum size or creel limits in another jurisdiction, Mississippi law will prevail.
CHARTER AND HEAD BOATS
Persons on a licensed charter boat or head boat may possess a two-day bag limit only when complying with the following conditions and only for the species listed in subsection H as listed below:

A. Charter boats must be less than 100 gross tons and meet U.S. Coast Guard requirements to carry six or fewer passengers.
B. Head boats must hold a valid certificate of inspection issued by the Coast Guard.
C. The charter boat or head boat must possess a federal reef fish permit if fishing for reef fish or in possession of reef fish in federal waters.
D. The charter boat or head boat must have two Coast Guard-certified captains aboard (as required by Coast Guard regulations for trips over 12 hours).
E. Each person aboard the charter boat or head boat must possess a certificate issued in the name of the chartering company, stating the time and date the charter left the dock, and the trip must be in excess of 24 hours.
F. Charter vessel captain and crew are prohibited from keeping a recreational bag limit of red snapper.
G. For-hire vessel captains and crew are prohibited from retaining a recreational bag limit of greater amberjack.

H. King and Spanish mackerel, snappers (red, vermillion, lane, gray, mutton, yellowtail, schoolmaster, cubera, dog, mahogany, queen, blackfin, silk and wenchman), groupers (misty, snowy, yellowedge, warsaw, speckled hind, red, yellowfin, black, gag, scamp, yellowmouth, rock hind and red hind), hogfish, gray triggerfish, lesser amberjack, banded rudderfish, almaco jack, goldface tilefish, anchor tilefish, blackline tilefish, blueline tilefish and greater amberjack.

Charter and recreational fishermen fishing in the Gulf of Mexico over 24 continuous hours may possess filleted fish in Mississippi waters, if they have filed a float plan with the MDMR in advance and have a signed copy aboard their boats. Float plans are available at the MDMR during regular working hours, Monday through Friday from 8 a.m. to 5 p.m. Float plans must be filed and received during these times, before the boat’s departure on the fishing trip. A float plan does not allow anglers to possess a two-day catch.
Mississippi Sportfishing Records

To qualify for saltwater sportfishing record consideration, anglers must complete an official application obtained from the MDMR and must abide by the following rules:

1. Fish must be hooked, fought and brought to net or gaff by the applicant with no help from any person, except that another person may operate the net or gaff. Catches on handlines or other nonsporting equipment will not be considered.

2. a. **Conventional Records**: Fish must be legally caught in a sporting manner on rod, reel and line or pole and line, and hooked with any legal hook or lure.
   b. **Fly-Fishing Records**: Fish must be legally caught using conventional fly-fishing tackle. The lure used must be a recognized type of artificial fly. Treble hooks are prohibited. The use of any other type of lure or natural bait, either singularly or attached to the fly is prohibited. The fly used must be submitted with the application.

3. Two color photographs should be submitted with each application:
   a. One of angler and fish.
   b. One showing a clear, close-up side view of the fish. Photos become the property of the MDMR.

4. Fish MUST be weighed on certified scales or scales legal for trade, i.e., grocery store scales, etc. The weighing must take place in the presence of two witnesses other than the applicant who MUST sign the application form or a separate statement attesting that they witnessed the OFFICIAL weight. NO provision for weight loss will be allowed. The actual weight of the fish AT THE TIME OF WEIGHING will be the OFFICIAL WEIGHT. It is also desirable to include signature(s) on the application form of the witness(es), if any, to the actual catching of the fish. Witnesses to the weight and catch CANNOT be the same persons. Rodeo entries are considered valid and acceptable weights.

5. Length of the fish must be measured in a straight line from the tip of the snout to the tip of the tail AND from the tip of the snout to the fork of the tail (see diagram on p. 5).

6. Girth of the fish will be measured around the thickest portion of the body.

7. Applications for saltwater species SHALL be positively identified AND verified by a professional fisheries biologist and/or a rodeo weighmaster.

8. Only fish caught in Mississippi waters or fish caught in adjacent waters and landed in a Mississippi port will be considered.

9. The MDMR reserves the right to further check fish identification or verification of witnesses and to refuse any application that is questionable. It will be considered “just cause” for disqualification of current application and any previous records established by anyone who knowingly falsifies a Record Application. All rules will be strictly adhered to. The decision of the Mississippi Commission on Marine Resources will be final.
Shrimp

COMMERCIAL METHODS OF TAKING
During open seasons and in open areas, saltwater shrimp may only be taken with shrimp trawls, trawls, butterfly nets, skimmer nets, push trawls, beach seines and cast nets. North of the barrier islands (COLREGS demarcation line), within the Mississippi Sound, shrimp may only be taken with a single net, no larger than 50 feet along headrope and 60 feet along footrope, or not more than two nets, each no larger than 25 feet on headrope and 32 feet on footrope. A test (or try) trawl no longer than 12 feet along headrope and 15 feet along footrope and used with boards not more than 30 inches in length is permitted. Trawl doors shall not exceed 8 feet by 43 inches.

Licensed shrimp trawlers may keep up to 25 pounds in total of white trout, croaker, black drum, ground mullet, gafftopsail catfish and flounder and three dozen blue crabs for personal consumption. Non-resident licensed shrimp trawlers may only keep this allowance if their respective state has a reciprocal agreement with Mississippi.

It shall be unlawful to use skimmer trawls or wing nets with a maximum size greater than 25 feet on the headrope and 32 feet on the footrope.

All recreational and commercial shrimp vessels with a mechanical assisted retrieval system must have a Turtle Excluder Device (TED). Skimmer trawl vessels may use 55-minute tow times instead of TEDs April 1 to October 31 and 75-minute tow time from November 1 to March 31. Contact NOAA 228-762-4591 for more information on these federal requirements.

RECREATIONAL METHODS OF TAKING
A recreational shrimp license is required for shrimp harvest by trawl. Recreational shrimp harvest by cast net does not require a recreational fishing license, unless retaining finfish. Recreational shrimp trawling is only allowed in open areas during open seasons.

Recreationally harvested shrimp cannot be sold.

All crabs and finfish harvested by recreational fishermen may be kept for personal consumption, but MUST meet minimum size and creel limits.

Cast nets or brail (brail) nets not exceeding 12-feet maximum radius may be used to catch up to 50 pounds of shrimp (heads on) per person, per day for personal consumption only in the bays located within and surrounding the cities of Bay St. Louis, Biloxi, Ocean Springs, Gautier and Pascagoula.

Persons catching shrimp with cast nets or brail nets shall not remove the heads of the shrimp on site.

Small mesh beach seines under 100 feet in length and with a maximum 1/4-inch-square mesh size are permitted.
Holders of a recreational shrimp trawling license are limited to the use of a single net measuring no larger than 16 feet along the headrope.

RESTRICTED AREAS
Trawling is not generally permitted in any area within 1/2 mile of the mainland, except by duly licensed live-bait dealers. Please contact the MDMR for more details on closed areas.

Trawling is prohibited north of the Intracoastal Waterway (tugboat channel) starting at midnight Dec. 31 of each year. The area south of the Intracoastal Waterway (tugboat channel) will be closed to trawling after April 30 of each year and prior to the opening of shrimp season (special extensions may be made by the Commission on Marine Resources pending sampling findings).

It shall be unlawful to recreationally or commercially trawl within the boundaries of the Gulf Islands National Seashore, which is a one-mile perimeter around Ship, Horn and Petit Bois islands.

SEASON
Shrimp season is officially opened by public notice at such time that the MDMR’s Office of Marine Fisheries has determined that the shrimp have reached legal size. As defined in Miss Code Ann. 49-15-64.1.

LEGAL SIZE
Shrimp smaller in size than 68 count to the pound are not to be taken in Mississippi waters, except by licensed live-bait boats. According to Title 22, Part 2, Ch. 5 (106).

SPECIAL PROVISIONS
It is illegal for anyone to drag or pull a trawl or try net under the water with the bag tied or untied within any waters that are closed to shrimping. Title 22, Part 2, Ch. 5 (106).

It is illegal to use a saltbox in Mississippi waters in which the salt solution exceeds 100 parts per thousand salinity.

Commercial shrimpers are permitted to sell their legally caught shrimp live with a “Fresh Product” permit.

For the latest updates on the Mississippi shrimp fishery, call the toll-free 24-hour Shrimp Information Hotline 1-866-We Trawl (866-938-7295).

LICENSED LIVE-BAIT SHRIMPING
Licensed live-bait catcher boats are prohibited from trawling north of the CSX Railroad bridge in the three coastal counties of Mississippi.

The live-bait fishery is viewed as a service to recreational fishermen and to the tourist industry of Mississippi. The special privileges granted and the regulations imposed are intended to ensure that this service may be performed with minimal impact on shrimp and fish populations.
Written application for live-bait licenses must be made to the Mississippi Commission on Marine Resources.

Shrimp of 100 count to the pound are the minimum legal size for licensed live-bait dealers. Live-bait dealers must mark their boats and transport vehicles with the designation “LIVE BAIT” in letters at least 6 inches high on both the port and starboard sides of the vessel and at least 4 inches high on the transport vehicle. The name of the bait camp must be similarly displayed on the boat and transport vehicle.

Licensed live-bait boats must be equipped to adequately maintain live shrimp on board. Such boats also are restricted to tows of 25 minutes or less and are not permitted to have on board in excess of 30 pounds of dead shrimp at any time.

Live-bait trawling is permitted only during the hours beginning 30 minutes before sunrise and ending at sunset, then only using a trawl no larger than 16 feet on the headrope and 22 feet on the footrope, except areas west of Bayou Caddy, where trawls may be 25 feet on the headrope and 32 feet on the footrope. Special areas may be opened to live-bait trawling and additional restrictions imposed.

Fish caught coincidental to a live-bait operation may be retained and sold for chum. Fish retained must be of legal commercial size. However, if crabs are to be kept, the dealer is required to hold a valid Mississippi commercial crab license.

Licensed live-bait camps must meet the following special requirements:
• Each camp must have adequate holding and aerating systems, which must be cleaned of dead shrimp at least every 12 hours.
• No bulk sales of dead shrimp are permitted. Dead shrimp may be sold only with the heads attached and in containers holding no more than 16 ounces. No more than five 16-ounce containers may be sold to an individual in one day.
• Someone must be readily available to serve customers during appropriate hours, and each live-bait dealer application must include these hours, at least eight hours per 24-hour period.
• Location of the camp must be accessible to the general public by public road or waters located within the three coastal counties.

Purchasing dead shrimp in bulk quantities from a live-bait dealer is illegal and punishable by a $5,000 fine for the first offense. Additional information and regulations governing the licensed live-bait fishery are available from the MDMR.
Oysters

METHODS OF TAKING
A recreational oyster license is required for all methods of oyster harvest.
During open season, oysters may be taken only by hands, tongs and dredges.

Dredges for oystering may not exceed 115 pounds in weight nor may they have
an excess of 16 teeth. Teeth on the dredge must be 5 inches or less in length.

Restrictions on the maximum number of dredges carried or the maximum
number of sacks that may be harvested daily will be established seasonally by
the Commission on Marine Resources.

DEFINITIONS TO KNOW*
APPROVED AREA
A classification used to identify a growing area where harvest for direct
marketing is allowed.

CONDITIONALLY APPROVED AREA
A classification used to identify a growing area which meets the criteria for
the approved classification except under certain conditions described in a
management plan.

RESTRICTED AREA
A classification used to identify a growing area where harvesting shall be by
special license and the shellstock, following harvest, is subjected to a suitable
and effective treatment process through relaying or depuration.

PROHIBITED AREA
A classification used to identify a growing area where the harvest of shellstock
for any purpose, except depletion or gathering of seed aquaculture, is not
permitted.

*Definitions from the National Shellfish Sanitation Program’s “Guide for Control of
Molluscan Shellfish,” 2015 Revision.
OYSTER REEFS
Oysters may be taken only from those waters approved for shellfish harvest by the Commission on Marine Resources. These area waters are subject to reclassification.

The harvesting, shucking, processing and sale of oysters must conform to all regulations specified by state statute and in the regulation adopted by the Commission on Marine Resources.

Several natural reefs are located in approved waters. They include:
• Southern Portions of the Pass Marianne Reef
• Telegraph Reef
• Umbrella Reef
• Pelican Key Reef
• Fletcher’s Key Reef

The major natural oyster reefs known to be located within conditionally approved waters include:
• Northern Portions of the Pass Marianne Reef
• St. Joe Reef (St. Joseph’s Point Reef)
• Waveland Reef
• St. Stanislaus Reef
• Square Handkerchief Reef
• Henderson Point Reef
• Bay St. Louis Reef

Following a rainfall, riverstage or other pollution event, conditionally approved reefs and affected privately leased areas may be temporarily closed to oystering when poor water-quality conditions exist. Such closures are released to local newspapers, television and radio media. Pertinent information about the opening and closing of reefs is available by calling the MDMR toll-free 24-hour Oyster Information Hotline at 228-374-5167 or 800-385-5902. The information may be updated daily during oyster season. Information on the current status of any shellfish growing waters in this state may be obtained from the MDMR.
SPECIAL PROVISIONS

Both recreational and commercial oyster harvesters must purchase a license from the MDMR.

Oysters taken from Mississippi waters must be tagged. These tags are issued by the MDMR at officially designated check-in, check-out stations. These stations will be identified in the opening order for oyster season. Both commercial and recreational oyster harvesters must check in at the designated check station before going to reefs and must check out at the same station.

Tags are issued at the time of inspection. Each tag must be completed with the harvester’s name, license/identification number, harvest date, harvest area and the shell-stock dealer’s name and identification number if the oysters are to be sold. Tags must be affixed to the sacks with the fasteners provided by the MDMR. All harvesters are required to pay a shell retention fee to the MDMR on the day of harvest. Shell retention fees will be used to further oyster production in the state.

Oysters taken from private leases must be so designated by tags indicating the official lease numbers issued by the MDMR.

Oysters taken for personal consumption also must be inspected and a tag will be issued for each sack. Such tags will identify that the contents are not to be sold.

Each boat or vessel used to harvest or transport shellfish is required to have on board a functional, approved marine sanitation device (MSD), portable toilet or other approved sewage disposal receptacle designed to contain human sewage.

Oysters destined for interstate commerce must originate from a certified Mississippi dealer with a fixed cooler facility.

Any oysters taken from other than Mississippi waters must be accompanied by a bill of lading indicating the point of origin.

Oysters harvested outside of Mississippi waters and transported by vessel into the state, must apply for a permit issued by the MDMR and comply with the provisions of the permit.

Between May 1 and Sept. 30, harvest vessels must have an awning or similar covering above shellstock to provide protection from the sun.
SEASONS
The commercial oyster season is regulated by the Commission on Marine Resources and notice thereof will be duly released to local newspapers, radio and television media.

During open season, oysters may be taken only from legal sunrise until 4:00pm. These times are subject to change as necessary.

LEGAL SIZE LIMITS
Oysters taken in Mississippi waters must be at least 3 inches from hinge to bill. At times, however, the MDMR may adjust this limit upon public notice to that effect.

LEGAL CATCH LIMITS
Recreational catch limits, set by Statute 49-15-46 (4), and commercial catch limits, set by Statute 49-15-38, are set annually.

American oyster (*Crassostrea virginica*)
Crabs

METHODS OF TAKING
Traditional methods of taking crabs:
• Traps (pots)
• Handline
• Drop net
• Dip net
• Trawls

SPECIAL PROVISIONS
A recreational crab license is required for crab traps only.

It shall be unlawful to have any sponge crabs (egg-bearing crabs) at any time of year. All sponge crabs shall immediately be returned to the water alive.

It is illegal to remove crabs from traps or pots for which one is not specifically licensed. It is illegal to remove crab traps from the water between the hours of 1/2 hour after sunset to 1/2 hour before sunrise.

All crabs, except for peeler crabs (those that are about to shed) and soft-shell crabs (those that have recently shed), must be 5 inches or larger as measured from the tip of one lateral spine across the back of the shell to the tip of the opposite lateral spine. Peeler crabs, if under 5 inches, must be in a separate container during commercial harvest activities.

All crab trap floats must be visibly marked with corresponding commercial or recreational crab license number. In addition, all crab traps fished from only recreational boats must also be marked with the vessel’s registration number. Licensed commercial crab fishermen may register a buoy color code with Marine Patrol. A crab trap float line must be of non-floating or weighted material and easily cut with a knife. All floats must measure 6 inches in diameter. It is illegal to place any crab trap so that the trap, the trap line or float is in any navigable waterway and interferes with normal boat traffic.

All crab traps must be permanently marked for ownership by a corrosion-resistant metal or plastic tag attached to the trap. The tag must be supplied by the fisherman and must be legibly stamped with license holder’s full name.

To protect overwintering crabs, it is illegal to fish for crabs by any means between Jan. 1 and March 31 each year in the winter crab sanctuary west of Cat Island (see legal description in CMR Title 22 Part 4).
Contact the MDMR at 228-374-5000 for more information or see map at dmr.ms.gov/marine-fisheries/shrimp-a-crab.

COMMERCIAL
Commercial crabbing is prohibited north of the CSX railroad bridge in the 3 coastal counties of Mississippi. Crabs may be taken by trawl, but the trawl must not exceed the maximum allowable dimension specified under “Methods of Taking” for shrimp (see p. 21) and must comply with all other regulations governing the use of a trawl. Crabs incidentally caught in trawls must be immediately returned to the water unless the boat operator holds a valid Mississippi commercial crab license. Licensed shrimp trawlers and licensed oyster fishermen may keep up to three dozen blue crabs for personal consumption.

RECREATIONAL
A recreational crab license ($5) is required to catch crabs in traps for personal use (not for sale). The taking of crabs with drop nets is permitted without a license.

It shall be unlawful for any person recreationally fishing for crabs for personal use or consumption, by means of crab traps or crab pots, to use in excess of six such traps or pots per household. Traps or pots must be marked with the owner’s name, and if traps or pots are being fished from a vessel, the traps or pots must be marked with the vessel’s registration number. Recreational crab traps are not allowed north of Interstate 10.

DIAMONDBACK TERRAPINS
Diamondback terrapins, a type of aquatic turtle, occasionally become trapped in crab traps. If you catch one, please call the Grand Bay National Estuarine Research Reserve at 228-475-7047. Your help is greatly appreciated in the study and protection of this species of concern. Free Turtle Excluder Devices (TEDs) for crab traps are available from the MDMR Shrimp and Crab Bureau. Call 228-374-5000 for more information.
Menhaden

METHOD OF TAKING
Menhaden are traditionally taken using purse seines. Boats and nets for taking menhaden are commercially licensed separately.

SEASONS
Menhaden season opens on the 3rd Monday of April and closes on Nov. 1 each year.

SPECIAL PROVISIONS
Purse seines for taking menhaden may not be used in any bay, river or bayou, nor within one mile of the shorelines of Hancock or Harrison counties.

Purse seines may not be used to catch in excess of 5 percent by weight, in any single set of the net, any of the following species:
• Bluefish
• Cobia (ling or lemonfish)
• Dolphin
• Jack crevalle
• King mackerel
• Spotted seatrout (speckled trout)

It also is illegal for any vessel carrying a purse seine to have on board in excess of 10 percent by weight of the total catch any of the aforementioned species.

It is further illegal for any vessel carrying a purse seine to have on board any quantity of red drum.

Data Reporting Requirements
Statistical agents of the MDMR’s Office of Marine Fisheries are authorized and empowered to obtain information on all fish and shellfish landed in Mississippi. This information may be collected from the fishermen in the form of interviews and/or questionnaires and may also be obtained from the purchase slips or landing records of each seafood dealer, processor or landing firm. All such statistical information obtained by the MDMR will remain confidential and will not be released except in aggregate form.

Cooperation with statistical agents is appreciated. For more information on the statistical program and associated data reporting requirements, contact the MDMR’s Office of Marine Fisheries.
Protected Species

Certain marine species are protected by federal law. Should any of these species be inadvertently taken in nets, on fishing hooks or otherwise, they must be taken to a rehabilitation facility or immediately released unharmed. Protected species include but are not restricted to the following:

- All marine mammals
- West Indian manatee
- Kemp’s Ridley, hawksbill, leatherback, loggerhead and green sea turtles (see pg. 32)
- Atlantic and Gulf sturgeon
- Marine birds
- Smalltooth and largetooth sawfish

If an injured or dead sea turtle or marine mammal is found, immediately call the following office:

- **Institute for Marine Mammal Studies, 1-888-SOS-DOLPHIN (1-888-767-3657)**

Information on manatee sightings is greatly needed. To report a sighting, or if an injured or dead manatee is found, immediately call:

- **Manatee Sighting Network, 1-866-493-5803**

To report a captured Gulf sturgeon call:

- **U.S. Fish and Wildlife Service, 850-769-0552**

For all other injured or dead protected species, immediately notify:

- **Department of Marine Resources, 228-374-5000**

Please note that criminal violations (intentionally shooting, killing or harming endangered or threatened animals) of the Endangered Species Act carry a maximum fine of $20,000 and a jail sentence of up to one year. Should this action be observed, call NOAA Fisheries Service or MDMR Marine Patrol.

Attention Fishermen: It is against the law to possess fish with heads, tails or flesh removed until the final destination. Fish may be eviscerated and scaled. To protect sea turtles, please discard fish parts in trash receptacles on land.
While Fishing, Help Save Sea Turtles

Sea turtles inadvertently caught in trawls may appear to be dead, but the Endangered Species Act of 1973 requires that fishermen attempt resuscitation of such sea turtles.

- Place the sea turtle on its breastplate (lower shell) and elevate its hindquarters several inches.
- Keep the turtle moist and in the shade. Do not put turtle in a container with water.
- Once recovered, release the turtle over the stern of the vessel (with engines in neutral).

How to Avoid Hooking and Entangling a Sea Turtle

- Reuse bait and properly dispose of cleaned fish remains. Dumping bait attracts sea turtles to piers.
- Recycle fishing line and stash your trash.
- Never feed sea turtles – it is harmful and illegal.
- Use corrodible (non-stainless steel) hooks to reduce injuries to wildlife.
- Reel in your line or change location if a sea turtle is near or shows interest in your bait or catch.
- Never cast in the direction of a sea turtle.

What to Do if You Hook a Sea Turtle

If you catch a sea turtle while fishing, immediately call the response team at 1-888-SOS-DOLPHIN (1-888-767-3657), even if the turtle got away!

While you wait for the response team:

- Do NOT lift by the hook or pulling on the line.
- Use a net or lift by the sides of the shell to bring the turtle on the pier or land. If no net is available or the turtle is too large, try to walk it to the beach.
- Leave the hook in place as removing it could cause harm.
- Keep the turtle out of direct sunlight, and cover the shell with a damp towel. Do not cover the head.
Marine Litter

The Marine Litter Act of 1989 prohibits the dumping of wastes, garbage and other debris from vessels and empowers the marine enforcement officers to uphold and enforce the provisions as set forth in the act. U.S. Coast Guard officers are further authorized to make arrests under federal law.

**MARINE LITTER REGULATION**

- “Vessel” means any boat, barge or other vehicle operating in the marine environment from the largest supertanker to the smallest recreational craft.
- “Person” means any human individual discharging garbage from land, vessel, plane or fixed or floating platforms.
- “Garbage” means all food wastes, but does not include fresh fish or their parts.

It shall be unlawful for any person or vessel to discharge any type of plastics, including synthetic ropes, fishing nets, garbage bags and other garbage, including paper products, glass, metal, dunnage, lining and packing materials, into the marine waters of this state.

All marinas and access areas used by vessels shall be required to have proper disposal facilities on site.

All vessels shall have on board a clearly marked **closed container** for the proper disposal of waste, trash and other garbage. Signage shall be posted on board notifying passengers and crew that it is unlawful to dispose of waste, trash and other garbage into the marine waters of the State of Mississippi.

![Marine Litter Sticker](image)

*This Marine Litter Sticker may be obtained free of charge at the MDMR. This sticker is required to be visibly displayed in all vessels (including personal watercraft) within the marine waters of the State of Mississippi.*

“Closed Container” means any sealed and properly labeled receptacle. The size and volume of the container shall be determined by the length and purpose of the cruise/voyage, the number of passengers and crew on board and the amount of trash or garbage to be generated. Closed containers shall include, but not be limited to, buckets or cans with lids, or watertight garbage bags with appropriate ties. Closed containers shall be clearly and permanently marked **TRASH** with weather-resistant materials.
EXCEPTIONS
The regulations contained herein shall not apply during the following emergencies:

• Discharges of garbage from a ship for the purpose of securing the safety of a ship and those on board or saving life at sea.

• The escape of garbage resulting from damage to a ship or its equipment, if all reasonable precautions have been taken before and after the occurrence of the damage to prevent or minimize the escape.

• The accidental loss of synthetic fishing nets or the loss of synthetic material during repair of nets, provided all reasonable precautions have been taken to prevent such losses.

• Refuse or other flotsam found in nets during trawling activities may legally be returned to the sea without violating these regulations. Regulations prohibit the intentional discharge of fishing nets at sea.

*Note that it is illegal to throw trash or allow it to enter into the marine waters of this state from piers, docks, bridges or land.*

PENALTIES
Any person or vessel convicted of violating any provision of these regulations shall be guilty of a misdemeanor and upon conviction shall be punished by a fine not to exceed $500. Each day of a continuing violation constitutes a separate violation. Violations of more than one (1) section or subsection of these regulations or parts thereof shall be considered separate offenses and punished as such.

Any person or vessel convicted of a 2nd or subsequent violation of any provisions of these regulations shall be guilty of a misdemeanor and upon conviction shall be punished by a fine not to exceed $10,000.

Any person violating federal marine litter laws may receive fines up to $50,000. A provision of the federal law may award a portion of criminal penalties or civil fines assessed against a violation to the person who gives information that leads to a conviction or assessment of a penalty.

MISSISSIPPI COASTAL CLEANUP
The Mississippi Coastal Cleanup is held the 3rd Saturday of October as part of the International Coastal Cleanup, during which coastal states and countries around the world dedicate the day to ridding the coastline of marine debris. Mississippi has one of the most successful cleanups in the world. Along with the event, the MDMR promotes marine debris awareness and education on prevention throughout the year. Visit [www.mscoastalcleanup.org](http://www.mscoastalcleanup.org) to find out how you can participate in the next Coastal Cleanup, the largest event to help stop marine debris.
MISSISSIPPI MONOFILAMENT RECYCLING PROGRAM
The MDMR and partners launched the state’s Monofilament Recycling Program in 2008 in an effort to reduce the amount of fishing line in the environment. Monofilament is a strand of strong, flexible plastic used for fishing. The majority is non-degradable in water and lasts about 600 years in the environment.

Fishing line recycling tubes and bins can be found at about 30 piers and harbors across the Mississippi Gulf Coast. Carefully disposing of monofilament in these tubes and bins can help prevent fish and wildlife entanglements and death, and the destruction of boat propellers and intake valves.

For more information on the Mississippi Monofilament Recycling Program or for a list of tube and bin locations, go to www.dmr.ms.gov and click on Marine Fisheries.

Invasive Species
Non-native invasive species can harm Mississippi’s natural environments by outcompeting native animals and plants for food and space. Aquatic plants can degrade water quality, reducing oxygen available to native aquatic species.

The impact to fishing and hunting can be substantial. Fish populations can be reduced by competition from non-native species and reduced water quality. Invasive aquatic plants can cover the water surface, making fishing impossible. Reduced water quality may degrade habitat for other animals as well. Non-native aquatic plants can clog motor intakes, degrade swimming areas and can even reduce property values in areas where non-native aquatic plants have taken over.

YOU CAN HELP prevent the spread of non-native invasive plants and animals by:
• Removing any aquatic plants from boat propellers, intakes, trailers and gear before leaving a launch area.
• Never releasing plants, fish or animals into a body of water unless they came out of that body of water.
• Eliminating water from equipment before transporting.
• Blowing out jet-ski intakes and washing boats and equipment land side before traveling into a new waterway.

For more information on invasive aquatic species visit: www.ProtectYourWaters.net

To report invasive species call the MDMR at 228-374-5000.
General Penalties

It is a misdemeanor to violate the Seafood Laws and the rules and regulations of the Commission on Marine Resources.

Any person, firm or corporation convicted of violating any regulation adopted by the Commission on Marine Resources shall be fined no less than $100 and no more than $500 for the first offense, unless the first offense is committed during a closed season, in which case the fine shall be no less than $500 and no more than $1,000.

For a second offense within a period of three (3) years, the fine will be no less than $500 and no more than $1,000.

For any third or subsequent offense within a period of three (3) years, penalties shall include no less than $2,000 and no more than $4,000, or imprisonment in the county jail for a period not exceeding 30 days. Upon conviction of a third or subsequent offense, the court shall revoke the right of the person or boat in violation from taking any seafood from state waters for one (1) year.

In addition to any other penalties, the Commission on Marine Resources may suspend the license of any person convicted of a violation and any vessel used in the violation for a period not to exceed five (5) days for the first offense, and a period not to exceed 30 days for the second offense.

Upon conviction of five seafood violations within a period of five (5) years, the Commission on Marine Resources may revoke the license of the convicted party and the vessel used in the offenses, and may prohibit indefinitely the issuance of a license to that person or vessel.

The Commission on Marine Resources is also authorized to impose administrative penalties of not more than $10,000 for each violation of the rules and regulations of the Commission.

License Sales

24-Hour License Sales: Call 1-800-5GO-HUNT (1-800-546-4868) or purchase online at www.ms.gov/gf/hunting.

All licenses may be purchased at the MDMR, Monday - Friday, 8 a.m. - 5 p.m.

Recreational saltwater fishing licenses may be purchased at most Wal-Mart, Kmart, sporting goods stores, bait shops and fishing camps.

For more information contact the MDMR at 228-374-5000.

or dmr.ms.gov/licenses

Saltwater Fishing License Purchase
Coastal Resources

Yours to Treasure. Yours to Protect.
Your purchase of a fishing license supports research and restoration that enhances fishing opportunities in coastal Mississippi.
The 2016-2017 cover represents the Shrimp and Crab Bureau.

This public document is not for sale, and all rights to the publication are reserved to the MDMR. Copies may be made for educational purposes only.
Texas Commercial Fishing Guide

EFFECTIVE SEPT. 1, 2016 THROUGH AUG. 31, 2017

Information in this guide may change due to Legislative or Commission action.
IMPORTANT: See Important Notices, Page 2
You can make a difference by reporting poaching, pollution and dumping, arson in state parks, and intoxicated boaters! Up to $1,000 may be paid for information leading to arrest and conviction of a person for a violation of our state’s wildlife and fisheries laws, as well as for certain laws related to environmental crime, arson, and intoxicated boaters.

Reward Hotline (800) 792-GAME

Operation Game Thief is privately funded. Please consider supporting efforts to protect our precious natural resources and keep our waterways safe by sending your tax deductible donation to Operation Game Thief, or by becoming an Operation Game Thief Member. Please visit www.ogttx.com for membership information. Donations can be sent to Texas Parks and Wildlife Department, 4200 Smith School Road, Austin, Texas 78744, or you may also call (512) 389-8801 to make a donation by credit card.
A GUIDE TO TEXAS COMMERCIAL FISHING INDUSTRY REGULATIONS

Commercial fishing is any activity involving taking or handling fresh or saltwater aquatic products for pay or for the purpose of barter, sale or exchange.

This publication is a summary of regulations for the commercial fishing industry in Texas and is designed as a guide only. Regulations concerning sport fishing are contained in the Texas Parks and Wildlife Outdoor Annual which is available free of charge from Texas Parks and Wildlife Department (TPWD) offices and from bait, tackle and sporting goods dealers where fishing licenses are sold.

More detailed information concerning commercial fishing industry regulations can be obtained from TPWD game wardens or any law enforcement office of TPWD.

IMPORTANT NOTICES

NOTICES BY TPWD
1. A Harvester/Shell Recovery Tag
   a. The tag must be affixed to the outside of each sack of oysters at the time of harvest, in the location of harvest, contain information required by the Department of State Health Services under the National Shellfish Sanitation Program, and remain affixed during transportation of the oysters to a dealer.
   b. The appropriate Harvester/Shell Recovery Tag (green or white) must be affixed to the sack regardless of the season or whether the requirements of 25 TAC §241.57 (relating to Molluscan Shellfish Harvesting and Handling) apply.
2. All commercial shipments of aquatic products must be accompanied by an invoice and containers must be labeled. (See Page 18 – SHIPPING REGULATIONS.)
3. The Shipper and Receiver of commercial shipments of aquatic products must keep the shipping invoices on file as a record for one year from the date of shipment. (See page 19 – RECORDS.)
4. Consumption of Clams, Mussels, and Other Molluscan Shellfish taken from public fresh waters is prohibited by the Texas Department of State Health Services. Maps identifying approved areas may be obtained from the Texas Department of State Health Services, Seafood Safety Division (512) 834-6757. Additional information concerning area closures may be obtained 24 hours a day, 7 days a week by calling (800) 685-0361.
5. Clams, Mussels, Oysters, and Other Molluscan Shellfish taken from public salt waters may be taken only from waters approved by the Texas Department of State Health Services. By order of the Texas Department of State Health Services (TDSHS) retention bans on finfish and shellfish are in effect in the following areas:
   1. The area of Lavaca Bay inshore of a line beginning at the last point of land at the northeastern approach of the Lavaca Bay Causeway, then in a south-west direction to Aquatic Life Marker A to Aquatic Life Marker B to Channel Marker #12, then in a southeastern direction to Aquatic Life Marker C to Aquatic Life Marker D to Aquatic Life Marker E to Channel Marker #74, then in a northeastern direction to Aquatic Life Marker F to the southernmost point of land on the spoil island east of the ship channel, is closed to the retention of finfish and crabs. (Catch and release of finfish and crabs is lawful. This closure is due to mercury contamination.)
   2. The Donna Irrigation System in Hidalgo County is declared a prohibited area for the taking of all species of aquatic life. This closure is due to elevated levels of polychlorinated biphenyls (PCBs) found in fish samples.

CONSUMPTION ADVISORIES
Fish and shellfish can be a source of high-quality protein in your diet. Fish and shellfish, however, can accumulate contaminants from the waters in which they live. The Texas Department of State Health Services (TDSHS) monitors fish in the state for the presence of environmental contaminants and alerts the public through bans and advisories when a threat to human health may occur from the consumption of contaminated fish.

In waters with consumption bans, possession and consumption of fish and/or shellfish is prohibited. Catch-and-release fishing from these areas is allowed. A consumption advisory is a recommendation to limit consumption to specified quantities, species, and sizes of fish. For additional information, a listing of all consumption bans and advisories, or a listing of areas tested where no bans or advisories were issued, call the TDSHS at (800) 685-0361 (shellfish) or (512) 834-6757 (fish).
OFFSHORE AQUACULTURE REGULATIONS

The Texas Parks and Wildlife Department adopted rules that prescribe the procedures and conditions for operating an offshore aquaculture facility in Texas waters, and implement the department’s responsibilities under Agriculture Code, Chapter 134 by providing protection for marine resources in the wild, including endangered species. TPWD’s responsibility is to protect the health and viability of native populations of fish, shellfish, and aquatic life in state waters, including endangered species. In general, the new rules prescribe the conditions under which marine species may be introduced into an offshore aquaculture facility without damaging surrounding water and marine resources.

The regulation of offshore aquaculture involves both state and federal jurisdictions. With respect to state agencies, the Texas Department of Agriculture (TDA) is the primary agency responsible for regulating aquaculture, the Texas Commission on Environmental Quality (TCEQ) has primary responsibility for establishing and enforcing water quality standards, the Texas General Land Office (GLO) is responsible for managing state-owned submerged lands, the Texas Animal Health Commission (TAHC) is responsible for management of animal disease necessary to protect agriculture, and the Texas Department of State Health Services (TDSHS) is the primary agency for protecting human health and safety, including seafood safety. The United States Army Corps of Engineers (COE) and the United States Coast Guard (USCG) are responsible for establishing maritime navigation standards and the identification, marking, and mitigation of navigational hazards.

The intent of this rulemaking is that individuals applying to the various agencies for their necessary permissions be able to do so simultaneously so that the many needed reviews, inspections and other activities can be accomplished in the minimum amount of time. However, the rule also specifies that all of these other permissions be obtained before the permit is approved by TPWD. For more information, call Robert Adami at (361) 939-7784.

GENERAL REGULATIONS

These rules also apply to fish, shrimp, crabs or other aquatic life caught in the Exclusive Economic Zone and landed in Texas.

**Texas residents** 17 years of age or older while fishing, hunting or trapping **MUST** have on their person a driver’s license or personal identification certificate issued by the Department of Public Safety. **Non-residents** must have similar documents issued by the agency of the state or country of which the person is a resident that is authorized to issue driver’s licenses or personal identification certificates.

**Waste of Fish** – It is unlawful to leave edible fish or bait fish taken from the public waters of the state to die without the intent to retain the fish for consumption or bait.

**RULES REQUIRING DRAINING OF WATER FROM VESSELS AND HOLDING TANKS USED ON PUBLIC FRESH WATERS**

Persons leaving or approaching public fresh water are required to drain all water from their vessels and on-board receptacles (includes live wells, bilges, motors and any other receptacles or water-intake systems coming into contact with public waters). This rule applies at all sites where boats can be launched and includes all types and sizes of boats whether powered or not, personal watercraft, sailboats, kayaks/canoes, or any other vessel used to travel on public waters.

- Live fish, including personally caught live bait, cannot be transported in or aboard a vessel in water that comes from the water body where the fish were caught. Personally caught live bait can be used in the water body where it was caught.
- Transport and use of commercially purchased live bait in water while fishing from a vessel is allowed, provided persons in possession of the bait have a receipt that identifies the source of the bait. Any live bait purchased from a location on or adjacent to a public water body that is transported in water from that water body can only be used as bait on that same water body.
• A vessel leaving a public freshwater body may be transported on a public roadway without water being drained, provided the vessel is transported via the most direct route to another access point located on the same water body during that same day.
• Marine sanitary systems are not covered by these regulations.
Following these procedures does not exempt persons from complying with prohibitions against transporting exotic aquatic species that are visible to the unaided eye, such as adult zebra mussels, which may be attached to boats or trailers.

CIVIL RESTITUTION
When a Texas Game Warden encounters a violation of hunting and fishing regulations, there will be a criminal complaint filed in either a justice court or a county court. Fines for such violations are assessed by the presiding judge hearing the case, and commercial aquatic products harvested in violation of the law may be confiscated and sold. In addition to assessed fines that may be associated with a criminal complaint, violators are also liable to civil restitution for the loss of or damage to wildlife resources that have resulted from the violation. Civil restitution will be assessed following each violation and each violator will receive an invoice for this restitution from the department. Failure to pay the civil recovery value will result in the department’s refusal to issue any license, tag or permit in the violator’s name until restitution is made. An individual who hunts or fishes after such a refusal commits a Class A misdemeanor which is punishable by a fine not less than $500 or more than $4,000; punishment in jail not to exceed one year; or both fine and confinement. For questions concerning civil restitution call (512) 389-4630.

IMPORTANT NOTICE: A person who seeks reinstatement of license privileges following license revocation or denial must apply for license privilege reinstatement and pay a $100 application fee.

POSSESSION OF PROHIBITED FISHING DEVICES
It is UNLAWFUL to possess a device designed to catch fish or other aquatic life in or on the public water of this state where the use of the device is prohibited or are not identified in this document as legal devices.

In coastal waters, a prohibited device may be possessed on board a vessel if the vessel is in port or in a marked channel going directly to or from an area in this state where the use of the device is permitted.

Gill nets, trammel nets, strike nets and seines (other than minnow seines) may not be possessed within 500 yards of any public coastal waters.

DEFINITIONS
Aquaculture: The business of producing and selling cultured species raised in private facilities.

Aquatic Product: Any live or dead uncooked, fresh or frozen aquatic animal life.

Artificial Lure: Any lure (including flies) with hook or hooks attached that is man-made and is used as a bait while fishing.

Bait: Something used to lure any wildlife resource. It is UNLAWFUL to use game fish or any part thereof as bait.

Barrel of Oysters: As defined in Parks and Wildlife Code, §76.001, a barrel of oysters is three boxes of oysters in the shell or two gallons of shucked oysters without shells. The dimensions of a box are ten inches by 20 inches by 13 1/2 inches. In filling a box for measurement the oysters may not be piled more than 2 1/2 inches above the height of the box at the center.

Bycatch Reduction Device (BRD): A device installed in the cod end (tail bag) of a shrimp trawl for the purpose of excluding finfish from the net. NOTE: BRDs are required in certain trawls.

Cast Net: A net which can be hand-thrown or cast to drop over an area.

Charter Vessel: A vessel less than 100 gross tons that meets the requirements of the U.S. Coast Guard to carry six or fewer passengers for hire and that carries a passenger for hire at any time during the calendar year. A charter vessel with a commercial permit is considered to be operating as a charter vessel when it carries a passenger who pays a fee or when there are more than three persons aboard, including operator and crew.

Circle Hook: A hook originally designed and manufactured so that the point of the hook is turned perpendicularly back toward the shank.
of the hook to form a generally circular or oval shape.

**Community Fishing Lake:** All public impoundments 75 acres or smaller located totally within an incorporated city limits or a public park, and all impoundments of any size lying totally within the boundaries of a state park. For a list of community fishing lakes in your area, call (800) 792-1112 or visit www.tpwd.texas.gov/fishboat/fish/recreational/lakes/cfl.phtml.

**Crab Line:** A baited line with no hook or pole attached.

**Crab Measurement:** Blue crabs are measured across the widest point of the body from tip of spine to tip of spine. Stone crab claws are measured by the propodus length which is the distance from the tip of the immovable claw finger to the first joint behind the claw. (See Page 25 for details.)

**Daily Bag Limit:** The quantity of a species that may be taken in one day.

**Day:** A 24-hour period of time that begins at midnight and ends the following midnight.

**Dip Net:** A mesh bag suspended from a frame attached to a handle.

**Fishing:** Taking or attempting to take fish, shrimp, crabs, oysters, clams, mussels or any other aquatic life by any means.

**Fishing Guide:** A person who, for compensation, accompanies, assists, or transports a person or persons engaged in fishing in the waters of this state.

**Fishing Guide Deck Hand:** A person in the employ of a fishing guide who assists in operating a boat for compensation to accompany or to transport a person or persons engaged in fishing in the waters of this state.

**Gaff:** Any hand-held pole with a hook attached directly to the pole.

**Game Fish** (includes hybrids or subspecies of fish on this list):
- Bass, Guadalupe
- Bass, largemouth
- Bass, smallmouth
- Bass, spotted
- Bass, striped
- Bass, white
- Bass, yellow
- Catfish, blue
- Catfish, channel
- Catfish, flathead
- Cobia
- Crappie, black
- Crappie, white
- Drum, red
- Mackerel, king
- Mackerel, Spanish
- Marlin, blue
- Marlin, white
- Pickerel
- Sailfish
- Sauger
- Seatrout, spotted
- Sharks
- Snook
- Spearfish, longbill
- Swordfish, broadbill
- Tarpon
- Tripletail
- Trout, brown
- Trout, rainbow
- Wahoo
- Walleye

**Gear Tag:** A tag constructed of material as durable as the device to which it is attached. The gear tag must be clearly legible and show the name and address of the person using the device and except for saltwater trotlines and crab traps, the date the device is set out. (See Page 7 for details.)

**Gig:** Any hand-held shaft with single or multiple points, barbed or barbless.

**Handfishing:** Fishing by the use of HANDS ONLY. The use of ANY other fishing device while handfishing (including but not limited to gaff, pole hook, trap, spear, or stick) is UNLAWFUL.

**Harvester/Shell Recovery Tag:** An identifying marker that must be affixed to the outside of each sack of oysters at the time and location of harvest containing information required by the Texas Department of State Health Services under the National Shellfish Sanitation Program. The tag must remain affixed during transportation of the oysters to a dealer.

**Headboat:** A vessel that holds a valid Certificate of Inspection issued by the U.S. Coast Guard to carry passengers for hire. A headboat with a commercial vessel permit is considered to be operating as a headboat when it carries a passenger who pays a fee or, in the case of persons aboard fishing for or possessing coastal migratory fish or Gulf reef fish, when there are more than three persons aboard, including operator and crew.

**Individual Fishing Quota (IFQ):** A form of limited access that assigns a fixed share of the total allowable catch to each user of the resource.

**Jug Line:** For use in FRESH WATER only. A fishing line with five or less hooks tied to an orange buoy.

**Lawful Archery Equipment:** Includes longbow, recurved bow, compound bow, and crossbow.

**Mussels and Clams:** Includes all freshwater and marine bivalve mollusks except oysters.
• Freshwater mussels - bivalve mollusks of the family Unionidae.

**Natural Bait:** A whole or cut-up portion of a fish or shellfish or a whole or cut-up portion of plant material in its natural state, provided that none of these may be altered beyond cutting into portions.

**Nongame Fish:** All species not listed as game fish except endangered or threatened fish which are defined and regulated under separate rules.

**Non-resident:** A person who does not meet the resident requirements.

**Offshore Aquaculture Facility:** All enclosures and associated infrastructure used to produce, hold, propagate, transport or sell stock under authority of an offshore aquaculture permit.

**Paddle Craft:** Any non-motorized vessel.

**Paddle-craft Fishing Guide:** A person who, for compensation, accompanies, assists, or transports a person or persons by means of a non-motorized vessel engaged in fishing in the coastal waters of this state.

**Permanent Structure:** A building designed, planned and constructed so as to remain at one location.

**Place of Business:** means a permanent structure on land or a motor vehicle where aquatic products or orders for aquatic products are received or where aquatic products are sold or purchased, but does not include a boat or any type of floating device, a public cold-storage vault, the portion of a structure that is used as a residence, or a vehicle from which no orders are taken or no shipments or deliveries are made other than to the place of business of a licensee in this state.

**Pole and Line (which includes rod and reel):** A line with hook, attached to a pole.

**Possession Limit:** The maximum number of a species of game, fish or other animals that may be possessed at one time.

**Purse Seine:** A net with flotation on the corkline adequate to support the net in open water without touching bottom with a rope or wire cable strung through rings attached along the bottom edge to close the bottom of the net.

**Residence:** A permanent structure where a person regularly sleeps and keeps personal belongings such as furniture and clothes, but does not include a temporary abode or dwelling such as a hunting or fishing club, or any club house, cabin, tent, or trailer house or mobile home used as a hunting or fishing camp, or any hotel, motel or rooming house used on a temporary basis.

**Resident:** A person who has lived in Texas continuously for more than 6 months immediately before applying for a license. (This includes residents and their spouses or unmarried children living at home who enter the United States Armed Forces and continue to list Texas as their state of residency with the armed forces.)

**Sack of Oysters:** A volume of oysters equivalent to a box (see definition of Barrel of Oysters) that weighs no more than 110 pounds of oysters including dead shell and the weight of the sack.

**Seine (includes a push net):** A section of non-metallic mesh webbing, with the top edge buoyed upwards by a floatline and the bottom edge weighted.

**Shark Fin:** The fresh and uncooked, or cooked, frozen, dried, or otherwise processed, detached fin or tail of a shark.

**Spear:** Any shaft with single or multiple points, barbed or barbless, which may be propelled by any means, but does not include arrows.

**Spear Gun:** Any hand operated device designed and used for propelling a spear, but does not include the crossbow.

**Stock:** Native species of fish, shellfish, or aquatic plants intended for use in, being transported to, or contained within an offshore aquaculture facility under the terms of an offshore aquaculture permit.

**Throwline:** For use in FRESH WATER only. A fishing line with five or less hooks and with one end attached to a permanent fixture. Components of a throwline may also include swivels, snaps, rubber, and rigid support structures.

**Trap:** A rigid device of various designs and dimensions used to entrap aquatic organisms.

**Trawl:** A beam trawl or otter trawl with a bag-shaped net which is used to catch shrimp.
- Beam Trawl - A trawl, without wings, the mouth of which is held open by a rigid beam of wood or metal.
- Otter Trawl - A funnel-shaped trawl, with wings, the mouth of which is held open by floats and weights and spread by trawl doors fastened to the wings.

Trotline: A non-metallic main fishing line with more than five hooks attached and with each end attached to a fixture.

Turtle Excluder Device (TED): A device installed in a shrimp trawl forward of the cod end (tail bag) for the purpose of excluding sea turtles from the net. NOTE: TEDs are required in certain trawls. (See Page 40 – APPROVED TED DESIGNS or federal regulation CFR Part 223 §223.207 for TED specifications).

Umbrella Net: A non-metallic mesh net that is suspended horizontally in the water by multiple lines attached to a rigid frame.

Wildlife Resources: Any wild animal, wild bird, or aquatic life.

POTENTIALLY HARMFUL EXOTIC FISH, SHELLFISH AND AQUATIC PLANTS

The importation, sale, transportation and release of exotic fish, shellfish, or aquatic plants designated harmful or potentially harmful by the Texas Parks and Wildlife Commission are prohibited except by special permit from the department. The list of potentially harmful species may be obtained by calling (800) 792-1112 or visit: www.tpwd.texas.gov/huntwild/wild/species/exotic/prohibited_aquatic.phtml.

FRESH WATER AND SALT WATER DEVICES, MEANS AND METHODS

ONLY DEVICES AND RESTRICTIONS LISTED MAY BE USED TO TAKE OR ATTEMPT TO TAKE AQUATIC LIFE

A person may fish with multiple poles or other devices, except as provided in this guide. In Fresh Water it is UNLAWFUL to fish with more than 100 hooks on all devices combined.

Bycatch Reduction Device (BRD): BRDs are required in certain trawls (See Page 37 – SHRIMP for trawl design restrictions).

Cast Net:
- Legal only for taking NONGAME fish and other aquatic animal life.
- May not be greater than 14 feet in diameter.
- In SALT WATER, NONGAME fish and other aquatic animal life may be taken for bait purposes only.

Circle Hook: It is UNLAWFUL to fish for red snapper using any kind of hook other than a circle hook when using natural bait.

Crab Trap: See Pages 41-43 – CRAB for crab trap design restrictions.

Dip Net:
- Legal only for taking NONGAME fish and other aquatic animal life.
- May be used to aid in the landing of fish caught by other legal devices.
- In SALT WATER, NONGAME fish and other aquatic animal life may be taken for bait purposes only.

Gaff:
- May only be used to aid in the landing of fish caught by other legal devices, means, or methods.
- Fish landed with a gaff may not be below the minimum, above the maximum, or within a protected length limit.

Gear Tag: The GEAR TAG must be legible, contain the name and address of the person using the device and the date the device was set out (See Page 5 – DEFINITIONS).

Gig: May be used to take NONGAME fish only.

Handfishing:
- The use of ANY other fishing device while handfishing (including but not limited to gaff, pole hook, trap, spear or stick) is UNLAWFUL.
- No person may intentionally place a trap (including such devices as boxes, barrels or pipes) in public fresh water for the purpose of taking catfish by handfishing.
- May be used to take channel catfish and blue catfish in FRESH WATER only.
- For handfishing under a commercial license, flathead catfish may not be retained or possessed.
Harvester/Shell Recovery Tag:
• Must be affixed to the outside of each sack of oysters at the time of harvest.
• Must be filled out completely with all information as indicated on the tag. Must remain affixed during transportation of the oysters to a dealer.

Jugline: For use in FRESH WATER only.
• May be used to take NONGAME fish, channel catfish and blue catfish only.
• For juglines fished under a commercial license, flathead catfish may not be retained or possessed.

Placement and Location Restrictions:
Juglines may not be used in:
• Community Fishing Lakes (See Page 5 for definition)
• Reservoirs or sections of rivers lying totally within the boundaries of a state park
• Bellwood Lake in Smith County
• Boerne Lake in Kendall County
• Canyon Lake Project #6 in Lubbock County
• Dixieland Reservoir in Cameron County
• Gibbons Creek Reservoir in Grimes County
• Lake Bastrop in Bastrop County
• Lake Bryan in Brazos County
• Lakes Coffee Mill and Davy Crockett in Fannin County
• Lake Naconiche in Nacogdoches County
• Lake Pflugerville in Travis County
• North Concho River from O.C. Fisher dam to the Bell Street dam
• South Concho River from Lone Wolf dam to Bell Street dam
• Tankersley Reservoir in Titus County
• Wheeler Branch Reservoir in Somervell County

Tagging and Marking Requirements:
• Must be used with a valid GEAR TAG (See Page 5) attached within 6 inches of the free-floating device; gear tag is valid for 10 days after the date set out and must include the number of the permit to sell nongame fish taken from fresh water, if applicable.
• For juglines, properly-marked buoys or floats qualify as valid GEAR TAGS.
• For commercial purposes, a jugline must be marked with an orange, free-floating device.

Lawful Archery Equipment:
• May be used to take NONGAME fish only.
• Any fish that is edible or can be used for bait (includes all gar species, common carp, and buffalo) may not be released back into the water after being taken with lawful archery equipment. See also “Waste of Fish” on Page 3.
• State regulations permit bow fishing in most public waters. EXCEPT it is UNLAWFUL to possess, shoot or hunt with a bow and arrow or crossbow on all water in the Aransas and Poesta rivers in Bee County; on all public water in the state-owned riverbeds of La Salle or McMullen counties; and on all public water in the state-owned riverbeds of the Nueces, Frio and Atascosa rivers in Live Oak County.
• Additionally, bow fishers are advised to check with local authorities that may have ordinances restricting use of archery equipment.
• A person fishing with lawful archery equipment on a navigable stream in Dimmit, Edwards, Frio, Kenedy, Llano, Maverick, Real, Uvalde, or Zavala counties may not possess an arrow equipped with fletching of any kind, an unbarbed arrow, or a bow that is not equipped with a reel and line.

Minnow Trap:
• Legal only for taking NONGAME fish and other aquatic animal life.
• NONGAME fish may be taken for bait purposes only.
• Trap may not exceed 24 inches in length. The throat may not exceed 1 inch by 3 inches.
• The trap must have a GEAR TAG attached (See Page 5) which is valid only for 10 days.

Oyster Dredge: For use in SALT WATER only
• May be used to take OYSTERS only.
• Oysters may be taken by the use of a legal oyster dredge in places, at times, and in manners as authorized by TPWD (see section on Oysters for details).
• May not exceed 48 inches in width and a 2-barrel capacity.
**Perch Traps:** For use in SALT WATER only.
- Legal only for taking NONGAME fish and other aquatic animal life.
- NONGAME fish and other aquatic animal life may be taken for bait purposes only.
- May not exceed 18 cubic feet.
- Must be marked with a floating visible orange buoy not less than 6 inches in height and 6 inches in width. The buoy must have a GEAR TAG (See Page 5) valid only for 10 days attached.
- Must be equipped with a degradable panel as described for crab traps (See Page 43 for design details).
- Buoys or floats may not be made of plastic bottle(s) of any color or size.
- It is UNLAWFUL to place any type of trap within the area in Cedar Bayou between a department sign erected where Mesquite Bay flows into Cedar Bayou and the department sign erected near the point where the pass empties into the Gulf of Mexico.

**Pole and Line (fished under a commercial fishing license):**
- May be used to take NONGAME fish only.
- GAME FISH may not be retained or possessed EXCEPT for blue catfish and channel catfish.
- It is UNLAWFUL to use a pole and line to take or attempt to take fish by foul-hooking, snagging, or jerking. A fish is foul-hooked when caught by a hook in an area other than the fish’s mouth.
- For community fishing lakes, pole and line is the only lawful method for taking GAME FISH (EXCEPT blue catfish and channel catfish may be retained or possessed) and NONGAME fish from Community Fishing Lakes (See Page 5 – DEFINITIONS); includes impoundments lying totally within the boundaries of a state park, sections of rivers lying totally within boundaries of a state park, the North Concho River from O.C. Fisher dam to the Bell Street dam, the South Concho River from Lone Wolf dam to Bell Street dam, Wheeler Branch Reservoir, Lake Pflugerville, and Canyon Lake Project #6.

**Purse Seine:** For use in SALT WATER only.
- Purse seines with not less than 1-1/2 inch stretched mesh, not including the bag, may be used only for taking menhaden from the third Monday in April through the first day in November.
- Purse seines for taking menhaden may not be used in any bay, river, pass or tributary, nor within one mile of any barrier, jetty, island or pass, nor within 1/2 mile offshore in the Gulf of Mexico.
- When using a purse seine to take menhaden, edible aquatic products may not exceed five percent by volume of the menhaden in possession.

**Seine (Includes a push net):**
- Legal only for taking NONGAME fish and other aquatic animal life.
- May not be longer than 20 feet.
- May not have mesh exceeding 1/2-inch square.
- Must be manually operated.
- In SALT WATER, NONGAME fish and other aquatic animal life may be taken by seine for BAIT PURPOSES only.

**Shad Trawl:** For use in FRESH WATER only.
- Legal only for taking NONGAME fish and other aquatic animal life.
- May not be longer than 6 feet or with a mouth larger than 36 inches in diameter.
- May be equipped with a funnel or throat and must be towed by boat or hand.

**Shrimp Trawl:** For use in SALT WATER only.
- “Legal shrimping operations” means the use of a legal trawl in places, at times, and in manners as authorized by TPWD (See Page 27 – SHRIMP).
- Seasons, area restrictions and trawl design restrictions (See Page 27 – SHRIMP).
- NONGAME fish (EXCEPT those species regulated by bag or size limits) taken by certain legal shrimping operations may be retained (See Page 27 – SHRIMP for details).
- May be used to take NONGAME fish only.

**Spear Gun:**
- May be used to take NONGAME fish only.
- Not a legal means to take fish in a community fishing lake.
**Throwline:** For use in FRESH WATER only.
- May be used to take NONGAME fish, channel catfish and blue catfish.
- For throwlines used under a commercial license, flathead catfish may not be retained or possessed.
- Must be used with a valid gear tag attached. Gear tag is valid for 10 days after the date set out.

**Placement and Location Restrictions:**
Throwlines may not be used in:
- Community Fishing Lakes (See Page 5 – DEFINITIONS)
- Reservoirs or sections of rivers lying totally within the boundaries of a state park
- Bellwood Lake in Smith County
- Boerne Lake in Kendall County
- Canyon Lake Project #6 in Lubbock County
- Dixieland Reservoir in Cameron County
- Gibbons Creek Reservoir in Grimes County
- Lake Bastrop in Bastrop County
- Lake Bryan in Brazos County
- Lakes Coffee Mill and Davy Crockett in Fannin County
- Lake Naconiche in Nacogdoches County
- Lake Pflugerville in Travis County
- North Concho River from O.C. Fisher dam to the Bell Street dam
- South Concho River from Lone Wolf dam to Bell Street dam
- Tankersley Reservoir in Titus County
- Wheeler Branch Reservoir in Somervell County

**Trotline:**
- NONGAME fish, channel catfish and blue catfish may be taken by trotline.
- For trotlines fished under a commercial license, flathead catfish may not be retained or possessed.
- Red drum, spotted seatrout, and sharks caught on a trotline may not be retained or possessed.
- **General Construction and Design Restrictions:** Trotlines may not be used with:
  - A mainline length exceeding 600 feet;
  - Hooks spaced less than 3 horizontal feet apart;
  - Metallic stakes; or
  - The main fishing line and attached hooks and stagings placed above the water's surface.

**Trotlines in Fresh Water:**
- **Tag Requirements:** Must be used with a valid GEAR TAG (See Page 5 – DEFINITIONS).
- Properly-marked buoys or floats qualify as valid GEAR TAGS.
- GEAR TAGS must be attached within 3 feet of the first hook at each end of the trotline and are valid for 10 days after the date set out.
- **Placement and Location Restrictions:**
Trotlines may not be used in:
- Community Fishing Lakes (See Page 5 – DEFINITIONS)
- Reservoirs or sections of rivers lying totally within the boundaries of a state park
- Bellwood Lake in Smith County
- Boerne Lake in Kendall County
- Canyon Lake Project #6 in Lubbock County
- Dixieland Reservoir in Cameron County
- Fayette County Reservoir in Fayette County
- Gibbons Creek Reservoir in Grimes County
- Lake Bastrop in Bastrop County
- Lake Bryan in Brazos County
- Lakes Coffee Mill and Davy Crockett in Fannin County
- Lake Naconiche in Nacogdoches County
- Lake Pflugerville in Travis County
- North Concho River from O.C. Fisher dam to the Bell Street dam
- South Concho River from Lone Wolf dam to Bell Street dam
- Tankersley Reservoir in Titus County
- Wheeler Branch Reservoir in Somervell County

**Trotlines in Salt Water:**
- Maximum Number of Trotlines Allowed: It is UNLAWFUL to fish for commercial purposes with more than 20 trotlines at one time.
- **Tag Requirements:**
  - Must be used with valid GEAR TAGS (See Page 5 – DEFINITIONS) which must be attached within 3 feet of the first hook at each end of the trotline.
  - For trotlines in SALT WATER fished under a commercial license, date is not required on a valid GEAR TAG.
Must be marked with yellow flagging attached to stakes or with a yellow buoy showing the commercial finfish fisherman’s license plate number. The letters must be in a contrasting color at least two inches high and attached to end fixtures.

Construction and Design Restrictions:

- The mainline length may not exceed 600 feet.
- May not use metallic stakes.
- May not place the main fishing line and attached hooks and stagings above the water’s surface.
- Must be marked with yellow flagging attached to stakes or with a yellow floating buoy not less than 6 inches in height and 6 inches in width, attached to end fixtures.
- Floats must be yellow.
- Buoys or floats may not be made of plastic bottle(s) of any color or size.
- May not be baited with other than natural bait.
- Natural bait is whole or cut-up portion of a fish or shellfish or a whole or cut-up portion of plant material in its natural state, provided that none of these may be altered beyond cutting into portions.
- Hooks must be 3 feet apart.
- May not be used with hooks other than circle-type hook (comparable to Mustad 11/0 circle hook Model #39960ST) with point curved in and having a gap (distance from point to shank) of no more than 1/2 inch, and with the diameter of the circle not less than 5/8 inch.

Placement and Location Restrictions:

- May not be used in or on the waters of the Gulf of Mexico within the jurisdiction of this state;
- May not be placed closer than 50 feet from any other trotline, or set within 200 feet of the edge of the Intracoastal Waterway or its tributary channels.
- May not be used in Aransas County in Little Bay and the water area of Aransas Bay within one-half mile of a line from Hail Point on the Lamar Peninsula, then direct to the eastern end of Goose Island, then along the southern shore of Goose Island, then along the causeway between Lamar Peninsula and Live Oak Peninsula, then along the eastern shoreline of the Live Oak Peninsula past the town of Fulton, past Nine-Mile Point, past the town of Rockport to a point at the east end of Talley Island, including that part of Copano Bay within 1,000 feet of the causeway between Lamar Peninsula and Live Oak Peninsula.
- No trotline or trotline components including lines and hooks, but excluding poles, may be left in or on coastal waters between the hours of 1 p.m. on Friday through 1 p.m. on Sunday of each week, except that attended sail lines are excluded from the restrictions imposed by this clause. Under the authority of the Texas Parks and Wildlife Department Code, §66.206(b), in the event small craft advisories or higher marine weather advisories issued by the National Weather Service are in place at 8 a.m. on Friday, trotlines may remain in the water until 6 p.m. on Friday. If small craft advisories are in place at 1 p.m. on Friday, trotlines may remain in the water until Saturday. When small craft advisories are lifted by 8 a.m. on Saturday, trotlines must be removed by 1 p.m. on Saturday. When small craft advisories or higher marine weather advisories are still in place at 1 p.m. on Saturday, trotlines may remain in the water through 1 p.m. on Sunday. It is a violation to tend, bait or harvest fish or any other aquatic life from trotlines during the period that trotline removal requirements are suspended under this provision for adverse weather conditions. For purposes of enforcement, the geographic area customarily covered by marine weather advisories will be delineated by department policy.

Turtle Excluder Device (TED): TEDs are required in certain trawls (See Page 40 – SHRIMP REGULATIONS for trawl design restrictions).

Umbrella Net:

- Legal only for taking NONGAME fish and other aquatic animal life.
- NONGAME fish and other aquatic animal life may be taken for bait purposes only.
- May not have within the frame an area that exceeds 16 square feet.
LICENSE REQUIREMENTS

License requirements and fees are subject to change. (License fees are not refundable.)

RECREATIONAL LICENSE REQUIREMENTS FOR COMMERCIAL FISHERMEN

A commercial fisherman must purchase a recreational fishing license, either resident or non-resident, and appropriate fresh or saltwater endorsement to fish for recreational purposes. NOTE: commercial plates must be removed from any commercial vessel while being used for recreational purposes.

When fishing under a recreational sport license, recreational size, bag and possession limits apply, and no aquatic species taken under a recreational license may be sold.

SHRIMP, CRAB, FINFISH AND OYSTER LICENSE MANAGEMENT

A moratorium on the sale of licenses or a license management program (limited entry) has been in effect for the Texas bay and bait shrimp fishery since 1996, the crab fishery since 1998, the saltwater finfish fishery since 2000 and both the gulf shrimp and oyster fisheries since 2005. To retain eligibility in each of these fisheries, purchase of the previous year’s license is required. A license buyback provision is in place for bay and bait shrimp boat, crab and finfish commercial licenses, but not for gulf shrimp boat or oyster boat licenses.

For further information regarding any limited entry requirements, license buybacks or other provisions of the program contact: Zack Thomas, Texas Parks and Wildlife Dept., Coastal Fisheries Division, 4200 Smith School Road, Austin TX 78744, (512) 389-8448, email: zack.thomas@tpwd.texas.gov.

GENERAL LICENSES

General Commercial Fisherman’s
Resident (Type 372) ......................... $26
Non-resident (Type 340) .................... $189

Required for any person who:
• catches aquatic products from the waters of this state for pay or for the purpose of sale, barter or exchange or any other commercial purpose; or
• unloads in this state aquatic products that were taken from water outside this state and have not been previously unloaded in another state or a foreign country, for pay or for the purpose of sale, barter or exchange or any other commercial purpose.
• a non-resident who is residing in a state that denies the privilege of commercial fishing in that state to a Texas resident because of residency status is not eligible for a non-resident general commercial fisherman’s license.

Exceptions:
• a person who holds a commercial shrimp boat captain’s license, commercial oyster boat captain’s license, a bait dealer’s license and catching bait only, commercial crab fisherman’s license, commercial finfish fisherman’s license, Class A and Class B menhaden boat license, or the crew of a licensed commercial shrimp boat or oyster boat is not required to obtain a general commercial fisherman’s license.

Commercial Finfish Fisherman’s
Resident (Type 371) ......................... $360
Non-resident (Type 361) .................. $1,440

This is a limited entry license. (See Page 12 – SHRIMP, CRAB, FINFISH AND OYSTER LICENSE MANAGEMENT.) Required for any person who takes finfish for commercial purposes from the coastal waters of this state.
• Finfish Fisherman: defined as a person who catches finfish from the coastal waters of this state for the purpose of sale, barter, exchange or any other commercial purpose.
• Finfish: defined as those living resources having either cartilaginous or bony skeletons (Chondrichthyes and Osteichthyes).

Exceptions:
• A person who is licensed as a bait dealer and who takes finfish for bait only is not required to obtain a commercial finfish fisherman’s license.
• A person who is in a vessel licensed as a menhaden boat and who takes menhaden is not required to obtain a commercial finfish fisherman’s license.
• A person who holds a commercial shrimp boat captain’s license or the crew of a licensed commercial shrimp boat is not required to obtain a commercial finfish fisherman’s license when catching finfish incidental to legal shrimp trawling operations.

• A person may operate a boat bearing a commercial finfish fisherman’s license plate ONLY if that person possesses on board the following documentation:
  • a commercial finfish fisherman’s license OR
  • a general commercial fisherman’s license, the original finfish fisherman’s license AND a copy of an affidavit permitting the boat operator to fish the commercial finfish fishing devices owned by the person to whom the commercial finfish fisherman’s license was issued. The affidavit must contain the date, original signature of the license owner, and commercial finfish license number which matches the commercial finfish license plate number on the boat.

• A person operating a boat for the purpose of commercial finfish fishing is not required to possess a commercial fishing boat license.

Note:
• A person purchasing this license will receive two (2) license plates bearing a number unique to that person.

A boat operated for the purposes of commercial finfish fishing is required to have commercial finfish fisherman’s license plates prominently displayed as to be clearly visible from both sides of the boat.

• No more than one set of commercial finfish license plates and license may be on board a commercial finfish fishing boat at any one time.

Commercial Shrimp Boat Captain’s
Resident (Type 333) ......................... $50
Non-resident (Type 433) ..................... $126

Required of any person who operates a commercial shrimp boat catching or attempting to catch shrimp and other aquatic products from the public waters of this state or unloading or attempting to unload in this state shrimp and other aquatic products taken from waters outside this state.

Commercial Oyster Boat Captain’s
Resident (Type 309) ......................... $32
Non-resident (Type 409) ..................... $126

Required of any person who operates a commercial oyster boat while taking oysters from the public waters of this state.

Commercial Oyster Fisherman’s
Resident (Type 370) ......................... $126
Non-resident (Type 470) ..................... $315

Required of any person who takes oysters from the public waters of this state for pay or for the purpose of sale, barter or exchange or any other commercial purpose. (Not required of the captain and crew onboard a licensed commercial oyster boat.)

Commercial Crab Fisherman’s
Resident (Type 338) ......................... $630
Non-resident (Type 438) ..................... $2,520

This is a limited entry license. (See Page 12 – SHRIMP, CRAB, FINFISH AND OYSTER LICENSE MANAGEMENT.)

Required for any person who takes crabs for commercial purposes from the coastal waters of the state.

NOTE: No person may hold more than three commercial crab fisherman’s licenses.

Exceptions:
• A person may operate a boat bearing a commercial crab fisherman’s license plate ONLY if that person possesses on board the following documentation:
  • a commercial crab fisherman’s license OR
  • a general commercial fisherman’s license, AND a copy of an affidavit permitting the boat operator to fish the commercial crab fishing devices owned by the person to whom the commercial crab fisherman’s license was issued. The affidavit must contain the date, original signature of the license owner, and commercial crab license number which matches the commercial crab license plate number on the boat.

• A person operating a boat for the purpose of commercial crab fishing is not required to possess a commercial fishing boat license.

Note:
• A person purchasing this license will receive two (2) license plates bearing a number unique to that person.
• A boat operated for the purposes of commercial crab fishing is required to have a commercial crab fisherman’s license plate prominently displayed as to be clearly visible from both sides of the boat.
• No more than one set of commercial crab fisherman’s license plates and license may be on board a commercial crab fishing boat at any one time.

**Commercial Mussel and Clam Fisherman’s**
- **Resident (Type 320)........................................... $38**
- **Non-resident (Type 420)............... $1,008**

Required of any person taking mussels, clams or their shells from the public waters of this state for commercial purposes. (See Page 44 – MUSSELS AND CLAMS.)

**Fishing Guide Licenses:**
Required for any person who for compensation, accompanies, assists, or transports any person engaged in fishing in the public waters of the state.

- **Fresh Water**
  - **Resident and Non-resident (Type 600)...............................$132**
- **All-Water**
  - **Resident (Type 610).......................... $210**
  - **Non-resident (Type 710).............$1,050**

Required of any person operating as a fishing guide in all public waters (salt water only or both fresh and salt water).

**NOTE:** No person operating a motorized vessel or boat as a fishing guide on or in the salt waters of this state may be issued a fishing guide license unless the person presents original documentation to the license agent that the applicant possesses a valid and appropriate U.S. Coast Guard (USCG) Operator’s License. It is the operator’s responsibility to assure compliance with USCG regulations. For additional information, contact the USCG Regional Examination Center in Houston, Texas at (713) 948-3350.

**All-Water Paddle Craft**
- **Resident (Type 650).............................. $210**
- **Non-resident (Type 750).............$1,050**

Required of any person operating as a fishing guide and utilizing paddle craft (canoes, kayaks, etc.) while guiding can qualify for a fishing guide license upon presentation to a license agent of certification or proof of completion of a TPWD boater safety course, CPR/First Aid training, and completion of the American Canoe Association Coastal Kayak Day Trip Leading Assessment or the British Canoe Union Four Star Leader Sea Kayak Certification. This license is applicable only to paddle craft and cannot be used when a person is operating a motorized vessel.

Any person who possesses an All-Water fishing guide license and a valid USCG vessel operator’s license is qualified as an All-Water paddle craft fishing guide.

**All-Water fishing guide and All-Water paddle craft licenses available only at TPWD Law Enforcement offices. Freshwater fishing guide licenses available at any location where licenses are sold.**

**BAIT DEALERS’ LICENSES**

All bait dealers who purchase aquatic product(s) from anyone except other dealers, and all bait dealers who harvest aquatic product(s) themselves are required to report these landings under the Trip Ticket Program. (See Page 19 – COMMERCIAL HARVEST REPORTS.)

- **Bait Dealer - Individual (Type 312)...........................................$38**
  Required for any person who catches, transports or sells his own catch of minnows, fish or other aquatic products (except shrimp) for bait.
  **Note:** In addition to this license, a permit to sell nongame fish taken from public fresh water is required. The fee for this license is $60 and can be obtained by calling (512) 389-4444. (See Page 15 – OTHER BUSINESS LICENSES AND PERMITS and Page 7 – GENERAL COMMERCIAL FISHERMAN’S LICENSE.)

- **Bait Dealer - Place of Business/Building (Type 515)...........................................$38**
  Required for any person who buys for the purpose of sale, minnows, fish, shrimp in non-coastal counties or other aquatic products for bait.
Bait Dealer – Place of Business/Motor Vehicle
(Type 516) ..................................................$38
Required for any person operating a place of business and buying, for the purpose of sale from a motor vehicle, minnows, fish, shrimp in non-coastal counties or other aquatic products for bait.

Bait-Shrimp Dealer – Place of Business/Building (coastal counties)
(Type 335) .................................................. $215
Required for any person who operates an established place of business engaged in selling shrimp for fish bait. Minnows, nongame fish or other aquatic products may also be sold for fish bait under this license. Only the place of business/building bait dealer’s license is required for grocery stores which do not unload or purchase shrimp directly from commercial bait-shrimp boats.

*Wholesale Fish Dealer
(each place of business except trucks)
(Type 314) .................................................. $825
*Wholesale Fish Truck Dealer
(for each truck used as a place of business)
(Type 315) .................................................. $590
Required for any person who operates a place of business for the purpose of selling, offering for sale, canning, preserving, processing, or handling for shipments or sale aquatic products to retail or wholesale fish dealers, hotels, restaurants, cafes, or consumers.

*Note: HB 2470 of the 78th Legislature mandated a 10% surcharge on fees for these licenses. The funds generated by these increases will be dedicated to a shrimp marketing and promotion program administered by the Texas Department of Agriculture.

*Retail Fish Dealer
(each place of business except trucks)
(Type 302) .................................................. $92.40
*Retail Fish Truck Dealer
(each truck used as a place of business)
(Type 316) .................................................. $171.60
Required for any person who operates a place of business and sells aquatic products to consumers.

*Note: HB 2470 of the 78th Legislature mandated a 10% surcharge on fees for these licenses. The funds generated by these increases will be dedicated to a shrimp marketing and promotion program administered by the Texas Department of Agriculture.

Menhaden Fish Plant (Type 326) ............... $180
Required for any person who operates, at a fixed location on land, any installation where fish and fish by-products are processed by pressure, heat or chemical means into fish oil, fish solubles, fish scraps or other products.

Texas Finfish Import License
(Type 380) .................................................. $95
Required of any person in this state receiving bass of the genus Micropterus, blue marlin, crappie, flathead catfish, goliath grouper (formerly called jewfish), longbill spearfish, muskelunge, northern pike, red drum, sailfish, sauger, snook, spotted seatrout, striped bass, tarpon, walleye, white bass, white marlin, yellow bass or hybrids of any of these fish directly from another state or country; or importing, transporting, or selling these fishes in this state.

*Other Business Licenses

“Place of business” means a permanent structure on land or a motor vehicle where aquatic products or orders for aquatic products are received or where aquatic products are sold or purchased, but does not include a boat or any type of floating device, a public cold-storage vault, the portion of a structure that is used as a residence, or a vehicle from which no orders are taken or no shipments or deliveries are made other than to the place of business of a licensee in this state.

Aquatic products lawfully taken from the waters of another state may be sold within this state by licensed dealers without regard to size limitations imposed on such products taken within this state. A record of the source and disposition of such undersized or oversized products shall be maintained by the dealer for as long as the undersized or oversized products are retained and for at least 30 days thereafter.

All fish dealers who purchase aquatic product(s) from anyone except other dealers, and all fish dealers who harvest aquatic product(s) themselves are required to report these landings under the Trip Ticket Program. (See Page 19 – COMMERCIAL HARVEST REPORTS.)
(This license is not required for fishes raised under a Texas Department of Agriculture Aquaculture License, or persons transporting these fish by common carrier from outside this state to a point of delivery outside this state providing the fish are not unloaded in Texas and are accompanied by a bill of lading.)

Shell Buyer

Resident (Type 324) .................................. $126
Non-resident (Type 424) ............................ $1,890

Required to purchase for commercial use mussel and clam shells that have been taken from the public waters. (See Page 44 – MUSSELS AND CLAMS.)

Permit to Sell Nongame Fish from Public Fresh Water ........................................ $60

Required of any person who sells nongame fish taken from the public fresh waters of this state. Additional licenses such as a General Commercial Fisherman’s License, Individual Bait Dealer’s License, and/or a Commercial Fishing Boat License (if using a boat to catch nongame fish) may be required. (See Page 23 – SALE OF FISH – FRESH WATER.) This permit can be obtained by calling (512) 389-4742.

BOAT LICENSES

Current boat registration or documentation papers must be presented when purchasing a boat license.

A non-resident boat is defined as a boat that does not have a Texas Certificate of Number or a boat that does not have a United States Coast Guard Certificate of Documentation that lists the owner’s address in Texas.

Commercial Fishing Boat

(Type 304) ........................................... $27

Required of each boat that must be registered under federal or state laws and is used in taking aquatic products except menhaden, oysters and shrimp from the public waters of the state or for boats unloading within the state such products taken outside the state’s waters for pay, barter, sale, exchange or any commercial purpose.

Class A Menhaden Boat

(Type 325) ........................................... $4,200

Required for each boat used in the coastal waters of this state for the purpose of catch-

ing, storing and transporting menhaden for pay, barter, sale or exchange. Persons aboard a menhaden boat for the purpose of taking menhaden are not required to possess a general commercial fisherman’s license or commercial finfish fisherman’s license.

Class B Menhaden Boat

(Type 329) ........................................... $50

Required for each boat used for the purpose of assisting a Class A Menhaden boat in catching menhaden. Persons aboard a Class B Menhaden boat for the purpose of catching menhaden are not required to possess a general commercial fisherman’s license or commercial finfish fisherman’s license.

Bait-Shrimp Boat

Resident (Type 337) ............................ $366
Non-resident (Type 437) .................... $758

This is a limited entry license. (See Page 12 – SHRIMP, CRAB, FINFISH AND OYSTER LICENSE MANAGEMENT.)

Required for each boat that must be registered under federal or state laws and is used in the inside waters of the state for taking bait shrimp for pay, barter, sale or exchange. A boat licensed as a commercial bait shrimp boat may also be used to take edible aquatic products, other than shrimp, for pay, barter, sale or exchange from inside waters.

Bay-Shrimp Boat

Resident (Type 336) ...................... $382.80
Non-resident (Type 436) ................ $825

This is a limited entry license. (See Page 12 – SHRIMP, CRAB, FINFISH AND OYSTER LICENSE MANAGEMENT.)

Required for each boat that must be registered under federal or state laws and is used in the inside major bay waters of the state for taking shrimp for pay, barter, sale or exchange. A boat licensed as a commercial bay shrimp boat may also be used to take other edible aquatic products for pay, barter, sale or exchange from inside waters.

Gulf-Shrimp Boat

Resident (Type 330) ........................... $495
Non-resident (Type 430) ............... $1,485

This is a limited entry license. (See Page 12 – SHRIMP, CRAB, FINFISH AND OYSTER LICENSE MANAGEMENT.)
Required for each boat that must be registered under federal or state laws and is used in the Gulf of Mexico or "outside" waters of the state for taking shrimp and other edible aquatic products for pay, barter, sale or exchange or for boats unloading within the state such products taken outside the state’s waters.

**Commercial Oyster Boat License**
- **Resident** (Type 306) $441
- **Non-resident** (Type 406) $1,764

Required for each boat used to transport or for taking oysters for pay or for the purpose of sale, barter, or exchange or any other commercial purpose from the public waters of this state by utilizing a dredge, tongs, or other mechanical means.

**PURCHASE OF AQUATIC PRODUCTS FOR RESALE**

**EXOTIC SPECIES**
Wholesale fish dealers and Retail fish dealers may display live tilapia, lawfully purchased from the holder of an exotic species permit, but must gut or behead the tilapia before selling or delivering to another person. It is unlawful to transfer live tilapia between fish dealers that do not possess exotic species permits. Exotic species regulations may be found at 31 TAC 57.111 – 57.137.

Wholesale fish dealers may purchase for resale, or receive for sale, barter, exchange, or any other commercial purpose aquatic products only from persons or entities in this state who hold a valid:
- general commercial fisherman's license;
- commercial oyster fisherman's license;
- commercial oyster boat license;
- wholesale fish dealer's license;
- fish farmer's license;
- commercial oyster boat captain's license;
- commercial shrimp boat license;
- commercial shrimp boat captain's license;
- commercial crab fisherman's license; or
- commercial finfish fisherman's license.

All wholesale fish dealers who purchase aquatic product(s) from anyone except other dealers, and all wholesale fish dealers who harvest aquatic product(s) themselves are required to report these landings under the Trip Ticket Program. (See Page 19 – COMMERCIAL HARVEST REPORTS.)

Retail fish dealers may purchase for resale, or receive for sale, barter, exchange, or any other commercial purpose aquatic products only from persons or entities in this state who hold a valid:
- wholesale fish dealer’s license;
- fish farmer’s license;
- general commercial fisherman’s license;
- commercial shrimp boat captain’s license;
- commercial shrimp boat license when the retail fish dealer has given written notification to the department of the dealer’s intent to purchase aquatic products from the holder of a general commercial fisherman’s license or a commercial shrimp boat license;
- commercial crab fisherman’s license; or
- commercial finfish fisherman’s license.

All retail fish dealers who purchase aquatic product(s) from anyone except other dealers, and all retail fish dealers who harvest aquatic product(s) themselves are required to report...
Restaurant owners, operators or employees may purchase aquatic products (only for consumption by the restaurant’s patrons on the restaurant premises) only from persons or entities in this state who hold a valid:

- general commercial fisherman's license;
- wholesale fish dealer’s license;
- fish farmer’s license;
- commercial shrimp boat license;
- commercial shrimp boat captain’s license;
- commercial crab fisherman's license; or
- commercial finfish fisherman’s license.

**SHIPPING REGULATIONS**

*AQUATIC PRODUCT TRANSPORTATION INVOICES*

All aquatic products (uncooked, fresh or frozen fish, shrimp, oysters, crabs, etc.) shipped for commercial purposes must be accompanied by an invoice prepared by the shipper containing the following information:

- Invoice Number
- Date of Shipment
- Name and Physical Address of Shipper (Fish Dealer)
- Name and Physical Address of Receiver
- Dealer Number of Shipper
- Quantity of Aquatic Products contained in the shipment; finfish by species, number or weight; oysters by volume; and all other aquatic products by weight.

Shippers shall sequentially number invoices during each license year. No number may be used twice during any one license period.

Shipper and receiver shall maintain a copy of invoice for a period of one year from date of shipment.

**INTERSTATE TRANSPORTATION**

No person may bring into this state and deliver aquatic products for commercial purposes unless the person has obtained a wholesale fish dealer’s license, a retail fish dealer’s license, a bait dealer’s license, or an exotic species interstate transport permit, as applicable, issued by the Texas Parks and Wildlife Department.

Aquatic products lawfully taken from the waters of another state may be sold within this state by licensed dealers without regard to size limitations imposed on such products taken within this state. A record of the source and disposition of such undersize or oversize products shall be maintained by the dealer for as long as the undersize or oversize products are retained and for at least 30 days thereafter.

No person may transport aquatic products out of this state for commercial purposes unless the transporter first obtains a wholesale fish dealer’s license or a retail fish dealer’s license. A person who delivers aquatic products for a licensed wholesale fish dealer or retail fish dealer must possess a copy of the dealer’s license while making deliveries.

**CONTAINERS**

All containers of aquatic products shipped for commercial purposes must have a label attached to the outside listing the following information:

- Aquatic Products Transportation Invoice number of the shipment of which the container is a part
- Kind of aquatic product contained
- Weight of aquatic product in the container

Finfish may not be shipped in individual packages that contain more than one species.

A commercial fisherman licensed to take aquatic products from Texas waters transporting their own catch within this state is not required to invoice the shipment or label containers.

**LICENSES**

Any person transporting aquatic products for commercial purposes must have in his possession the license authorizing the shipment.

- Commercial finfish fisherman's license
- OR
- General commercial fisherman’s license and an affidavit from the holder of the commercial finfish fisherman's license authorizing the person to operate their fishing devices for shipments of the fisherman’s own catch.
- Commercial shrimp boat license (or copy of commercial shrimp boat license) and commercial shrimp boat captain’s license for shipments of shrimp and/or other aquatic products taken on a commercial shrimp boat.
• Commercial oyster boat captain’s license and commercial oyster boat license (or copy of commercial oyster boat license), for shipments of oysters taken on a commercial oyster boat.
• Commercial oyster fisherman’s license for shipments of the fisherman’s own catch of oysters.
• Wholesale or retail fish dealer’s truck licenses (original license) or a copy of the wholesale or retail fish dealer’s business license for shipments going to or from the place of business of fish dealer.

No person may transport aquatic products out of this state for commercial purposes unless the shipper first obtains a wholesale fish dealer’s license, retail fish dealer’s license or a bait dealer’s license, whichever is applicable.

No person may bring into this state and deliver aquatic products for any commercial purpose unless he has obtained a wholesale fish dealer’s license or a retail fish dealer’s license, whichever is applicable.

A motor carrier providing contract carriage of aquatic products for a fish dealer is not responsible for invoicing or labeling the shipment or obtaining a wholesale or retail fish dealer’s license. The shipper (seller of the aquatic product) is responsible for invoicing and labeling the shipment and obtaining the proper dealer’s license.

RECORDS

COMMERCIAL HARVEST REPORTS

Trip Tickets
NOTE: All aquatic product transactions are required to be recorded by individual trip regardless of the species involved in the transaction, and each trip’s landings will be linked to information about the fisherman and his equipment. These transactions may be recorded electronically [using software provided by TPWD at the address below] or on paper using forms provided by TPWD [at the same address].

All dealers who purchase or receive aquatic product(s) from anyone other than another dealer MUST file a monthly report with the Texas Parks and Wildlife Department on or before the 10th day of each month following the month in which the reportable activity occurred. The report must be filed every month, whether or not reportable activity occurs. The filing of an incorrect or false report is unlawful. This report must include the forms for all transactions conducted during the period covered by the report.

All commercial fishermen who sell their catch to individuals other than wholesale fish dealer, retail fish dealer, wholesale truck dealer, retail truck dealer, bait dealer, bait-shrimp dealer, MUST report these sales by filing a monthly report with the TPWD on or before the 10th day of each month following the month in which reportable activity occurred. Processed aquatic products not sold to the processing dealer must be reported by the commercial fishermen at the landing weight prior to processing.

A trip ticket must include:
• the name of the seller;
• the commercial license number of the seller;
• commercial license type of seller;
• Texas driver’s license;
• the date of sale;
• the number of pounds sold by species;
• unit and condition codes
• count and/or market size
• the water body or bay system from which the aquatic products were taken;
• price paid per pound per species;
• gear used to harvest the aquatic product;
• trip time;
• fishing time;
• commercial fishing vessel name;
• commercial fishing vessel registration number;
• dealer name; and
• the commercial license number of the dealer.

Trip tickets are required for all aquatic products and must be completed at the time the products are delivered from the fisherman to the dealer.

Source of Forms
Dealer report forms for aquatic products are available by writing: Commercial Harvest Program, Texas Parks and Wildlife Department, Dickinson Marine Laboratory, 1502 FM 517 E, Dickinson, TX 77539 or calling (281) 534-0117.
MARKING OF VEHICLES

All motor vehicles, trailers or semi-trailers transporting aquatic products for commercial purposes are required to exhibit the inscription “FISH” on the rear of the vehicle. The inscription shall read from left to right, be attached or painted on the vehicle in block letters of good proportion in contrasting color to the background and be at least six inches in height, or be marked in the lower left portion, on the rear of the vehicle with a decal (see illustration) as prescribed by the Texas Parks and Wildlife Commission. For information call (512) 389-4853. Each individual dealer or company is responsible for generating their own decal according to provided guidelines.

(Reduced version of truck decal. Must be at least six inches by six inches in size and in contrasting color to the truck.)

IMPORTATION REGULATIONS

No person may import into this state or possess a wildlife resource taken outside this state, unless the person possessing the wildlife resource produces on demand by a game warden a valid hunting, fishing or other applicable license, stamp, tag, permit or document for the state or country in which the wildlife resource was legally taken.

A person importing or possessing a wildlife resource from another state or country must produce upon demand by a game warden a valid driver’s license or personal identification certificate.

Fish imported into Texas and landed by boat, must comply with Texas bag and size limits. This does not apply to fish caught under the authority of an approved Federal Fishery Management Plan.

COMMERCIAL PROTECTED FISH

All shipments of commercially protected finfish must be accompanied by a “Commercially Protected Finfish Shipping Invoice.” A copy of the invoice must accompany all commercially protected finfish shipments through their place of final sale to the consumer.

Commercially Protected Finfish
- Bass of the genus Micropterus*
- Bass, striped*
- Bass, white*
- Bass, yellow
- Catfish, flathead*
- Crappie, black*
- Crappie, white*
- Drum, red*
- Grouper, goliath (formerly called Jewfish)
- Marlin, blue
- Marlin, white
- Muskelunge
- Pike, northern
- Sailfish
- Saurer
- Seatrout, spotted
- Snook
- Spearfish, longbill
- Tarpon
- Walleye
- Hybrids of any of these fish*

*NOTICE: To be lawfully imported, sold or purchased in Texas, bass of the genus Micropterus, crappie, flathead catfish, red drum, striped bass, white bass or a hybrid of any of these fish must be farm raised and fed a prepared feed containing 20% or more of plant protein or grain by-products as a primary food source.

Commercially Protected Finfish Invoice
1. Shall accompany all shipments of commercially protected finfish imported, exported or shipped within the state.
2. Shall contain all of the following information, correctly stated and legibly written:
   (a) Commercially Protected Finfish Shipping Invoice number;
   (b) Date of shipment;
   (c) Name and physical address of shipper;
   (d) Name and physical address of receiver;
   (e) Shipper’s and receiver’s Texas Finfish Import Dealer number when required;
   (f) Number and weight of whole fish or fillets by species contained in the shipment; and
   (g) State (or country, if outside the United States) of origin.
3. Shall be on the form prescribed by the Texas Parks and Wildlife Commission and 8-1/2 x 11 inches in size.
4. Be sequentially numbered during the license period.
5. **NEW.** The shipper and receiver is responsible for reporting each shipment made within 24 hours of shipment through the Texas Parks and Wildlife Department approved internet application found at [https://txfinfish.com](https://txfinfish.com), except a retail dealer or restaurant selling only to the consumer is not required to report through the department approved internet application.

6. One copy of each invoice must be **retained** by the shipper and receiver, including retail dealers and restaurants, for a period of at least one year from the date of shipment. For questions contact (512) 389-4853.

**Package Requirements**
Commercial shipments of commercially protected finfish must be shipped in containers whose volume is no greater than six cubic feet or in containers that do not contain more than three individual fish each.

**Package Labels**
Each package of commercially protected finfish shall be labeled as to its contents. Labels shall be placed on the outside of each package and contain the following information:

1. The commercially protected finfish invoice number of the shipment of which the package is a part.
2. The number and weight of whole fish or fillets by species contained in the package.

**Importation of Commercially Protected Finfish from the EEZ by Commercial Fishermen**
A commercially protected finfish lawfully taken or raised for commercial purposes in the Exclusive Economic Zone (EEZ) under the authority of a Federal Fishery Management Plan or Federal Permit may be transported into this state by the harvesting vessel. These commercially protected finfish may only be unloaded to the holder of a Texas Finfish Import License.
All public waters east and south of the following boundary are considered salt waters: beginning at the International Toll Bridge in Brownsville, northward along U.S. Hwy. 77 to the junction of Paredes Lines Road (FM Road 1847) in Brownsville, thence northward along FM Road 1847 to the junction of FM Road 106 east of Rio Hondo, thence westward along FM Road 106 to the junction of FM Road 508 in Rio Hondo, thence northward along FM Road 508 to the junction of FM Road 1420, thence northward along FM Road 1420 to the junction of State Hwy. 186 east of Raymondville, thence westward along State Hwy. 186 to the junction of U.S. Hwy. 77 near Raymondville, thence northward along U.S. Hwy. 77 to the junction of the Aransas River south of Woodsboro, thence eastward along the south shore of the Aransas River to the junction of the Aransas River Road at the Bonnie View boat ramp; thence northward along the Aransas River Road to the junction of FM Road 136 to FM Road 2678 to the junction of FM Road 774 in Refugio, thence eastward along FM Road 774 to the junction of State Hwy. 35 south of Tivoli, thence northward along State Hwy. 35 to the junction of State Hwy. 185 between Bloomington and Seadrift, thence northwestward along State Hwy. 185 to the junction of FM Road 616 in Bloomington, thence northeastward along FM Road 616 to the junction of State Hwy. 35 east of Blessing, thence southward along State Hwy. 35 to the junction of FM Road 521 north of Palacios, thence northeastward along FM Road 521 to the junction of State Hwy. 36 south of Brazoria, thence southward along State Hwy. 36 to the junction of FM Road 2004, thence northward along FM Road 2004 to the junction of Interstate Hwy. 45 between Dickinson and La Marque, thence northwestward along Interstate Hwy. 45 to the junction of Interstate Hwy. 610 in Houston, thence east and northward along Interstate Hwy. 610 to the junction of Interstate Hwy. 10 in Houston, thence eastward along Interstate Hwy. 10 to the junction of State Hwy. 73 in Winnie, thence eastward along State Hwy. 73 to the junction of U.S. Hwy. 287 in Port Arthur, thence northwestward along U.S. Hwy. 287 to the junction of Interstate Hwy. 10 in Beaumont, thence eastward along Interstate Hwy. 10 to the Louisiana State Line.

The following public waters are not considered salt water:
(1) waters of Spindletop Bayou inland from the concrete dam at Russels Landing on Spindletop Bayou in Jefferson County; (2) north of the dam on Lake Anahuac in Chambers County; (3) the waters of Taylor Bayou and Big Hill Bayou inland from the saltwater locks on Taylor Bayou in Jefferson County; (4) Galveston County Reservoir on State Hwy. 146 and Galveston State Park Ponds #1 through #7 in Galveston County; (5) Lakeview City Park Lake, West Guth Park Pond, and Waldron Park Pond in Nueces County; (6) Lake Burke-Crenshaw and Lake Nassau in Harris County; (7) Fort Brown Resaca, Resaca de la Guerra, Resaca de la Palma, Resaca de los Cuates, Resaca de los Fresnos, Resaca Rancho Viejo, and Town Resaca in Cameron County; and (8) Little Chocolate Bayou Park Ponds #1 and #2 in Port Lavaca in Calhoun County.
FISH

GENERAL REGULATIONS

It is **UNLAWFUL** to take, attempt to take, possess, sell or purchase fish within a protected length limit, in greater numbers, by other means, or at any time or place other than as provided in this guide.

It is **UNLAWFUL** to transport by boat or person any fish within a protected length limit, or in excess of the daily bag limit or possession limit established for those fish.

**No person** on board a licensed commercial fishing boat (a commercial fishing boat, commercial shrimp boat, menhaden boat, commercial oyster boat) may possess any fish species whose sale is prohibited.

- On board a commercial shrimp boat fish legally taken incidental to a legal shrimp operation may only be possessed by a person with a shrimp boat captain’s license or a person who is the owner of a licensed commercial shrimp boat.
- To legally fish recreationally from a licensed commercial fishing boat, the commercial plates must be removed from the boat. While no commercial plates are on board, all recreational fishing regulations apply including size, bag and possession limits.
- While the commercial plates are on board, all commercial regulations apply, including size, bag and possession limits.

**No person** may possess a finfish of any species, except broadbill swordfish or king mackerel, taken from public water with the head and tail removed until such person finally lands the catch on the mainland, a peninsula or barrier island, not including jetties or piers. Sharks may have their head removed prior to landing the catch on the mainland, a peninsula or barrier island, not including jetties or piers. However the tail must remain attached to the carcass until finally processed or until delivered to the dealer.

Leaving fish to die. It is **UNLAWFUL** to leave edible fish or bait fish taken from the public waters of this state to die without the intent to retain the fish for consumption or bait.

PROHIBITED ACTS IN ALL PUBLIC WATERS

It is **UNLAWFUL** to fail to immediately remove the intestines from grass carp, tilapia, or any other harmful exotic species when caught or possessed. (For a complete listing contact TPWD at (800) 792-1112.)

It is **UNLAWFUL** for any person to use a gaff except to aid in the landing of fish caught by other legal devices, means, or methods. Fish landed with a gaff may not be below the minimum, above the maximum, or within a protected length limit.

It is **UNLAWFUL** for any person to release into the public waters of this state a fish with a device or substance implanted or attached that is designed, constructed or adapted to produce an audible, visual or electronic signal used to monitor, track, follow or in any manner aid in the location of the released fish.

It is **UNLAWFUL** to catch, possess, use, transport, purchase or sell any game fish or any part thereof as bait.

Billfish, except swordfish, may not be landed or possessed by the captain or crew of a commercial fishing vessel.

SALE OF FISH – FRESH WATER

It is **UNLAWFUL** to sell any fish taken from the public fresh water of Texas except for the following:

(1) **Channel and blue catfish** over 14 inches in length taken in the following:

- Angelina County
- Bowie County
- Camp County
- Cass County
- Chambers County
- Franklin County
- Freestone County
- Gregg County
- Hardin County
- Harris County
- Harrison County
- Jasper County
- Jefferson County
- Lamar County
- Leon County
- Liberty County
- Madison County
• Marion County
• Montgomery County
• Morris County
• Nacogdoches County
• Navarro County
• Newton County
• Orange County
• Panola County
• Polk County
• Red River County
• Sabine County
• San Augustine County
• San Jacinto County
• Shelby County
• Titus County
• Trinity County
• Tyler County
• Upshur County
• Walker County
• the Neches and Trinity rivers in Houston County
• the Colorado River in Bastrop, Colorado, Fayette, Matagorda or Wharton counties

(2) A PERMIT TO SELL NONGAME FISH is required to sell alligator gar, shortnose gar, spotted gar, longnose gar, bowfin, gizzard shad, threadfin shad, common carp, goldfish, grass carp, bighead carp, bigmouth buffalo, black buffalo, smallmouth buffalo, river carpsucker, black bullhead, yellow bullhead, freshwater drum (gaspergou), tilapia and their hybrids, Rio Grande cichlids (perch), silversides, mullet, listed shiners and minnows, and hybrids of these species taken from the public fresh waters of this state (See Page 15 - OTHER BUSINESS LICENSES AND PERMITS). Other nongame fish may not be sold. For permit information call (512) 389-4742.

SALE OF FISH – SALT WATER

All fish listed below taken from the public salt water of Texas may NOT be sold for any purpose. All other fish taken from public salt water may be sold provided all commercial fishing regulations including licensing, and size, possession and bag limits are met.

- Bass of the genus *Micropterus*
- Bass, striped
- Bass, white
- Bass, yellow
- Catfish, flathead
- Crappie, black
- Crappie, white
- Drum, red
- Grouper, goliath (formerly called jewfish)
- Marlin, blue
- Marlin, white
- Muskellunge
- Pike, northern
- Sailfish
- Sauger
- Seatrout, spotted
- Snook
- Spearfish, longbill
- Tarpon
- Walleye
- Hybrids of any of these fish

**Commercial Fishing Seasons**
The commercial fishing seasons for red snapper, sharks and king mackerel caught in Texas waters shall run concurrently with commercial seasons established for these species in federal waters of the Exclusive Economic Zone (more than 9 nm off shore).

**Sale or Purchase of Shark Fins**
NEW: It is UNLAWFUL for any person to buy, sell, offer to buy or sell, or possess for the purpose of sale, transport, or shipment a shark fin regardless of where the shark was taken or caught. A person who violates this provision commits an offense that is a Class B Parks and Wildlife misdemeanor.

**Exception:** A shark carcass that retains all of its fins naturally attached to the carcass through some portion of uncut skin may be bought, sold, or possessed for sale, transport or shipment.
TEXAS STATE WATERS - FEDERAL WATERS

Texas recreational and commercial fishermen fishing more than 9 nautical miles off the coast of Texas are in federal waters and are subject to rules and regulations that may differ from those in state waters. It is a violation of state law to possess aquatic animal life in Texas that was unlawfully taken in violation of federal law in the Exclusive Economic Zone. To insure you are in compliance with federal regulations, you should contact the Gulf of Mexico Fishery Management Council at (888) 833-1844 (toll-free) or visit www.gulfcouncil.org and click on REGULATIONS.

INDIVIDUAL FISHING QUOTA (IFQ) FOR RED SNAPPER

No person aboard any vessel shall sell, barter, trade, or exchange red snapper; land or attempt to land red snapper for the purpose of sale, barter, trade, or exchange; or possess red snapper for the purpose of sale, barter, trade, or exchange unless the person possesses a valid federal permit for the harvest of Gulf of Mexico Reef Fish, a valid federal red snapper Individual Fishing Quota (IFQ) vessel endorsement and a sufficient allocation for red snapper.

TOTAL ALLOWABLE CATCH (TAC) FOR GULF MENHADEN

The commercial season for menhaden (Brevoortia patronus) is open beginning on the third Monday in April and will continue until whichever of the following first occurs: the first day in November; or the total catch for the season has reached 31,500,000 pounds.

PADRE ISLAND NATIONAL SEASHORE - SPECIAL REGULATIONS

Starting March 7, 2009 anyone, excluding vendors and concessionaires, who makes money from a public resource at the Padre Island National Seashore or within its aquatic perimeter is required to possess a National Park Service issued “Commercial Use Authorization” permit while operating their service. Direct questions at (361) 949-9239, ext. 33. Also check the website for a full explanation of the rule: www.nps.gov/pais

HOW TO MEASURE FISH AND CRABS

The length to be measured is that straight line distance from the tip of the snout to the extreme tip of the tail or caudal fin. All measurements are to be made as that straight line distance (not over the curve of the body) with the fish lying on its side and with the jaw closed in a normal position, not extended in any way. The tail should be squeezed or rotated to produce the maximum overall length.

---

**a** Only the holder of a commercial finfish fisherman's license is exempt from recreational bag and possession limits while commercial fishing for black drum or sheepshead.

**b** Exceptions to catfish daily bag limit:
1) In Lake Livingston (Polk, San Jacinto, Trinity and Walker counties) the daily bag limit for channel and blue catfish is 50 in any combination;
2) In lakes lying totally within a state park and community fishing lakes (see the Texas Parks and Wildlife Outdoor Annual), the daily bag limit for channel and blue catfish is 5 in any combination and fish may be taken by pole and line only.

**c** Flounder Special Regulation: Daily bag is 30 fish except from Nov. 1-30, when the daily bag limit is 2 fish (flounder may be taken only by pole-and-line); and from December 1-14, when the daily bag limit is 2 fish (flounder may be taken by any legal means). Possession limit is equal to the daily bag. On board a licensed commercial shrimp boat the limit is equal to the recreational limit per each person with a current shrimp boat captain’s license and is subject to the 50% bycatch rule (See Page 27 – SHRIMP)

**d** Fishing Restrictions for Spawning Alligator Gar: When conditions such as water temperature and flooding events would be conducive for spawning of alligator gar, the TPWD Executive Director may temporarily prohibit taking or attempting to take alligator gar in a specified area for a period not to exceed 30 days. Conditions that would be used to invoke this action include water temperatures between 68 to 82°F and occurrence of moderate flood levels as defined and reported by U.S. Geological Survey gauges (see www.srh.noaa.gov/wgrfc). Notice of this action will be posted on the TPWD website, distributed to print and broadcast media, and shared through social media. The notice will specify the area to be closed and when lawful fishing for alligator gar may resume. For current closure notices, visit tpwd.texas.gov/gar-closure

---

26  2016-2017 Texas Commercial Fishing Guide
In Falcon International Reservoir (Starr and Zapata counties), daily bag limit is 5, and possession limit is 10.

1 May not take from public waters or possess on board a boat mullet over 12 inches during October, November, December and January. No limits apply during other months.

2 Special Regulation: The daily bag limit is one (1) fish for all allowable shark species INCLUDING Atlantic sharpnose, blacktip and bonnethead.

4 Special Regulation: Red snapper may be taken using pole and line, but it is UNLAWFUL to use any kind of hook other than a circle hook when using natural bait.

The possession limit does not apply to fish in the possession of:
(1) a person who has an invoice or sales ticket showing the name and address of the seller, number of fish by species, date of the sale, and other information required on a sales ticket or an invoice.
(2) for all wildlife resources (including fish) taken for personal consumption and for which there is a possession limit, the possession limit shall not apply after the wildlife resource has reached its final destination and/or point of sale with required invoices.

It is UNLAWFUL for any person while fishing on or in public waters to have in possession fish in excess of the daily bag limit or fish within a protected length limit as established for those waters.

**SHRIMP**

**GENERAL REGULATIONS**

**LICENSE REQUIRED**
- Commercial Shrimp Boat Captain’s License
- Commercial Shrimp Boat License (Bay, Bait or Gulf)

(See Pages 6 and 13 for licensing details)

To legally sport fish from a licensed commercial shrimp boat and to legally catch and retain fish species prohibited from sale, the commercial plates must be removed from the boat. While no commercial plates are on board, all sport fishing regulations apply including licenses, size, bag and possession limits. All commercial regulations apply when the commercial plates are on board.

It is UNLAWFUL to:
- take or attempt to take shrimp within the boundaries of any natural or man-made pass leading from the inside waters to the outside waters (Gulf of Mexico) of the state.
- use a trawl or fail to have the spreading devices on deck and the trawl bag untied at a time when shrimping is prohibited.
- possess a trawl that is too wide or has small mesh in an area where the trawl is prohibited. Such trawls may be possessed on vessels in port or in a marked channel going directly to or from an area in this state where the use of the trawl is permitted.
- head shrimp aboard a boat in inside waters.
- possess a device designed to catch fish or other aquatic life, including a shrimp trawl, in or on the public waters of the state where the use of the device is prohibited.
- catch and retain fish species prohibited from sale on a licensed commercial shrimp boat while the commercial plates are on board.
- retain a red drum, spotted seatrout or lightning whelk on board a licensed commercial shrimp boat if there is a trawl on board the boat.

It is UNLAWFUL for any person:
- aboard a vessel licensed as a commercial bay shrimp boat to off-load, transfer, sell, or barter any amount of live or dead shrimp to a person aboard another vessel;
- aboard a vessel to off-load, transfer, purchase, or barter from a person aboard a vessel licensed as a commercial bay shrimp boat any amount of live or dead shrimp;
- aboard a vessel licensed as a commercial bait shrimp boat to off-load, transfer, sell, or barter any amount of live or dead shrimp, except an amount of live or dead
shrimp not to exceed two quarts per sport fisherman or one gallon (by volume) for two or more sport fishermen may be off-loaded, transferred, sold, or bartered to a person aboard a sport fishing vessel; or
• aboard a vessel to off-load, transfer, purchase, or barter from a person aboard a vessel licensed as a commercial bait shrimp boat any amount of live or dead shrimp, except a person aboard a recreational fishing vessel may off-load, transfer, purchase, or barter an amount of shrimp not to exceed two quarts per sport fisherman or one gallon (by volume) for two or more recreational fishermen.

Commercial shrimp boat license plates must be prominently displayed as to be clearly visible from both sides of the boat. Fresh shrimp may be held in possession only through open seasons and five days thereafter, except that bait dealers and sport fishermen may possess bait shrimp throughout the year.

The captain of a licensed commercial shrimp boat is required to hold a Commercial Shrimp Boat Captain’s license.

Nongame fish and other aquatic products taken incidental to legal shrimp trawling operations may be retained provided each person that retains a lawful limit of fish has a current shrimp boat captain’s license, or is the licensed owner of the shrimp boat, and:
• the total weight of aquatic products retained, in any combination, do not exceed 50% by weight of shrimp on a shrimping vessel; or
• from May 1 to Sept. 30 up to 1,500 live nongame fish not regulated by bag or size limit and/or 300 dozen ribbonfish may be retained daily for bait purposes only on board a vessel licensed for commercial bait shrimp fishing.

The taking of aquatic products of illegal size on board a licensed commercial shrimp boat engaged in the lawful taking of shrimp is not a violation if the aquatic products of UNLAWFUL size are returned to the waters from which taken in a manner to ensure their best chance of survival.

DISPLAY BOAT NUMBERS

All commercial shrimp boats are required to exhibit the vessel’s documentation or registration number on the port and starboard sides of the deckhouse or hull and on an appropriate weather deck. The number in block Arabic numerals in contrasting color to the background must be at least 18 inches in height on vessels over 65 feet and 10 inches in height for all other vessels and be permanently attached.

METHOD OF NET MEASUREMENT

All total widths specified for commercial otter trawls, including try nets, are measured along the uninterrupted corkline from leading tip of door to leading tip of door, including any and all add-on devices or attachments to the corkline. All beam trawl widths are measured along the beam in its fully extended position. (See Page 36 for details.)

Mesh sizes specified for commercial trawls apply to the trawl, bag and trawl liner and are measured in inches of length between the two most widely separated knots in any consecutive series of five stretched meshes after the trawl has been placed in use.

SPECIAL REGULATIONS

(Bay and Bait Shrimping)

A boat having on board or displaying a bait shrimp boat license must operate only under commercial bait shrimp regulations, including: 1) 200 pound daily limit; 2) maintaining 50% of the shrimp alive; 3) places authorized for bait shrimping; and 4) sale or unload to a bait shrimp dealer or sportsman. (See Page 27 – SHRIMP.)

A shrimp boat licensed both as a bay shrimp boat and a bait shrimp boat may not shrimp in both a major bay and any other water on the same calendar day during the period May 15 through July 15 (Spring Open Season).

A shrimp boat licensed both as a bay shrimp boat and a bait shrimp boat may not take more than 800 pounds of heads-on shrimp per calendar day during the period May 15 through July 15 (Spring Open Season).

See tables on pages 34-35 for open seasons, limits and requirements for the Commercial Bay-Shrimp and Bait-Shrimp Boats.
WATERS DEFINED

Outside Waters—That part of the Gulf of Mexico extending from the shoreline seaward to nine nautical miles.

Inside Waters—All bays, passes, rivers or other bodies of water landward from the Gulf of Mexico. In these waters, the tide rises and falls and saltwater shrimp are found or migrate.

Major Bays (arranged geographically north to south)
- Sabine Lake (north of Cameron Causeway to the south of a line marked by the GIWW [Sabine Neches Canal/Sabine River] between the eastern most tip of Goat Island to the western most tip of Stewts Island)
- Trinity Bay (southeast from a line extending from the mouth of Double Bayou in Chambers County to Double Bayou Channel Marker 14, to Separator C-2, to Point Barrow in Chambers County)
- Galveston Bay
- East Bay (westward from a line extending from Frozen Point to the GIWW Marker 12)
- Matagorda Bay (westward of a line extending from a location on the mainland where a line running immediately northwest [bearing 330 degrees] from Shellfish Marker A intersects the mainland; thence southeasterly to Shellfish Marker A located near the mainland, thence to Shellfish Marker B located near the end of Shell Island Reef, thence to the tide gauge located near the Matagorda Peninsula, and thence southeasterly [bearing 153 degrees] to the Matagorda Peninsula)
- East Matagorda Bay
- Tres Palacios Bay (south of a line from Grassey Point to the mouth of Pilkington Bayou)
- Espiritu Santo Bay
- Lavaca Bay (seaward of State Hwy. 35)
- San Antonio Bay (seaward of a line from McDowell Point to Mosquito Point)
- Aransas Bay
- Corpus Christi Bay (exclusive of the area bounded by a line extending from the GIWW at the southwest point of Dagger Island chain, along Dagger Island to the southeast tip of Ransom Island, then southeast to the westernmost point of land north of Marker 14 in the Corpus Christi Ship Channel)
  - All exclusive of tributary bays, bayous and inlets, lakes and rivers.

Bait Bays include major bays and the following (arranged geographically north to south)
- Gulf Intracoastal Waterway (GIWW) exclusive of all tributaries
- Chocolate Bay
- West Bay (south and west of Interstate Hwy. 45 Causeway Bridge and the GIWW inclusive of the area south of a line extending westward from the Interstate Hwy. 45 Causeway Bridge at Virginia Point, along the southern edge of Tiki Island to the northeastern tip of North Deer Island at Channel Marker 48)
- Trinity Bay (northward from a line extending from the mouth of Double Bayou in Chambers County to Double Bayou Channel Marker 14, to Separator C-2, to Point Barrow in Chambers County)
- The Old Brazos River (lying north of the GIWW in Brazoria County)
- Baroom Bay
- Upper Laguna Madre
- Alazan Bay
- Baffin Bay, and
- Lower Laguna Madre including the Brownsville Ship Channel

Nursery Areas (Those coastal waters not specifically named above as Major Bays or Bait Bays are considered Nursery Areas)—Includes tributary bays, bayous, inlets, lakes and rivers that provide growth and development environments for postlarval and juvenile shrimp. Does not include outside waters, major bays or bait bays.

Map is not to scale.
OUTSIDE WATERS

Commercial Gulf-Shrimp Boats – Closed Seasons, Limits and Gear Restrictions

Closed Seasons:
- **Federal Waters** (from 9 nautical miles to 200 nautical miles from the Texas Coast), shrimping is closed:
  - from May 15** – July 15**
  - IMPORTANT NOTICE: The rules regarding the Summer Closed Season for Federal Waters off Texas may have changed prior to publication of this guide. For current rules, please call the National Marine Fisheries Service at (727) 824-5305 or contact your nearest TPWD Law Enforcement office.
- **Within 5 nautical miles of the Texas coast** (Zones N1, N2, S1, S2), shrimping is closed:
  - at night (30 minutes after sunset to 30 minutes before sunrise)
  - from Dec. 1 - Feb. 15
- **Within 5 nautical miles of the Texas coast in the South Zone** (Zones S1, S2), shrimping is closed:
  - from Feb. 16 – May 15**
- **Within 9 nautical miles of the Texas coast** (Zones N1, N2, N3, S1, S2, S3), shrimping is closed:
  - from 30 minutes after sunset May 15** to 30 minutes after sunset July 15**

**SPECIAL NOTICE:** These dates may be changed by the department providing 72 hours public notice on new closing dates and 24 hours notice on new opening dates.

Net Limitations:
- **Net Type I:**
  - **Trawl Size:** Otter trawls must have doors at least 3 feet long as measured along the door centerline from leading tip of door to trailing edge of door; and each net cannot exceed any of the following dimensions as measured along an uninterrupted corkline from leading tip of door to leading tip of door including any and all add-on devices or attachments to the corkline.
  - **Net Dimensions:**
    - **Door Length (ft.):**
      - 3' or more but less than 4' 71'  
      - 4' or more but less than 5' 73'  
      - 5' or more but less than 6' 75'  
      - 6' or more but less than 7' 77'  
      - 7' or more but less than 8' 79'  
      - 8' or more but less than 9' 81'  
      - 9' or more but less than 10' 83'  
      - 10' or more 85'
    - **Total Width (ft.):**
      - 4' or more but less than 4' 40'  
      - 4' or more but less than 5' 42'  
      - 5' or more but less than 6' 44'  
      - 6' or more but less than 7' 46'  
      - 7' or more but less than 8' 48'  
      - 8' or more but less than 9' 50'  
      - 9' or more but less than 10' 52'  
      - 10' or more 54'

- **Seabob Net:**
  - **Trawl Size:** Otter trawls must have doors at least 3 feet long as measured along the door centerline from leading tip of door to trailing edge of door; and each net cannot exceed any of the following dimensions as measured along an uninterrupted corkline from leading tip of door to leading tip of door including any and all add-on devices or attachments to the corkline.
  - **Net Dimensions:**
    - **Door Length (ft.):**
      - 3' or more but less than 4' 48'  
      - 4' or more but less than 5' 50'  
      - 5' or more but less than 6' 52'  
      - 6' or more but less than 7' 54'  
      - 7' or more but less than 8' 56'  
      - 8' or more but less than 9' 58'  
      - 9' or more but less than 10' 60'  
      - 10' or more 62'
    - **Total Width (ft.):**
      - 4' or more but less than 4' 48'  
      - 4' or more but less than 5' 50'  
      - 5' or more but less than 6' 52'  
      - 6' or more but less than 7' 54'  
      - 7' or more but less than 8' 56'  
      - 8' or more but less than 9' 58'  
      - 9' or more but less than 10' 60'  
      - 10' or more 62'

- **Try Nets** (Gulf and Inshore – Bay Shrimping):
  - **Otter Trawls:**
    - Total width: 21 feet
    - Doors: 450 square inches
  - **Beam Trawls:** May not exceed 10 feet in width
- **Try Nets** (Inshore – Bait Shrimping):
  - **Otter Trawls:**
    - Total width: 12 feet
    - Doors: 450 square inches
  - **Beam Trawls:** May not exceed 5 feet in width

See tables on pages 32-33 for open seasons, limits and requirements for the Southern and Northern Zones for Commercial Gulf-Shrimp Boats.
The State Outside Waters of the Southern Shrimp Zone are OPEN TO SHRIMPING as follows:

### Nueces County Laguna Madre Special Commercial Bait-Shrimping Regulations
- All year in the Gulf Intracoastal Waterway between markers 17 and 57 in the Laguna Madre in Nueces County, commercial bait-shrimp boats may take bait-shrimp from 1 a.m. to 30 minutes before sunrise each day with a legal beam trawl only.
- It is UNLAWFUL for any person to take or attempt to take shrimp with a trawl at any other time or in any other place in the Laguna Madre in Nueces County north of a line starting on the mainland at the most northeasterly point on the north side of the entrance of Whiteley Channel then proceeding in a straight line to the north end of Pita Island; then continuing on a line to the southernmost point on the westerly most spoil island bordering the north side of the New Humble Channel (commonly referred to as Hap's Channel); then continuing on a line along the north edge of the New Humble Channel (commonly referred to as Hap's Channel) to its junction with the Gulf Intracoastal Waterway; then continuing on a straight line to the Nueces/Kleberg County line marker on Padre Island.

† BRD means Bycatch Reduction Device  
‡ TED means Turtle Excluder Device
OTTER TRAWL MEASUREMENTS

Shrimp trawls in Texas are measured from leading tip of one door along the uninterrupted cork line to the leading tip of the other door. (Any devices added to the cork line, except the corks, will not be considered interrupting the cork line and will be included in the total measurement of the trawl.) THESE ATTACHMENTS/ADDITIONS INCLUDE BUT ARE NOT LIMITED TO BIBS, CHAINS, AND SLED/DUMMY DOORS.

BRD MEASUREMENTS

All measurements must be taken with gear in a hanging position.

For additional information on specifications for trawls, BRDs and TEDs, call the nearest Coastal Law Enforcement office (see page 46).

Diagrams are derived from images provided by the National Marine Fisheries Service.
FISHEYE AND SEA EAGLE BRDs

Key Measurements
A. Fisheye opening may not be placed less than 24 inches behind lazy line attachment system.
B. Fisheye opening must be less than 9 ft. from the cod end tie-off rings.
C. Fisheye may not be placed more than 12 meshes either side of the center seam of the tail bag.

Lazy Line Placement
• Lazy lines, choker straps, elephant ears, rings and other lines may be placed in these areas.
• Fisheye opening may not be obstructed by any ropes, rings, elephant ears or straps.

Top View of Tail Bag

For additional information on specifications for trawls, BRDs and TEDs, call the nearest Coastal Law Enforcement office (see page 46).

Diagrams are derived from images provided by the National Marine Fisheries Service.
For additional information on specifications for trawls, BRDs and TEDs, call the nearest Coastal Law Enforcement office (see page 46).

Diagrams are derived from images provided by the National Marine Fisheries Service.
LARGE MESH EXTENDED FUNNEL BRD

Components

Key Measurements

A. BRD funnel should not be more than 14 inches from the posterior edge of the TED grid.

B. Mesh size of the Large Mesh Escape Section should be between 4 and 5 inches on a side.

C. Clearance between the posterior edge of the large mesh escape section and the funnel, when hanging, should be at least 8 inches.

For additional information on specifications for trawls, BRDs and TEDs, call the nearest Coastal Law Enforcement office (see page 46).

Diagrams are derived from images provided by the National Marine Fisheries Service.
For additional information on specifications for trawls, BRDs and TEDs, call the nearest Coastal Law Enforcement office (see page 46).

Diagrams are derived from images provided by the National Marine Fisheries Service.
CRABS

NOTE: It is UNLAWFUL to place, fish or leave a crab trap component in the coastal waters of this state from Feb. 17–26, 2017.

• There are no public salt waters, seasons or times closed to the taking and retaining of crabs and ghost shrimp, EXCEPT as provided in this guide.
• It is lawful to take, attempt to take or possess crabs and ghost shrimp by means, in numbers, and of sizes ONLY as described below.

BAG, POSSESSION AND LENGTH LIMITS

Blue crab
• Daily Bag: No limit
• Possession: No limit
  • Except that not more than 5% by number, of undersized blue crabs may be possessed for bait purposes only and must be placed in a separate container.
  • May not possess egg-bearing (sponge) crabs.
  • May not possess a female crab that has its abdominal apron detached.
• Minimum Length: five inches
  • Measured across the widest point of the body from tip of spine to tip of spine (see page 25).

Stone crab (right claw only)
• Daily Bag: No limit
• Possession: No limit
  • Only the right claw may be retained or possessed.
  • The body of the stone crab must be returned immediately to the water from which it was taken.
• Minimum Length: 2-1/2 inches claw measurement
  • Measured from the tip of the immovable claw to the first joint behind the claw (see page 25).

DEVICES AND RESTRICTIONS

Crab Line: A baited line with no hook attached.
• Must be marked with a white floating buoy not less than 6 inches in height, 6 inches in length and 6 inches in width.
• Buoy or floats may not be made of plastic bottle(s) of any color or size.

Crab Traps:
• May only remove crab traps from the water or remove crabs from crab traps during the period from 30 minutes before sunrise to 30 minutes after sunset.
• Maximum Number of Traps Allowed:
  • Only 200 crab traps at a time may be used while fishing under the authority of a commercial crab fisherman’s license.
  • Only 20 crab traps at a time may be used while fishing under the authority of a commercial finfish fisherman’s license.
• Tag Requirements: Must be used with a valid GEAR TAG (See Page 5) attached within 6 inches of the buoy.
• Construction and Design Restrictions (See Page 43):
  • Crab traps may not exceed 18 cubic feet.
  • Crab traps must be equipped with at least two escape vents in each crab-retaining chamber and located on the outside trap walls.
    • Escape vents must be at least 2-3/8 inch in diameter.
  • Crab traps must be marked with an attached white floating buoy not less than 6 inches in height, 6 inches in length and 6 inches width.
  • Crab traps fished under the authority of a commercial crab fisherman’s license must have buoys marked with a commercial crab fisherman’s license plate number in letters of a contrasting color at least 2 inches high.
  • Crab traps fished under the authority of a commercial finfish fisherman’s license must have buoys marked with a commercial finfish fisherman’s license plate number preceded with the letter “F” in letters of a contrasting color at least 2 inches high.
  • Crab traps must be equipped with a degradable panel. A trap is considered to have a degradable panel if one of the following methods is used in construction of the trap:
    • the trap lid tie-down strap is secured to the trap at one end by a simple...
loop of untreated jute twine (comparable to Lehigh brand #530), sisal twine (comparable to Lehigh brand #390) or untreated steel wire with a diameter of 20 gauge or smaller. The trap lid must be secured so that when the twine or wire degrades, the lid will no longer be securely closed; or
• the trap contains at least one sidewall, not including the bottom panel, with a rectangular opening no smaller in either dimension than 3 inches by 6 inches. Any obstruction placed in this opening may not be secured in any manner EXCEPT it may be laced, sewn, or otherwise obstructed by a single length of untreated jute twine (comparable to Lehigh brand #530), sisal twine (comparable to Lehigh brand #390) or untreated steel wire with a diameter of 20 gauge or smaller knotted only at each end and not tied or looped more than once around a single mesh bar. When the twine or wire degrades, the opening in the sidewall of the trap will no longer be obstructed; or
• the obstruction may be loosely hinged at the bottom of the opening by no more than two untreated steel hog rings and secured at the top of the obstruction in no more than one place by a single length of untreated jute twine (comparable to Lehigh brand #530), sisal twine (comparable to Lehigh brand #390) or untreated steel wire with a diameter of 20 gauge or smaller. When the twine or wire degrades, the obstruction will hinge downward and the opening in the sidewall of the trap will no longer be obstructed.

• Placement and Location Restrictions:
• May not place a crab trap or portion thereof closer than 100 feet from any other crab trap, EXCEPT when traps are secured to a pier or dock.
• May not fish a crab trap in public fresh waters.
• May not fish a crab trap within 200 feet of a marked navigable channel in Aransas County; and in the water area of Aransas Bay within one-half mile of a line from Hail Point on the Lamar Peninsula, then direct to the eastern end of Goose Island, then along the southern shore of Goose Island, then along the eastern shoreline of the Live Oak Peninsula past the town of Fulton, past Nine Mile Point, past the town of Rockport to a point at the east end of Talley Island including that part of Copano Bay within 1,000 feet of the causeway between Lamar Peninsula and Live Oak Peninsula.
• May not possess, use or place more than three crab traps in waters north and west of Highway 146 where it crosses the Houston Ship Channel in Harris County.
• May not use or place more than three crab traps in public waters of the San Bernard River north of a line marked by the boat access channel at Bernard Acres.

• Baiting Crab Traps: It is UNLAWFUL to use any part of a game fish for bait, except for processed catfish heads used as crab-trap bait by a licensed crab fisherman, provided the catfish is obtained from an aquaculture facility permitted to operate in the United States. A person who uses catfish as bait under this subparagraph shall, upon the request of a department employee acting within the scope of official duties, furnish appropriate authenticating documentation, such as a bill of sale or receipt, to prove that the catfish was obtained from a legal source.

Other Devices:
• Devices legally used for taking of fresh or saltwater fish or shrimp may be used to take crab if operated in places and at times authorized by a proclamation of the Texas Parks and Wildlife Commission or the Texas Parks and Wildlife Department Code.
• See applicable pages in this guide to determine authorized uses, places and times for other legal devices.

ARANSAS NATIONAL WILDLIFE REFUGE – SPECIAL REGULATIONS

Beginning March 1, 2009 the Aransas National Wildlife Refuge began enforcing a no commercial crabbing regulation within refuge marshes. For more information contact the Aransas National Wildlife Refuge at (361) 286-3559.
ESCAPE RINGS
A crab trap must be equipped with at least two escape vents in each crab-retaining chamber and located on the outside trap walls (saltwater perch traps are not required to be equipped with escape rings). Escape vents must be at least 2-3/8 inches in diameter.

DEGRADABLE PANELS
A crab trap and a saltwater perch trap must be equipped with a degradable panel. A trap is considered to have a degradable panel if one of the following methods is used in construction of the trap:

<table>
<thead>
<tr>
<th>Option 1</th>
<th>The lid tie-down strap is hooked into a LOOP of approved material.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Option 2</td>
<td>The lid tie-down strap is hooked into a BRIDLE of approved material.</td>

</tbody>
</table>
OYSTERS

NOTICES –
1. As authorized by Section 3 of SB 932, the executive director of the department may close an oyster area upon finding that the area is being overworked or damaged, or if the area needs to be reseeded or restocked. Information on closures will be available at all TPWD offices.
2. A Harvester/Shell Recovery Tag must be affixed to the outside of each sack of oysters at the time of harvest, in the location of harvest, contain information required by the Department of State Health Services under the National Shellfish Sanitation Program, and remain affixed during transportation of the oysters to a dealer.
3. The appropriate Harvester/Shell Recovery Tag (green or white) must be affixed to the sack regardless of the season or whether the requirements of 25 TAC §241.57 (relating to Molluscan Shellfish Harvesting and Handling) apply.

Commercial Oystering Seasons—Nov. 1 through Apr. 30 except in all private leases with permits from the Texas Parks and Wildlife Department where there is no closed season. During open season, oysters may be taken only from sunrise to 3:30 p.m.

Commercial Oyster Limits—No oyster boat may take more than 50 sacks of oysters per boat per day, and may possess no more than six sacks (equivalent of two barrels) of unculled oysters which must be unsacked and separate from the rest of the cargo. A sack is defined as 110 pounds of oysters (including dead oyster shell and the sack).

Legal Size Limits—Three (3) inches (greatest length of shell) or larger. Oysters 3/4 inch to 3 inches and dead oyster shell greater than 3/4 inch (measured along any axis) are to be culled and returned to the reef from which taken; provided, however, that each cargo may contain not more than 15 percent of oysters and/or dead shell of these sizes. Not more than the equivalent six sacks of unculled oysters are permitted on board while on a reef and must remain unsacked and separate from the culled cargo.

Legal Means and Methods—It is UNLAWFUL while taking or attempting to take oysters for pay or the purpose of sale, barter or exchange or any other commercial purpose to use more than one dredge, use a dredge which exceeds 48 inches in width and a two-barrel capacity, have more than one dredge connected in any manner to a winch, chain or other lifting device during the open public season; or have any additional dredge(s) on board unless secured below deck, to the wheelhouse or to the deck in such a manner as to be lashed, tied, shackled or chained as to prevent its immediate use. Commercial oyster boats are limited to not more than 50 sacks of legal size oysters.

Special Provisions—Oysters may be taken only from waters approved by the State Commissioner of the Department of State Health Services.

New Laws: The penalty for a commercial oyster boat taking oysters in a closed area has increased to a Parks and Wildlife Class “A” Misdemeanor (See Page 45 – CRIMINAL PENALTIES AND CIVIL VALUE RECOVERY) and everyone on the vessel will be in violation.

The harvesting, shucking, processing and sale of oysters must conform to all regulations specified by the Texas Department of State Health Services.

MUSSELS AND CLAMS

A moratorium on the sale of new licenses is in effect for the Texas commercial freshwater mussel fishery.
SEA TURTLES AND OTHER AQUATIC LIFE

It is UNLAWFUL for any person to knowingly take, kill or disturb any sea turtle or sea turtle eggs in the State of Texas. To report stranded sea turtles or nests, please call 1-866-TURTLES.

There is no open season in any county for ALL MARINE MAMMALS INCLUDING PORPOISES, DOLPHINS AND WHALES.

Any other aquatic life (except threatened and endangered species) not addressed in this guide may be taken only by hand or with the devices defined as lawful for taking fish, shrimp, oysters or crabs in places and at times as provided in this guide.

CRIMINAL PENALTIES AND CIVIL VALUE RECOVERY

If you violate fish and wildlife laws, in addition to civil restitution you may:
• be fined (Class C – $25–$500; Class B – $200–$2,000; Class A – $500–$4,000; State Jail Felony, $1,500–$10,000);
• be jailed (Class B and higher offenses);
• face automatic suspension or revocation of licenses for up to five years;
• forfeit hunting gear, including firearms, used to commit a violation.

CIVIL RESTITUTION: In addition to the criminal penalty for hunting and fishing violations, the department will seek the civil recovery value for the loss or damage to wildlife resources. The civil restitution cost is payable to Texas Parks and Wildlife Department and is in addition to the fine assessed by the court. Failure to pay the civil recovery value will result in the department’s refusal to issue a license, tag, or permit. An individual who hunts or fishes after the refusal commits a Class A misdemeanor which is punishable by a fine not less than $500 or more than $4,000; punishment in jail not to exceed one year; or both fine and confinement.

LICENSE REINSTATEMENT: A person who seeks reinstatement of license privileges following license revocation or denial must apply for license privilege reinstatement and pay a $100 application fee. For questions concerning civil restitution call (512) 389-4630.

IMPORTANT NOTE: Texas is now a member of the Interstate Wildlife Violator Compact (IWVC). The IWVC is a multi-state compact that allows member states to share information about wildlife violators and to deny licensure to persons who have failed to comply with conservation law in member states. For example, if a person has had their hunting, fishing or trapping privileges suspended in one member state, the suspension may be recognized by any member state. For more information call (512) 389-4381.

Hunting and fishing regulations, as well as state-mandated hunter education and safety information, are also available online in Spanish. Visit www.tpwd.texas.gov/espanol, or with specific questions call (800) 792-1112.

En español, el sumario del reglamento para cacería y pesca, así como la información sobre el requisito de certificación de educación y seguridad en la caza, se encuentran disponibles en línea visitando: www.tpwd.texas.gov/espanol o con preguntas específicas llamando a (800) 792-1112.

WHERE TO GET INFORMATION AND LICENSES:
Recreational hunting and fishing licenses and endorsements are available at approximately 1,800 locations throughout the state in addition to the offices listed below. These locations include sporting goods stores, gun shops, department stores, discount stores, bait and tackle shops, grocery stores, and many other types of stores. Some commercial hunting and fishing licenses are available ONLY at the Austin headquarters and offices listed below. For added convenience, select recreational licenses may be purchased by phone or through the Internet with approved Visa, Discover, or MasterCard. A $5.00 administrative fee will be charged for those sales. Call (800) TX LIC 4 U (1-800-895-4248) between 8 a.m.–5 p.m. Monday through Friday (closed Saturday, Sunday and most holidays), or log on to www.tpwd.texas.gov/licenses/online_sales. Many licenses may be purchased for immediate use except where tagging is required, i.e., deer and turkey.

TPWD receives funds from the USFWS. TPWD prohibits discrimination on the basis of race, color, religion, national origin, disability, age, and gender, pursuant to state and federal law. To request an accommodation or obtain information in an alternative format, please contact TPWD on a Text Telephone (TDD) at (512) 389-8951 or by Relay Texas at T-1-1 or (800) 735-2989. If you believe you have been discriminated against by TPWD, please contact TPWD or the U.S. Fish and Wildlife Service, Office for Diversity and Workforce Management, 5275 Leesburg Pike, Falls Church, VA 22041.
SUMMARY OF 2016-2017 RECREATIONAL FISHING REGULATIONS

General Fishing Rules for Fresh and Salt Waters

For purposes of this guide, salt waters and coastal waters mean the same thing.

It is a violation to:
• Take, kill, or disturb sea turtles. If you land a sea turtle, immediately call (866) 887-8535 for information on how to handle the turtle.
• Take, kill, or disturb any endangered or threatened species (paddlefish, shovel-nosed sturgeon, smalltooth sawfish, and others);
• Take or kill diamondback terrapin, sawfish of any species, porpoises, dolphins (mammals), or whales;
• Place any game fish into public waters, other than the body of water where the fish was caught, without a valid permit issued by TPWD. This includes fish caught by pole and line. For permit information, please call TPWD at (800) 792-1112 (menu 4) or (512) 389-4444.
• Use any vessel to harry, herd or drive fish including, but not limited to, operating any vessel in a repeated circular course, for the purpose of or resulting in the concentration of fish for the purpose of taking or attempting to take fish.
• Uproot or dig out any rooted seagrass plant from a bay bottom or other saltwater bottom in this state by means of a propeller. Additional information regarding seagrass regulations: www.tpwd.texas.gov/seagrass

Rules on Possession and Transport of Exotic Aquatic Species

It is a violation to:
• Possess or transport any exotic aquatic plant or animal listed as harmful or potentially harmful. This includes: plants such as hydrilla, water hyacinth, and giant salvinia; fishes such as tilapia and Asian carps (grass, silver, and bighead carp); and zebra mussels.
• Possess any tilapia, grass carp, or any other fish listed as harmful or potentially harmful without immediately removing the intestines, except on those waters where a valid Triploid Grass Carp Permit is in effect. In those waters, it is illegal to possess grass carp, and any grass carp caught must be immediately returned to the water unharmed. For a list of waters with a Triploid Grass Carp Permit, see www.tpwd.texas.gov/gcpermits.
• Fail to immediately remove and lawfully dispose of any harmful or potentially harmful aquatic plant that is clinging or attached to a vessel, watercraft, trailer, motor vehicle, or other device used to transport or launch a vessel or watercraft can result in a fine of $25-$500.

Rules Requiring Draining of Water from Vessels Used on Public Fresh Waters

Persons leaving or approaching public fresh water are required to drain all water from their vessels and on-board receptacles (includes live wells, bilges, motors and any other receptacles or water-intake systems coming into contact with public waters). This rule applies at all sites where boats can be launched and includes all types and sizes of boats whether powered or not, personal watercraft, sailboats, kayaks/canoes, or any other vessel used to travel on public waters.

• Live fish, including personally caught live bait, cannot be transported from the water body where the fish were caught in or aboard a vessel in water from the water body where the fish were caught. Personally caught live bait can be used in the water body where it was caught.
• Transport and use of commercially purchased live bait in water while fishing from a vessel is allowed, provided persons in possession of the bait have a receipt that identifies the source of the bait. Any live bait purchased from a location on or adjacent to a public water body that is transported in water from that water body can only be used as bait on that same water body.
• A vessel leaving a public freshwater body may be transported on a public roadway without water being drained, provided the vessel is transported via the most direct route to another access point located on the same water body during that same day.
• Persons participating in a fishing tournament confined to one water body are allowed to transport live fish in water from that single water body to an identified off-site weigh-in location, provided all water is drained and properly disposed of before leaving that location. Participants must possess documentation provided by tournament organizers that identify them as participants in a tournament.
• Marine sanitary systems are not covered by these regulations.

Following these procedures does not exempt persons from complying with prohibitions against transporting exotic aquatic species that are visible to the unaided eye, such as adult zebra mussels, which may be attached to boats or trailers.

FISHING REGULATIONS

AN ETHICAL ANGLER…

• Takes only what they can use, and uses what they take.
• Always recycles or properly disposes of monofilament line to protect the environment and aquatic or wildlife resources.
• Leaves no litter and doesn’t pollute our waters.
• Records their trophy with care, and returns it to the water.
FISHING REGULATIONS

Fishing Restrictions for Spawning Alligator Gar
When conditions such as water temperature and flooding events would be conducive for spawning of alligator gar, the TPWD Executive Director may temporarily prohibit taking or attempting to take alligator gar in a specified area for a period not to exceed 30 days. Conditions that would be used to invoke this action include water temperatures between 68 to 82°F and occurrence of moderate flood levels as defined and reported by U.S. Geological Survey gauges (see www.srh.noaa.gov/wgrfc). Notice of this action will be posted on the TPWD website, distributed to print and broadcast media, and shared through social media. The notice will specify the area to be closed and when lawful fishing for alligator gar may resume. For current closure notices, visit tpwd.texas.gov/gar-closure

Fishing in Texas State Parks
A fishing license and endorsement are not required if fishing on State Park property or in waters completely enclosed by a State Park.

On man-made structures (docks, piers, jetties, etc.) within state parks, fishing is by pole-and-line only, with each person limited to two poles. All other fishing regulations, such as length and bag limits, remain in effect.

Anchoring Boats and Vessels

It is a violation to:
- Leave unattended for any period of time or anchor a barge, boat, or fishing platform in the Trinity River below Livingston Dam in an area 1,000 feet from the dam to a point 1,500 feet downstream from the dam:
  - for more than 10 hours in a 24-hour period without moving 100 feet or more during that time, or
  - for five or more consecutive days, whether or not it has been moved;
- Anchor or moor a vessel, barge, or structure for a period exceeding two consecutive days within the area in Cedar Bayou between a department sign erected where Mesquite Bay flows into Cedar Bayou and the department sign erected near the point where the pass empties into the Gulf of Mexico.

Tagging Fish – It is unlawful to release into the public waters of this state a fish with a device or substance implanted or attached that is designed, constructed, or adapted to produce an audible, visual, or electronic signal used to monitor, track, follow, or in any manner aid in the location of the released fish. It is legal to place an identification tag on the exterior of a fish and release this fish back into public waters. Caution is advised as use of these tags can damage fish.

Waste of Fish – It is unlawful to leave edible fish or bait fish taken from the public waters of the state to die without the intent to retain the fish for consumption or bait.

Possession of Fish taken from Public Water
- Any fish caught must be taken by legal means and methods. Fish caught and immediately released are not considered to be in your possession. Any fish not immediately released that are retained by using any type of holding device such as stringer, cooler, livewell, or bucket are considered in your possession and must adhere to established protected length and bag limits. While fishing, it is illegal to be in possession of more fish than the daily bag limit or fish that are within a protected length limit.
- In order to verify length and species, a fish caught may not have the head or tail removed and may not be filleted until an angler finally lands the catch on the mainland, a peninsula, or barrier island not including jetties or piers and does not transport the catch by boat. For broadbill swordfish and king mackerel, the head OR tail may be removed but the remainder of the carcass must remain intact and may not be filleted. For sharks, ONLY the head may be removed. The remainder of the carcass (including the tail) must remain intact and may not be filleted.
- Any fish taken from public water and landed by boat or person in Texas must adhere to the protected length limits and daily bag and possession limits established for those fish in Texas regardless of the state or country in which they were caught.
- The bag limit for a guided fishing party is equal to the total number of persons in the boat licensed to fish or otherwise exempt from holding a license minus each fishing guide and fishing guide deckhand multiplied by the bag limit for each species harvested.
- It is unlawful to transport live, nongame fishes taken from the Red River below Lake Texoma downstream to the Arkansas border, Big Cypress Bayou downstream of Ferrell’s Bridge Dam on Lake O’ the Pines (including the Texas waters of Caddo Lake), or the Sulphur River downstream of the Lake Wright Patman dam. Nongame fishes collected from the above waters may be used as live bait on these water bodies only.

Special Area Designations and Restrictions
- It is a violation to move, remove, deface, alter, or destroy any sign, depth marker, or other informational signage placed by the department within, or to delineate boundaries of the Redfish Bay State Scientific Area.
- Rio Grande: Portions of the Rio Grande adjacent to the Black Gap Wildlife Management Area are designated as a “Wild and Scenic River.” Special federal rules apply to fishing, boating, and other uses in these areas. For more information concerning these rules and boundaries, call the Big Bend National Park at (432) 477-2251 (menu 3, option 3).
REGULATIONS SUMMARY

RESERVOIR BOUNDARIES  (For bag, possession and length limits):

- Buchanan Reservoir in Burnet, Lampasas, Llano, and San Saba counties comprises all impounded waters of the Colorado River from Lake Buchanan dam upstream to the U.S. Hwy. 190 bridge.

- Caddo Lake in Marion and Harrison counties comprises all impounded waters of Big Cypress Bayou from the Texas-Louisiana border upstream to the State Hwy. 43 bridge.

- Canyon Reservoir in Comal County comprises all impounded waters of the Guadalupe River from the Canyon dam upstream to the U.S. Hwy. 281 bridge.

- Lake Conroe in Montgomery and Walker counties comprises all impounded waters of the West Fork of the San Jacinto River from the Lake Conroe Dam upstream to FM Road 1791 bridge.

- Cooper Lake (Jim L. Chapman Lake) in Delta and Hopkins counties comprises all waters within the Corps of Engineers lands on Cooper Lake upstream from State Hwy. 19/154 and downstream from FM Road 71.

- Falcon International Reservoir in Starr and Zapata counties comprises all impounded waters of the Rio Grande from the Falcon Dam upstream to the Zapata/Webb county line.

- Lake Georgetown in Williamson County comprises all impounded waters of the North Fork of the San Gabriel River from the Lake Georgetown Dam upstream to U.S. Hwy. 183 bridge.

- Gibbons Creek Reservoir in Grimes County comprises all waters within the Texas Municipal Power Agency property boundaries.

- Inks Lake in Burnet and Llano counties comprises all impounded waters of the Colorado River from the Roy Inks Dam (Inks Lake Dam) upstream to the Lake Buchanan Dam.

- Lake Limestone in Leon, Limestone, and Robertson counties comprises all impounded waters of the Navasota River from the Lake Limestone dam upstream to the Fort Parker State Park Lake Dam.

- Lake Livingston in Leon, Houston, Madison, Polk, San Jacinto, Trinity, and Walker counties comprises all impounded waters of the Trinity River from the Lake Livingston Dam upstream to the lock and dam near State Hwy. 7.

- Lake Lyndon B. Johnson in Burnet and Llano counties comprises all impounded waters of the Colorado River from the Alvin Wirtz Dam (Lake Lyndon B. Johnson Dam) upstream to the Roy Inks Dam (Inks Lake Dam) including the Llano River upstream to the State Hwy. 16 bridge and Sandy Creek upstream to the State Hwy. 71 bridge.

- Lake Marble Falls in Burnet County comprises all impounded waters of the Colorado River from the Max Starcke Dam (Lake Marble Falls Dam) upstream to the Alvin Wirtz Dam (Lake Lyndon B. Johnson Dam).

- Lake Murvaul in Panola County comprises all impounded waters of Murvaul Creek Bayou upstream from the Lake Murvaul Dam and Murvaul Creek Bayou downstream from the dam to FM Road 1970 bridge.

- Lake O’ The Pines in Camp, Marion, Morris, and Upshur counties comprises all impounded waters of Big Cypress Creek from the Ferrell’s Bridge Dam (Lake O’ The Pines Dam) upstream to U.S. Hwy. 259 bridge.

- Lake Palestine in Anderson, Cherokee, Henderson, Smith, and Van Zandt counties comprises all impounded waters of the Neches River from the Blackburn Crossing Dam (Lake Palestine Dam) upstream to FM Road 279 bridge, including Kickapoo and Flat Creeks in Henderson County.

- Lake Pat Mayse in Lamar County comprises all impounded waters of Sanders Creek from Pat Mayse Lake Dam upstream to County Road 35610.

- Purtis Creek State Park Lake in Henderson and Van Zandt counties comprises all waters within the Purtis Creek State Park boundaries.

- Lake Somerville in Burleson, Lee, Milam, and Washington counties comprises all impounded waters of Yegua, East Yegua and Middle Yegua Creeks upstream from the Lake Somerville Dam.

- Toledo Bend Reservoir in Newton, Panola, Sabine, and Shelby counties comprises all impounded waters of the Sabine River from Toledo Bend Dam upstream to the Texas - Louisiana state line in Panola County.

- Lake Travis in Burnet and Travis counties comprises all impounded waters of the Colorado River from the Mansfield Dam (Lake Travis Dam) upstream to the Max Starcke Dam (Lake Mansfield Dam), including the Pedernales River upstream to the Hammetts Crossing-Hamilton Pool Road bridge.
All public waters east and south of the following boundary are considered salt water:

beginning at the International Toll Bridge in Brownsville, northward along U.S. Hwy. 77 to the junction of Paredes Lines Road (FM Road 1847) in Brownsville, thence northward along FM Road 1847 to the junction of FM Road 106 east of Rio Hondo, thence westward along FM Road 106 to the junction of FM Road 508 in Rio Hondo, thence northward along FM Road 508 to the junction of FM Road 1420, thence northward along FM Road 1420 to the junction of State Hwy. 186 east of Raymondville, thence westward along State Hwy. 186 to the junction of U.S. Hwy. 77 near Raymondville, thence northward along U.S. Hwy. 77 to the junction of the Aransas River south of Woodsboro, thence eastward along the south shore of the Aransas River to the Junction of the Aransas River Road at the Bonnie View boat ramp; thence northward along the Aransas River Road to the junction of FM Road 136 to FM Road 2678 to the junction of FM Road 774 in Refugio, thence eastward along FM Road 774 to the junction of State Hwy. 35 south of Tivoli, thence northward along State Hwy. 35 to the junction of State Hwy. 185 between Bloomington and Seadrift, northwestward along State Highway 185 to the junction of F.M. Road 616 in Bloomington, thence northeastward along F.M. Road 616 to the junction of State Highway 35 east of Blessing, thence southward along State Highway 35 to the junction of F.M. Road 521 north of Palacios, thence northeastward along F.M. Road 521 to the junction of State Highway 36 south of Brazoria, thence southward along State Highway 36 to the junction of F.M. Road 2004, thence northward along F.M. Road 2004 to the junction of Interstate Highway 45 between Dickinson and La Marque, thence northwestward along Interstate Highway 45 to the junction of Interstate Highway 610 in Houston, thence east and northward along Interstate Highway 610 to thence the junction of Interstate Hwy. 10 in Houston, thence eastward along Interstate Hwy. 10 to the Louisiana State Line.

The following public waters are not considered salt water: (1) waters of Spindletop Bayou inland from the concrete dam at Russels Landing on Spindletop Bayou in Jefferson County; (2) north of the dam on Lake Anahuac in Chambers County; (3) the waters of Taylor Bayou and Big Hill Bayou inland from the saltwater locks on Taylor Bayou in Jefferson County; (4) Galveston County Reservoir on State Hwy. 146 and Galveston State Park Ponds #1 through #7 in Galveston County; (5) Lakeview City Park Lake, West Guth Park Pond, and Waldron Park Pond in Nueces County; (6) Lake Burke-Crenshaw and Lake Nassau in Harris County; (7) Fort Brown Resaca, Resaca de la Guerra, Resaca de la Palma, Resaca de los Cuates, Resaca de los Fresnos, Resaca Rancho Viejo, and Town Resaca in Cameron County; and (8) Little Chocolate Bayou Park Ponds #1 and #2 in Port Lavaca in Calhoun County.
DEFINITIONS

**Artificial Lure:**
Any lure (including flies) with hook or hooks attached that is man-made and is used as a bait while fishing.

**Bait:**
Something used to lure any wildlife resource. It is unlawful to use game fish or any part thereof as bait.

**Community Fishing Lake:**
All public impoundments 75 acres or smaller located totally within an incorporated city limits or a public park, and all impoundments of any size lying totally within the boundaries of a state park. See pgs. 38-41 for a listing of specific fishing regulations for these waters. For a list of Community Fishing Lakes in your area, call (800) 792-1112 (menu 3) or check the TPWD website at: www.tpwd.texas.gov/fishboat/fish/recreational/lakes

**Daily Bag:**
Quantity of a species of a wildlife resource, such as fish, that may be taken in one day.

**Day:**
A 24-hour period of time that begins at midnight and ends at midnight.

**Fishing:**
Taking or attempting to take aquatic animal life by any means.

**Fishing Guide:**
A person who, for compensation, accompanies, assists, or transports a person or persons engaged in fishing in the water of this state.

**Fishing Guide Deck Hand:**
A person in the employ of a fishing guide who assists in operating a boat for compensation to accompany or to transport a person or persons engaged in fishing in the water of this state.

**Game Fish** (includes hybrids or subspecies of fish on this list):

| Bass: Guadalupe, largemouth, smallmouth, spotted, striped, white, yellow | Pickerel | Spearfish, longbill |
| Catfish: blue, channel, flathead | Red drum | Swordfish, broadbill |
| Cobia | Sailfish | Tarpon |
| Crappie: black, white | Sauger | Tripletail |
| Mackerel: king, Spanish | Seaturt, spotted | Trout: brown, rainbow |
| Marlin: blue, white | Sharks | Wahoo |
| | Snook | Walleye |

**Gear Tag:**
A tag constructed of material as durable as the device to which it is attached. The gear tag must be legible, contain the name and address of the person using the device and the date the device was set out. Date is not required for saltwater trotlines or crab traps fished under a commercial license. For juglines and freshwater trotlines, properly-marked buoys or floats qualify as valid gear tags.

**Nongame Fish:**
All species not listed as game fish except endangered and threatened fish which are defined and regulated under separate rules.

**Possession Limit:**
The maximum number of fish a person may possess before returning to their residence. Possession limit is twice the daily bag on game and nongame fish, except as provided in this guide, and does not apply to fish in the possession of or stored by a person at their residence.

**Residence:**
A permanent structure where a person regularly sleeps and keeps personal belongings such as furniture and clothes, but does not include a temporary abode or dwelling such as a hunting or fishing club, or any club house, cabin, tent, or trailer house or mobile home used as a hunting or fishing camp, or any hotel, motel or rooming house used on a temporary basis.

**Wildlife Resources:**
Any wild animal, wild bird, or aquatic life.
Legal Freshwater and Saltwater Devices and Restrictions for Fish

**ONLY DEVICES AND RESTRICTIONS LISTED MAY BE USED TO TAKE OR ATTEMPT TO TAKE AQUATIC LIFE.**

**GAME FISH** may be taken only by pole and line (which includes rod and reel), except as otherwise provided in this guide.

A person may fish with multiple poles or other devices, except as provided in this guide. In fresh water, it is unlawful to fish with more than 100 hooks on all devices combined.

In fresh water, it is unlawful to take fish with a hand operated device held underwater except that a spear or spear gun may be used to take NONGAME fish.

**CAST NET:** A net that can be hand-thrown over an area.
- Legal only for taking NONGAME fish and other aquatic animal life (including crabs, crayfish, and shrimp).
- May not be greater than 14 feet in diameter.
- In SALT WATER, nongame fish may be taken for bait purposes only.

**DIP NET:** A mesh bag suspended from a frame attached to a handle.
- Legal only for taking NONGAME fish and other aquatic animal life (including crabs, crayfish, and shrimp).
- May be used to aid in the landing of fish caught by other legal devices.
- In SALT WATER, nongame fish may be taken for bait purposes only.

**GAFF:** Any hand-held pole with a hook attached directly to the pole.
- May only be used to aid in the landing of fish caught by other legal devices, means, or methods.
- Fish landed with a gaff MAY NOT be below the minimum, above the maximum, or within a protected length limit.

**GIN:** Any hand-held shaft with single or multiple points, barbed or barbless.
- May be used to take NONGAME fish only.

**HANDFISHING:** Fishing by the use of HANDS ONLY. The use of ANY other fishing device while handfishing (including but not limited to gaff, pole hook, trap, spear or stick) is UNLAWFUL.
- No person may intentionally place a trap (including such devices as boxes, barrels or pipes) in public fresh water for the purpose of taking catfish by handfishing.
- May be used to take channel, blue, and flathead catfish in fresh water only.

**JUGLINE:** For use in FRESH WATER only. A fishing line with five or less hooks tied to a free-floating device.
- May be used to take NONGAME fish, channel catfish, blue catfish, and flathead catfish only.
- **Placement and Location Restrictions:** Juglines may not be used in
  - Community Fishing Lakes (see pg. 32 for definition)
  - Reservoirs or sections of rivers lying totally within the boundaries of a state park
  - Bellwood Lake in Smith County
  - Boerne City Lake in Kendall County
  - Canyon Lake Project #6 in Lubbock County
  - Dixie Land Reservoir in Cameron County
  - Gibbons Creek Reservoir in Grimes County
  - Lake Bastrop in Bastrop County
  - Lake Bryan in Brazos County
  - Lakes Coffee Mill and Davy Crockett in Fannin County
  - Lake Pflugerville in Travis County
  - Lake Naconiche in Nacogdoches County
  - North Concho River from O.C. Fisher dam to the Bell Street dam
  - South Concho River from Lone Wolf dam to Bell Street dam
  - Tankersley Reservoir in Titus County
  - Wheeler Branch Reservoir in Somervell County

- **Tagging and Marking Requirements:**
  - Must be used with a valid GEAR TAG (see pg. 32) attached within 6 inches of the free-floating device; gear tag is valid for 10 days after the date set out and must include the number of the permit to sell nongame fish taken from fresh water, if applicable. Properly-marked buoys or floats qualify as valid gear tags.
  - For non-commercial purposes, a jugline must be marked with a free-floating device of any color other than orange.
  - For commercial purposes, a jugline must be marked with an orange, free-floating device.

**LAWFUL ARCHERY EQUIPMENT:** Includes longbow, recurved bow, compound bow, and crossbow.
- May be used to take NONGAME fish only.
- Any fish that is edible or can be used for bait (includes all gar species, common carp, and buffalo) may not be released back into the water after being taken with lawful archery equipment. See also “Waste of Fish” on pg. 29.
- State regulations permit bow fishing in most public waters (see Exceptions to Statewide Freshwater Harvest Regulations, pgs. 37-41, and Restricted Areas in Counties, pg. 74). Additionally, bow fishers are advised to check with local authorities that may have ordinances restricting use of archery equipment.
- A person bow fishing on a navigable stream in Dimmit, Edwards, Frio, Kenedy, Llano, Maverick, Real, Uvalde, or Zavala counties may not possess an arrow equipped with fletching of any kind, an unbarbed arrow, or a bow that is not equipped with a reel and line.
MINNOW TRAP:
• Legal only for taking NONGAME fish and other aquatic animal life (including crayfish and shrimp).
• Trap may not exceed 24 inches in length. The throat may not exceed 1 inch by 3 inches.
• GEAR TAG (see pg. 32) valid for only 10 days must be visibly attached.

PERCH TRAPS: For use in SALT WATER only.
• Legal only for taking NONGAME fish and other aquatic animal life (including crayfish and shrimp).
• May not exceed 18 cubic feet.
• Must be marked with a floating visible orange buoy not less than 6 inches in height and 6 inches in width. The buoy must have a GEAR TAG (see pg. 32) valid only for 10 days attached.
• Must be equipped with a degradable panel as described for crab traps (see pg. 50).
• Buoys or floats may not be made of plastic bottle(s) of any color or size.
• It is unlawful to place any type of trap within the area in Cedar Bayou between a department sign erected where Mesquite Bay flows into Cedar Bayou and the department sign erected near the point where the pass empties into the Gulf of Mexico.

POLE AND LINE (which includes rod and reel): A line with hook, attached to a pole.
• May be used to take GAME AND NONGAME fish.
• It is unlawful to use a pole and line to take or attempt to take fish by foul-hooking, snagging, or jerking. A fish is foul-hooked when caught by a hook in an area other than the fish’s mouth.
• Game and nongame fish may be taken by pole and line, except that in the Guadalupe River in Comal County starting 800 yards downstream from the Canyon Dam release and extending downstream to the second bridge crossing on River Road, rainbow and brown trout may not be retained when taken by any method except artificial lures. In this area only, artificial lures cannot contain or have attached either whole or portions, living or dead, of organisms such as fish, crayfish, insects (grubs, larvae or adults) or worms, any other animal or vegetable material, or synthetic scented materials. This does not prohibit the use of artificial lures that contain components of hair or feathers. It is an offense to possess rainbow and brown trout while fishing with any other device in that part of the Guadalupe River defined in this paragraph.
• Pole and line is the only lawful method for taking game fish and nongame fish from Community Fishing Lakes (see definition, pg. 32); includes impoundments lying totally within the boundaries of a state park), sections of rivers lying totally within boundaries of a state park, the North Concho River from O.C. Fisher dam to the Bell Street dam, the South Concho River from Lone Wolf dam to Bell Street dam, Wheeler Branch Reservoir, Lake Pflugerville, and Canyon Lake Project #6.

SAIL LINE: For use in SALT WATER only. A type of trotline with one end of the main line fixed on the shore, the other end of the main line attached to a wind-powered floating device or sail.
• Nongame fish, red drum, spotted seatrout, and sharks may be taken with a sail line.
• No more than one sail line may be used per fisherman.
• The sail line must be attended at all times the line is fishing.
• Sail lines may not be used by the holder of a commercial fishing license.
• Sail lines may be used seven days a week.
• Tag Requirements: Must have a valid SALTWATER TROTLINE TAG for each 300 feet of mainline or fraction thereof being fished.
• Construction and Design Restrictions:
  • Sail line may not exceed 1,800 feet from reel to sail.
  • Sail and the most shoreward float must be bright orange or red color. All other floats must be yellow. No float may be more than 200 feet from the sail.
  • A weight of 1 ounce or more must be attached to the line not less than 4 feet or more than 6 feet shoreward of the most shoreward float.
  • Reflectors of not less than 2 square inches shall be attached to the sail and floats. They must be easily seen from all directions. This applies for sail lines operated from 30 minutes after sunset to 30 minutes before sunrise.
  • May have no more than 30 hooks.
  • There is no hook spacing requirement.
  • No hook may be placed more than 200 feet from the sail.
  • May be baited with either natural or artificial bait.
• Placement and Location Restrictions:
  Must meet placement and location requirements for saltwater trotlines (see pg. 36).

SEINE: (includes a push net.) A section of non-metallic mesh webbing, with the top edge buoyed upwards by a floatline and the bottom edge weighted.
• Legal only for taking NONGAME fish and other aquatic animal life (including crabs, crayfish, and shrimp).
• May not be longer than 20 feet.
• May not have mesh exceeding 1/2-inch square.
• Must be manually operated.
• In SALT WATER, nongame fish may be taken by seine for bait purposes only.
SHAD TRAWL: For use in FRESH WATER only. A bag-shaped net which is dragged along the bottom or through the water to catch aquatic life.
- Legal only for taking NONGAME fish and other aquatic animal life (including crayfish and shrimp).
- May not be longer than 6 feet or with a mouth larger than 36 inches in diameter.
- May be equipped with a funnel or throat and must be towed by boat or hand.

SPEAR: Any shaft with single or multiple points, barbed or barbless, which may be propelled by any means, but does not include arrows. May be used to take NONGAME fish only.

SPEAR GUN: Any hand operated device designed and used for propelling a spear, but does not include the crossbow. May be used to take NONGAME fish only, not a legal means to take fish in a community fishing lake.

THROWLINE: For use in FRESH WATER only. A fishing line with five or less hooks and with one end attached to a permanent fixture. Components of a throwline may also include swivels, snaps, rubber, and rigid support structures.
- May be used to take NONGAME fish, channel catfish, blue catfish, and flathead catfish only.
- Must be used with a valid gear tag attached. Gear tag is valid for 10 days after the date set out.
- **Placement and Location Restrictions:** Throwlines may not be used in:
  - Community Fishing Lakes (see pg. 32 for definition)
  - Reservoirs or sections of rivers lying totally within the boundaries of a state park
  - Bellwood Lake in Smith County
  - Boerne City Lake in Kendall County
  - Canyon Lake Project #6 in Lubbock County
  - Dixieland Reservoir in Cameron County
  - Gibbons Creek Reservoir in Grimes County
  - Lake Bastrop in Bastrop County
  - Lake Bryan in Brazos County
  - Lakes Coffee Mill and Davy Crockett in Fannin County
  - Lake Naconiche in Nacogdoches County
  - Lake Pflugerville in Travis County
  - North Concho River from O.C. Fisher dam to the Bell Street dam
  - South Concho River from Lone Wolf dam to Bell Street dam
  - Tankersley Reservoir in Titus County
  - Wheeler Branch Reservoir in Somervell County

TRAWL (INDIVIDUAL BAIT-SHRIMP TRAWL): For use in SALT WATER only. A bag-shaped net which is dragged along the bottom or through the water to catch aquatic life. Restricted to hand-operated trawls only; use of mechanical devices is UNLAWFUL.
- See pg. 46 under Shrimp Regulations for trawl design restrictions.
- Nongame fish (EXCEPT those species regulated by bag or size limits) taken incidental to legal shrimping operations may be retained.
- “Legal shrimping operations” means the use of a legal trawl in places, at times, and in manners as authorized by TPWD (see section on Shrimp for details).
- 200 nongame fish taken with an individual bait-shrimp trawl may be retained per person for BAIT PURPOSES ONLY.

TROTLINE: A non-metallic main fishing line with more than five hooks attached and with each end attached to a fixture.
- Nongame fish, channel catfish, blue catfish, and flathead catfish may be taken by trotline.
- Red drum, spotted seatrout, and sharks caught on a trotline may not be retained or possessed.
- **General Construction and Design Restrictions:** Trotlines may not be used with:
  - a mainline length exceeding 600 feet;
  - hooks spaced less than 3 horizontal feet apart;
  - metallic stakes;
  - or the main fishing line and attached hooks and stagings placed above the water’s surface.

TROTLINE IN FRESH WATER
- **Tag Requirements:** Must be used with a valid GEAR TAG (see pg. 32). Properly-marked buoys or floats qualify as valid gear tags. Gear tags must be attached within 3 feet of the first hook at each end of the trotline and are valid for 10 days after the date set out.
- **Construction and Location Restrictions:** May not have more than 50 hooks on any one trotline.
- **Placement and Location Restrictions:** Trotlines may not be used in:
  - Community Fishing Lakes (see pg. 32 for definition)
  - Reservoirs or sections of rivers lying totally within the boundaries of a state park
  - Bellwood Lake in Smith County
  - Boerne City Lake in Kendall County
  - Canyon Lake Project #6 in Lubbock County
  - Dixieland Reservoir in Cameron County
  - Fayette County Reservoir in Fayette County
FISHING REGULATIONS

- Gibsons Creek Reservoir in Grimes County
- Lake Bastrop in Bastrop County
- Lake Bryan in Brazos County
- Lakes Coffee Mill and Davy Crockett in Fannin County
- Lake Naconiche in Nacogdoches County
- Lake Pflugerville in Travis County
- North Concho River from O.C. Fisher dam to the Bell Street dam
- Pinkston Reservoir in Shelby County
- South Concho River from Lone Wolf dam to Bell Street dam
- Tankersly Reservoir in Titus County
- Wheeler Branch Reservoir in Somervell County

TROTLINES IN SALT WATER - No more than one trotline may be used per fisherman.

- Tag Requirements:
  - Must have a valid SALTWATER TROTLINE TAG attached to each 300 feet of mainline or fraction thereof. (Must be purchased at TPWD Law Enforcement offices, see pg. 18.)
  - Must be used with a valid GEAR TAG (see pg. 32) attached within 3 feet of the first hook at each end of the trotline. Tag does not need to be dated.

- Construction and Design Restrictions:
  - Must be marked with a yellow floating buoy not less than 6 inches in height, 6 inches in length, and 6 inches in width, bearing a two-inch wide stripe of contrasting color, attached to end fixtures.
  - Buoys or floats may not be made of plastic bottle(s) of any color or size.
  - May not be baited with other than natural bait. Natural bait is a whole or cut-up portion of a fish or shellfish or a whole or cut-up portion of plant material in its natural state, provided that none of these may be altered beyond cutting into portions.
  - May not be used with hooks other than circle-type hook with point curved in and having a gap (distance from point to shank) of no more than one-half inch, and with the diameter of the circle not less than five-eighths inch (comparable to Mustad 11/0 circle hook Model #39960ST).

- Placement and Location Restrictions:
  - May not be used in or on the waters of the Gulf of Mexico within the jurisdiction of this state.
  - May not be placed closer than 50 feet from any other trotline, or set within 200 feet of the edge of the intracoastal Waterway or its tributary channels.
  - May not be used in Aransas County in Little Bay and the water area of Aransas Bay within one-half mile of a line from Hail Point on the Lamar Peninsula, then direct to the eastern end of Goose Island, then along the southern shore of Goose Island, then along the causeway between Lamar Peninsula and Live Oak Peninsula, then along the eastern shoreline of the Live Oak Peninsula past the town of Fulton, past Nine-Mile Point, past the town of Rockport to a point at the east end of Talley Island, including that part of Copano Bay within 1,000 feet of the causeway between Lamar Peninsula and Live Oak Peninsula.
  - No trotline or trotline components (EXCEPT Sail Lines), including lines and hooks, but excluding poles, may be left in or on coastal waters between the hours of 1 p.m. on Friday through 1 p.m. on Sunday of each week, except that attended sail lines are excluded from the restrictions imposed by this clause. In the event small craft advisories or higher marine weather advisories issued by the National Weather Service are in place at 8 a.m. on Friday, trotlines may remain in the water until 6 p.m. on Friday. If small craft advisories are in place at 1 p.m. on Friday, trotlines may remain in the water until Saturday. When small craft advisories are lifted by 8 a.m. on Saturday, trotlines must be removed by 6 p.m. on Saturday. When small craft advisories or higher marine weather advisories are still in place at 1 p.m. on Saturday, trotlines may remain in the water through 1 p.m. on Sunday. It is a violation to tend, bait, or harvest fish or any other aquatic life from trotlines during the period that trotline removal requirements are suspended under this provision for adverse weather conditions. For purposes of enforcement, the geographic area customarily covered by marine weather advisories will be delineated by department policy.

UMBRELLA NET: A non-metallic mesh net that is suspended horizontally in the water by multiple lines attached to a rigid frame.

- Legal only for taking NONGAME fish and other aquatic animal life (including crabs, crayfish, and shrimp).
- May not have within the frame an area that exceeds 16 square feet.

Freshwater Fishing Harvest Regulations

- Statewide regulations apply for all public fresh waters except for those locations noted in the Exceptions to Statewide Freshwater Harvest Regulations on pgs. 37-41.
- A person taking or attempting to take game and nongame fish from fresh water for non-commercial purposes is required to have a valid fishing license and a freshwater fishing endorsement.
- The only exceptions to the statewide possession limits, which are twice the daily bag limits, are for striped bass from Lake Texoma and alligator gar from Falcon International Reservoir (see pg. 38-39). Please note that on Caddo Reservoir, Kirby Reservoir, Lake Livingston, Palestine Reservoir, the Sabine River below Toledo Bend Reservoir and Toledo Bend Reservoir where some daily bag limits are larger than the statewide daily bag, the possession limits remain twice the statewide daily bag limits listed on pg. 37.
- For saltwater finfish species caught in the public fresh waters of this state, statewide bag, possession, and length limits as listed on pgs. 44-45 apply.
- Some reservoirs have special regulations for red drum. See Exceptions to Statewide Freshwater Harvest Regulations.
**Statewide Bag and Length Limits** (see below and pgs. 38-41 for exceptions)

Daily bag and possession limit defined on pg. 32.

</table>

For fishes not listed above, there are NO statewide bag or length limits. There are special requirements associated with the harvest of harmful or potentially harmful exotic fishes (tilapia, grass carp); see pg. 28.

*See listing for “Southeast Texas” for largemouth bass limit on pg. 39. *See alligator gar fishing restrictions on pg. 29. *See notes on “Lawful Archery Equipment” on pg. 33.

**Exceptions to Statewide Freshwater Harvest Regulations**

**Bait Fish Exceptions**

In Brewster, Crane, Crockett, Culberson, Ector, El Paso, Jeff Davis, Hudspeth, Kinney, Loving, Pecos, Presidio, Reeves, Terrell, Upton, Val Verde, Ward, and Winkler counties, the only fishes that may be used or possessed for bait while fishing are common carp, fathead minnows, gizzard and threadfin shad, golden shiners, goldfish, Mexican tetra, Rio Grande cichlid, silversides (Atherinidae family) and sunfish (Lepomis).

How to use the table (pgs. 38-41): First, look for your location of interest (lake or river) under Location. The locations are listed in alphabetical order. If you find the location you are looking for, first check the counties listed to the right of the locations to make sure you have the correct location. If those match, continue reading to the right and note the codes for regulation exceptions. Exception codes are listed starting on pg. 40.

For instance, Lake Bastrop is located in Bastrop County. The codes for regulations that are exceptions to statewide regulations are **Bass9** and **Gear3**. Locate these codes listed on pgs. 40-41. Then read the description for each regulation exception. Please note MLL = Minimum Length Limit.

If you do not find the location you are looking for, that means **statewide regulations apply**. Please see above for Statewide Bag and Length Limits. If the lake is less than 75 acres and within a public park, it is most likely a **Community Fishing Lake**. See the Community Fishing Lakes listing for regulation exceptions and also see the definition on pg. 32.

FISHING REGULATIONS

REGULATION EXCEPTION CODES AND DESCRIPTIONS:

**BASS (LARGEMOUTH, SMALLMOUTH, SPOTTED AND GUADALUPE BASS):**

**Bass1** - For largemouth bass, only bass 16 inches in length or less may be retained. Daily bag = 5 bass. Bass 24 inches or greater in length may be temporarily retained in a live well or other aerated holding device and immediately weighed using personal scales. Bass weighing 13 pounds or more may be donated to the ShareLunker Program; otherwise, the fish must be immediately released in the lake where caught. Anglers wishing to donate their bass must immediately cease fishing and contact TPWD at (903) 681-0550. Anglers may not remove the bass from the immediate vicinity of the reservoir unless instructed to do so by TPWD staff. Bass not accepted by TPWD must be immediately released.

**Bass2** - Daily bag for all species of bass = 8 bass in any combination. Possession limit = 10. For largemouth bass, MLL = 14 inches.

**Bass3** - Catch and release only for largemouth, smallmouth, spotted, and Guadalupe bass.

**Bass4** - Catch and release only for largemouth bass.

**Bass5** - Catch and release only for largemouth bass, except that any bass 24 inches or greater in length may be temporarily retained in a live well or other aerated holding device and immediately weighed using personal scales. Bass weighing 13 pounds or more may be donated to the ShareLunker Program; otherwise, the fish must be immediately released in the lake where caught. Anglers wishing to donate their bass must immediately cease fishing and contact TPWD at (903) 681-0550. Anglers may not remove the bass from the immediate vicinity of the reservoir unless instructed to do so by TPWD staff. Bass not accepted by TPWD must be immediately released.

**Bass6** - For largemouth bass, MLL = 16 inches, and daily bag for all four species of bass = 5 bass in any combination.

**Bass7** - For largemouth bass; MLL = 18 inches, and daily bag for all four species of bass = 5 bass in any combination.

**Bass8** - For largemouth bass, length limit is a 14-18 slot. Bass 14 inches and less or 18 inches or greater in length may be retained, and daily bag for all four species of bass = 5 bass in any combination.

**Bass9** - For largemouth bass, length limit is a 14-21 slot. Bass 14 inches and less or 21 inches or greater in length may be retained. Only one bass 21 inches or greater may be retained each day.

**Bass10** - For largemouth bass, length limit is a 14-24 slot. Bass 14 inches and less or 24 inches or greater in length may be retained. Only one bass 24 inches or greater may be retained each day.

**Bass11** - For largemouth bass, length limit is a 16-24 slot. Bass 16 inches and less or 24 inches or greater in length may be retained. Only one bass 24 inches or greater may be retained each day.

**Bass12** - For smallmouth bass, MLL = 18 in. and daily bag = 3.

**Bass14** - For largemouth and spotted bass there is no MLL. Daily bag = 5 bass in any combination. Up to 5 largemouth or spotted bass may be retained; however, only 2 may be less than 18 inches.

**Bass15** - For largemouth bass, no MLL, daily bag = 5 bass in any combination. However, only two largemouth bass less than 18 inches may be retained each day.

**Bass16** - For largemouth bass, length limit is a 14-18 slot. Largemouth bass 14 inches and less or 18 inches or greater in length may be retained, and daily bag for all bass species = 8 bass in any combination of which no more than four may be largemouth bass 18 inches or greater. Possession limit = 10

**Bass17** - For largemouth bass. MLL = 12 inches

**BASS (STRIPED, WHITE, AND HYBRID STRIPED BASS):**

**S&W1** - For striped bass and hybrid striped bass, no MLL, daily bag = 10 and possession limit = 20, and only two striped or hybrid striped bass, 20 inches or greater, may be retained each day. Culling of striped bass and hybrid striped bass is prohibited. Culling of striped bass and hybrid striped bass is prohibited.

**S&W2** - For striped bass, no MLL, daily bag = 5, and only two striped bass, 30 inches or greater, may be retained each day.

**S&W3** - For striped bass and hybrid striped bass, no MLL and daily bag = 5. Culling of striped bass is prohibited.

**S&W4** - For the Trinity River from the Lake Livingston dam downstream to the FM Road 3278 bridge, striped bass MLL = 18 inches and daily bag = 2.

**S&W5** - For white bass, no MLL and daily bag = 25.

**COMMON CARP:**

**Carp1** - For common carp, only one carp 33 inches or greater may be retained each day. There is no daily bag limit for carp less than 33 inches in length.

**CATCH & RELEASE:**

**C&R1** - No harvest of largemouth bass, channel catfish, or any sunfish species is allowed.

**CATFISH (BLUE, CHANNEL, AND FLATHEAD CATFISH):**

**Ctfsh1** - For channel and blue catfish, MLL = 12 and daily bag = 5 in any combination

**Ctfsh2** - For channel and blue catfish, no MLL and daily bag = 5 in any combination.

**Ctfsh3** - For channel and blue catfish, daily bag and possession limit = 50 in any combination. NOTE: Applies only to the portion of Lake Livingston in Polk, San Jacinto, Trinity, and Walker counties.

**Ctfsh4** - For flathead catfish, MLL = 20 in. and daily bag = 5.

**Ctfsh5** - For blue and channel catfish, MLL = 12 and daily bag = 15. Only one blue catfish 30 inches or greater may be retained each day. For flathead catfish, MLL = 20 in. and daily bag = 5.

**Ctfsh6** - For the Trinity River from the Lake Livingston dam downstream to the FM Road 3278 bridge, blue and channel catfish MLL = 12 and daily bag = 10, of which only two fish can be 24 inches or larger.

**Ctfsh7** - For blue catfish, length limit is a 30- to 45-inch slot. Blue catfish 30 inches and less or 45 inches or greater in length may be retained. Only one blue catfish 45 inches or greater may be retained each day. Daily bag = 25 blue and channel catfish in any combination.

**Ctfsh8** - For blue and channel catfish, no MLL and daily bag and possession limit = 50 in any combination of which no more than five blue or channel catfish 20 inches or greater may be retained.

**Ctfsh9** - For flathead catfish, daily bag = 10 and possession limit = 10.

**Ctfsh10** - For blue and channel catfish, no MLL. Daily bag and possession limit = 50 in any combination of which no more than five blue or channel catfish 30 inches or greater may be retained.

**Ctfsh11** - For blue and channel catfish, no MLL and daily bag limit = 25. In the 25-fish bag, no more than seven fish 20 inches or greater may be retained, and no more than two of those five fish may be 30 inches or longer in length.

**CRAPPIE (BLACK AND WHITE):**

**Crpie1** - For black and white crappie, there is no MLL and daily bag = 25 in any combination.

**Crpie2** - For black and white crappie caught from DEC. 1 through the last day of FEB., there is no MLL, daily bag = 25 in any combination, and all crappie caught must be retained.

**Crpie3** - For black and white crappie, MLL = 10 inches and daily bag = 37 in any combination. Possession limit = 50

**GAR (ALLIGATOR):**

**Gar1** - During May, no person shall fish for, take, or seek to take alligator gar in that portion of Lake Texoma encompassed within the boundaries of the Hagerman National Wildlife Refuge or that portion of Lake Texoma from the U.S. 377 bridge (Wills Bridge) upstream to the I.H. 35 bridge.

**Gar2** - For alligator gar, daily bag = 5. Possession limit=10

**GEAR AND METHODS:** (see pg. 33 for Legal Freshwater and Saltwater Devices and Restrictions)

**Gear1** - Fishing is by pole and line only.

**Gear2** - Fishing is by pole and line only. Anglers may use no more than two poles while fishing.

**Gear3** - Use of juglines, throwlines and trotlines is prohibited.

**Gear4** - Use of trotlines is prohibited.

**RED DRUM:**
**How to Attach Red Drum Tag**

Immediately upon retaining a fish:
1. Remove tag from license and use entire tag.
2. Fill in ALL information spaces on front of tag.
3. Cut out day and month.
4. Attach tag with a string or wire to the narrowest part of the tail, just ahead of the tail fin (see diagram).

**How to Measure Fish and Crabs**

Use these guidelines to measure fish correctly:
1. Place the fish on its side with the jaw closed.
2. Squeeze the tail fin together or turn it in a way to obtain the maximum overall length.
3. Measure a straight line from the tip of the snout to the extreme tip of the tail fin.

**Tips for Releasing Fish**

Releasing fish today means better fishing for tomorrow. Give your fish the best chance at survival by following these tips:
- Play and land fish as quickly as possible.
- Minimize the time fish is out of the water (no longer than you can hold your breath).
- Wet hands to avoid removing protective slime.
- Smaller fish (under 5 pounds) can be vertically held by the lower jaw. Never hold fish horizontally by jaw unless supporting with a second hand under the fish's body.
- Attempt to remove all hooks before release as most will not rust out.
- For details on hook removal, depressurizing overinflated air bladders, and more fish survival tips, see www.tpwd.texas.gov/regulations/outdoor-annual/fishing/freshwater-fishing/catch-release-tips

For saltwater fishes only

When releasing a fish that cannot right itself or is showing a distended air bladder:
- Gently insert a thin point or an approved device through the side of the fish immediately behind the upper part of the pectoral fin base. This is usually directly below the fourth or fifth spine (see diagram right).
- Revive fish by holding upright in water and facing it into the current, gently forcing water through gills.
Identification of Yellow, White, Striped and Hybrid Striped Bass

**yellow bass**

A. Stripes distinct, broken above anal fin.
B. Color – silvery yellow.
C. Dorsal fins joined.
D. Does not have a tooth patch near the midline towards the back of the tongue.

**white bass**

A. Stripes faint, only one extends to tail.
B. Body deep, more than 1/3 length.
C. Has one tooth patch near the midline towards the back of the tongue.

**striped bass**

A. Stripes distinct, several extend to tail.
B. Body slender, less than 1/3 length.
C. Has two, distinct tooth patches near the midline towards the back of the tongue.

**hybrid striped bass**  
(also known as Palmetto or Sunshine bass)

A. Stripes distinct, usually broken, several extend to tail.
B. Body deep, more than 1/3 length.
C. Has two tooth patches near the midline on the back of the tongue. Tooth patches may be distinct or close together.

Note: For hybrid striped bass, all characteristics should be considered for identification as characteristics in individual fish may vary.
Identification of Smallmouth, Guadalupe & Spotted and Largemouth Bass

**smallmouth bass**

A Vertical barring along the sides.

B Jaw does not extend BEYOND the back margin of the eye when mouth is closed.

C Brownish-green color; white belly area does not extend high on the sides.

**Guadalupe and spotted bass**

A Irregular lateral stripe is similar to but more broken than largemouth bass.

B Jaw does not extend BEYOND the back margin of the eye when mouth is closed.

C Spots on scales form “rows” of stripes on whitish belly area.

**largemouth bass**

A Definite lateral stripe.

B Jaw extends well BEHIND the back margin of the eye when mouth is closed.
SALTWATER FISHING – GENERAL INFORMATION

- For freshwater finfish species caught in the public salt waters of this state, statewide bag, possession and length limits as listed on pg. 37 apply.
- A person taking or attempting to take game and nongame fish from salt water for non-commercial purposes is required to have a valid fishing license and a saltwater fishing endorsement.

Texas State Waters – Federal Waters
Texas recreational and commercial fishermen fishing more than nine (9) nautical miles off the coast of Texas are in federal waters and are subject to rules and regulations that may differ from those in state waters. An example would be the federal requirement to use non-stainless circle hooks when fishing for reef fish. Recreational anglers must have a Texas fishing license and saltwater endorsement to possess in state water or land in Texas any fish taken in federal waters. To ensure that you are in compliance with federal regulations, you should contact the Gulf of Mexico Fishery Management Council at (888) 833-1844 (toll free). Federal rules may be found online at www.gulfcouncil.org

The limits and restrictions in this guide apply to aquatic life caught in the public waters of Texas out to nine (9) nautical miles in the Gulf of Mexico, and also apply to aquatic life caught between 9 and 200 nautical miles in the Exclusive Economic Zone (EEZ) and possessed in state waters or landed in this state. (Federal law also regulates species between 9 and 200 nautical miles managed under a Federal Fishery Management Plan.) See pg. 27 for Importation of Wildlife Resources.

IT IS UNLAWFUL TO POSSESS AQUATIC LIFE IN TEXAS WATERS THAT WAS ILLEGALLY TAKEN IN FEDERAL WATERS.

Bag and Length Limits for Saltwater Fish

- Daily bag and possession limit are defined on pg. 32.
- There are no bag, possession, or length limits on game or nongame fish, except as listed in this guide.

<sup>a</sup> No more than one black drum over 52 inches may be retained per person per day and counts as part of the daily bag and possession limit.

<sup>b</sup> Red drum special regulation: During a license year, one red drum over the stated maximum length limit may be retained when affixed with a properly completed Red Drum Tag and one red drum over the stated maximum length limit may be retained when affixed with a properly completed Bonus Red Drum Tag. Any fish retained under authority of a Red Drum Tag or a Bonus Red Drum Tag may be retained in addition to the daily bag and possession limit as stated in this section.

<sup>c</sup> Flounder special regulation: Daily bag is 5 fish except from Nov. 1-30, when the daily bag limit is 2 fish (flounder may be taken only by pole-and-line); and from December 1-14, when the daily bag limit is 2 fish (flounder may be taken by any legal means, including gigging). Possession limit is equal to the daily bag.

<sup>d</sup> May not take from public waters, or possess on board a boat, mullet over 12 inches during October, November, December, and January. No limits apply during other months.

<sup>e</sup> No more than one spotted seatrout over the stated maximum length may be retained per person per day and counts as part of the daily bag and possession limit.

<sup>f</sup> Special Regulation: The daily bag limit is 1 fish for all allowable shark species INCLUDING Atlantic sharpnose, blacktip and bonnethead.

<sup>g</sup> Prohibited shark species: Atlantic angel, Basking, Bigeye sand tiger, Bigeye sixgill, Bigeye thresher, Bignose, Caribbean reef, Caribbean sharpnose, Dusky, Galapagos, Longfin mako, Narrowtooth, Night, Sandbar, Sand tiger, Sevengill, Silky, Sixgill, Smalltail, Whale, White.

<sup>h</sup> Special Regulation: Red snapper may be taken using pole and line, but it is unlawful to use any kind of hook other than a circle hook when using natural bait. For additional regulations governing red snapper and other reef fish, see pg. 44.
Saltwater Freeze Events

When temperatures on the coast are predicted to fall below 32°F for three or more days, the TPWD executive director may close one or more of the sites listed on the website below for saltwater fishing until the threat from the freeze event is over. This NOTICE OF CLOSURE will be made available to local media including newspapers. If you have any questions about your fishing area during a freeze event, please watch your local newspaper or call the nearest TPWD Law Enforcement office (see pg. 18).

Coastal areas that may be closed to fishing during freeze conditions can be found at the following website: tpwd.texas.gov/saltwater-freeze-events

Shrimp Regulations

• Shrimp may be taken for personal use (bait or food). Shrimp taken for personal use may not be sold.
• A person taking or attempting to take shrimp from salt water for non-commercial purposes is required to have a valid fishing license and a saltwater fishing endorsement.

Legal Sport Shrimping Devices:

• Cast Net (see pg. 33 for cast net restrictions)
• Seine (see pg. 34 for seine restrictions)
• Individual Bait-shrimp Trawl with Individual Bait Shrimp Trawl Tag (see pg. 24 and below)

Individual Bait-shrimp Trawl:

• Only one trawl per boat is allowed.
• Must have an individual bait-shrimp trawl tag in one’s possession while trawling (see pg. 24).
• Must not be greater than 20 feet in width between the doors.
• Mesh size must not be smaller than 8-3/4 inches over a consecutive series of five stretched meshes.
• Boards must not be larger than 450 square inches each.

Coastal waters (all the salt waters of the state) are divided into the following groups:

1. Outside Water: That part of the Gulf of Mexico extending from the shoreline seaward to nine nautical miles. May not take shrimp from outside waters during closed seasons (see pg. 48)

2. Inside Water: All bays, passes, rivers, or other bodies of water landward from the shoreline along the Gulf of Mexico. In these waters, the tide rises and falls and saltwater shrimp are found or migrate. Shrimping is not permitted within any natural or man-made pass leading from the inside waters to the outside waters of the state.

3. Major Bays:

• Sabine Lake north of Cameron Causeway to south of a line marked by the Gulf Intracoastal Waterway (Sabine Neches Canal/Sabine River) between the easternmost tip of Goat Island to the westernmost tip of Stewts Island
• Trinity Bay southward from a line extending from the mouth of Double Bayou in Chambers County to Double Bayou Channel Marker 14, to Separator C-2, to Point Barrow in Chambers County
• Galveston Bay
• East Bay westward from a line extending from Frozen Point to the Gulf Intracoastal Waterway Marker 12
• Matagorda Bay westward of a line extending from a location on the mainland (where a line running immediately northwest [bearing 330 degrees] from Shellfish Marker A intersects the mainland), thence southeasterly to Shellfish Marker A located near the mainland, thence to Shellfish Marker B located near the end of Shell Island Reef, thence to the tide gauge located near the Matagorda Peninsula, and thence southeasterly [bearing 153 degrees] to the Matagorda Peninsula.
• East Matagorda Bay
- Tres Palacios Bay south of a line from Grassey Point to the mouth of Pilkington Bayou
- Espiritu Santo Bay
- Lavaca Bay southward of State Highway 35
- San Antonio Bay southward of a line from McDowell Point to Mosquito Point
- Aransas Bay
- Corpus Christi Bay exclusive of the area bounded by a line extending from the Gulf Intracoastal Waterway at the southwest point of the Dagger Island chain, along Dagger Island to the southeast tip of Ransom Island, then southeast to the westernmost point of land north of Marker 14 in the Corpus Christi Ship Channel
- All exclusive of tributary bays, bayous, inlets, lakes and rivers

4. Bait Bays (includes major bays and those listed here):
   - Chocolate Bay
   - West Bay south and west of Interstate Hwy. 45 Causeway Bridge and the Gulf Intracoastal Waterway inclusive of the area south of a line extending westward from Interstate Hwy. 45 Causeway Bridge at Virginia Point, along the southern edge of Tiki Island to the northeastern tip of North Deer Island at Channel Marker 48
   - Trinity Bay northward from a line extending from the mouth of Double Bayou in Chambers County to Double Bayou Channel Marker 14, to Separator C-2, to Point Barrow in Chambers County
   - The Old Brazos River lying north of the Gulf Intracoastal Waterway in Brazoria County
   - Upper Laguna Madre
   - Baffin Bay
   - Alazan Bay
   - Barroom Bay
   - Lower Laguna Madre, including the Brownsville Ship Channel
   - The entire Gulf Intracoastal Waterway, exclusive of all tributaries

5. Nursery Areas: (No Shrimping Allowed) Those coastal waters not specifically named above as Major Bays or Bait Bays are considered Nursery Areas. Includes tributary bays, bayous, inlets, lakes, and rivers that serve as significant growth and development environments for postlarval and juvenile shrimp. Does not include outside waters, major bays, or bait bays.

### Bait Shrimping (Major Bays and Bait Bays)

<table>
<thead>
<tr>
<th>Season</th>
<th>Hours</th>
<th>Limits</th>

*SPECIAL NOTICE: The federal government may close the Exclusive Economic Zone off Texas (9-200 nautical miles) at the same time Texas waters are closed. For further information call the National Marine Fisheries Service at (727) 824-5305.

**SPECIAL NOTICE: These dates may be changed by the department providing 72 hours public notice on new closing dates and 24 hours public notice on new opening dates.*
Special County Restrictions

Nueces: It is unlawful for any person to take or attempt to take shrimp with a trawl in the Laguna Madre north of a line starting on the mainland at the most northeasterly point on the north side of the entrance to Whiteley Channel then proceeding in a straight line to the north end of Pita Island; then continuing on a line to the southernmost point on the westerly most spoil island bordering the north side of the New Humble Channel (commonly referred to as Hap’s Channel); then continuing on a line along the north edge of the New Humble Channel (commonly referred to as Hap’s Channel) to its junction with the Gulf Intracoastal Waterway; then continuing on a straight line to the Nueces/Kleberg County line marker on Padre Island.

Crab and Ghost Shrimp Regulations

NOTE: It is unlawful to place, fish, or leave a crab trap or crab trap component in the coastal waters of the state from Feb. 17-26, 2017.

- Crabs may be taken for personal use (bait or food). Crabs taken with recreational license for personal use may not be sold.
- There are no public salt waters, seasons, or times closed to the taking and retaining of crabs and ghost shrimp, EXCEPT as provided in this guide.
- It is lawful to take, attempt to take, or possess crabs and ghost shrimp by means, in numbers, and of sizes ONLY as described below.
- A person taking or attempting to take crabs or ghost shrimp from salt water for non-commercial purposes is required to have a valid fishing license and a saltwater fishing endorsement.

Bag, Possession and Length Limits

</tr>
</tbody>
</table>

a Except that not more than 5% by number, of undersized blue crabs may be possessed for bait purposes only and must be placed in a separate container.
- May not possess egg-bearing (sponge) crabs.
- May not possess a female crab that has its abdominal apron removed.

b Only the right claw may be retained or possessed. The body of the stone crab must be immediately returned to the water from which it was taken.
Legal Devices and Restrictions

Crab Line: A baited line with no hook attached.
• No restrictions.

Umbrella Net (sometimes called crab net): A non-metallic mesh net that is suspended horizontally in the water by multiple lines attached to a rigid frame.
• It is unlawful to use an umbrella net to take GAME fish. Umbrella nets may be used to take nongame fish and other aquatic animal life, including crabs, crayfish, and shrimp.
• May not have within the frame an area that exceeds 16 square feet.

Folding Panel Traps:
• Only crabs may be taken.
• Overall surface area (including panels) may not exceed 16 square feet.

Crab Traps:
• Only six crab traps at a time may be fished for non-commercial purposes.
• May only remove crab traps from the water or remove crabs from crab traps during the period from 30 minutes before sunrise to 30 minutes after sunset.
• Tag Requirements: Must be used with a valid GEAR TAG, valid for 10 days (see pg. 32) and attached within six inches of the buoy or pier to which the trap is tied.
• Construction and Design Restrictions:
  • May not exceed 18 cubic feet.
  • Must be equipped with at least two escape vents in each crab-retaining chamber and located on the outside trap walls.
  • Escape vents must be at least 2-3/8 inches in diameter.
  • Must be marked with a white floating buoy not less than 6 inches in height, 6 inches in length, and 6 inches in width, bearing a 2-inch wide center stripe of contrasting color, attached to the crab trap.
  • Buoys or floats may not be made of plastic bottle(s) of any color or size.
  • Must be equipped with a degradable panel. A trap is considered to have a degradable panel if one of the following methods is used in construction of the trap:
    • the trap lid tie-down strap is secured to the trap at one end by a simple loop of untreated jute twine (comparable to Lehigh brand #530), sisal twine (comparable to Lehigh brand #390) or untreated steel wire with a diameter of 20 gauge or smaller. The trap lid must be secured so that when the twine or wire degrades, the lid will no longer be securely closed; or
    • the trap contains at least one sidewall, not including the bottom panel, with a rectangular opening no smaller in either dimension than 3 inches by 6 inches. Any obstruction placed in this opening may not be secured in any manner EXCEPT it may be laced, sewn, or otherwise obstructed by a single length of untreated jute twine (comparable to Lehigh brand #530), sisal twine (comparable to Lehigh brand #390) or untreated steel wire with a diameter of 20 gauge or smaller knotted only at each end and not tied or looped more than once around a single mesh bar. When the twine or wire degrades, the opening in the sidewall of the trap will no longer be obstructed; or
  • the obstruction may be loosely hinged at the bottom of the opening by no more than two untreated steel hog rings and secured at the top of the obstruction in no more than one place by a single length of untreated jute twine (comparable to Lehigh brand #530), sisal twine (comparable to Lehigh brand #390) or untreated steel wire with a diameter of 20 gauge or smaller. When the twine or wire degrades, the obstruction will hinge downward and the opening in the sidewall of the trap will no longer be obstructed.

Placement and Location Restrictions:
• May not place a crab trap or portion thereof closer than 100 feet from any other crab trap, EXCEPT when traps are secured to a pier or dock.
• May not fish a crab trap in public fresh waters.
- May not fish a crab trap within 200 feet of a marked navigable channel in Aransas County; and in the water area of Aransas Bay within one-half mile of a line from Hail Point on the Lamar Peninsula, then direct to the eastern end of Goose Island, then along the southern shore of Goose Island, then along the eastern shoreline of the Live Oak Peninsula past the town of Fulton, past Nine Mile Point, past the town of Rockport to a point at the east end of Talley Island, including that part of Copano Bay within 1,000 feet of the causeway between Lamar Peninsula and Live Oak Peninsula.
- May not possess, use, or place more than three crab traps in waters north and west of Hwy. 146 where it crosses the Houston Ship Channel in Harris County.
- May not use or place more than three crab traps in public waters of the San Bernard River north of a line marked by the boat access channel at Bernard Acres.
- It is unlawful to place any type of trap within the area in Cedar Bayou between a department sign erected where Mesquite Bay flows into Cedar Bayou and the department sign erected near the point where the pass empties into the Gulf of Mexico.

Other Devices:

- Devices legally used for taking of fresh or saltwater fish or shrimp may be used to take crab if operated in places and at times authorized by a proclamation of the Parks and Wildlife Commission or the Parks and Wildlife Code.
- See applicable pages in this guide to determine authorized uses, places, and times for other legal devices.

Sand Pumps: A self-contained, hand-held, hand-operated suction device used to remove and capture Callianassid ghost shrimp.
- May only be manually operated.
- May not be used for commercial purposes.

Oyster Regulations

- Oysters may be taken for personal use (food). Oysters taken with recreational license for personal use may not be sold.
- A person taking or attempting to take oysters is required to have a valid fishing license and a saltwater endorsement.
- Persons fishing with tongs or a dredge must hold a sport oyster boat license.
- Oysters may be taken only from waters approved by the Texas Department of State Health Services Seafood and Aquatic Life Group. For more information call (800) 685-0361.
- Oysters may not be taken from marked private leases, except by permission of the lessee.
- Seasons: November 1 through April 30, sunrise to 3:30 p.m., coastwide.
- Length and Possession Limits:
  - Oysters must be 3 inches or larger as measured by the greatest length of the shell.
  - Oysters 3/4 inch to 3 inches and dead oyster shell greater than 3/4-inch (measured along any axis) must be culled and returned to the reef from which taken.
  - Oysters 3/4 inch to 3 inches and dead oyster shell greater than 3/4-inch (measured along any axis) may not make up more than 15% by number of oysters in possession.
  - No more than two sacks of legal oysters may be possessed per person. A sack is defined as 110 pounds of oysters including dead oyster shell and the sack.
- Devices:
  - Oysters may be taken by hand, with tongs, or by oyster dredge.
  - Oyster dredges may not be more than 14 inches in width.

Other Aquatic Life (Fresh and Salt Waters)

- Aquatic life not addressed in this guide (except threatened and endangered species) may be taken only by hand or with the devices defined as lawful for taking fish, crabs, oysters, or shrimp in places and at times as provided in this guide.
• There is no open season, bag or possession limit for marine mammals (including porpoises, dolphins and whales).
• In public fresh waters, a fishing license and freshwater fishing endorsement is required to take mussels, clams, crayfish, and other aquatic life for personal use. In salt water, a saltwater fishing endorsement is required with the fishing license.
• A hunting license is required to hunt non-protected turtles and frogs (see pgs. 25 and 72).
• No more than 25 pounds of whole mussels and clams, or 12 pounds of mussel and clam shells may be taken per day for personal use only.
• Clams, Mussels and Other Molluscan Shellfish taken from public salt waters may be taken only from waters approved by the Texas Department of State Health Services (TDSHS). Maps identifying approved areas may be obtained from the TDSHS, Seafood and Aquatic Life Group (512) 834-6757. Additional information concerning area closures may be obtained 24 hours a day, 7 days a week by calling (800) 685-0361.
• Consumption of Clams and Mussels taken from public fresh waters is prohibited by the TDSHS.
• Mussels and clams may only be taken by hand.
• Freshwater mussels of the following species may be taken only when they will not pass through a ring with an inside diameter (I.D.) specified for that species.

• More information on harvesting freshwater mussels and clams, including areas closed to harvest, can be obtained by calling TPWD in Austin at (512) 389-4444.
• It is unlawful to take more than 15 live univalve snails during a day which include no more than two each of the following snails: lightning whelk, horse conch, Florida fighting conch, pear whelk, banded tulip, or Florida rocksnail.
• It is unlawful to take or kill shell-bearing mollusks, hermit crabs, starfish, or sea urchins from Nov. 1 through Apr. 30 within the following boundary: the bay and pass sides of South Padre Island from the east end of the north jetty at Brazos Santiago Pass to the west end of West Marisol Drive in the town of South Padre Island, out 1,000 yards from the mean high-tide line, and bounded to the south by the centerline of the Brazos Santiago Pass.

Fish Consumption Bans and Advisories

Fish and shellfish can be a source of high-quality protein in your diet. Fish and shellfish, however, can accumulate contaminants from the waters in which they live. The Texas Department of State Health Services (TDSHS) monitors fish in the state for the presence of environmental contaminants and alerts the public through bans and advisories when a threat to human health may occur from the consumption of contaminated fish.

In waters with consumption bans, possession and consumption of fish and/or shellfish is prohibited. Catch-and-release fishing from these areas is allowed. A consumption advisory is a recommendation to limit consumption to specified quantities, species, and sizes of fish. For additional information, a listing of all consumption bans and advisories, or a listing of areas tested where no bans or advisories were issued, call the TDSHS at (800) 685-0361 (shellfish) or (512) 834-6757 (fish).

Boater Education

Anyone born on or after September 1, 1993 MUST complete an approved boater education course before operating in public water a vessel of more than 15 horsepower, a windblown vessel of more than 14 feet in length, or a personal watercraft, unless there is another person on board who is 18 years of age or older and who is legally qualified to operate the vessel or personal watercraft.

For course information, please call TPWD toll-free at (800) 792-1112 (menu 6) or call (512) 389-4999 or consult the TPWD Boater Education section at: www.tpwd.texas.gov/boating/education
Boating Regulations and Safe Boating Tips

Each year, over 85 percent of all sportsmen who die in the water were not wearing a life jacket. **WEAR YOUR LIFE JACKET! The life you save may be your own.**

If you use a boat:

- **STATE LAW REQUIRES** a wearable-type life jacket (Types I, II, or III) for each person on board. Life jackets must be U.S. Coast Guard approved.
- Children under 13 years of age must wear a wearable personal flotation device on a vessel under 26 ft. in length while underway. It is recommended that non-swimmers always wear a life jacket on the water. In addition, a Type IV throwable-type life jacket is required on boats 16 feet in length and longer.
- **STATE LAW PROHIBITS** intoxicated persons (.08% BAC) from operating a boat.
- **CHECK THE WEATHER** and give a “float plan” to a friend before departing.
- See the Texas Water Safety Act Digest available on the TPWD website for a detailed summary of boating regulations.

www.tpwd.texas.gov/boatsafe

FRESHWATER FISH REGULATIONS

Texas’ waterways are under attack by invasive species that push aside native plants and animals, throwing aquatic ecosystems out of whack. Invasive plants like giant salvinia can double in size in a week and block recreational access. And species like zebra mussels can hinder water recreation, damage your boat and affect our water supply.

**Don’t be a carrier. Prevent the spread of invasive species by following 3 steps EVERY time you leave the water:**

1. **CLEAN.** Inspect your boat, trailer and gear and remove all plant material, mud and foreign objects.
2. **DRAIN.** Remove all water from the boat, including the motor, bilge, livewells and bait buckets.
3. **DRY.** Open all compartments and allow the boat and trailer to dry for a week or more before entering another body of water. If you can’t dry the boat and trailer for at least a week, wash them with high-pressure, hot soapy water instead.

Possession or transportation of aquatic invasive species without a permit is illegal in Texas. Boaters are also required to drain all water from their boat and gear before approaching or leaving a public water fresh water body. The penalty for the first offense is a fine of up to $500. The penalty for a repeat offense is a fine of up to $2,000, up to 180 days in jail, or both.

Learn more at www.texasinvasives.org. For a list of harmful and potentially harmful aquatic species, visit www.tpwd.texas.gov/invasives

**GOOD FISHING DEPENDS ON CLEAN WATER.** Algae blooms affect fishing spots, creating “dead zones” where no aquatic life can survive. The cause is usually pollution from fertilizers, septic systems, animal waste, and sewage treatment plants. Everyone can do something to help. Supporting water quality protection supports great fishing! Learn more at: [www.epa.gov/nutrientpollution/](http://www.epa.gov/nutrientpollution/)

Check water conditions, fish habitat partnerships and fish advisories by accessing EPA’s water data at [www.epa.gov/mywaterway](http://www.epa.gov/mywaterway)

---

NEW! Violations can now be reported via text messaging. Text to 847411, then type message beginning with TPWD (not case-sensitive).

You can make a difference by reporting poaching, pollution and dumping, arson in state parks and intoxicated boaters! Up to $1,000 may be paid for information leading to arrest and conviction of a person for a violation of our state’s wildlife and fisheries laws, as well as for certain laws related to environmental crime, arson and intoxicated boaters.

Operation Game Thief is privately funded. Please consider supporting efforts to protect our precious natural resources and keep our waterways safe by sending your tax deductible donation to Operation Game Thief, or by becoming an Operation Game Thief member.

Please visit [www.ogttx.com](http://www.ogttx.com) for membership information. Donations can be sent to Texas Parks and Wildlife Department, 4200 Smith School Road, Austin, Texas 78744, or you may also call (512) 389-4381 to make a donation by credit card.
This publication was prepared for general informational purposes and has no legal force or effect. Fishing regulations are subject to change. Check for updates by visiting www.gulfcouncil.org.

The Gulf of Mexico Fishery Management Council is one of eight regional Fishery Management Councils established by the Fishery Conservation and Management Act of 1976. The Council prepares fishery management plans, which are designed to manage fishery resources within the federal waters of the Gulf of Mexico.

The Council consists of 17 voting members: the Southeast Regional Administrator of the National Marine Fisheries Service (NMFS) Southeast Regional Office (or his designee), the directors of the five Gulf state marine resource management agencies (or their designees), and 11 members who are nominated by the state governors and appointed by the Secretary of Commerce. There are also four non-voting members representing the U.S. Coast Guard, U.S. Fish and Wildlife Service, Department of State, and the Gulf States Marine Fisheries Commission.

The Council meets five times a year at various locations around the Gulf coast. When reviewing potential rule changes, the Council draws upon the services of knowledgeable people from other state and federal agencies, universities, and the public to balance competing interests and achieve the greatest overall benefit to the nation.

Scoping workshops and public hearings are also held throughout the Gulf coast, and virtual meetings are available online. Testimony, oral or written, is considered by the Council before it takes final action on proposed rule changes. Public testimony is also heard during each Council meeting. Proposed rule changes are then submitted to National Marine Fisheries Service for further review and approval before implementation by the Secretary of Commerce.

NOTE: The use of gillnets is permitted only in the southern Florida west coast subzone. The gillnet fishery for Gulf group king mackerel in or from the Gulf EEZ is closed each year from July 1 until 6:00 a.m. on the day after the Martin Luther King Jr. federal holiday. The gillnet fishery is also closed during all subsequent weekends and observed federal holidays, except for the first weekend following the Martin Luther King Jr. holiday, which will remain open to the gillnet fishery provided that a notification of closure has not been filed. Weekend closures are effective from 6:00 a.m. Saturday to 6:00 a.m. Monday. Holiday closures are effective from 6:00 a.m. on the observed federal holiday to 6:00 a.m. the following day.

## Commercial Permit Requirements

Applications for permits (except for tuna) may be obtained from the National Marine Fisheries Service, Southeast Regional Office, 263 13th Avenue S., St. Petersburg, Florida 33701, or by calling 877-376-4877. Tuna permits may be obtained by calling 888-872-8862 or 978-281-9260.

<table>
<thead>
<tr>
<th>Permit</th>
<th>Required for:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Spiny lobster federal vessel permit or Florida commercial harvester license and certificates</td>
<td>Florida commercial harvester license and certificates required for harvest or possession in excess of the bag limits in the EEZ off Florida or to land or sell in Florida. Federal vessel permit required for harvest or possession in excess of the bag limits in the EEZ other than off Florida or sale other than Florida. May retain up to 50 spiny lobsters under the minimum size limit, and one per trap.</td>
</tr>
<tr>
<td>Spiny lobster tail separation permit</td>
<td>Possession of a separated spiny lobster tail in or from the EEZ aboard a vessel. Also requires a spiny lobster federal vessel permit or Florida state license and certificates. Fishermen with tailing permits must land spiny lobster all whole or all tailed.</td>
</tr>
<tr>
<td>Shrimp</td>
<td>Permit required for all vessels that intend to fish for shrimp in EEZ waters of the Gulf of Mexico. Permit moratorium in effect. Shrimp trawlers must have a bycatch reduction device (BRD) installed on each net rigged for fishing. Additionally, shrimp trawlers must have an approved turtle excluder device (TED) installed in each net that is rigged for fishing.</td>
</tr>
<tr>
<td>Mackerel vessel permit</td>
<td>Harvest of king or Spanish mackerel under quota and in excess of the bag limits. Issuance of new king mackerel permits is under moratorium, but existing permits are transferable. There is no moratorium on Spanish mackerel permits, but these permits are not transferable.</td>
</tr>
<tr>
<td>King mackerel gillnet endorsement</td>
<td>Harvest of king mackerel in the Florida west coast subzone using a gillnet. Also requires a mackerel vessel permit. Permit moratorium, area restrictions, and restrictions on permit transfer are in effect.</td>
</tr>
<tr>
<td>Reef fish vessel permit</td>
<td>Harvest and sale of all reef fish listed in the Reef Fish Fishery Management Plan under quota (where applicable) and in excess of the bag limits (where applicable), except goliath grouper and Nassau grouper (for which all harvest is prohibited). Issuance of new reef fish permits is under moratorium. Existing permits are transferable.</td>
</tr>

<th>Required for:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aquacultured live rock permit</td>
<td>Possession or harvest of cultivated live rock. Florida state permits are also required to land live rock in Florida. Wild live rock possession/harvest prohibited.</td>
</tr>
<tr>
<td>Allowable octocoral permit</td>
<td>Octocorals (soft corals) were removed from the Coral and Coral Reefs Fishery Management Plan and are now managed by Florida FWC in state and federal waters of the Gulf of Mexico. See Florida Fish Wildlife &amp; Conservation Commission regulations.</td>
</tr>
<tr>
<td>Commercial tuna categories:</td>
<td>Vessels must have one of these permits to sell Atlantic bluefin tuna, albacore, Atlantic bonito, bigeye tuna, skipjack tuna, or yellowfin tuna. Separate Atlantic bluefin quota and gear restrictions apply to each category. For more information contact the Atlantic tunas information hotline at 888-872-8862 or the NMFS HMS Division at 978-281-9260.</td>
</tr>
<tr>
<td>Swordfish vessel permit</td>
<td>Commercial harvest and sale of swordfish under quota.</td>
</tr>
<tr>
<td>Shark vessel permit</td>
<td>Harvest and sale of sharks listed in the management unit of the Atlantic Sharks Fishery Management Plan under quota and in excess of bag limits.</td>
</tr>
<tr>
<td>Dealer permits</td>
<td>A dealer to receive Gulf reef fish harvested from federal waters of the Gulf of Mexico. A Gulf IFQ dealer endorsement is also required. Call 1-866-425-7627 for more information.</td>
</tr>
</tbody>
</table>
### Additional Rules

Vessel Monitoring Systems are required onboard all vessels with federal commercial permits for Gulf reef fish, including charter vessels/headboats that also have a commercial reef fish permit.

<table>
<thead>
<tr>
<th>Entangling nets may not be used for directed harvest of reef fish.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reef Fish taken under recreational bag limit may not be sold.</td>
</tr>
<tr>
<td>Commercial vessels are prohibited from retaining reef fish caught under the recreational size and bag/possession limit when commercial quantities of Gulf reef fish are on board.</td>
</tr>
<tr>
<td>Reef fish as bait, except sand perch or dwarf sand perch, is prohibited.</td>
</tr>
<tr>
<td>Reef fish gear is limited to no more than 3 hooks in a special management zone off Alabama. Nonconforming gear is restricted to bag limits, or for reef fish without a bag limit, to 5% by weight of all fish onboard.</td>
</tr>
<tr>
<td>Vessels with shrimp trawls or entangling net gear onboard may not exceed the recreational reef fish bag limits.</td>
</tr>
<tr>
<td>Stressed areas for reef fish begin at the shoreward boundary of federal waters and generally follow the 10 fathom contour from the Dry Tortugas to Sanibel Island; the 20 fathom contour to Tarpon Springs; the 10 fathom contour to Cape San Blas; the 25 fathom contour to south of Mobile Bay; the 13 fathom contour to Ship Island, Mississippi; the 10 fathom contour off Louisiana; and the 30 fathom contour off Texas. In designated “stressed areas” use of roller trawls and power heads is prohibited.</td>
</tr>
<tr>
<td>All fish except for bait and oceanic migratory species taken from federal waters must have heads and fins intact through landing. Legal size fish within bag limit may be consumed at sea.</td>
</tr>
<tr>
<td>Pelagic longlining for highly migratory pelagics is prohibited from the DeSoto Canyon area. Contact NMFS at 301-713-2347 for detailed coordinates.</td>
</tr>
<tr>
<td>A state may regulate vessels that are registered in that state and that are fishing in federal waters for species for which there are no federal fishery management plans or applicable federal regulations.</td>
</tr>
<tr>
<td>Vessels participating in the reef fish fishery must possess dehooking devices and use non-stainless steel circle hooks when using natural baits.</td>
</tr>
<tr>
<td>Operators of vessels with Gulf of Mexico reef fish commercial or charter vessel/headboat permits must comply with guidelines for proper care and release of incidentally caught smalltooth sawfish and sea turtles and possess onboard specific gear to ensure proper release of such species.</td>
</tr>

Measurement Guidelines

Fork length: the straight-line distance from the tip of the head (snout) to the rear center edge of the tail (caudal fin).

Total length: the straight-line distance from the tip of the snout to the tip of the tail (caudal fin), excluding any caudal filament, while the fish is lying on its side. The mouth of the fish may be closed and/or the tail may be squeezed together to give the greatest overall measurement.

Carapace length: The carapace is measured beginning at the forward edge between the rostral horns, excluding any soft tissue, and proceeding along the middle to the rear edge of the carapace.
Marine Sanctuaries and Area Closures

Flower Garden Banks National Marine Sanctuary

Below is a summary of regulated activity within the FGBNMS. For the full text, contact the Sanctuary office at 409-621-5151 or visit www.flowergarden.noaa.gov.

Fishing and Related Activities
The following activities are generally prohibited:

- Injuring, catching, harvesting, collecting or feeding, or attempting to injure, catch, harvest, collect or feed, any fish within the sanctuary by use of any gear, device, equipment or means (e.g. spear guns, nets) except by use of conventional hook and line gear.
- Possessing (except while passing through the sanctuary without interruption) any fishing gear, device, equipment, or means except conventional hook and line gear.
- Possessing or using explosives or releasing electrical charges within the sanctuary.

Conventional hook and line gear means any fishing apparatus operated afloat a vessel and composed of a single line terminated by a combination of sinkers and hooks or lures and spooled upon a reel that may be hand or electrically operated, hand-held or mounted.

Anchoring and Mooring
The following activities are prohibited:

- Anchoring any vessel within the Sanctuary.
- Mooring a vessel over 100 feet in registered length on a Sanctuary mooring buoy.

Discharges
Discharging or depositing any material or other matter within the Sanctuary is prohibited, with the following exceptions:

- Fish, fish parts, chumming materials or bait used in or resulting from fishing with conventional hook and line gear in the sanctuary.
- Clean effluent from an operable Type I or Type II marine sanitation devise (MSD).
- Clean water generated by routine vessel operations (e.g. engine exhaust, cooling water, deck wash down, and gray water), excluding oily wastes from bilge pumping.

Injury to or Possession of Sanctuary Resources
The following activities are generally prohibited:

- Injuring or removing, or attempting to injure or remove, any coral or other bottom formation, coralline algae or other plant, marine invertebrate (e.g., spiny lobster, queen conch, shell, sea urchin), brine-seep biota or carbonate rock.
- Possessing within the Sanctuary (regardless of where collected), any coral or other bottom formation, coralline algae or other plant, or fish (except for fish caught by use of conventional hook and line gear).
- Drilling into, dredging, or otherwise altering the seabed of the sanctuary; or constructing, placing, or abandoning any structure, material, or other matter on the seabed of the Sanctuary.

Longline Closure

50 CFR: Wildlife and Fisheries - PART 622 FISHERIES OF THE CARIBBEAN, GULF OF MEXICO, AND SOUTH ATLANTIC §622.34 - Gulf EEZ seasonal and/or area closures.

(q) Prohibitions applicable to bottom longline fishing for Gulf reef fish.

(1) From June through August each year, bottom longlining for Gulf reef fish is prohibited in the portion of the Gulf EEZ east of 85°30’W. longitude

(2) Within the prohibited area and time period specified in paragraph (q)(1) of this section, a vessel with bottom longline gear on board may not possess Gulf reef fish unless the bottom longline gear is appropriately stowed, and a vessel that is using bottom longline gear to fish for species other than Gulf reef fish may not possess Gulf reef fish. For the purposes of paragraph (q) of this section, appropriately stowed means that a longline may be left on the drum if all gangions and hooks are disconnected and stowed below deck; hooks cannot be baited; and all buoys must be disconnected from the gear but may remain on deck.

(3) Within the Gulf EEZ east of 85°30’W. longitude, a vessel for which a valid eastern Gulf reef fish bottom longline endorsement has been issued that is fishing bottom longline gear or has bottom longline gear on board cannot possess more than a total of 1000 hooks including hooks on board the vessel and hooks being fished and cannot possess more than 750 hooks rigged for fishing at any given time. For the purpose of this paragraph, “hooks rigged for fishing” means hooks attached to a line or other device capable of attaching to the mainline of the longline.

(c) Reef fish longline and buoy gear restricted area. A person aboard a vessel that uses, on any trip, longline or buoy gear in the longline and buoy gear restricted area is limited on that trip to the bag limits for Gulf reef fish specified in §622.38(b) and, for Gulf reef fish for which no bag limit is specified in §622.38(b), the vessel is limited to 5 percent, by weight, of all fish on board or landed.

NOTE: A bottom longline endorsement is required to fish for reef fish east of Cape San Blas, Florida. The use of longlines and buoy gear for reef fish is prohibited inside of 50 fathoms west of Cape San Blas, Florida. East of Cape San Blas, the use of longlines and buoy gear for reef fish is prohibited inside of 20 fathoms year round and 35 fathoms during June - August (see next page). Vessels fishing within this zone and possessing longlines or buoy gear may not exceed the recreational bag limits, and for reef fish without a bag limit, 5% by weight of all fish aboard.
Longline Closure

From June through August each year, bottom longlining for Gulf reef fish is prohibited in the portion of the Gulf EEZ east of 85°30’ W. longitude (Cape San Blas).
Longline Closure

From June through August each year, bottom longlining for Gulf reef fish is prohibited in the portion of the Gulf EEZ east of 85°30’W. longitude (Cape San Blas).

Madison Swanson, Steamboat Lumps, and the Edges

50 CFR: Wildlife and Fisheries - PART 622 FISHERIES OF THE CARIBBEAN, GULF OF MEXICO, AND SOUTH ATLANTIC §622.34 - Gulf EEZ seasonal and/or area closures.

(k) Closure provisions applicable to the Madison and Swanson sites, Steamboat Lumps, and the Edges.

(2) Within the Madison and Swanson sites and Steamboat Lumps, possession of Gulf reef fish is prohibited, except for such possession aboard a vessel in transit with fishing gear stowed as specified in paragraph (k)(4) of this section.

(3) Within the Madison and Swanson sites and Steamboat Lumps during November through April, and within the Edges during January through April, all fishing is prohibited, and possession of any fish species is prohibited, except for such possession aboard a vessel in transit with fishing gear stowed as specified in paragraph (k)(4) of this section. The provisions of this paragraph, (k)(3), do not apply to highly migratory species.

(4) For the purpose of paragraph (k) of this section, transit means non-stop progression through the area; fishing gear appropriately stowed means -

(i) A longline may be left on the drum if all gangions and hooks are disconnected and stowed below deck. Hooks cannot be baited. All buoys must be disconnected from the gear; however, buoys may remain on deck.

(ii) A trawl net may remain on deck, but trawl doors must be disconnected from the trawl gear and must be secured.

(iii) A gillnet must be left on the drum. Any additional gillnets not attached to the drum must be stowed below deck.

(iv) A rod and reel must be removed from the rod holder and stowed securely on or below deck. Terminal gear (i.e., hook, leader, sinker, flasher, or bait) must be disconnected and stowed separately from the rod and reel. Sinkers must be disconnected from the down rigger and stowed separately.

(5) Within the Madison and Swanson sites and Steamboat Lumps, during May through October, surface trolling is the only allowable fishing activity. For the purpose of this paragraph (k)(5), surface trolling is defined as fishing with lines trailing behind a vessel which is in constant motion at speeds in excess of four knots with a visible wake. Such trolling may not involve the use of down riggers, wire lines, planers, or similar devices.

(6) For the purpose of paragraph (k) of this section, fish means finfish, mollusks, crustaceans, and all other forms of marine animal and plant life other than marine mammals and birds. Highly migratory species means tuna species, marlin (Tetrapturus spp. and Makaira spp.), oceanic sharks, sailfishes (Istiophorus spp.), and swordfish (Xiphias gladius).
Madison Swanson and Steamboat Lumps

Madison-Swanson and Steamboat Lumps Marine Reserves closed year round to reef-fish fishing. Surface trolling for species other than reef fish allowed May 1 through October 31.
The Edges (40 fathom contour)
Madison-Swanson and Steamboat Lumps Reserves are closed to reef-fish fishing year round. Surface trolling for species other than reef fish is allowed May 1 through October 31.

Gulf of Mexico Federal Waters

The Gulf of Mexico Fishery Management Council manages fisheries in the federal waters of the Gulf of Mexico Exclusive Economic Zone. Federal waters begin where state waters end and extend to the 200-mile limit of the Gulf of Mexico.

Title 50: Wildlife and Fisheries

Part 600 - Magnuson-Stevens Act Provisions
Subpart B - Regional Fishery Management Councils

§ 600.105 Intercouncil boundaries.

(c) South Atlantic and Gulf of Mexico Councils. The Boundary coincides with the line of demarcation between the Atlantic Ocean and the Gulf of Mexico, which begins at the intersection of the outer boundary of the EEZ, as specified in the Magnuson-Stevens Act, and 83°00’W long., proceeds northward along that meridian to 24° 35’ N lat. (near the Dry Tortugas Islands), thence eastward along that parallel, through Rebecca Shoal and the Quicksand Shoal, to the Marquesas Keys, and then through the Florida Keys to the mainland at the eastern end of Florida Bay, the line so running that the narrow waters within the Dry Tortugas Islands, the Marquesas Keys and the Florida Keys, and between the Florida Keys and the mainland are within the Gulf of Mexico.

State Authority in Federal Waters

A state may regulate vessels that are registered in that state and fishing in federal waters for species for which there are no federal fishery management plans or applicable federal regulations, or for which the appropriate fishery management plan has delegated management of the state and the state rules are consistent with federal regulations.

NOTE: Federally permitted for-hire reef fish vessels must comply with the more restrictive of federal or state reef fish regulations when fishing for reef fish in state waters.

About the Gulf of Mexico Fishery Management Council

The Gulf of Mexico Fishery Management Council is one of eight regional Fishery Management Councils established by the Fishery Conservation and Management Act of 1976. The Council prepares fishery management plans, which are designed to manage fishery resources within the federal waters of the Gulf of Mexico.

The Council consists of 17 voting members: the Southeast Regional Administrator of the National Marine Fisheries Service (NMFS) Southeast Regional Office (or his designee), the directors of the five Gulf state marine resource management agencies (or their designees), and 11 members who are nominated by the state governors and appointed by the Secretary of Commerce. There are also four non-voting members representing the U.S. Coast Guard, U.S. Fish and Wildlife Service, Department of State, and the Gulf States Marine Fisheries Commission.

The Council meets five times a year at various locations around the Gulf coast. When reviewing potential rule changes, the Council draws upon the services of knowledgeable people from other state and federal agencies, universities, and the public to balance competing interests and achieve the greatest overall benefit to the nation.

Scoping workshops and public hearings are also held throughout the Gulf coast, and virtual meetings are available online. Testimony, oral or written, is considered by the Council before it takes final action on proposed rule changes. Public testimony is also heard during each Council meeting. Proposed rule changes are then submitted to National Marine Fisheries Service for further review and approval before implementation by the Secretary of Commerce.

</tbody>
</table>

* Subject to in-season closure.
Species that are part of the 20-reef fish aggregate bag limit include:

- Vermilion Snapper
- Lane Snapper
- Almaco Jack
- Gray Triggerfish
- Tilefish (Golden)
- Goldface Tilefish
- Blueline Tilefish

**NOTES:**

For-hire captains and crew are prohibited from retaining bag limits of any grouper, greater amberjack, or red snapper while under charter.

Federally permitted for-hire reef fish vessels must comply with the more restrictive of federal or state reef fish regulations when fishing for reef fish in state waters.
Shallow-water Grouper Closure (Map of the 20-fathom break)

Title 50 CFR: Wildlife and Fisheries - PART 622 FISHERIES OF THE CARIBBEAN, GULF OF MEXICO, AND SOUTH ATLANTIC
Subpart B – Reef Fish Resources of the Gulf of Mexico - §622.34 Seasonal and area closures designed to protect Gulf reef fish

(d) Seasonal closure of the recreational sector for shallow-water grouper (SWG). The recreational sector for SWG, in or from the Gulf EEZ, is closed each year from February 1 through March 31, in the portion of the Gulf EEZ seaward of rhumb lines connecting, in order, the points in the following table. During the closure, the bag and possession limit for SWG in or from the Gulf EEZ seaward of the following rhumb lines is zero.

See coordinates next page.

</tr>
<tr>
<td>For-Hire Captains and Crew</td>
<td>For-hire captains and crew are prohibited from retaining bag limits of any grouper, red snapper, or greater amberjack while under charter.</td>
</tr>
<tr>
<td>Federally Permitted For-Hire Reef Fish Vessels</td>
<td>Federally permitted for-hire reef fish vessels must comply with the more restrictive of federal or state reef fish regulations when fishing for reef fish in state waters.</td>
</tr>
<tr>
<td>Reef Fish as Bait</td>
<td>The use of federally managed reef fish as bait is prohibited.</td>
</tr>
<tr>
<td>Non-Stainless Steel Circle Hooks</td>
<td>Non-stainless steel circle hooks, along with dehooking devices, are required when angling for reef fish in federal waters.</td>
</tr>
<tr>
<td>Gear</td>
<td>Reef fish gear is limited to no more than 3 hooks in a special management zone off of Alabama. Nonconforming gear is restricted to bag limit. For reef fish without a bag limit, nonconforming gear is restricted to 5% by weight of all fish onboard.</td>
</tr>
<tr>
<td>Stressed Areas</td>
<td>Use of roller trawls and power heads is prohibited in designated stressed areas. Stressed areas for reef fish begin at the shoreward boundary of federal waters and generally follow the 10 fathom contour from the Dry Tortugas to Sanibel Island; the 20 fathom contour to Tarpon Springs; the 10 fathom contour to Cape San Blas; the 25 fathom contour to south of Mobile Bay; the 13 fathom contour to Ship Island, Mississippi; the 10 fathom contour off Louisiana; and the 30 fathom contour off Texas.</td>
</tr>
<tr>
<td>Sale of Recreationally Caught Reef Fish</td>
<td>Reef fish taken under the recreational bag limit may not be sold.</td>
</tr>
<tr>
<td>Care and Release of Incidental Catch of Smalltooth Sawfish and Sea Turtles</td>
<td>Operators of vessels with Gulf of Mexico reef fish commercial or charter vessel/headboat permits must comply with guidelines for proper care and release of incidentally caught smalltooth sawfish and sea turtles and must possess onboard specific gear to ensure proper release of such species.</td>
</tr>
</tbody>
</table>
### Highly Migratory Species

All HMS species, except blackfin tuna, require an HMS Angling Category permit from NOAA Fisheries. Permits are available by calling 888-872-8862, or by visiting www.nmfspermits.com. No sale permitted for HMS species caught under an angling permit. Additional recreational reporting requirements apply for swordfish, billfish, and Atlantic bluefin tuna. For complete HMS regulations contact NOAA Fisheries HMS Management Division at 301-713-2347, or visit www.nmfspermits.com.

For updates on tuna quota monitoring and tuna retention limit adjustments, anglers may call the Atlantic Tunas Information Line at 888-872-8862 or visit www.nmfspermits.com. For more information on tunas, contact the HMS Management Division at 978-281-9260. Recreational swordfish and billfish landings should be reported to 800-984-5528.

**Measurement Guidelines**

**Fork length:** the straight-line distance from the tip of the head (snout) to the rear center edge of the tail (caudal fin).

**Total length:** the straight-line distance from the tip of the snout to the tip of the tail (caudal fin), excluding any caudal filament, while the fish is lying on its side. The mouth of the fish may be closed and/or the tail may be squeezed together to give the greatest overall measurement.

**Curved fork length:** the tip of the jaw to form of tail measured along the contour of the middle of the body.

**Carcass length:** the curved measure from posterior edge of gill opening to anterior portion of caudal keel.

**Carapace length:** The carapace is measured beginning at the forward edge between the rostral horns, excluding and soft tissue, and proceeding along the middle to the rear edge of the carapace.
Marine Sanctuaries and Area Closures

Flower Garden Banks National Marine Sanctuary (See pages 17-19)

Below is a summary of regulated activity within the FGBNMS. For the full text, contact the Sanctuary office at 409-621-5151 or visit www.flowergarden.noaa.gov.

**Fishing and Related Activities**
The following activities are generally prohibited:

- Injuring, catching, harvesting, collecting or feeding, or attempting to injure, catch, harvest, collect or feed, any fish within the sanctuary by use of any gear, device, equipment or means (e.g. spear guns, nets) except by use of conventional hook and line gear.
- Possessing (except while passing through the sanctuary without interruption) any fishing gear, device, equipment, or means except conventional hook and line gear.
- Possessing or using explosives or releasing electrical charges within the sanctuary.

Conventional hook and line gear means any fishing apparatus operated aboard a vessel and composed of a single line terminated by a combination of sinkers and hooks or lures and spooled upon a reel that may be hand or electrically operated, hand-held or mounted.

**Anchoring and Mooring**
The following activities are prohibited:

- Anchoring any vessel within the Sanctuary.
- Mooring a vessel over 100 feet in registered length on a Sanctuary mooring buoy.

**Discharges**
Discharging or depositing any material or other matter within the Sanctuary is prohibited, with the following exceptions:

- Fish, fish parts, chumming materials or bait used in or resulting from fishing with conventional hook and line gear in the sanctuary.
- Clean effluent from an operable Type I or Type II marine sanitation devise (MSD).
- Clean water generated by routine vessel operations (e.g. engine exhaust, cooling water, deck wash down, and gray water), excluding oily wastes from bilge pumping.

**Injury to or Possession of Sanctuary Resources**
The following activities are generally prohibited:

- Injuring or removing, or attempting to injure or remove, any coral or other bottom formation, coralline algae or other plant, marine invertebrate (e.g., spiny lobster, queen conch, shell, sea urchin) brine-seep biota or carbonate rock.
- Possessing within the Sanctuary (regardless of where collected), any coral or other bottom formation, coralline algae or other plant, or fish (except for fish caught by use of conventional hook and line gear).
- Drilling into, dredging, or otherwise altering the seabed of the sanctuary; or constructing, placing, or abandoning any structure, material, or other matter on the seabed of the Sanctuary.

Madison Swanson, Steamboat Lumps, and the Edges (see pages 25-27)

50 CFR: Wildlife and Fisheries - PART 622 FISHERIES OF THE CARIBBEAN, GULF OF MEXICO, AND SOUTH ATLANTIC
§622.34 - Gulf EEZ seasonal and/or area closures.

(k) Closure provisions applicable to the Madison and Swanson sites, Steamboat Lumps, and the Edges.

(2) Within the Madison and Swanson sites and Steamboat Lumps, possession of Gulf reef fish is prohibited, except for such possession aboard a vessel in transit with fishing gear stowed as specified in paragraph (k)(4) of this section.

(3) Within the Madison and Swanson sites and Steamboat Lumps during November through April, and within the Edges during January through April, all fishing is prohibited, and possession of any fish species is prohibited, except for such possession aboard a vessel in transit with fishing gear stowed as specified in paragraph (k)(4) of this section. The provisions of this paragraph, (k)(3), do not apply to highly migratory species.

(4) For the purpose of paragraph (k) of this section, transit means non-stop progression through the area; fishing gear appropriately stowed means -

(i) A longline may be left on the drum if all gangions and hooks are disconnected and stowed below deck. Hooks cannot be baited. All buoys must be disconnected from the gear; however, buoys may remain on deck.

(ii) A trawl net may remain on deck, but trawl doors must be disconnected from the trawl gear and must be secured.

(iii) A gillnet must be left on the drum. Any additional gillnets not attached to the drum must be stowed below deck.

(iv) A rod and reel must be removed from the rod holder and stowed securely on or below deck. Terminal gear (i.e., hook, leader, sinker, flasher, or bait) must be disconnected and stowed separately from the rod and reel. Sinkers must be disconnected from the down rigger and stowed separately.

(5) Within the Madison and Swanson sites and Steamboat Lumps, during May through October, surface trolling is the only allowable fishing activity. For the purpose of this paragraph (k)(5), surface trolling is defined as fishing with lines trailing behind a vessel which is in constant motion at speeds in excess of four knots with a visible wake. Such trolling may not involve the use of down riggers, wire lines, planers, or similar devices.

(6) For the purpose of paragraph (k) of this section, fish means finfish, mollusks, crustaceans, and all other forms of marine animal and plant life other than marine mammals and birds. Highly migratory species means tuna species, marlin (Tetrapturus spp. and Makaira spp.), oceanic sharks, sailfishes (Istiophorus spp.), and swordfish (Xiphias gladius).
Madison Swanson and Steamboat Lumps

Madison-Swanson and Steamboat Lumps Marine Reserves closed year round to reef-fish fishing. Surface trolling for species other than reef fish allowed May 1 through October 31.
The Edges (40 fathom contour)
Madison-Swanson and Steamboat Lumps Reserves are closed to reef-fish fishing year round. Surface trolling for species other than reef fish is allowed May 1 through October 31.

Gulf of Mexico Federal Waters

The Gulf of Mexico Fishery Management Council manages fisheries in the federal waters of the Gulf of Mexico Exclusive Economic Zone. Federal waters begin where state waters end and extend to the 200-mile limit of the Gulf of Mexico.

Title 50: Wildlife and Fisheries

Part 600 - Magnuson-Stevens Act Provisions
Subpart B - Regional Fishery Management Councils

§ 600.105 Intercouncil boundaries.

(c) South Atlantic and Gulf of Mexico Councils. The Boundary coincides with the line of demarcation between the Atlantic Ocean and the Gulf of Mexico, which begins at the intersection of the outer boundary of the EEZ, as specified in the Magnuson-Stevens Act, and 83°00'W long., proceeds northward along that meridian to 24°35'N lat., (near the Dry Tortugas Islands), thence eastward along that parallel, through Rebecca Shoal and the Quicksand Shoal, to the Marquesas Keys, and then through the Florida Keys to the mainland at the eastern end of Florida Bay, the line so running that the narrow waters within the Dry Tortugas Islands, the Marquesas Keys and the Florida Keys, and between the Florida Keys and the mainland are within the Gulf of Mexico.

State Authority in Federal Waters

A state may regulate vessels that are registered in that state and fishing in federal waters for species for which there are no federal fishery management plans or applicable federal regulations, or for which the appropriate fishery management plan has delegated management of the state and the state rules are consistent with federal regulations.

NOTE: Federally permitted for-hire reef fish vessels must comply with the more restrictive of federal or state reef fish regulations when fishing for reef fish in state waters.

Regulation Changes and Updates

Supplemental “update sheets” will be published periodically to reflect changes in fishing regulations implemented since this pamphlet was published. For up-to-date regulations visit www.gulfcouncil.org or download our free regulations app. Just visit the Android Market or iTunes and search for “Gulf Council”.
